EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, six quarters of samples taken have resulted in annual average violations for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the six quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels have exceeded the MCL. One sampling site was in violation following the May 2015 sampling cycle and results from August 2015 sampling indicate all sites are now within compliance.

A number of issues were identified as possibly contributing to the initial high THM levels measured.

1. Inefficient ozone system functionality which led to in increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
   a. Broken valves causing less than ideal flow patterns
   b. Inefficient pump station pressure zones
   c. Water storage volumes in excess of that needed for today's demands
   d. Oversized water mains
   e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors.

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor that can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to have been a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to 2015 sampling periods. Monthly operating report data up to August 1, 2015 is depicted on the Table.

TABLE 1 – SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING

	FACTOR	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
2014	Softening bypass steam over 20% of plant flow												
	Ozone system not feeding optimally												
	Using full water storage capacity of WSR & CSR												
	Chlorine feed at WTP 7.0 mg/l or more												
	Ferric chloride feed rate less than 10 mg/l Fe3+												
	Raw water temp 23 degrees C or more												
	Raw water TOC levels above 8.0 mg/l												
	Raw water coliform over 5000 counts/day												
	Positive bacteria test in dist. system (boil water notice)												
	Water demand less than 15 mgd												
2015	Softening bypass steam over 20% of plant flow												
	Ozone system not feeding optimally												
	Using full water storage capacity of WSR & CSR												
	Chlorine feed at WTP 7.0 mg/l or more												
	Ferric chloride feed rate less than 10 mg/l Fe3+												
	Raw water temp 23 degrees C or more												
	Raw water TOC levels above 8.0 mg/l												
	Raw water coliform over 5000 counts/day												
	Positive bacteria test in dist. system (boil water notice)												
	Water demand less than 15 mgd

ACTION PLAN

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

Stage 1 – Immediate Actions

- Hire third party water quality expert to complete independent 'water audit'
  - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia were provided in a report and technical memo dated 3/12/15 and 3/30/15 respectively.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
  - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
  - Manufacturer and controls programmers performed on site evaluations followed by corrective modifications in January 2015.
- Bench scale jar testing
  - Match existing process and assess possible areas of improvement
    - Existing process was simulated and an evaluation of existing chemical feed dosages was completed by LAN.
    - Existing process TOC profile was developed by Veolia.
  - Simulate potential modifications to treatment process
    - Soda ash softening evaluation completed and PAC feed testing was completed by LAN.
  - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
    - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
  - Discontinue softening bypass stream to reduce chlorine demand
    - Operational directive has been set to soften no less than 80% of flow.
  - Disinfection of filter beds to reduce chlorine demand
    - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
  - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
    - Jar testing completed to date has not indicated a meaningful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
  - Flushing efforts are ongoing as needed based on chlorine residual levels measured in the system.
- Water system modeling to identify areas with high water age and potential solutions
  - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are underway with expected completion in mid June, 2015.
  - Cedar Street Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - West Side Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - Storage tank volume use
    - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age. Possible elimination of WS or CS to be evaluated Sept-Oct, 2015.
  - Possible broken closed valve locations
    - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
  - Locations in need of flushing
    - High water age areas have been identified in the water model. Further evaluation is expected to be done by November 1, 2015 to determine most effective flushing points.

Stage 2 – Contingent Actions

- Replace filter media with granular activated carbon (GAC) media
  - Filter anthracite media was replaced with GAC media July – August 2015.
- Fix ozone system
  - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1st quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
  - Polymers evaluated by LAN did not demonstrate notable benefit.
  - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Change disinfectant to chloramine or chlorine dioxide until KWA
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Install pre-oxidant feed (permanganate) at intake to optimize ozone disinfection
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Implement advanced treatment for THM precursor removal
  - Option deemed unnecessary due to effectiveness of new GAC media.

- Increased main flushing based on water modeling results
  - Water model analysis to be completed Sept-Oct, 2015.
- Continue valve replacements with water model assistance
  - Water model analysis to be completed Sept-Oct, 2015.
- Emphasize cast iron pipes on water main replacement priority list
  - Flint has bid replacement of over 2 miles of 24" steel pipe along Dupont and Bishop Streets to be completed when and if the City can allocate funds. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete.

THM samples have been taken and tested 6 times for regulatory reporting since the City began using the Flint River for supply. Numerous additional sets of samples have been taken by the City for internal operational monitoring. Compliance samples were taken in May 2014, August 2014, November 2014, January 2015, February 2015, May 2015, and August 2015. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l.

I. BACKGROUND

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

A. WATER SUPPLY TRANSITION

1. Detroit Water and Sewer Department (DWSD)

Prior to spring of 2014, the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

2. Karegnondi Water Authority (KWA)

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

3. Flint River – Interim Period

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

B. TTHM VIOLATIONS

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

(2 x current quarter value + previous 2 quarter values) / 4 = Operational Evaluation Value

Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The August 2014 average across all test sites was 142.1 ug/l and the August 2015 average is 63.6 ug/l. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, new oxygen / nitrogen storage facilities for the ozone system, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New coagulant feed system
- Electrical
  - Pump Station #4 upgrades (under construction)
  - SCADA and controls upgrades
  - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

II. SOURCE WATER EVALUATION

A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS

Period	Turbidity NTU	TOC Mg/l	Alk. Mg/l	Hardness Mg/l as CaCO3	pH	Total Col. Count/day	THMFP Mg/l
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that near the time Flint initiated withdrawal from the Flint River investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report was used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

III. TREATMENT PROCESS EVALUATION

A. EXISTING PROCESS DESCRIPTION

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

1. Intake

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

2. Ozone

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

3. Rapid Mix

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

4. Coagulation / Flocculation

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

5. Settling

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed but are due for cleaning.

6. Softening

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, malfunctioning polymer feed pumps, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

7. Recarbonation

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

8. Filtration

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Sand and anthracite media was replaced in July and August 2015 with new sand and GAC at depths of 12" and 18" respectively. Prior to spring of 2014, the filters had been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand which could have contributed elevated TTHM. Late 2014, the City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

9. Disinfection

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

10. Clear Well & Pumping

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

B. JAR TESTS / EXPERIMENTS

1. Approach

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water by late 2016 and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBPFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "G" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

3. Considerations

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) could be investigated as additional treatment measures.

4. LAN Test Results

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015. Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

5. Testing by Others

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16th to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

6. Conclusions

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exeedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

A. INFRASTRUCTURE

1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Based on discussions with City staff, the percentage of cast iron pipe may be higher than that stated in the MDEQ Sanitary Survey. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation without extensive research and long term study.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS

Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11′	15′	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11′	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12′	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour

duration which results in a total volume of 600,000 gallons. These go-by approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

Common Practice	Flow Rate	Recommended Volume by ROT	Volume In Use
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

3. Pump Stations

All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

B. OPERATIONS AND MAINTENANCE

1. Pump Station & Storage Operations

Pump stations and storage tank levels are controlled as shown in Table 9.

TABLE 9 – PUMP STATION CONTROLS

PS Name	Control Point	On Point	Off Point
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5′	33′
Cedar Street	System pressure (elevated tank)	22.5′	33′
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Prior to the first TTHM violation, Cedar Street and Westside pump stations were operated as needed and were alternated. Typically, Cedar Street was run in the morning and Westside was run in the evening and reservoirs for each were filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

2. Booster Disinfection Practices

Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lowest for February sampling quarters than all others.

C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, updated pump curves, checked pipe diameters, updated system demands, and developed preliminary water age results throughout the entire system. Water age shown in the revised model corresponds for the most part to TTHM levels at the sampling sites. However, LAN has also identified several issues affecting the model that require further attention to allow for usable and reliable results. Those issues include accurate quantification of lost water and confirmation of the status of valves throughout the system. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL

Sample Point	Location	Address	Water Age (Hrs)	May/15 LRAA THM (ug/l)
1	McDonalds	3719 Davison	25	68
2	BP Gas Station	822 S. Dort Hwy	18	54
3	Liquor Palace	3302 S. Dort Hwy	14	60
4	Taco Bell	3606 Corunna	340	72
5	Univ. Market	2501 Flushing	305	94
6	Salem Housing	3216 MLK	45	66
7	Rite Aid	5018 Clio	41	69
8	N. Flint Auto	6204 N. Saginaw	37	55

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in Sept-Oct, 2015.

1. Simulation of Existing System

Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – July 2015.

2. Identification of Water System Deficiencies

Specific issues to look at:

- *Water age in entire system*
- *Possible recirculating water through pump stations*
- *Use of storage tanks – volumes in particular*
- *Indications of broken valves*
- *Effectiveness of booster disinfection*

V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES

A. SOURCE

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least $16,000,000/year or $1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

1. Watershed Management
A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

2. Monitoring
The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). WTP staff have obtained and installed TOC and THM analyzers. The THM analyzer is set up as an on-line plant tap monitor and operations personnel have begun taking samples most days to track TOC levels throughout the treatment process. It is recommended to implement TOC tracking as a strict daily procedure which would provide staff the data needed to establish correlations to predict distribution system THM formation.

3. Intake Operations
The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16th, 2014 and recommended implementation at a dosage of 0.5 mg/l – 1.2 mg/l to achieve 10% additional TOC removal.

4. Seasonal Strategies
Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

5. Upstream Contamination Issues

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings in the past have signaled potential issues that the City was able to identify and remove.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

B. TREATMENT PROCESS

1. Operational Recommendations

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP but jar testing by LAN and PVS Technologies did not indicate clearly defined benefits. Addition of coagulation and flocculation polymer aids should be categorized as a future consideration that would require further evaluation.
- Discontinue softening bypass: In early summer of 2014 the City was bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Soften with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. Veolia did not recommend this option after conducting jar tests.
- Disinfection of filter beds: Recommendation is no longer applicable since media has been replaced.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. However, Veolia provided no recommendation to change polymers following their evaluation.

2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it had not been used extensively on a full time basis. Following minor complications, the City hired the equipment manufacturer and a programmer to troubleshoot the system. Replacement of faulty gauges and redesign of the control program have allowed the system to operate properly since January 2015.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the intermediate chlorine feed location should be relocated to a point downstream of the filters. The City elected to pursue this option and 6 filters were completed in July 2015 and the remaining 6 were completed in August 2015. Provisions are also being considered for adding more GAC media and/or regeneration of media next summer.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered in early summer 2014 and has been repaired by the City.

C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

1. Manage Water Age

a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-37 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1
- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Adjusted system wide storage volume would be 35 MG

Option 2
- Take Cedar Street reservoir and pump station out of service
- Adjusted system wide storage volume would be 37 MG

b) Residence Time in Pipes

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

2. Reduce Disinfectant Demand

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand. Cleaning of all tanks is recommended as well as investigation into stagnant water prevention options.

3. Water Modeling of Recommendations [yet to be completed]

Determine best flushing locations to reduce water age
Evaluate changes in storage tank operations to reduce water age
Valves to close/add to improve pressure zones, reduce recirculation
Optimization of pump station use – smaller pumps? Shut down?
Evaluate booster disinfection

D. BOOSTER DISINFECTION

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN

	Action	Purpose	Status
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed	Complete
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality	Complete
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal	Complete
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications	Complete
	Discontinue softening bypass	Reduce chlorine demand	Complete
	Disinfect filters	Reduce chlorine demand	Complete
	Increased water main flushing	Reduce water age / stagnant water	Ongoing
	Water system modeling evaluation	Determine areas with high water age and reasons	Partially complete
	Modify booster disinfection feeds, if appropriate	Decrease water age	Not yet evaluated
Stage 2	Repair ozone system	Reduce chlorine feed and increase TOC removal	Complete
	Continue increased water main flushing	Reduce water age / stagnant water	Ongoing
	Replace filter media with GAC	Reduce TOC and chlorine demand	Complete
	Continue valve replacements based on water model	Reduce water age / stagnant water	Ongoing
	Convert to lime and soda ash softening	Increase TOC removal	Future consideration
	Change disinfectant to chlorine dioxide	Reduce THMFP	Future consideration
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine	Future consideration
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal	Future consideration
	Place priority on replacing cast iron water mains	Reduce chlorine demand	Ongoing

Samples were taken August 18th, 2015 for the latest round of quarterly testing. The City has implemented many of the Stage 1 actions and installed GAC media in the filters and THM test results have significantly improved (decreased) since May and August 2014. All sampling results are shown on Chart 1.

2 COMMUNITY PROFILE

MASTER PLAN FOR A SUSTAINABLE FLINT

COMMUNITY PROFILE

Incorporated in 1836, the City of Flint, as of the 2010 census, is the seventh largest City in Michigan, with a population of 102,434 and an estimated population of 100,515 in 2012. As the seat of Genesee County in mid-Michigan, Flint is located roughly 50 miles from Lansing and 70 miles from downtown Detroit. Three interstates, I-69, I-75, and I-475, intersect in Flint, placing Flint at a major crossroads in the State of Michigan and directly linking the City to an international border with America's largest trading partner, Canada. These important roadways combine with two major rail corridors and the Bishop International Airport to make Flint an important regional transportation hub.

The City is also bisected by the Flint River, a tributary of the Saginaw River, which eventually flows into the Saginaw Bay of Lake Huron. Despite a significant downturn in auto-industry employment, Flint remains an established manufacturing center in Michigan alongside the "Tri-Cities" of Saginaw, Bay City, and Midland. Today, Flint is the largest employment hub in the Genesee County region and is home to four colleges and universities including Kettering University, the University of Michigan-Flint, Mott Community College, and Baker College. Flint is also at the center of a growing health sector anchored by Hurley Medical Center, McLaren Regional Medical Center, Genesys Regional Medical Center and Diplomat Pharmacy.

COMMUNITY HISTORY

The Canadian fur trader Jacob Smith founded Flint in 1819. Attracted to the shallowest crossing point in the Flint River, Smith built a trading post at this "grand traverse," which is now present-day Water Street. Smith's trading post capitalized on a key passageway between Detroit and other parts of the state.

Native American Heritage

Smith was not Flint's first resident, however. For generations, Native Americans such as the Sauks, Ottawas, and Chippewas occupied areas in and around present-day Flint. At the time of Smith's arrival, there was a Chippewa village northwest of Flint near Montrose. There was also a gathering place in Flint called "Muscatawingh," meaning "open plain burnt over."

A great council in Saginaw, between the Chippewa and the territorial governor, General Lewis Cass, led to the sale of six million acres, including present-day Flint, to the U.S. government and settlers in 1819. Over the next few decades, pioneers from the east, aided by the completion of the Erie Canal and the promise of ample land, moved to the "Flint River Settlement" to farm, hunt, and trade.

The area continued to experience growth, and by 1855 was home to around 2,000 residents. That same year, the settlement was formally incorporated by the State of Michigan and officially named Flint, likely after the Native American name for the Flint River which translated into "river of flints." Shortly after its incorporation, residents elected the City's first mayor and council, and established a fire and police department.

Lumbering

In addition to its strategic position in the fur-trade, Flint's expansive and dense forests made it an attractive location for lumbering. Sawmills quickly sprouted up as Flint became a lumbering boom town. Henry Crapo's sawmill, for example, employed sixty people and cut twelve million feet of lumber, annually. By 1870, Flint was home to more than 5,000 residents, 100 stores, 18 lumber dealers, and 11 sawmills. Lumbering created a cadre of expert carpenters in home construction, cabinet making, and other key wood industries which stimulated economic growth for the City.

Since Flint's lumbering was a local enterprise, profits for the most part remained in the community and were available for reinvestment and development in other technologies, including carriage making.

Carriage Manufacturing

In 1869, the first of Flint's "Big Three" carriage companies was founded by the Patterson brothers, William and A.B. By 1901, the Pattersons employed 350 people and built 23,000 vehicles annually. The second, Flint Wagon Works, transitioned directly from lumbering operations to large scale carriage construction. Most famously, William Crapo Durant ("Billy") and J. Dallas Dort founded the third in 1886 in what would become the Durant-Dort Carriage Company, a global leader in carriage production and the foundation for General Motors.

Flint's entrepreneurs recognized a pent-up nationwide consumer demand for a new mode of transportation – farmers required wagons to move and sell their crops, businesses needed vehicles to transport wares, and families sought travel into and around town. With the availability of lumber dwindling, the local economy reinvented itself through carriage manufacturing.

At the dawn of the twentieth century, 13,103 residents called Flint home, and its companies manufactured more than 150,000 wagons annually.

Rise of the Auto Industry

The carriage business created an entrepreneurial scene in Flint akin to Silicon Valley and planted the seeds for Flint's transition to the "horseless carriage," or automobile industry. In 1900, the first automobile built in Flint, Charles Wisner's "buzz wagon," debuted before 10,000 spectators at the Flint Labor Day parade. Just two years later, A.B.C. Hardy manufactured the City's first fleet of autos, producing the $750 to $850 Flint Roadster. However, it was not until 1903, when the Flint Wagon Works bought the Buick Motor Company, that the Flint Journal declared that "a splendid new manufacturing industry is now assured for Flint." Billy Durant was brought onboard at Buick in 1904 and quickly persuaded Charles Stewart Mott's axle company to relocate from New York to Flint. In 1908, Durant founded General Motors (GM) and purchased Buick and Oldsmobile. Within the next several years, Durant purchased dozens more companies such as Chevrolet, Cadillac, Oakland (precursor to Pontiac), and AC Spark Plug and reorganized them under the GM umbrella. Flint made its last carriage in 1917 and by 1927 Buick was producing 240,000 cars annually.

Population Boom

Flint's population, wealth, and diversity rose steadily with the burgeoning automobile industry. In 1900, Flint's population was only 13,000, but by 1910, it skyrocketed to 38,500; 91,600 in 1920; and a remarkable 156,500 in 1930. Immigrants and southern blacks were larger drivers of these numbers, flocking to Flint to work in its factories. The list of Flint congregations from the time period illustrates the City's diversity.

The City also saw a building boom in the 1920s, with rapid construction of some of Flint's most famous structures: Central High School, Durant Hotel, Capitol Theatre, the Civic Park neighborhood, and the Mott Foundation Building.

Labor Rights

The course of American history was forever changed when striking auto workers in Flint redefined the relationship between workers and management. Starting in December 1936, thousands of General Motors factory employees enacted a "sit-down strike," refusing to work until employee demands were met by management. In February 1937, the strike ended when GM recognized the United Auto Workers (UAW) and gave workers a raise. This "strike heard around the world" gave birth to America's middle class by ensuring living wages and a safe working environment for factory workers around the country.

WWII & The Golden Era

When World War II broke out a few years later, Flint was uniquely situated to aid the war effort given its extensive manufacturing infrastructure. All of GM's factories converted to producing war machinery, making airplane parts, tanks, machine guns, and the Hellcat (a 19-ton tank destroyer). The City's involvement in the war effort extended beyond manufacturing. Nearly 28,000 men and women from Genesee County served in the war, of which nearly three thousand were killed or wounded.

Following the war, the 1950s marked the "golden era" for Flint. The City's civic leaders constructed the University of Michigan-Flint, new libraries, a planetarium, and the College Cultural Center. General Motors produced its 50 millionth car in 1954 and employed more than 80,000 while Buick recorded record sales.

The City added more than 33,000 new residents in this decade and its per-capita income rose to one of the highest in the nation.

Segregation & Race Relations

As the City's population grew, Flint also faced complicated race relations. Between 1940 and 1955, Flint's African American population tripled, due to southern migration to the City's factories. However, restrictive covenants, mortgage redlining, and social norms limited where African Americans could live and work. Flint may not have had the violent racial animosity of the Deep South, but a survey published in 1951 ranked Flint the third most segregated city in the country and the Ku Klux Klan paraded through the downtown.

While Flint residents mostly maintained economic security in the 1960s, the decade brought shifts in the City's politics, population, and economic base. In 1966, Floyd McCree became the first black mayor and one year later, progressive Flint voters passed the nation's first open housing ordinance. However, it did not lead to integrated neighborhoods, as intended. Instead, whites with new economic mobility began moving in droves out to suburbs such as Davison, Flushing, and Grand Blanc.

This flight was compounded by ongoing structural changes at GM that hurt the local workforce. New technology allowed GM to automate many jobs previously held by residents, while profit motives relocated many northern factories to lower-wage, non-union, southern states. By the 1980 census, the City had lost more than 35,000 residents from its peak of 196,940 in 1960.

Flint's urban renewal plans also complicated race relations. The City's 1960 Master Plan called for the demolition of the St. John's neighborhood, a predominantly poor and blighted African American neighborhood, to make way for I-475 and industrial expansion of Buick City. In 1972, demolition began with the promise of relocating residents to better, safer, and integrated housing. Unfortunately, that did not materialize. The neighborhood was razed, and black residents were relocated along racial lines.

Economic Decline

Factory closures, suburbanization, and sprawl combined with federal disinvestment created a perfect storm of blight, poverty, and high crime in Flint, during the final decades of the twentieth century. Historically a "one company town" with little economic diversity, Flint's challenges were significantly greater than most other post-industrial cities. Efforts to stem the tide with capital projects such as Auto World, Buick City, the I-475 highway expansion, a new down-town hotel, and a riverfront shopping mall, failed to materialize into any meaningful economic gain for the City. While area non-profit organizations, foundations, and everyday citizens came together at unprecedented levels, the economic storm was difficult for many to weather.

Flint in the 21st Century

The early twenty-first century has also not been easy. Two recessions, lower property tax revenues, and a decline in State revenue sharing, translated into an unprecedented shrinkage of City services. To help the City through this tough period, the State appointed an Emergency Manager in 2011 with special powers that supersede those of the City Council and Mayor. At the same time, Flint is seeing revitalization in the downtown, pockets of neighborhood investment, and expansion of its institutional corridors, including economic growth in the education and medical sectors.

DEMOGRAPHIC & MARKET OVERVIEW

An analysis of the City's demographic and market trends provides a firm understanding of existing conditions within the Flint community and informs land use and development decision-making. The analysis begins with a demographic overview of recent trends in population, households, income, age, racial and ethnic composition, and labor force and employment. This is followed by an assessment of Flint's position within the residential and commercial markets.

Data Sources

Numerous demographic and economic studies have been conducted within Flint and Genesee County in recent years. Where appropriate, data and observations provided by those various reports, has been incorporated into this market analysis. Some of the data referenced in those reports, has also been updated to provide the most accurate representation of Flint's position when the Existing Conditions Report was drafted in Fall 2012.

At the time of analysis, data from the 2010 US Census as well as the 2011 American Community Survey represented the most accurate snapshot of Flint's population. These data sources were contrasted with data from the 2000 Census to document demographic shifts and market trends within the community. Additional market data regarding housing, income and retail demand were also obtained from other U.S. Census Bureau sources and ESRI Business Analyst, a nationally recognized provider of market and demographic data.

Summary

Key points of the demographic and market analysis are listed below, including an examination of the City of Flint independently as well as in comparison to the larger Genesee County area:

- The Average household income in Flint is two-thirds lower than that of the County
- At $33,029, average household incomes in Flint are $20,000 lower than that of the County ($53,415), and more than $35,000 lower than the national average of $69,821
- The Flint African American population represents one quarter of the County population, but two-thirds of the County's total black population. African Americans make up 56% of Flint's population
- Nearly half of Flint residents are renters
- The City's population rapidly declined from 193,317 in 1970 to 102,434 in 2010, while the County's total population stayed relatively stable
- The City is continuing to lose population, albeit at a slower rate than in the past
- The population is getting older, with an increase of 35% in the 55 to 64 year old age cohort
- Economic development opportunities are enhanced by a growing student population and business activities
- The City lost nearly 23,000 jobs between 2002 and 2010; however, the City is still responsible for one-third of total employment within the County
- The City is projected to experience modest job growth through 2018
- At 25.6%, the 2011 Flint unemployment rate is 56% higher than that of the County (16.4%)
- There are some data indicating potential for additional retail development in multiple locations
- Some neighborhoods are underserved by grocery stores

Demographic Overview

Since Flint's previous master plan in 1960, the City's population declined by 48%. This significant decrease in population translates into a loss of $1,777 in City revenue per resident and a total loss of $9.4 million between 2006 and 2011. Additionally, the City still maintains the same amount of infrastructure that previously served a population double the size. It has struggled with preserving population density and a high-quality of life. With future projections showing a continued decline of 20,000 people over the next decade, the Master Plan outlines innovative methods to retain population and work towards stabilizing the residential population, strengthening vital City services, and promoting more sustainable, safer neighborhoods.

Demographic Summary – City of Flint – 2000 & 2010

	2000	2010	Total Change 2000 to 2010
Population	124,943	102,434	-22,509 (-18.0%)
Households	48,744	40,472	-8,272 (-17.0%)
Median Age	30.9	33.7	2.8 (9.1%)
Average Household Size	2.51	2.45	-0.1 (-2.4%)
Median Household Income	$28,121	$22,672	-$5,449 (-19.4%)
Average Household Income	$39,621	$30,826	-$8,795 (-22.2%)

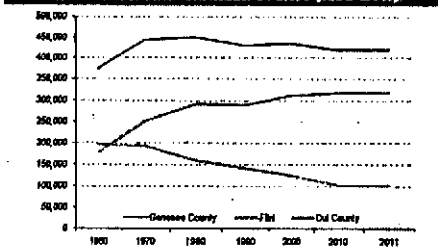
CITY OF FLINT AND GENESEE COUNTY (1960-2011)



Source: US Census, American Community Survey

Population Change

The Population Change graph compares changes in population and number of households within the City of Flint between 2000, 2010, and 2011. Population is defined as the overall number of people within a specified geography. A household is defined as the group of individuals who live in the same dwelling unit. Household by age is based on the age of the individual considered head of household. Overall, the number of households and total population have decreased within Flint, while the typical household has grown older and decreased in size.

Flint continues to get smaller. The City of Flint experienced a decline of 22,509 individuals (-18%) between 2000 and 2010. The trend of decline continued between 2010 and 2011, with a decrease of 866 individuals (-0.8%).

Flint is growing older, but remains younger than average. The City's median age surpassed 34 years in 2011, representing an increase of more than 3 years (10%) since 2000. This means that half of the people living in Flint are over the age of 34. This is still younger than the median age of Michigan and the Nation, which are 39.2 and 37.3 respectively.

Flint households are earning more. After declining by 19% between 2000 and 2010, it is estimated that median household incomes rose by $1,158 (5.1%) in 2011, indicating that Flint may be rebounding from the recession. While this may be a positive sign, Flint families are still earning significantly less than they were in the past.

Population Projections

While Flint's population has declined by half since 1960, the population of Genesee County has remained relatively stable, suggesting a population transfer to the suburbs. Between 2000 and 2011, the City lost more than 23,000 people, but the total County population declined by only 14,000. As such, population loss within the City of Flint accounted for approximately 166% of total population loss within the County and the proportion of Flint residents within Genesee County decreased by 16% over the same time period.

Population loss will continue into the near future. Genesee County is projected to lose population through the year 2020, decreasing by more than 12,000 between 2010 and 2020. Assuming a similar ratio of population loss within the City and population gain within other areas of the county, it is projected that the City will lose approximately 20,000 individuals between 2010 and 2020. Conversely, those areas of Genesee County outside of Flint, will grow by a projected 8,000 over the same period.

Population Change
CITY OF FLINT & GENESEE COUNTY - 2000-2010

	Population		Change

Population Change within the City

Population Density

Flint's population is not as dense as other communities. As shown in the following table, Flint's population density is lower than that of other peer-cities in Michigan, and significantly lower than its peak density in 1960 (5782 people per square mile). Flint, Ann Arbor, Grand Rapids and Lansing are the largest cities outside of the Detroit Metro area, each with a 2010 population of 100,000 or more. Flint is the least dense of these four cities. Between 2000 and 2010, population density of Flint dropped from more than 3,700 people per square mile to less than 3,100 people per square mile, representing a decrease of 17.5%. This is slightly less than the total loss in population of 18% that the City experienced over the same period.

Population Distribution

Population change varies by neighborhood. As highlighted by Census tracts shown in shades of orange, between 2000 and 2010, population loss within Flint was concentrated within areas north of the Flint River. These areas primarily consist of single family residential neighborhoods with limited commercial or employment-related uses.

Population Density
FLINT AND PEER COMMUNITIES (2000 & 2010)

			Total Change	
Population	2000	2010	Number	Percent
City of Flint	124,943	102,434	22,509	-18.0%
City of Ann Arbor	114,024	113,934	90	-0.1%
City of Grand Rapids	197,800	188,040	9,760	-4.9%
City of Lansing	114,321	109,563	4,758	-4.2%
Population Density (per sq. mi.)	2000	2010	Number	Percent
City of Flint	3,714.9	3,065.1	649.5	-17.5%
City of Ann Arbor	4,221.1	4,094.0	127.1	-3.0%
City of Grand Rapids	4,431.2	4,235.6	195.6	-4.4%
City of Lansing	3,366.7	3,303.2	63.5	-1.9%
Land Area (sq. mi.)	2000	2010	Number	Percent

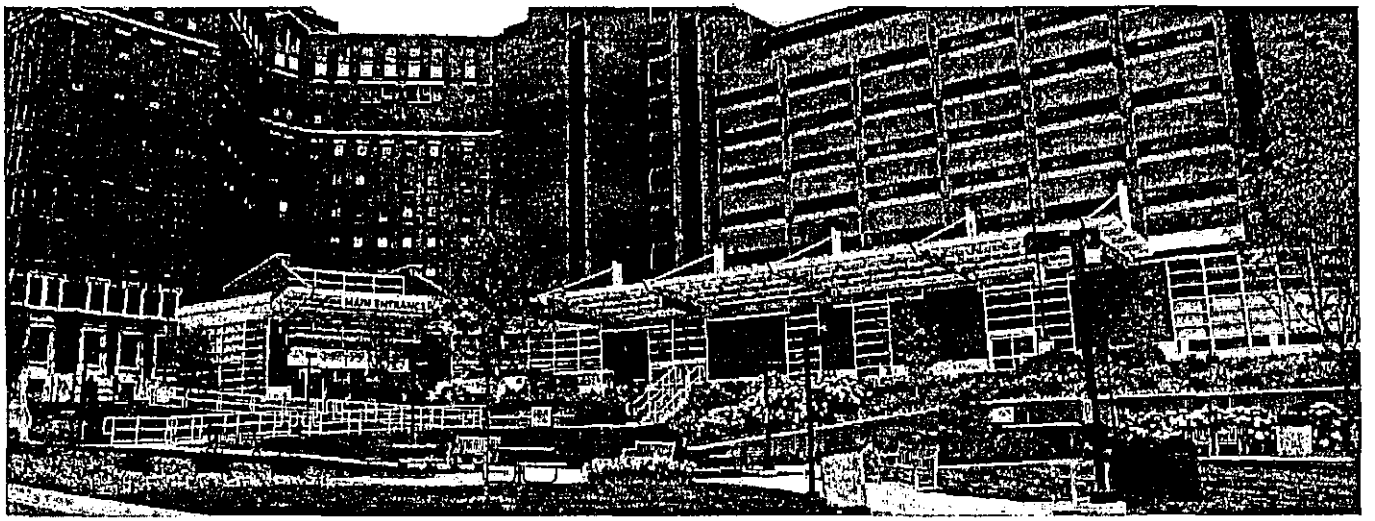
City of Ann Arbor	27.0	27.8	-0.8	3.0%
City of Grand Rapids	44.6	44.4	0.1	-0.5%
City of Lansing	34.0	33.2	0.8	-2.3%

Source: US Census, American Community Survey



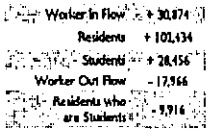
Daytime Population

Flint is a regional employment hub, not a bedroom community. Unlike many communities in the region, Flint's daytime population is larger than its resident population. While there is no doubt that the City of Flint has lost numerous businesses over the last several decades, Flint remains a large employer within mid-Michigan and serves as a regional hub for employment and education. The number of people commuting to Flint for work is nearly double the number of Flint residents leaving the community for work on a daily basis. Nearly 30,000 students are also enrolled at Flint's four major college and universities (Baker College, Mott Community College, Kettering University, and University of Michigan-Flint).

Flint's retail demand goes beyond demand from residents. When non-resident employees and students are combined with residents living and working in Flint, the City's daytime population is conservatively estimated at nearly 134,000. This population has a significant influence on demand for retail goods and services *throughout the community.* More in-depth discussion of the impact of the daytime population can be found in *Chapter 9: Economic Development and Education.*

Flint's institutions generate significant demand. Mott Community College, University of Michigan-Flint, Hurley Medical Center, McLaren Regional Medical Center and Genesys employ a combined 8,500 people. These institutions contribute significantly to the City's daytime population and may represent an underutilized source of potential demand for goods and services.

Daytime Population
CITY OF FLINT (2010)



Total Daytime Population 133,882

Source: US Census (2010), OnTheMap Application, Genesee Regional Chamber of Commerce

Race & Ethnicity

The following charts illustrate the estimated 2000 and 2011 racial and ethnic composition of the City of Flint (as defined by the US Census).

Flint remains a predominantly Black community. In 2011, it is estimated that 55.2% of the City's population is considered Black. While the Black population of Flint decreased by 10,542 between 2000 and 2011, this group has maintained a steady proportion of Flint's total population.

Flint's White Alone population has maintained a steady portion of the community. Between 2000 and 2011, Flint's White population decreased by 21.8%, making up 39.8% of the City's 2011 population. As with the Black population, despite decreases in population, Flint's White population has maintained a steady proportion of the *City's total population.*

Flint's non-Black and non-White racial groups are small, according to the US Census. There were an estimated 1,071 American Indian and Alaska Native individuals in Flint in 2011, making up 1.1% of the population. No other racial group made up more than 1% of Flint's 2011 population.

Flint's Hispanic population is growing. The most significant increase among any racial or ethnic group is projected to occur in the Hispanic population, which had an estimated 4,034 individuals in 2011. Flint's Hispanic and Latino population grew by 29.1% over 11 years to make up 4.8% of the City's 2011 population.

Age Profile

The following chart compares 2011 population estimates by age group for the City of Flint, State of Michigan, and the United States. The City of Flint has a proportionately smaller number of youth and young adults, while its middle-aged and senior populations are proportionately larger.

Flint has a smaller youth population than the national average. Residents under the age of 20 made up 27% of Flint's 2011 population. This is on par with the State of Michigan (26%), but lower than the national rate of 30%.

Flint has a typically-sized young adult population. In 2011, the proportion of Flint residents aged 20 to 34 was 20.4%, compared to 18.9% in the State of Michigan and 21.2% in the United States.

Flint has a larger middle-aged population than the national average. Residents aged 35 to 54 made up 27.4% of Flint's 2011 population. This is on par with the State of Michigan (27.6%) as a whole, but 2% larger than that of the United States (25.2%)

Flint has a larger senior population than the national average. In 2011, 25.4% of Flint residents were aged 55 or over. By comparison, this age group made up 27.3% of the Michigan population and 23.8% of the nation.

Population Change by Age

Flint is growing older, faster. The following chart shows population change by age cohort between 2000 and 2011. Between 2000 and 2011, the median age of a resident of the City of Flint increased by three years, from 30.9 to 34.2. By comparison, the national median age increased by two years, increasing from 35.3 in 2000 to 37.3 in 2011. The median age in Flint is increasing at a faster pace than that of the nation due to a combination of factors.

The number of residents aged 55 and over grew by nearly 2,000 individuals, an increase of 8.9%, between 2000 and 2011. Over this period, the only age group to experience significant growth were those aged 55 to 64, which increased by 3,164 individuals (+34.9%).

Flint's younger and middle-aged populations are getting smaller. Flint's population under the age of 25 decreased by 13,776 between 2000 and 2011, a drop of 27%. Over the same period, the number of Flint residents aged 25 to 54 decreased by 11,576 individuals (-22.4%).

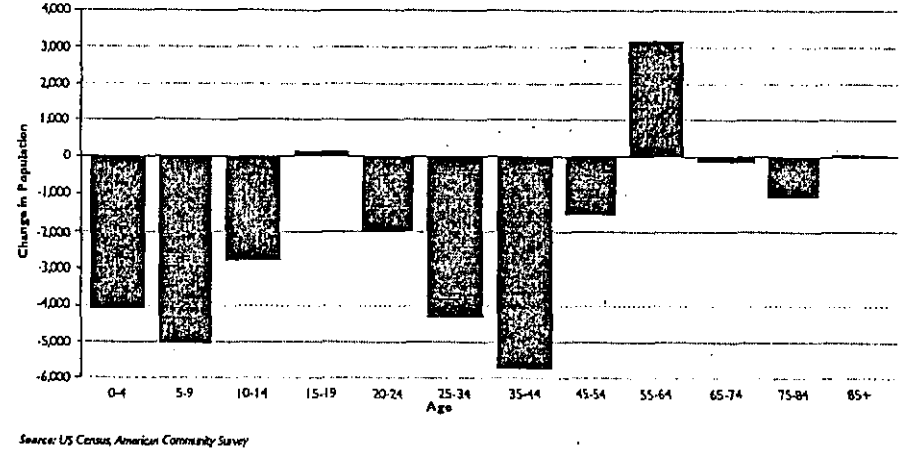
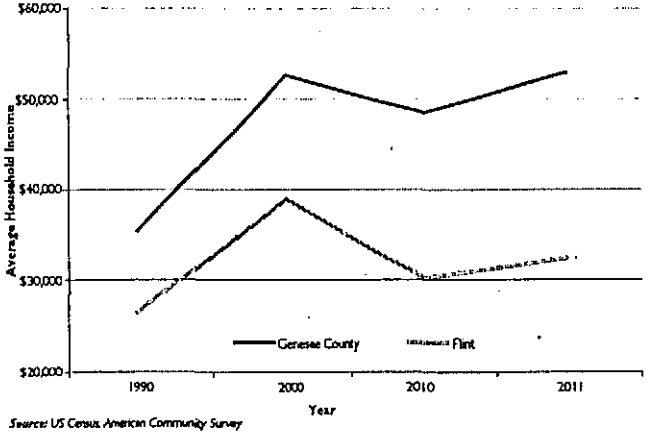
CITY OF FLINT (2000-2011)



Source: US Census, American Community Survey

Change in Average Household Income
CITY OF FLINT AND GENESEE COUNTY (1990-2011)



Source: US Census, American Community Survey

Household Structure

Household makeup is changing. The following table highlights the link between a shifting age profile and household structure. As noted in the Flint & Genesee County Comprehensive Economic Development Strategy (CEDS), Flint and Genesee County are experiencing the impacts of changes to household structure caused by an aging Baby Boom population. The proportion of two-parent households with children decreased between 1990 and 2010, while the proportion of non-married couples without children and persons living alone, increased. Persons living alone made up nearly one-third of all households in Genesee County in 2010.

Household Income

The following charts present change in household income between 1990, 2000, 2010, and 2011. Between 2000 and 2010 the median household income in Flint decreased by 19% while the average household income decreased by 22%. Although it was only one year, an increase in median income among Flint households between 2010 and 2011 is encouraging. This shift in median household income is largely the result of recent increases among middle income households.

Flint incomes may be growing. Between 2010 and 2011, the average income among Flint households increased by 7.1% to $33,029 in 2011. By comparison, the median household income for the State of Michigan increased by just 3.6% over the same period.

Flint is gaining more middle income households. After decreasing by 47% between 2000 and 2010, the number of households earning between $50,000 and $100,000, within Flint, grew by 1,563 (28%) between 2010 and 2011.

Flint household income lags behind Genesee County. The average income for a Flint household was $33,029 in 2011, while the average household income in Genesee County was $53,415. Moreover, while Genesee County household income is estimated to be slightly higher than in 2000, the average household income in Flint is still approximately 16% lower than in 2000.

Changes in Household Structure
GENESEE COUNTY & U.S. (1990 & 2010*)

	Genesee County		United States	
Families w/ Children	1990	2010	1990	2010
Male Householder	3.9%	3.3%	3.7%	4.6%

Local Employment
Genesee County job growth is positive, but modest. In 2008, Genesee County accounted for approximately 89.1% of jobs within the Flint region (defined by the Michigan Department of Technology as Genesee and Shiawassee Counties). Genesee County could stand to gain an additional 4,375 jobs between 2008 and 2018.

Unemployment
The unemployment rate among Flint individuals aged 16 and older was 27% in 2011. This is 56% higher than that of Genesee County, which is 16.4%. Unemployment in Flint is concentrated among males and young adults. In 2011, more than 46% of Flint's population aged 20 to 24 was employed and nearly one in three Flint men were unemployed.

Poverty Rate
The total poverty rate among Flint residents increased by 15% between 2000 and 2010, growing to 41.2% in 2010. As with household income, data from 2011 indicate that the long-term trend of increasing poverty may be reversing.

More of Flint's youth are living in poverty. The proportion of children under 18 years old living below the poverty level grew from nearly 38% in 2000 to more than 63% in 2010. By comparison, the poverty rate among adults increased by just 6% to 33% in 2010.

Flint's high poverty rate may be trending downward. Data for 2010 and 2011 indicate that the overall poverty rate within Flint decreased by 1.5% to 40.6%. This overall decrease is the result of a 3% drop in the youth poverty rate.

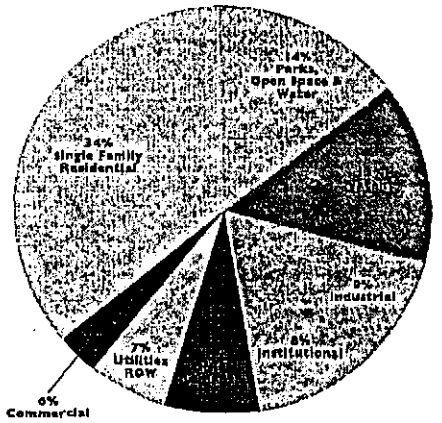
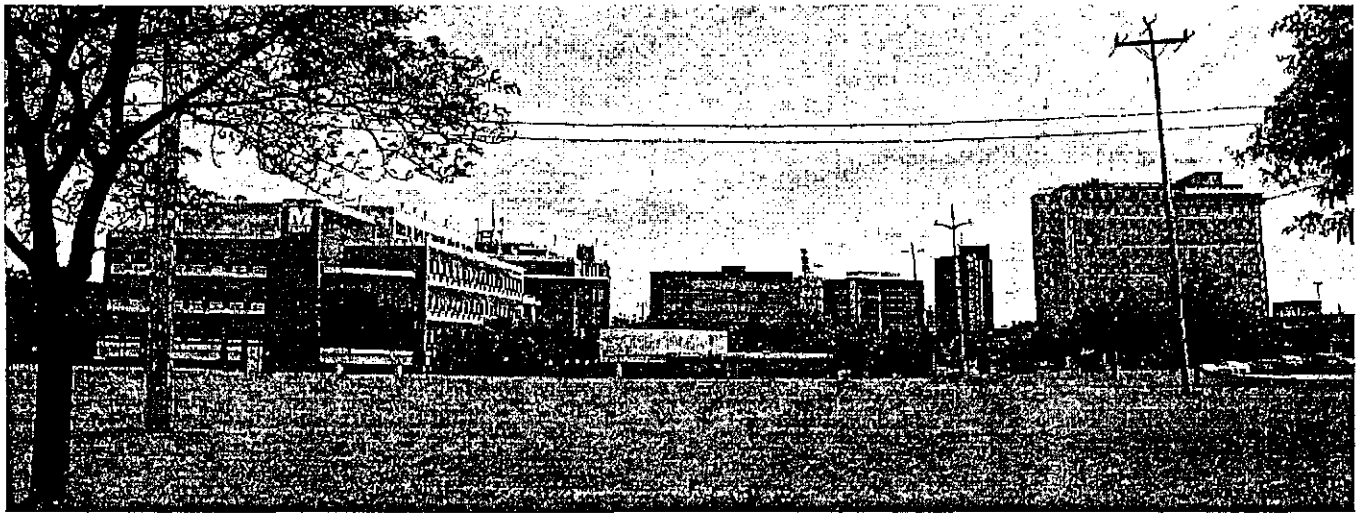
Existing Land Use





MASTER PLAN TOPICS

A detailed existing conditions analysis combined with extensive community outreach, provided an assessment of the challenges facing the Flint community and identified assets the City has upon which to build. This chapter provides an overview of the City's major assets and challenges addressed in other chapters of the Master Plan including: Land Use; Housing and Neighborhoods; Transportation and Mobility; Environmental Features, Open Space, and Parks; Infrastructure and Community Facilities; Economic Development and Education; Public Safety, Health, and Welfare; and Arts and Culture.

Existing Land Use

The Land Use Plan builds upon a firm understanding of Flint's existing land use patterns which will have a significant influence on the City's future growth and development. As illustrated, Flint is made up of a diverse range of land uses that have developed over the City's history. Large areas of the City are single family residential neighborhoods with commercial uses located primarily along the City's arterial corridors and in the Downtown area.

Flint's industrial and employment sector uses continue to concentrate along the City's two primary railroad corridors and along the Flint River. Flint also features a high amount of public and community facilities such as schools, churches, cultural amenities, and also includes a vast network of parks and open space. A primary distinguishing land use characteristic is the high number of vacant parcels that exist throughout the City's residential, industrial, and commercial areas.

Vacant Land

The Master Plan provides the City with a tremendous opportunity to capitalize on the abundance of vacant land to reinvent itself and correct previous planning mistakes. Vacant parcels include a wide array of formerly occupied sites including residential parcels, commercial and industrial sites, and public/semi-public uses currently without structures. Vacant parcels occur in almost all parts of the City, with high-concentration of vacancy in distressed residential neighborhoods and within the larger industrial areas. The abundance of vacant homes is having a negative impact on the sense of community as well as on City resources and infrastructure.

Genesee County Land Bank

In 1999, the Michigan State Legislature created a new, streamlined system for returning tax-reverted properties to productive use. This changed the way foreclosed properties were administered, by giving outright ownership of these properties to the local county treasurer after two and a half years, instead of speculators or slumlords at auction. With this process, Michigan opened the door for Flint to reclaim, reinvest in, and rebuild their neighborhoods through the creation of the Genesee County Land Reutilization Council (LRC). In 2004, after the State of Michigan passed the land bank legislation, the LRC became the Genesee County Land Bank Authority (GCLBA). Today, state governments across the country are approving land bank legislation based on the success of the Genesee County model.

Land Bank Properties

The Genesee County Land Bank uses the new tax law as a constructive community development tool. By avoiding the potential neglect or misuse that comes from selling land at auction to speculators, the County is able to acquire abandoned land through the foreclosure process, and determine the best use of that land in conjunction with the community's long-term vision. The Genesee County Land Bank transfers land to adjacent homeowners, develops long and short-term green spaces, and assembles land for responsible new housing and commercial development. The objective is to restore the integrity of the community by removing dilapidated structures and redeveloping abandoned properties.

As of June 2013, the Genesee County Land Bank owned 8,335 properties within the City of Flint. This represents an estimated 18% of the parcels within the City. The Genesee County Land Banks holdings have increased dramatically since 2003, with most properties concentrated in the north central portion of the community, along the M.L.K. and Saginaw Street corridors. Further discussion of the Land Bank and its programs can be found in *Chapter 5: Housing and Neighborhoods Plan.*

Housing & Neighborhoods

Flint has roughly 12,000 vacant homes and 6,000 houses in poor/substandard condition. The City must find ways to improve the quality of local neighborhoods; however, it is unlikely that the City can demolish all substandard homes given the cost of more than $10,000 a piece.

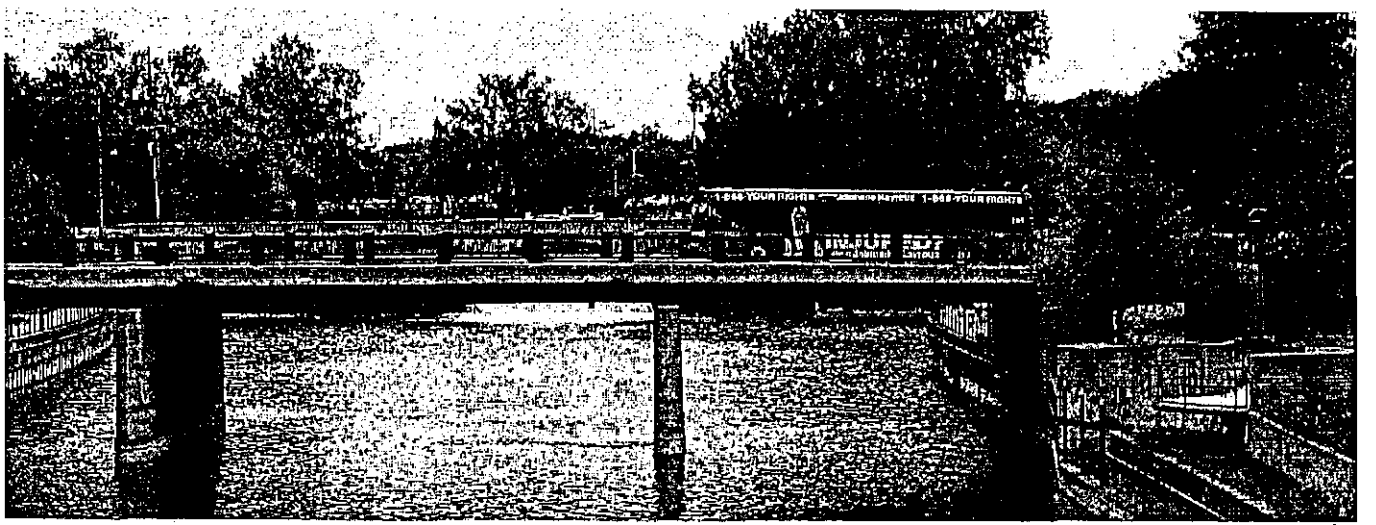
Therefore, the City must partner with local neighborhood groups and block clubs to address neighborhood blight and implement beautification programs. The City must also continue to work hand-in-hand with the Land Bank, which owns an estimated 18% of the parcels within Flint. Only by doing so, can the City identify ways to address the housing needs of a diverse population of home owners and renters, while also actively targeting blight and strategic demolition.

Housing Overview
CITY OF FLINT AND GENESEE COUNTY (2010)

	City of Flint		Genesee County	
Total Units	52,615	100.0%	192,097	100.0%
Occupied	40,827	78.0%	166,539	87.0%
Vacant	11,788	22.0%	25,558	13.0%
Single Family	40,270	77.0%	137,793	72.0%
Multi-Family (more than one unit)*	12,345	23.0%	13,404	28.0%

* Including mobile home units.

Source: American Community Survey; Houseal Lavigne Associates



Challenges

Housing Diversity
- 43% renters, but only 23% multi-family housing

Housing Stock
- 82% of Flint's housing stock was built before 1970
- 14.1% of Flint's parcels contain houses in poor or substandard condition

Vacancy
- 22% of Flint's residential parcels are vacant lots
- There are 5,774 blighted parcels in Flint, and it costs an average of $10,000 to demolish one house structure

Assets

Strong Neighborhoods
- Flint contains many strong and active neighborhoods, with as many as 65 neighborhood organizations identified by the City and 14 having developed neighborhood plans
- A variety of housing styles exist, with 24% of homes dating prior to 1940
- As of June 2013, the Genesee County Land Bank owns over 8,335 properties within Flint, positioning a large number of problematic lots together for system wide solutions
- More than $35 million has been invested in Flint neighborhoods through the Neighborhood Stabilization Program since 2009

Transportation & Mobility

To effectively influence how development will change and locate in the future, the Master Plan establishes a framework for investing in critical transportation infrastructure. The ultimate goal of the transportation and mobility plan is to support multiple types of motorized and non-motorized modes of travel, expand bike lanes, minimize congestion, develop complete streets, increase walkability, and reduce existing hazards. Flint is positioned to be a major asset throughout the region. Located centrally within the I-69 International Trade Corridor, Flint is connected with over 750,000 residents by means of air, water, rail, and roadways encompassing over 2,500 sq. miles of linkage. In addition, with the majority of Flint residents (59%) owning one car or less, accessibility and mobility are also an essential component of the City's transportation network.

Challenges

Poor Connectivity
- Some neighborhoods are isolated and not connected to larger grid system

Equal Access
- MTA provides 500,000 trips per year for people with disabilities
- Flint has 28,000 people with disabilities, of which 15% have mobility issues

Funding & Maintenance
- 26% of Flint's roads received the lowest condition rating requiring structural upgrades

Assets

Bishop International Airport & Freight Access
- Bishop International Airport serves 1 million passengers per year and growing

Mass Transit
- MTA serves approximately 6 million passengers per year
- MTA provides 14 service routes within Flint

I-69 Trade Corridor
- The corridor provides 2,500 miles of linkage connecting over 750,000 individuals

Non-Motorized Transport
- Flint is recognized for its trail system, including the 12+ mile Flint River Trail linking downtown to multiple neighborhoods and environmental assets
- In a 2007 non-motorized County trail plan, 3 of the top 10 priorities throughout the County recognized were in Flint

Transportation Coordination
- Coordination with the County is practiced, including long range planning

Environmental Features, Open Space & Parks

The Flint parks and recreation system, comprising 67 parks and play-lots spanning over 1,600 acres, was developed to place every neighborhood within a ¼ mile of an area of open space. While Flint's large and diverse inventory of parks and recreation facilities has the potential to serve as an important community amenity for residents, a drop in revenues and declining tax base have put the system in distress.

Between 2008 and 2012, the City lost nearly $315,000 in park millage revenue support. Since 2002, the Parks and Recreation Department has eliminated 89 staff positions. Fortunately, multiple non-profit, philanthropic, and neighborhood organizations are rising to the challenge to help maintain, update, and provide programming throughout Flint.

Given the severe cuts, the City is pursuing alternative funding strategies and contracting with third parties, to operate recreational facilities and assist neighborhood organization in their efforts to revitalize its parks.

Challenges

Parks Funding & Maintenance
- In 2012, the Parks and Recreation Department had a $2.1 million deficit
- Staffing was reduced to five people in FY2014 as a result of park revenue dropping by $315,000 between 2008 and 2013

Park Safety & Remediation
- During youth-focused Master Plan workshops, children overwhelmingly cited park safety as the reason for not using park assets
- The City possesses nearly 1,000 acres of brownfields in need of remediation/redevelopment

Assets

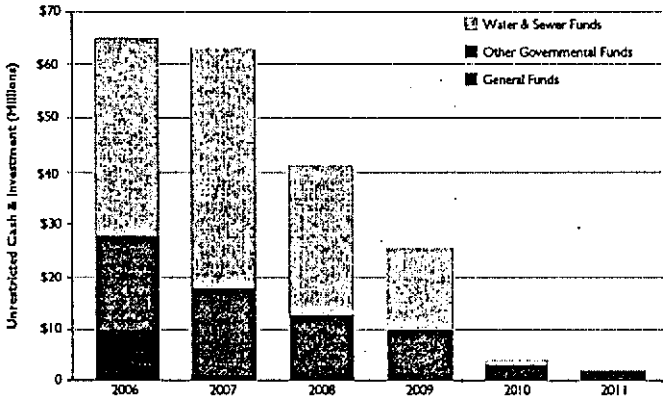
Flint River & Lakes
- Flint is located on part of a watershed that drains 1,360 square miles across 7 counties
- Flint contains 3 lakes, totaling roughly 300 acres of fresh water access
- The Flint River spans the entire City and is prime for recreational activity

Park Partnerships
- Dozens of partnerships have been formed to maintain parks and keep community centers
- Within the Clean & Green Program, there are 46 groups currently maintaining more than 1,360 lots within the City

Urban Agriculture & Gardening
- There are over 200 active farms and gardens in Flint

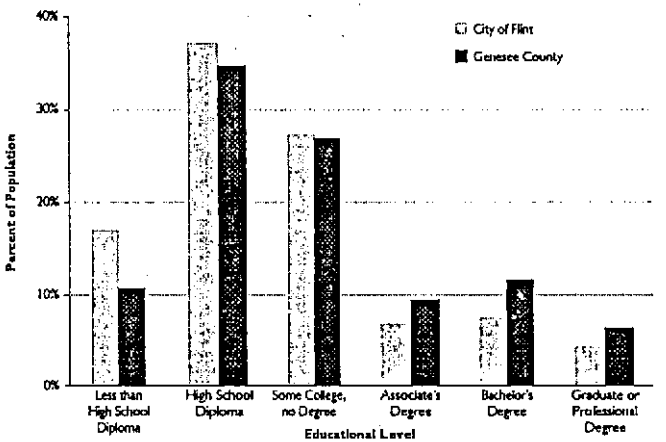
Accessibility
- There are over 1,800 acres of park land in Flint
- 80% of neighborhoods in Flint are within ½ mile of a City park

Primary Operating Funds



Source: US Census, American Community Survey

Educational Attainment



Source: US Census, American Community Survey

Infrastructure & Community Facilities

Budgetary constraints, partly due to a major deficit in 2012, have forced the City of Flint to downsize, close community facilities, and delay critical infrastructure upgrades. Water infrastructure has become an especially critical issue, due to a 20% decline in water customers between 1999 and 2011, leading to a major loss in the City's ability to adequately maintain its aging water infrastructure. The City recognizes that these services are essential to creating a thriving and vibrant community for all residents and help to define local quality of life. The goals outlined in the Master Plan address these issues head on.

Challenges

City Budget
- There was a $18 million general fund deficit in 2012

Infrastructure with High Fixed Costs
- In 1999, the City provided water to 45,000 customers, but by 2011 the number dropped to 36,000
- The City has 1,500 miles of water/sewer lines built to accommodate a population of more than 200,000
- Flint's water and sewer rates have increased 110% since 2011, equating to an average monthly bill of $139 for Flint residents

Outdated Infrastructure
- The City has six failing or obsolete dams
- The City's street lighting system uses over 11,600 antiquated steet lights

Assets

Cultural Center
- Culture In Flint creates a regional draw, for example, the Flint Institute of Music attracts 300,000 visitors for instruction, programming, and concerts

Potential to Repurpose Schools
- Some schools are well located and could be repurposed (e.g. Oak School) with uses that suit the community's needs

Economic Development & Education

Poor education and a lack of workforce development opportunities is stifling Flint's ability to both attract high-skilled jobs and fill available positions in the City. While Flint has a large trained workforce in manufacturing and skilled trades, the fast growing industries of healthcare, education, and professional services require a new set of skills.

The City is well positioned to take advantage of this with nearly 30,000 students attending Flint's colleges and universities, however, City residents are often left behind. High illiteracy and high school dropout rates have contributed to a 25% unemployment rate of for Flint residents over 16.

If Flint is to take advantage of future job growth in Genesee County, the workforce must be considerably more educated and tailored to the needs of a changing job market. The Plan outlines strategies for education, including the creation of greater links between Flint's primary education system and higher education opportunities. The Master Plan lays a framework for helping prepare Flint's future workforce for success.

Challenges

K-12 Education
- Only 54.4% of the school aged population attend a Flint Community School
- 17% of adults aged 25 and older did not graduate high school

Workforce Development & Literacy
- 36% of adults aged 25 and older are considered functionally illiterate

Youth Poverty
- In 2010, 63% of Flint youth aged 18 and under were living in poverty, which is an increase of 25.4% from 2000

Unemployment
- 27.5% of Flint's population over 16 was unemployed in 2011

Higher Education Attainment
- Only 11.6% of Flint's population has a bachelor's degree or higher

Assets

Higher Education
- Flint has 4 major higher education facilities with nearly 30,000 enrolled students

Regional Hub
- Flint businesses provide 33% of all jobs in Genesee County
- Flint has an estimated daytime population of 133,882
- Employment in Genesee and Shiawassee Counties is expected to grow by over 4,900 jobs (3%) by 2018

Public Safety, Health, & Welfare

Flint is struggling with unacceptably high crime and poverty rates. In 2010, an estimated 41% of overall residents live below the poverty line, with youth poverty rates near 63%. While these statistics are troubling, the City and County are fortunate to have hundreds of organizations committed to solving the challenges Flint faces.

The Master Plan identifies the improvement of public safety, health and welfare within Flint's neighborhoods as vital to the City's long-term economic health and quality of life. The Plan envisions a place where youth can mature around strong, stable neighborhoods, seniors can live peacefully while having access to high performing health care facilities, and businesses can ensure a high standard of quality of life for their employees.

Challenges

Crime
- 2,337 violent crimes were reported per 100,000 Flint residents in 2012

Poverty
- In 2010, 41.2% of Flint residents were living below the poverty level

Youth in Distress
- In 2010, 63% of Flint residents under the age of 18 lived below the poverty level

Police Staffing Levels
- Drops in City revenue between 2008 and 2013 have led to a loss of nearly 136 police officers since 2008

Arson
- Since 2008, over 1,600 structures within the City have been burned

Assets

Non-Profit Organizations
- Approximately 300-400 non-profit organizations are located in Genesee County

Healthcare Institutions
- Hurley Medical Center is the largest hospital in the County with 443 beds; In 2006, 472,208 outpatients were served

Genesee County Health Plan
- The Genesee Health Plan (GHP) affords area residents the opportunity to obtain quality health care services, serving over 25,000 area people annually

MASTER PLAN FOR A SUSTAINABLE FLINT

8 INFRASTRUCTURE & COMMUNITY FACILITIES PLAN

VISION P. 171

GOAL & OBJECTIVES P. 173

RECOMMENDATIONS AND BEST PRACTICES P. 175

IMPLEMENTATION P. 189

8 INFRASTRUCTURE & COMMUNITY FACILITIES PLAN
VISION, GOAL & OBJECTIVES

Imagine

an efficient and reliable system of infrastructure and community services that ensures the safety of the Flint community, meets the needs of residents, and supports investment in businesses, innovation, and the local economy.

Imagine a Flint that serves its residents through an effective local government and quality facilities.

Imagine a Flint that invests in infrastructure in order to spark new development, restore the environmental integrity of the area, meet the needs of various activities throughout the City, and is not only capable, but is also dependable.

Over the next twenty years, Flint can achieve this vision. However, we must first face existing realities: Flint's population and revenue stream cannot support infrastructure for a population twice its size, much of the City's infrastructure has outlived its expected lifespan, and many public facilities need to be upgraded, repurposed, or redeveloped.

The Infrastructure and Community Facilities Plan recognizes these challenges and charts a course that will help realize a new vision for the community. The recommendations included in this chapter will help Flint develop a modern and comprehensive system of infrastructure and facilities that will ensure the quality of life of its residents, the fiscal stability of the City, and the success of its changing economy.

SOCIAL EQUITY & SUSTAINABILITY

Community facilities and infrastructure play a critical role in ensuring that all residents and families have an opportunity for social and economic success. They also represent some of the greatest fiscal investments made by the City, and should aim to maximize efficiency and effectiveness in how they deliver benefits and enhance the environment.

QUALITY OF LIFE

Safety, reliability, a comprehensive set of services, and a responsive government will allow Flint residents to enjoy all that the City has to offer. Quality infrastructure will complement their investment in the community, while local services will provide the support for education, recreation, and other activities.

YOUTH

Local community services and infrastructure are critical in making sure Flint has strong youth and families. Community services provide the activities and programs that put young people's positive energy to use. Infrastructure provides a living laboratory for young residents to see, on a regular basis, the City's commitment to sustainability, making them the torch bearers for the next generation.

RETHINKING THE ECONOMY

Investment in infrastructure and community services will ensure that Flint is poised to build a strong economy, fueled by local professionals. Local services will help grow a strong local employment base. This, in conjunction with modern and reliable infrastructure, will make Flint an attractive place for investment in commerce and industry.

ADAPTING TO CHANGE

Infrastructure and community facilities must remain flexible in order to meet the needs of Flint's evolving population, development patterns, natural environment, and economy. The locations and design of public buildings, stormwater management strategies, blue/green infrastructure, and other factors must be considered within the context of the long-term vision for the community.

CIVIC LIFE

Infrastructure and community facilities relate to both the physical and social building blocks of community. Infrastructure provides the critical resources that allow a household, neighborhood, and City to operate, while community facilities provide the physical spaces and programs for neighbors to come together to accomplish the goals for Flint.

GOAL:

Flint will enjoy a system of reliable and efficient infrastructure tailored to meet local needs, and have a network of comprehensive community facilities and services provided by the City, non-profit organizations, and other local partners in a coordinated and collaborative manner.

GUIDING PRINCIPLES

The ways in which the Goal & Objectives of the Infrastructure and Community Facilities Plan have been influenced by the guiding principles are indicated using the following symbols.

- Social Equity & Sustainability
- Reshaping the Economy
- Quality of Life
- Adapting to Change
- Land
- Civic Life

Objective #1

Repair and right-size key neighborhood infrastructure to increase resident safety, quality of life, and efficiency.

Responding to Flint's future population, rather than its population from fifty years ago, will be an effective way to ensure investment reflects the vision of the community. This includes the location, capacity and type of infrastructure provided in various parts of the City.

Objective #2

Ensure longevity, reliability, and efficiency of City utilities.

Improvements should be weighed based on their potential to not only maintain existing infrastructure, but also to collectively implement the installation of a long-term coordinated system.

Objective #3

Modernize City and community facilities.

Flint must not only overcome its own past, but also the communities it competes with for development. Providing modern community facilities is one way to provide the best services to residents, and make Flint an attractive choice.

Objective #4

Leverage green technology to reduce energy costs, improve air quality, and increase long-term sustainability.

Needed infrastructure upgrades provide the opportunity to invest in innovative systems that accomplish multiple community goals. Strategic investment in infrastructure and facilities will have long-term benefits to the City and natural environment.

Objective #5

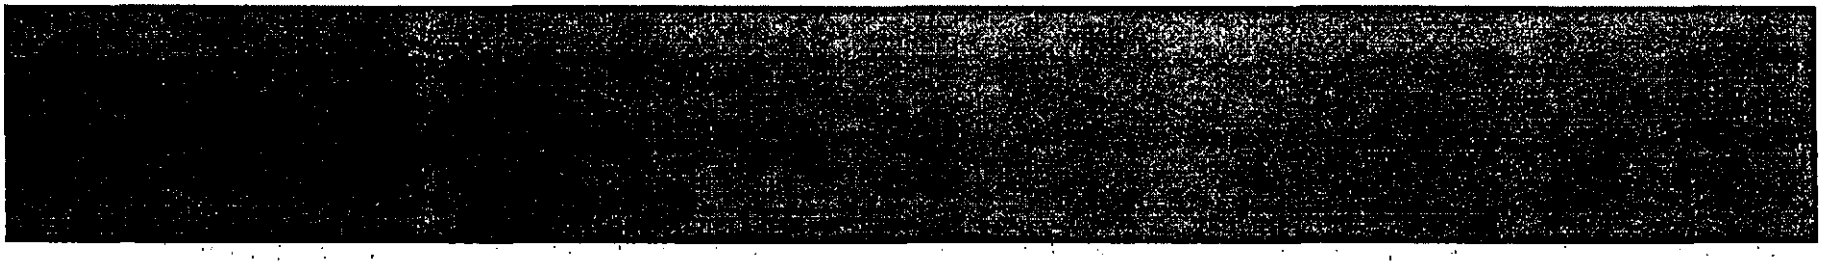
Expand opportunities for blue infrastructure development.

Flint's approach to infrastructure should recognize the value of water as both a usable resource and a tool for managing flooding, restoring ecosystems, and improving access to recreation and open space.

Objective #6

Develop and execute a coordinated City network of street trees.

Trees offer several benefits to the Flint community. Aside from their aesthetic value, they also enhance stormwater management, minimize erosion, and create buffers between incompatible uses.



Objective #7

Provide municipal services consistent with the Master Plan.

Infrastructure and services should be tailored to specifically respond to different neighborhood types, transportation systems, natural areas, and other site-specific influences.

Objective #8

Work with residents, businesses and other stakeholders to foster development of the City and its infrastructure in a manner consistent with the Master Plan.

Full implementation of the community's vision will require collaboration and shared accountability. The greatest level of positive impact will occur when the City's investment in infrastructure is in line with and complemented by service provided by local stakeholders.

Objective #9

Operate in an open and financially stable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits.

It is clear that attaining the vision for Flint will require new investment. However, such investment must be justified by its ability to achieve the goals and objectives in this Plan, or set the stage for other improvements that do so.

8 INFRASTRUCTURE AND COMMUNITY FACILITIES RECOMMENDATIONS & BEST PRACTICES

In 1960, 197,000 people lived in Flint, and the community was bracing for rapid growth around its core industries. Infrastructure was in place to support over 200,000 people. However, the next 50 years brought a reduction in population of 95,000 people. This reduction resulted in a large percentage of vacant buildings and sites. Flint has more than 10,000 vacant homes, including a total of 5,000 blighted structures. In the past 50 years, Flint's population has dropped by 48%, yet the City continues to maintain infrastructure systems capable of serving its peak population. The Infrastructure and Community Facilities Plan considers ways to tailor infrastructure and services to suit local population centers and anticipated long-term development patterns.

The Infrastructure and Community Facilities Plan establishes a coordinated vision for Flint's government facilities, infrastructure, and utilities. It also considers the relationship between the City and other agencies, non-profit organizations, or organizations that provide important social and cultural services.

It also explores vacant properties to make Flint more sustainable by minimizing the stress on infrastructure systems and creatively reusing vacant structures. The Plan envisions a City where infrastructure and services are closely coordinated with housing, economic development, the environment, parks and open space, and transportation, as well as a community that is fiscally responsible and able to support these systems in a fair and equitable way.

Becoming a more sustainable community implies a balanced approach to preserving the environment, enhancing the quality and distribution of services to all citizens, and ensuring the long-term financial viability of all infrastructure.

In addition to recommendations throughout this Plan, there are additional actions the City can take to achieve this important goal.

- Adopt an energy efficiency and conservation policy for government facilities, employees, and contractors that includes turning lights, computers and copiers off, appropriate thermostat use, and reduced "plug load" (i.e. desk lamps, radios, etc.)
- Adopt Energy Star purchasing requirements for new equipment and appliances.
- Implement blue/green infrastructure improvements described in ***Chapter 7: Environmental Features, Open Space, and Parks.***

INFRASTRUCTURE & FUTURE LAND USE

Chapter 4 presents the Place Based Land Use Plan, a flexible framework that establishes the desired character for the areas of Flint. The place types outline potential uses, intensities, and development patterns that can serve as a planning guide for supporting systems and services, enabling local land uses to thrive, and costs of delivery managed. The following paragraphs describe how the provision of infrastructure and services should reflect local land use typologies.

Residential Place Types

The Traditional Neighborhoods and Mixed-Residential areas are striving for improvement. They are existing and stable residential areas that require complete infrastructure, including multi-modal transportation systems consisting of transit, sidewalks, and bike paths; water and electricity with appropriate redundancy; and, community services that focus on supporting youth, families, and local schools.

Successful implementation of Green Neighborhoods will introduce green uses into the remaining, less-dense residential areas. Complete infrastructure, is critical in helping stabilize Green Neighborhoods, demonstrates a City commitment to these areas, and provides an opportunity for a potential long-term transition back into a Traditional Neighborhood. Green Neighborhoods also provide an opportunity to implement blue/green infrastructure, as a way to make use of vacant land and maximize the performance of the City's stormwater infrastructure.

Commercial Place Types

Downtown, City Corridors, and Neighborhood Centers are all critical to a healthy community and local economy. Infrastructure in these areas must ensure the continued delivery of critical services and customers, necessary to keep businesses in operation. Infrastructure can enhance the viability of businesses in the community, ensuring adequate connections are in place between business and all parts of the City, and that pedestrian infrastructure connects shopping and employment areas with nearby neighborhoods.

BENEFITS OF INVESTING IN SUSTAINABLE SYSTEMS

Several cities are demonstrating the benefits of investment in sustainable infrastructure systems:

- Philadelphia, PA has implemented restoration and demonstration efforts, regulations and incentives for private development to minimize the amount of demand on sewers, and a revised billing system that considers both the gross area of the lot and the amount of pervious surface.
- Stafford County, VA adopted development regulations that permit the use of low-impact development on private lots as a means of meeting on-site detention requirements.
- Portland, OR invested $9 million to address its sewer overflow issue, saving ratepayers approximately $224 million in infrastructure and maintenance costs associated with overflow events.

Institutional Place Types

The University Avenue Core and Civic/Cultural Campus areas have unique infrastructure needs. Activities in these areas include a combination of education, housing, research, and professional offices. These place types, and the institutions within them, may warrant dedicated infrastructure systems that offer improved stability, greater capacity, ease of adaptability as technologies emerge, and redundancy to overcome instances when the larger municipal network is compromised.

Implementation of the University Avenue Core place type will entail significant intensification of existing uses, and has a goal of adding 10,000 dwelling units to support full build-out. This repositioning and new development provides a good opportunity to replace traditional services with innovative green infrastructure, advanced telecommunications and data systems, gray water reuse, and on-site water storage and distribution.

Employment Place Types

Green Innovation areas, Production Centers, Commerce and Employment Centers, and Downtown, will power the local economy, hosting the most intensive activities within the City.

When implemented, Green Innovation areas will present the City with opportunities to take infrastructure "offline," removing unnecessary utilities and systems once the place type and uses are established.

Other place types must maintain access to a complete infrastructure system to ensure their continued operation. This will require flexible infrastructure that can easily and quickly be retrofitted to meet new demands, and be tailored to each specific place type. Commerce and Employment areas for example, will host intensive office and research activities requiring advanced telecommunications and energy systems. The City should consider flexible infrastructure systems that allow for local upgrades, without disruption or added cost to the broader city-wide systems.

LONG-TERM PLANNING

This Master Plan is intended to provide context for a number of other decisions to be made regarding specific actions, priorities, and capital investments. The City should use the Master Plan as a foundation for further analysis and design, that will answer important questions regarding long-term implementation. The Master Plan should directly correlate to two important municipal documents: the Capital Improvement Plan and the Strategic Plan.

Capital Improvement Program

The City's Capital Improvement Program (CIP) includes a series of projects or improvements related to facilities and infrastructure. It identifies specific actions to be completed, and considers anticipated costs, phasing, and funding sources. The Master Plan should be referenced as a guide that provides context for specific decisions and priorities identified in the CIP, specifically considering:

- The potential future benefit of certain actions. These may include long-term cost savings, environmental benefits, increased mobility to important services, and social equity, among others.
- The relative need for specific investments. Some projects may be critical to the health, safety, and welfare of the Flint community, despite also being expensive. These should be considered for more immediate action as they may protect other investments in public systems or private development.
- The anticipated impact in achieving other community goals. Investment in infrastructure or municipal services is often critical to successful economic development, the advancement of arts and culture, or healthy transportation options. These are all goals that provide positive returns back to the Flint community.
- Complementary non-municipal resources. While the CIP reflects the City's intended investment in certain projects, the City should consider funding partners who may make specific actions more attainable on the short-term. This may influence the phasing or priority of some projects and allow the City to attain its vision more quickly.

Flint Strategic Plan

In addition to this Master Plan, the City of Flint is putting in place a Five-Year Strategic Plan to set a sustainable course for local government based on the recognition that the instability and lack of accountability within City government has been a major strain on the community. The Strategic Plan will address the key goals and functions necessary to make the City of Flint a robust partner in planning and maintaining community infrastructure, utilities, and facilities. The Strategic Plan is based on a responsible five-year financial projection and a transparent and accountable revenue estimating process. The Strategic Plan recognizes the importance of creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors by providing municipal services in a customer friendly and financially responsible manner.

BENEFITS OF ENERGY EFFICIENT PUBLIC BUILDINGS

The City of St. Paul, MN is investing in the energy efficiency of public buildings. The $2.7 million program has improved the performance of nearly 30 buildings, with most improvements providing a positive financial return within five years. Improvements include the installation of new energy management systems, new high-efficiency HVAC systems, and new energy-efficient lighting fixtures.

Passive heating exterior surface (source: USDA)

SUSTAINABLE & RENEWABLE INFRASTRUCTURE

Regional and global climate change will impact water availability, infrastructure needs, flora and fauna, and other aspects of the environment. However, sustainable infrastructure has the potential to provide significant benefits to the Flint community. First, it can improve its own performance and efficiency. Secondly, it can minimize negative impacts on private development.

While environmental factors present significant challenges to the community, Flint and Genesee County are home to several hundred non-profit and community organizations. These social resources reflect the local commitment to improving Flint and making it a sustainable and successful community. This Master Plan is an important document for providing context for the coordination of City efforts and the social support provided by non-profit, and community organizations. However, the specific relationship between infrastructure, neighborhood development, character, sustainability, and global climate change, warrant the creation of a local Climate Action Plan. The following paragraphs describe overarching concepts that can be applied to infrastructure throughout the City.

A Climate Action Plan for Flint

In 2009, the State of Michigan adopted a Climate Action Plan that identifies 54 policy recommendations for reducing greenhouse gas emissions. The recommendations include actions that would reduce harmful impacts on the environment while providing an estimated $10 billion of benefits between 2009 and 2025 through the reduced use of water and energy, new job creation, and diversification of the economy.

The City of Flint should build on the state's efforts and create a local Climate Action Plan. This Plan would provide a unique opportunity to address, within the context of one another, anticipated climate change, future population trends, available open space, environmental resources, resident involvement, and the support provided by non-profit and community organizations. The Climate Action Plan would serve as a supporting document to this Master Plan, providing additional insights that would shape future land use policies, multi-modal transportation enhancements, capital improvements, economic development efforts, and collaboration with other departments, agencies and authorities.

Recommendations for the plan include, but are not limited to the following:

- Require City-funded projects to incorporate energy efficient features.
- Promote the benefits of energy efficiency to the business community and demonstrate techniques applicable in Flint.
- Provide a "how to" guide for residents who wish to increase energy efficiency in their homes through equipment upgrades, weatherizing, and modifications in behavior.
- Package information for businesses and residents regarding potential rebates or cost savings associated with energy efficiency.
- Work with local schools to integrate sustainability related discussions, demonstration, and field trips into curricula.
- Integrate sustainable alternatives and regulations into the City's zoning code related to green building design, stormwater management, and alternative energy production.
- Encourage or require landscaping materials that reduce water consumption and reflect anticipated climate change for the Flint region.
- Work with UM-Flint, Mott Community College, and other local partners to offer technical expertise to developers and designers who wish to implement sustainable development techniques.
- Utilize LED solar-powered technology for pedestrian crossing signals and street lights.
- Utilize water conservation practices for the maintenance of parks and municipal properties.
- Replace unused turf areas with native landscaping in open spaces and on municipal properties, in order to increase permeability and groundwater recharge.

Benefits of a Climate Action Plan

Four neighborhoods in Chicago, IL are using climate action plans to improve local quality of life. Working with anthropologists and ecologists from the Field Museum, residents are developing and implementing local climate action plans. The goal of this effort is to apply Chicago's city-wide Climate Action Plan to individual neighborhoods based on:

- Community strengths;
- Community concerns;
- Neighborhood's core organizational work;
- Strategies from the region's climate action plans; and,
- Existing and potential new local and technical partners.

Neighborhoods are exploring actions related to a broad range of concepts, including community gardening, green infrastructure, homeowner water conservation, youth leadership, and more.

Blue/Green Infrastructure

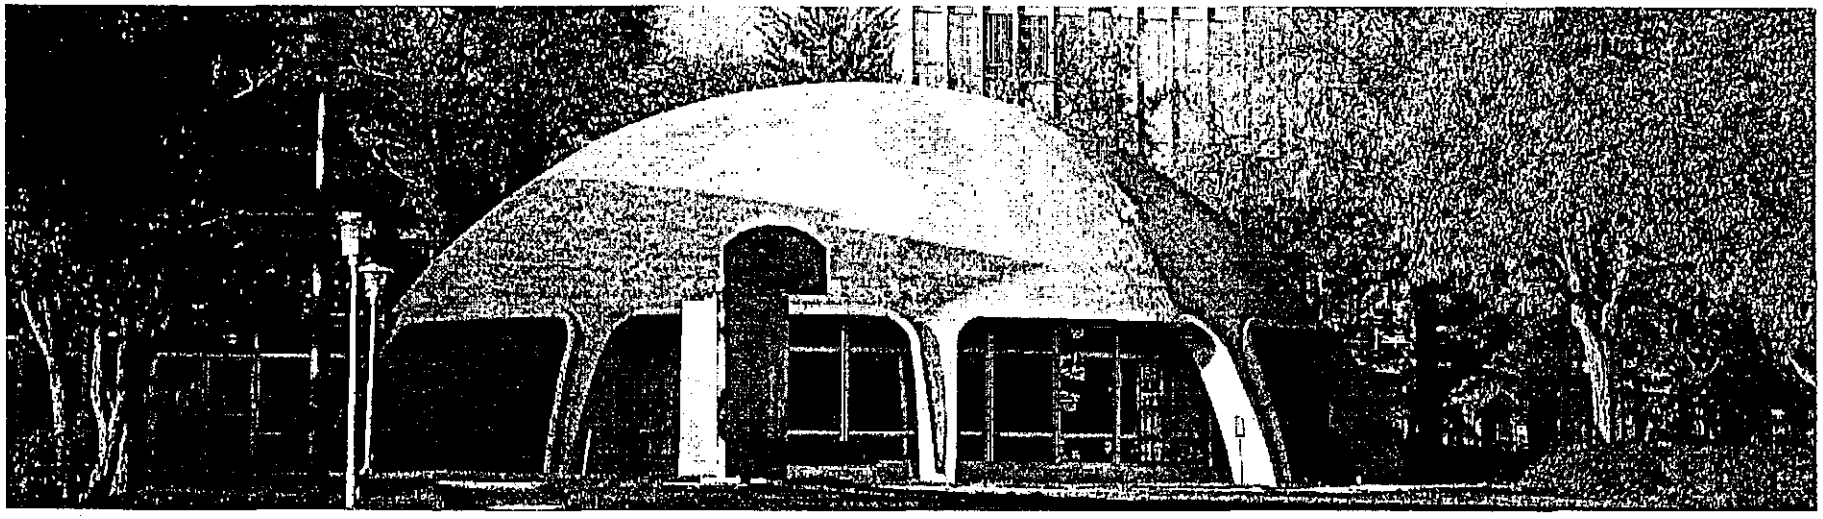
Blue/green infrastructure is an approach to infrastructure and site design that mimics natural systems using low-cost, simple techniques to contain and use stormwater close to where it falls and allow the ground to absorb water and filter pollution as it would before development occurred.

Rather than disposing of stormwater by funneling it off site, blue/green infrastructure advances the principle that stormwater is a natural resource that should be used to recharge natural systems at the site level. Allowing the natural processes of infiltration, filtering, storage and evaporation to occur on-site can reduce or eliminate the need for stormwater detention areas and drainage piping while improving overall water quality.

For example, rather than collecting rainwater in pipes and delivering it to the Flint River, a bioswale would allow for the percolation of rainwater into the soil, where it would be cleaned by native plant life and returned to the ground. This approach would provide the foundation for healthy natural ecosystems and help sustain groundwater supply. The City should explore opportunities to implement blue and green infrastructure techniques, as upgrades or new installation occurs. A more detailed discussion of these techniques exists in *Chapter 7: Environmental Features, Open Space, and Parks.*

Green Technologies

The City should consider ways to implement green technologies into development of its facilities and infrastructure. These include alternative energy sources (i.e. solar, wind and geothermal), energy efficient systems, passive heating and cooling, etc. These techniques can reduce both operational costs to the City, and environmental impacts on the community.



GOVERNMENT FACILITIES

The City of Flint operates a series of facilities that provide services to residents and sustain necessary operations related to government administration, infrastructure, and public safety. Parks and open space facilities are addressed in *Chapter 7: Environmental Features, Open Space, and Parks Plan*. This section describes those facilities and identifies recommendations related to their long-term maintenance.

Routine Maintenance

The City of Flint operates approximately 22 facilities throughout the community. Many of these facilities are approaching 100 years of age, with the majority of structures being built prior to 1960. The City should do the following measures to ensure their long-term viability:

- *On-going maintenance.* All structures should be monitored for regular maintenance needs, including façade rehabilitation, roof repair, water and electrical upgrades and code compliance, sidewalk improvements, ADA accessibility, and parking lot improvements.
- *Data technologies.* Where appropriate, data technologies should be upgraded to enhance the operations within a facility, and improve coordination between departments or buildings.
- *Energy efficiency.* All facilities should be made more energy efficient through improvements to heating and cooling systems, windows and doors, weather stripping, potential alternative energy sources (i.e. solar, wind or geothermal), upgrades to light fixtures, and the installation of more efficient appliances, infrastructure systems. This effort can be facilitated by the installation of energy management software to identify usage patterns and abnormalities, and the adoption of benchmarks for individual facilities.
- *Consolidation.* The City should consider opportunities to consolidate departments or services into fewer facilities, considering the impacts of vacating buildings on nearby land uses and opportunities to repurpose structures for lease or sale.

City Hall

Flint's administrative center consists of six structures: City Hall, City Hall-South Building, City Hall-North Building, the City Hall Dome, Police Headquarters, and Fire Headquarters. These structures total more than 187,000 square feet, and according to the Facilities, Grounds, and Maintenance Division, range from fair to poor/fair condition. In addition to the item listed above, the City should plan for the following improvements to the City Hall facilities:

- *City Hall.* Façade renovation and repair and replace the air conditioning unit.
- *City Hall-North.* Replace the roof and repair the sidewalk between the Police Station and City Hall.
- *City Hall Dome.* Repair or replace lighting in the adjacent parking lot.

Public Works

Public Works includes buildings and facilities operated by the Water Department, Water Pollution Control Department, Water Distribution Division, Sewer Maintenance Division, Street Maintenance Division, and Sanitation Division. The following actions are recommended to ensure that Public Works facilities provide efficient and reliable services to Flint:

- *Water Treatment Plant.* The Water Treatment Plant (WTP) is in need of maintenance or replacement of mechanical and electrical equipment, security improvements, concrete and asphalt, and roofs. These improvements, considered as general maintenance programs, are planned and funded.
- *Cedar Street Pumping Facility.* The Cedar Street Pumping Facility is used as an emergency or peak supply provider. However, the station has no standby power, its electrical controls date back to 1948, and significant upgrades are required to bring the station up to current automatic operation standards. These improvements should be considered in addition to regular maintenance.
- *Pump Station No. 4 and West Side Pump Station.* Pump Station No. 4 was rehabilitated in 1994 and is in adequate condition. The West Side Pump Station was built in 1970. Though its condition is adequate, there is no standby power provided to the station. Installation of standby power should be considered in addition to regular maintenance.
- *Torrey Road Booster Station.* The Torrey Road Booster Station has been scheduled for rehabilitation. The existing pumps have exceeded their lifespan and there is no standby power to the station. Rehabilitation should address these issues, while the station should be monitored for long-term maintenance needs.
- *Water Pollution Control.* The Water Pollution Control Department maintains the Water Pollution Control Facility (WPCF), 11 pumping stations, and 29 additional structures throughout the City. Several of the Department's facilities are in need of routine maintenance improvements. These should be considered as part of an overall maintenance strategy for all public facilities.
- *Street Maintenance and Sanitation Facility.* The Street Maintenance and Sanitation facility hosts the Street Maintenance, Sanitation, Traffic Engineering, and Fleet Maintenance Divisions. The facility includes office spaces, equipment storage, and fleet storage and maintenance. The facility is in need of routine maintenance improvements. This should be considered as part of an overall maintenance strategy for all public facilities.
- *Water Service Center.* The Water Service Center houses the Water Distribution and Sewer Maintenance Divisions, including staff, vehicles and equipment. The facility is in need of routine maintenance improvements. This should be considered as part of an overall maintenance strategy for all public facilities.

Public Safety Facilities

This section discusses the facilities related to public safety, while *Chapter 10: Public Safety, Health, and Welfare Plan* summarizes services, staffing, fleets, and related outreach and programs.

The Police Department operates out of several facilities, including one main station, one firing range, one storage facility, and six service centers that are staffed by part-time volunteers. There is also a vacant Police Academy facility for which the department has no long-term need.

The Police Department should implement the following actions:

- Conduct a detailed assessment and inventory of routine maintenance needs.
- Assess the feasibility and appropriateness of various technology upgrades in order to enhance communication among facilities and with other City departments.
- Consider the need for consolidated, vacated, or new facilities in conjunction with anticipated development in different areas of the community, considering localized population centers, surrounding land uses, and connectivity and responsiveness.

Public Safety Service Centers

The City of Flint currently operates six neighborhood service centers. These centers offer a visible presence while providing limited services and operate to serve as an interface between residents and police. In order for the City to achieve a "true" community policing model, the Flint Police Department must ensure these service stations are located and staffed across all areas of the City. Future locations, operations, and staffing of these centers are discussed in the Public Safety, Health and Welfare chapter.

The Fire Department maintains seven stations, four of which are operational, and one training center in Flint. In addition to on-going maintenance needs, the City should partner with the Fire Department in implementing the following actions:

- Assess the feasibility and appropriateness of various technology upgrades in order to enhance communication among facilities and with other City departments.
- Consider the need for consolidated, vacated, or new facilities in conjunction with anticipated development in different areas of the community, considering localized population centers, surrounding land uses, and connectivity and responsiveness.
- Make regular station upgrades and repairs related to diesel exhaust systems, bay doors, and other similar items.

Key Community Facilities

Flint Public Library

The Flint Public Library is a full-service library providing an extensive reference department, research collections, and Children's Library. The Library serves over 280,000 visitors annually, while offering over 800 programs servicing nearly 60,000 individuals. The City and the community must recognize the public library as a key community asset and work with a wide range of partners to ensure its long-term sustainability, including assisting in supporting efforts to implement minor capital investments in the short-term.

Flint City Market Site

While the closing of the Flint City Market presents a strong sense of loss for some, it also provides a great opportunity to repurpose the site with new partners in a truly unique fashion. However, its appealing aesthetics and character must be preserved through a thoughtful process that protects its status as a historical asset and strong community anchor.

Building on its proximity to the Flint River and ample parking nearby, the City-owned site could become a great complement to surrounding land uses. The City should encourage the repurposing of the building for either creative uses (i.e. artists' galleries) or Flint River related recreation. For example, the site's location along the river and the Flint River Trail, makes it ideal for a boat and bike rental facility, repair shop, concessions, and river-related recreation programming.

Community Centers

As of 2013, the City had five community centers: Berston, Brennan, Hasselbring, Haskell, and McKinley. All of the programming at these facilities is provided by various non-profit partners.

- *Senior Centers:* Two centers – Brennan and Hasselbring – function as Senior Centers with occasional programming offered to the larger community.
- *Youth Centers:* Berston and Haskell Centers provide services geared toward youth. Both these facilities are well utilized and have reached the point where they cannot physically accommodate more users without significant capital investment.
- *Special Services:* The McKinley Center is run by the VISTA Drop-In Center, an organization that was established in 1985 to serve the mentally ill, developmentally disabled, and/or homeless populations.

Funding

Genesee County passed a senior millage that formally helped fund senior services at Brennan, Hasselbring, and Pierce.

The Pierce Senior Center was closed in 2012 and unfortunately, the City was unable to find a partner to provide senior services at this location. There is no comparable funding source for youth programming.

Wrap-around Neighborhood Centers

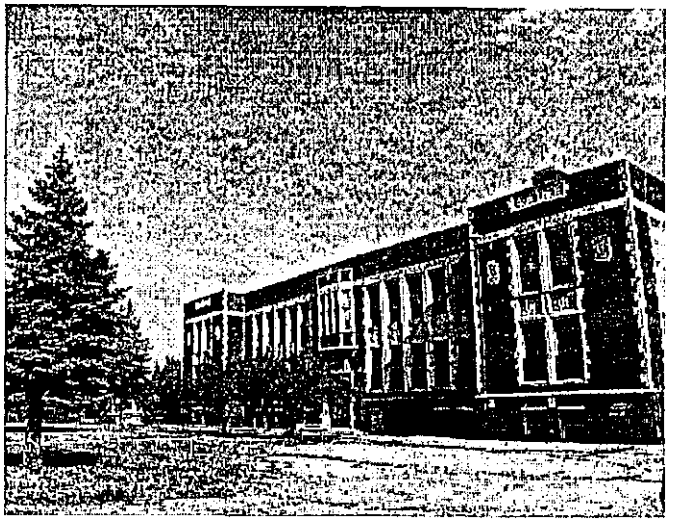
The community has expressed strong support for creating new community centers that offer wrap-around services for youth and their families throughout the City. In many cases, there are closed facilities, such as schools, that could be re-purposed for this use. In the short-term, the City must continue to work with its partners at these five centers to ensure that the facilities remain in operation and continue to provide much-needed programming for residents.

Priority should be given to necessary capital improvements, which will allow these facilities to remain open. However, recognizing that these facilities are inadequate to address the needs of our residents, the City should engage with residents, stakeholders, community-based organizations, and funders, to identify and establish new sites for community centers, particularly in underserved areas. The City should also continue to engage potential partners in re-opening the Pierce Senior Center, which when open, was fully utilized.

BERSTON FIELD HOUSE

Located on Flint's north side, the Berston Field House is home to many Flint legends, past and present. Opened in 1923 and designated as a State Historic Site in 1994, the field house was the first in Flint to allow African-Americans entry and access to programming. Run and operated by volunteers, the center is a prime example of the demand for youth programming within Flint's neighborhoods.

With linked City finances available for needed for capital improvements, the formation of a Berston Authority is underway. This type of public partnership could be a great model for future community centers across the city to ensure the youth of Flint have access and availability to necessary programming and activities.



Flint Community Schools - *Adaptive Reuse*

Declining enrollment and budget constraints have forced the Flint Community Schools District to close several of its facilities in recent years. Starting in the 2013-2014 school year, the district's two high schools will host students in grades 7 through 12, while 14 elementary schools will host students in kindergarten through grade 6. A new alternative program for 7th through 9th grade students, will also be opening at the former Flint Northern High School. FCS has not built a new school since 1972.

In total, the school district currently owns more than 20 closed school properties, some of which have had their structures demolished. The school district recently signed a six-month contract with a commercial real estate broker to market several district properties.

Adhering to the Land Use Plan

As important community anchors within Flint's neighborhoods, the City should advocate for the adaptive reuse of school facilities. Priority should be given to uses that complement the surrounding place identified in the Land Use Plan. For example, within a traditional or green neighborhood, an appropriate reuse of a school might include senior housing, a community center, or small retail center. Within a green innovation area, a former school could appropriately serve as a space for research, or a business incubator.

While the Land Use Plan should serve as a guide to the type of reuse desired by the community, the City should also be flexible in considering innovative approaches to the reuse of the valued community assets. First and foremost, it is important that school facility reuse does not negatively impact quality of life in surrounding neighborhoods. Unconventional reuse proposals may be appropriate if externalities are minimal. The following discussion includes a brief summary of challenges and best practices in the adaptive reuse of schools.

Historic School Buildings

Flint Community Schools owns several 1920s era buildings of potential historic significance. Schools such as Civic Park Elementary, are also located within designated historic districts. When properly maintained, these structures contribute to a positive neighborhood image and identity. Where possible, the City should work with the school district to preserve historic school buildings.

Challenges of Closed School Buildings

School buildings are neighborhood anchors that attract activity and act as a focal point, but when left vacant they can become a liability to school districts, and a potential burden on the surrounding community. A review of existing adaptive school reuse projects indicates that there is not a strong correlation between structural characteristics and certain types of reuse. The needs of the surrounding community, market demand, and developer willingness have more to do with how the building is adapted.

Competing Sellers with Less Red Tape

Public school closures are a growing phenomenon in the nation, but marketing the school sites to buyers for repurposing proves difficult. To begin with, school districts are typically not set up to handle the challenges of property sales – their business is in education administration and not in real estate or economic development.

Additionally, other entities compete with school districts to sell vacant facilities, such as private schools, which can make transactions more nimble and often have facilities in better shape than public schools.

School Location

Location changes the selling game as well – adaptation of a property on a busy corridor, is significantly more feasible than a property that is tucked away into the heart of a residential neighborhood, as many school buildings are. A building in substandard condition that is on an active corridor, will likely have a higher asking price than a less accessible building in great condition.

Best Practices

Physical Assessment & Marketing

Structural factors play a major part in the trouble of repurposing vacant school buildings. Typically, the larger the building, the more difficult it is to find a suitable use– smaller buildings are compatible with a wider range of uses and are easier to locate buyers for. Moreover, aged buildings may require serious renovations by the buyer, the need to be brought into compliance with the Americans with Disabilities Act (ADA), or might have insufficient parking. Excessive associated costs will drive away potential buyers.

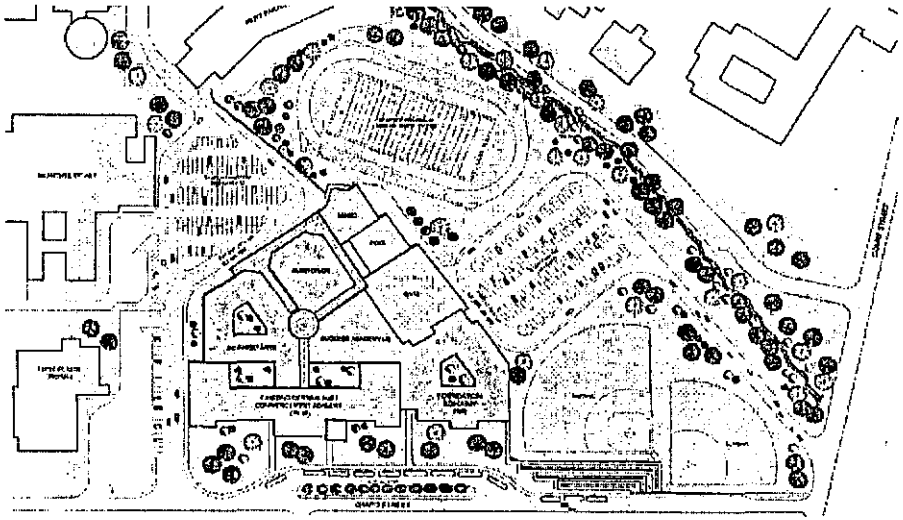
Given the varied age, size, and condition of the large inventory of closed school facilities owned by the FCS, the school district should consider performing an assessment of its properties to inventory condition, floor layout, site access, and other attributes of potential use to interested buyers. Once complete, the assessment should be made readily available to interested parties. Easy access to property information is essential in the effective marketing properties for sale or lease.

Repurposing Committee

Marketing a school property is a critical component of bringing in a new occupant. In addition to the commercial broker contracted by the school district, the City should work with the school district to establish a "repurposing committee" to guide the school sales/lease process. The committee should consist of school and City officials, as well as community stakeholders, and would be responsible for reaching out to potential developers and occupants, seeking input from residents and stakeholders, and determining whether any environmental or market studies are needed prior to redevelopment.

Choosing an Qualified Buyer

When successful, efforts to repurpose closed school property can be a valuable opportunity to rally interest in the area from both community residents and potential buyers. The school district should consider using a design competition to solicit creative and effective solutions for select properties. A "contest" approach may be more likely to attract developers because of the public attention. It could also generate increased interest among local residents and stakeholders. Use of a design competition may also make certain that the buyer follows through on announced plans by requiring construction milestones, adding clauses to the deed that prohibit flipping to other uses, and requiring a proof of funding for the project.



Central High School redevelopment concept (Source: Flint Community Schools)

Sell or Lease?

School districts have two different options of managing the financial transaction of a property: selling or leasing. Selling can be preferable because most school districts are not set up to be landlords. It produces cash and there is a reduction of the district's liability. On the other hand, leasing offers more control over future use, keeps buildings in public ownership, and can often reduce the turnaround time in occupancy.

Leasing works better for buildings in good condition because lessees may not have the capital or time for renovations. For example, the school district currently leases the former Stewart Elementary School building to a church.

Types of Reuse

School buildings are creatively reutilized in a wide variety of methods. The most common occupants that take up home in closed schools are charter schools – 42% of large city school closures are reused by charters. Other institutional uses frequently establish themselves in school buildings as well, such as private schools, college and university buildings, health clinics, community or cultural centers, police stations, homeless shelters, and churches. If appropriate, the property is sometimes even bought up by the municipality, and transformed into a green park or other public space.

Commercial, residential, or office space is also sometimes compatible with the property's structure and location. Commercial and office applications have included neighborhood markets, recording studios, daycare facilities, technology centers, shopping centers, medical offices, school administration offices, movie theaters, and hotels. Residential properties, especially mixed-income apartments or mixed use developments, are also typical adaptations.

- *Educational*
  Holmes Street School in Lansing is experiencing a $2.5 million renovation into a technology and educational hub. The building will house Spartan Internet Consulting, a software security technology company, and the *Information Technology Empowerment Center (ITEC)*, which is a non-profit organization that engages kids in math and science through technology courses and homework help.
- *Institutional*
  Graceland School in Kansas City, MO will be renovated as the *Brandmeyer Community Center* by Swope Corridor Renaissance/Upper Room, Inc. (SCUR), an organization that provides educational opportunities to low-income families. The building will host programs for seniors, a neighborhood meeting space, a coffee shop, a fitness center, and a computer room. It will also provide a home for neighborhood organizations and non-profit organization programs. SCUR received a $1.5 million private donation that will go towards the acquisition and renovation of the site.
- *Residential*
  The former Ypsilanti High, located in Ypsilanti, was built in 1915 and closed in 1995. In 1997, the school district chose a developer to purchase the 160,000 square foot building and renovate it into a 104 unit apartment complex for senior citizens, known as *Cross Street Village*. The rehabilitation cost more than $10 million and was finished in 2000. Seniors, some of whom attended the high school, live in renovated classrooms, laboratories, and offices. Lockers are used as storage and a small movie theater and laundry room had been added.
- *Commercial & Office*
  Swinney Elementary School in Kansas, MO is being purchased by the *Kansas City Sustainable Development Partners, LLC (KCSDP)* to restore the building into medical office suites that cater to small practices and doctor's groups. The historic interior and exterior will be preserved. The total projected cost is $9.3 million and are expected to be financed by historic tax credits, short-term and long-term debt, and developer equity.
- *Arts and Culture*
  Burton International School in Detroit converted to *Burton Theatre*, a facility with a movie theater and art studios. The school already had seats and a projection booth that was built in 1924, and was purchased by an individual for $400,000. It shows movies on weekends and is also home to a Montessori school.

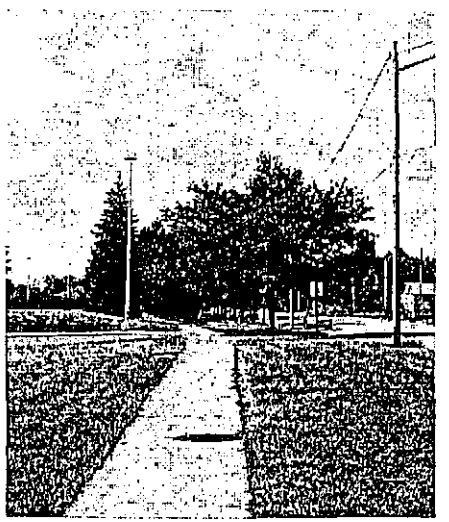
High School Locations

The Flint school district's two open high school facilities are located on the outer edges of the community. While this may be necessary due to current facility conditions and capacity, it also increases the need for busing to schools. A larger issue with the current high school configuration is a concern echoed through numerous community outreach efforts: lack of a central high school facility diminishes the local sense of community. Flint residents have repeatedly expressed a desire for a centrally located high school that helps create a shared sense of community identity across all neighborhoods of Flint, regardless of geography.

Central High School Redevelopment Concept

Central High School (built in 1922) and adjacent Whittier Middle School (built in 1925) were both closed following the 2008-2009 school year due to a combination of declining student enrollment, budget deficits, and increasing maintenance costs at the two facilities. Given its central location and large size, the Central-Whittier campus remains a highly desirable site for school facilities, and residents have expressed a strong desire to see the two schools renovated.

A potential renovation would also allow youth to capitalize on walkability to the Flint Institute of Arts, Flint Public Library, Longway Planetarium, and other key cultural and academic institutions. However, while school officials express a desire to renovate and reoccupy Central High School and Whittier Middle School, budget constraints have limited any action.



INFRASTRUCTURE & UTILITIES

The recommendations of this section address the maintenance and improvement of the City's infrastructure, and should be implemented in conjunction with new development, transportation systems, parks and open spaces, natural areas, and other investment.

Modularization & Decentralization

Modularization and decentralization should be considered for all infrastructure systems.

- Modularization entails the creation of several micro-systems within one larger system. This allows portions of the larger system to be taken off-line for maintenance or repairs without having to shut down a larger portion of the system.
- Decentralization entails the decreased reliance of a system on one resource. For example, multiple energy or water sources provide back-up and redundancy in the event that one source is compromised.

Transportation

Chapter 6: Transportation and Mobility Plan identifies more specific recommendations related to the operational characteristics and capacity of the City's multi-modal transportation network. This section focuses on the maintenance of that system and its relationship to other infrastructure.

Roadway Conditions

In 2012, the conditions of all federal aid eligible roadways in Genesee County were assessed based on the Pavement Surface Evaluation Rating (PASER) system. According to this assessment of 422 lane miles:

- 35 lane miles of roadway are in "good" condition, requiring routine maintenance.
- 309 lane miles of roadway are in "fair" condition, requiring capital preventative maintenance.
- 78 lane miles of roadway are in "poor" condition, requiring structural improvements.

In order to sustain a high-quality system of roadways, the City should:

- Work closely with MDOT and Genesee County to implement the recommendations in the Transportation and Mobility Plan, Genesee County Regional Trail Plan, Genesee County Long Range Transportation Plan, and other adopted policies.
- Continue to explore opportunities for grants to fund roadway improvement projects.
- Coordinate roadway improvement projects with other efforts, including utility upgrades, redevelopment, and streetscaping.
- Prioritize the improvement of roadways throughout the City based on factors impacts to traffic flow, mobility, safety, and access to surrounding land uses.
- Seek opportunities to implement other improvements (i.e. road diets) on roadway segments most in need of repair.

Bridges

Many of Flint's bridges were constructed in the 1960's and 1970's. According to a 2013 MDOT report utilizing the FHWA National Bridge Inventory rating system, nine bridges in Flint are structurally deficient, and 44 are functionally obsolete. (The report includes assessments of all bridges with a span of 20' or more.)

MDOT has included several bridge improvement projects in Flint in its 2013-2017 Capital Improvement Program. The City should continue to work with MDOT and Genesee County Metropolitan Planning Commission to implement these improvements, and monitor the condition of all bridges throughout the community on an on-going basis.

Sidewalks

There are approximately 1,300 miles of public sidewalk in Flint. The FY2014 Capital Improvement Program identifies a shortfall of $35-45 million needed to repair or replace 950 miles of sidewalk. In the past, the City has typically relied on CDBG funding to repair sidewalks, but such funding is increasingly limited and does not address the magnitude of the challenge in Flint. The following are actions that the City should take to improve the sidewalk network, and are consistent with the recommendations contained in *Chapter 6: Transportation and Mobility Plan:*

- Work with MDOT to implement the recommendations in the Transportation and Mobility Plan related to the maintenance of a comprehensive pedestrian network.
- Conduct a detailed inventory of the pedestrian network, including the location and condition of sidewalks, crosswalks, and curb cuts.
- Establish a sidewalk improvement program that identifies priority improvement areas and funding sources, and considers other improvements related to land use, streets, bike paths, parks and recreation, education, and other services and amenities.
- Assess the need for upgrades to signage and technologies to assist pedestrians in crossing public streets.
- Continue to explore funding sources for the improvement and expansion of the sidewalk network.
- Work closely with residents, neighborhood organizations, and businesses to improve sidewalks in localized areas.

CITY OF FLINT
2012 PASER Ratings

Pavement Surface Evaluation and Rating (PASER) is a rating system designed to assess the quality of roadway segments. Developed by the University of Wisconsin-Madison Transportation Information Center, the rating system evaluates roadway conditions on a scale of 1-10. The system is useful for setting priorities for infrastructure maintenance projects, and selecting alternative roadway treatments.

PASER Ratings Legend

Rating 8-10: 35 lane miles of roadway are in "good" condition, requiring routine maintenance.

Rating 4-7: 309 lane miles of roadway are in "fair" condition, requiring capital preventative maintenance.

Rating 1-4: 78 lane miles of roadway are in "poor" condition, requiring structural improvements.

Raingardens to retain and filter water on-site and recharge groundwater reserves (source: Nina Pennies)

STORMWATER UTILITY

The City faces several financial and engineering challenges related to the maintenance of infrastructure that serves a decreased population from when it was built. The City seeing stormwater infrastructure improvements and maintenance. Several other Michigan communities, including Ann Arbor, Adrian, and New Baltimore. This would allow the City to allocate resources to other systems, while working closely with the Utility to ensure that stormwater infrastructure improvements are made in accordance with land use and development policies.

Bike Trails

The City currently has a layered system of regional and local bike trails. (Chapter 6: *Transportation and Mobility* offers a more thorough inventory of Flint's trail network and proposed recommendations.) The Flint River Trail is the backbone of the system, extending 12.4 miles through the heart of the community, and providing access to the City's most important natural element. The 2007 Genesee County Regional Trail Plan highlights proposed improvements to the trail system. These recommendations should serve as the vision for future investment in trail maintenance and expansion.

The City should implement the following actions in order to create a more comprehensive system of bike trails in Flint:

- Work closely with Genesee County to implement the recommendations in the Transportation and Mobility Plan and Genesee County Regional Trail Plan.
- Ensure that the locations of, and connections to bike trails enhance access to open spaces, natural areas, and important destinations throughout the City.
- Prioritize bike path improvements based on their ability to reduce automobile use, provide active recreation, and enhance access to jobs, education, and other quality of life factors.
- Improve the mobility of Flint's youth.

Street Lighting

Street lights are currently owned and maintained by Consumer's Energy. The City is assessing the viability and cost savings of converting the system to energy-efficient LED fixtures. It is anticipated that this would result in an annual energy savings of approximately $1.5 million, and would offset installation costs in just over three years. The City should continue to assess the viability of this approach, and work closely with Consumer's Energy to procure funding for installation and long-term maintenance of the system.

Green Transportation Infrastructure

In addition to the maintenance of traditional transportation infrastructure, the City should support the use of alternative transportation through investment in green transportation infrastructure. Some components of a green transportation infrastructure network include:

- Electric car charging stations
- Green Highways that use permeable surfaces, recycled construction materials, and native plant species to retain pollutants from seeping into watersheds
- Pedestrian bridges that enhance connectivity and remove barriers to walking and biking
- Transportation projects that use recycled building materials
- Greenways that offer multi-modal connections between different parts of the City and foster wildlife migration

Sanitary Sewer System

The Utility Division manages 569 miles of sanitary sewers throughout the City. The system includes gravity sewers and force mains ranging from 8" to 72" in diameter, 11 pump stations, a 10 million gallon (MG) storage tunnel, a 10 MG Retention Treatment Basin (RTB), and a 50 million gallon per day (MGD) wastewater treatment plant known as the Water Pollution Control Facility (WPCF). The WPCF has a peak facility of 80 MGD and uses chlorination and dechlorination to disinfect sewage and discharge it into the Flint River.

A 2011 Sewer System Evaluation Study (SSES) concluded that 93 manholes would be submerged during significant rain events, and that sewage flow was disrupted by 80-90% in some areas by compromised joint integrity or root intrusion. The City should implement the following actions to improve the sanitary sewer system in response to the SSES findings and recommendations:

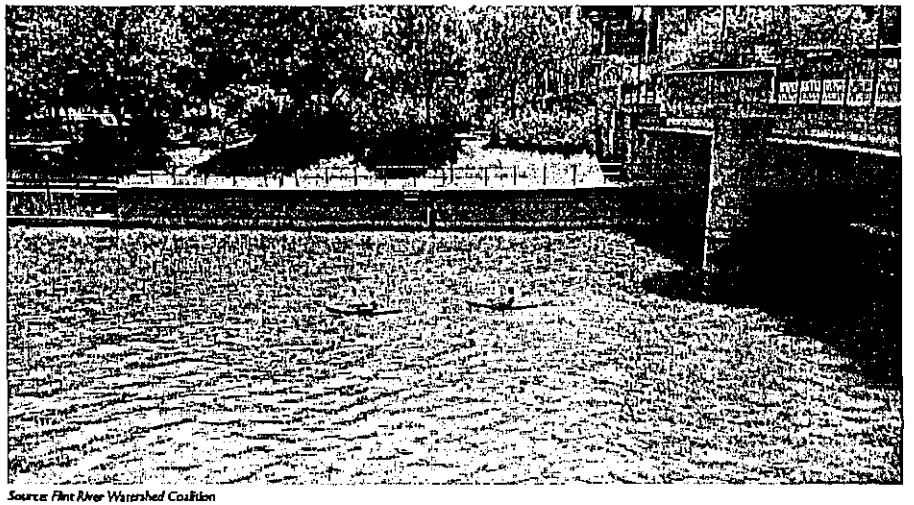
- Continue the on-going monitoring of the condition of all components of the sanitary sewer system.
- Establish a regular annual maintenance program that keeps pace with the anticipated lifespan of sanitary sewer components.
- Establish a short-term capital program to implement the recommendations of the SSES, including the replacement of manhole lids and lining of manholes at 93 locations, or the construction of a 2 MG retention treatment basin at the Chevy in the Hole site.
- Identify regular capital improvement funding and other funding sources to assist with scheduled or emerging issues.
- Coordinate sanitary sewer upgrades with other infrastructure improvement projects.

Additionally, the City should encourage the on-site separation of reusable gray water from sewage water that requires treatment. This would reduce the total amount of demand on the sewer system and provide opportunities for gray water reuse.

Storm Sewer System

The Utility Division operates and maintains 350 miles of storm sewers. The storm sewer is separate from the sanitary sewer, though heavy rain events can create overflow into the City's sanitary sewer system. There is little information regarding the age or condition of the storm sewer system, though it can be assumed it was installed at a time similar to the sanitary sewer system. The City should implement the following actions to improve the storm sewer system:

- Conduct a thorough and comprehensive survey of the age, condition, and performance of the storm sewer system that identifies shortcomings in capacity, danger points related to deteriorated infrastructure, or impediments to efficient performance such as root balls, blockages, or other factors. Establish a long-term maintenance and improvement program that addresses the needs identified in the comprehensive survey.
- Minimize the amount of storm water entering the system, especially during significant rain events, through on-site detention and filtration techniques, including detention and retention basins, rain gardens, residential rain barrels, permeable pavers, green roofs, and green infrastructure.
- Utilize vacant land in neighborhoods, commercial districts, and industrial areas for the creation of shared detention facilities that divert water away from the storm sewer system.



Source: Flint River Watershed Coalition

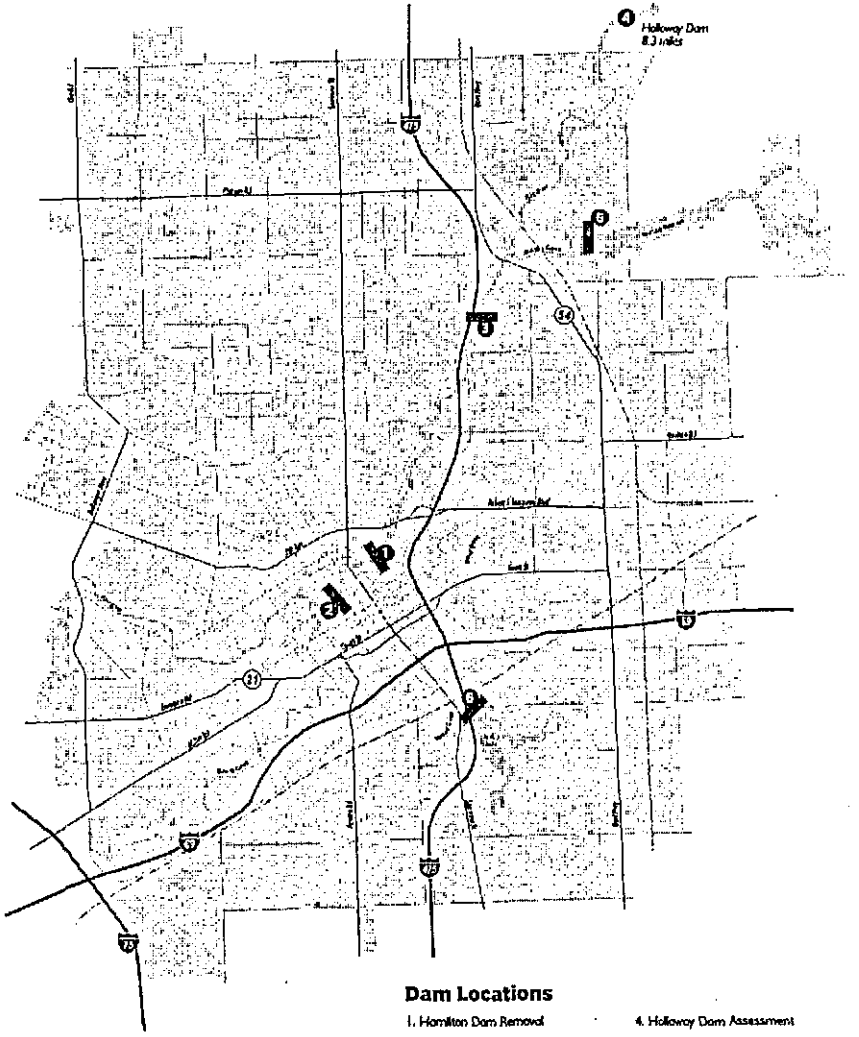
Water

This section includes recommendations related to the treatment and distribution of water, collection and discharge of stormwater and sewer water, and management of the Flint River. (A more detailed approach to the preservation of the Flint River as an environmental asset is discussed in ***Chapter 7: Environmental Features, Open Space, and Parks Plan.***

Flint River Dams

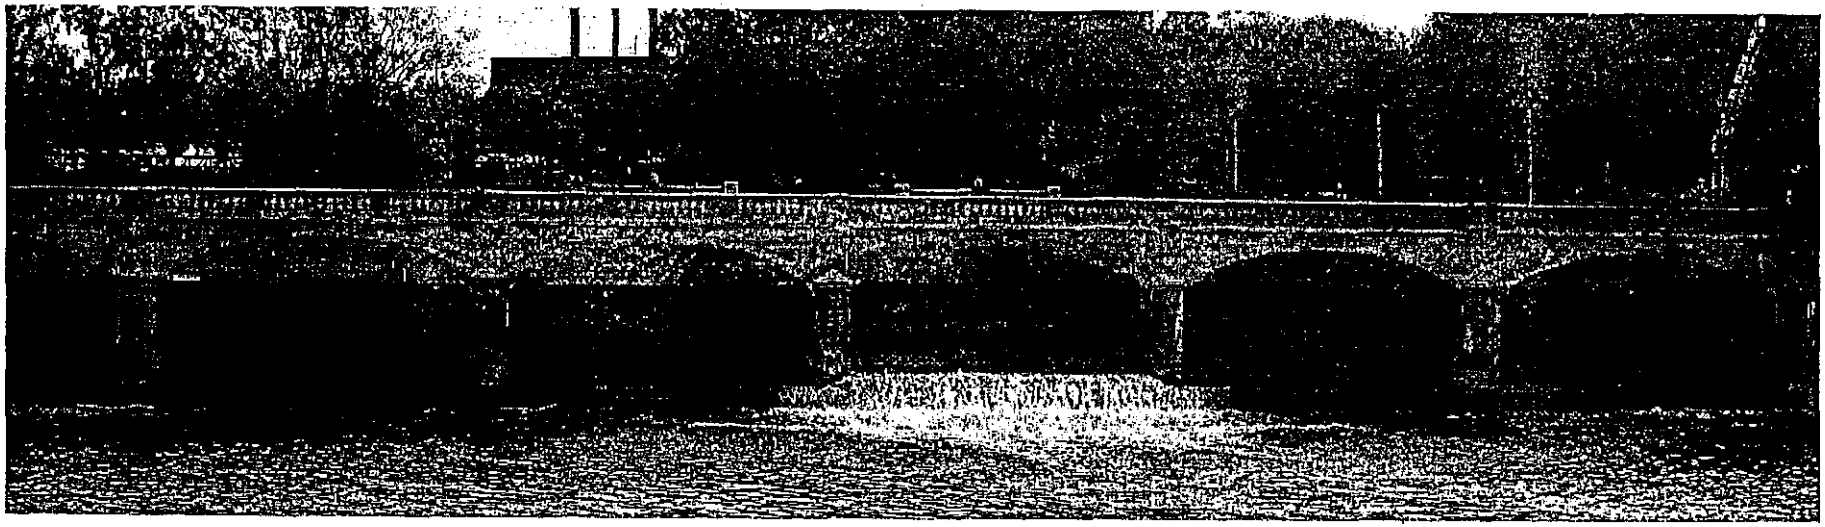
The City of Flint owns and operates six dams along the Flint River and its tributaries. Changes and improvements to the dam network should consider a number of factors, including the condition, functionality, intended benefits, recreational opportunities, and environmental impacts. Recommendations include:

- ***Hamilton Dam Removal.*** The Hamilton Dam is in severe need of repair with several areas of missing concrete and exposed inner rebar, and three of the six floodgates have been decommissioned. Due to its condition, the Hamilton Dam is classified as a High Hazard Critical Dam by the U.S. Army Corps of Engineers, meaning if dam failure were to occur, a potentially dangerous situation could ensue for those within the immediate area. The Hamilton Dam has also been classified by the Department of Environmental Quality as "unsatisfactory" and needing immediate emergency remedial action. As such, the Hamilton Dam is currently unsafe for use by pedestrians as a river crossing. The City should take steps to implement the recommendations of the Flint Riverfront Restoration Plan which call for the removal of the dam and installation of a series of cascading rock formations. This would enhance fish passage along the river and eliminate the burden of dam maintenance.
- ***Fabri Dam Reconstruction.*** The Fabri Dam was built in 1979, and is located downstream from the Hamilton Dam. Removal of the dam would enhance fish passage and river navigability. The City should take steps to implement the recommendations of the 2008 Fabri Dam Conceptual Design Report, and transform the dam into a whitewater run that would enhance the aesthetics of the Flint River and provide a unique recreational amenity in the City.
- ***Utah Dam Removal.*** The Utah Dam sits north of Downtown between Leith Street and North Dort Highway. The dam was built in 1928 and was installed to prevent industrial oil discharges from entering drinking water intakes. The gates are permanently open, and the dam no longer serves a functional purpose. The City should implement the recommendations of a Michigan Department of Natural Resources (MDNR) assessment to remove the dam.
- ***Holloway Dam Assessment.*** Holloway Dam is located approximately 12 miles northeast of Downtown Flint on the Upper Flint River. It was built in 1953 and currently serves as an emergency back-up water supply. As the City transitions to water supplied by the Karegnondi Water Authority, the City should assess the need for emergency back-up water from Holloway Reservoir, and minimize the use of the dam in order to reduce the burden of maintenance.
- ***Kearsley Dam Maintenance.*** The Kearsley Dam is located at the mouth of the Kearsley Reservoir east of Flint. The dam is used for recreation and occasional flow augmentation. The City should continue regular maintenance of the dam.
- ***Thread Dam Fish Passage.*** Thread Dam is currently used for recreation at Thread Lake. The City maintains and operates the dam, and should consider installing a fish passage to enhance its environmental benefits.



Dam Locations

1. Hamilton Dam Removal
2. Fabri Dam Reconstruction
3. Utah Dam Removal
4. Holloway Dam Assessment
5. Kearsley Dam Maintenance
6. Thread Dam Fish Passage



Potable Water

The Utility Division currently manages the maintenance of the water distribution and collection systems, including approximately 600 miles of water main, through the Water Service Center. The City of Flint currently purchases water from the City of Detroit Water and Sewerage Department (DWSD). Flint's waterworks system has a design capacity of 36 million gallons per day (MGD). As a back-up, the City of Flint maintains a water treatment plant that draws water from the Flint River, and has a capacity of 36 MGD. In 2006, improvements were made that were mandated by the Michigan Department of Environmental Quality (MDEQ). However, additional upgrades will be required as part of a new agreement to receive water from the Karegnondi Water Authority.

As part of its mission to reduce the cost of water and efficiency of the distribution system, the City should explore opportunities to provide raw water to industrial uses that do not require fully treated water. This will reduce the cost of water to these users, and therefore operating expenses, as well as the demand on local water treatment facilities.

Water Storage

An assessment conducted by the MDEQ found that Flint's water storage system is adequate in terms of storage, but many aspects of the system are at the end of their useful life, and will require repair or replacement. Components of the water storage system include:

- Dort Reservoir, a 20 million gallon (MG) ground storage facility built in 1966 and is used primarily for emergency water storage and drinking water during peak periods.
- Water Treatment Plant (WTP) elevated tank, with a 2 MG capacity for emergency water capacity and pressure buffering.
- WTP ground storage facility with a capacity of 3 MG used for emergency and peak demand.
- Cedar Street Reservoir, a 20 MG ground storage facility used for emergency and peak demand.
- West Side Reservoir, a 12 MG ground storage facility used for emergency and peak demand.

The City should establish a long-term capital improvement plan for the water storage system, highlighting priority improvements, potential funding sources, and long-term budgeting of maintenance and expansion.

Karegnondi Water Authority

The Karegnondi Water Authority (KWA) was incorporated in 2012 to provide water to the region of the state commonly known as the I-69 Corridor. In order to implement service from the KWA, the Authority is preparing to build a pipeline to Flint. Flint's contribution to the pipeline construction is anticipated to be approximately $81 million, but the cost savings of discontinuing service from the City of Detroit should net benefits in the long-term. In preparation for the construction of the pipeline, the City should assess the capacity requirements of back-up supplies and tailor facilities and infrastructure as needed in order to maximize the efficiency of the storage and distribution system and relieve maintenance costs to the greatest extent possible.

Water Distribution

Flint's conveyance system includes water mains that range from 4" to 72" in diameter. Much of the piping in the system is over 70 years old, and a significant amount of the 48" mains are prone to breaks and unable to provide modern pressures and fire flows. According to a 2011 Water Reliability Study, the distribution and transmission system is "old and in serious need of replacement."

The City has since commissioned a six-year Capital Improvement Program that addresses below-ground infrastructure issues and establishes a 20-year improvement strategy. It is recommended that the City prioritize the implementation of the Capital Improvement Program and continue to closely monitor the condition of the water distribution system.

The distribution system includes over 7,200 valves. The City currently maintains valves as needed, but is transitioning to a preventative maintenance and replacement program that would require $500,000 annually according to the Water Reliability Study.

Also, there are currently 3905 hydrants in the water distribution system, many of which are more than 50 years old. In 2012, the City purchased 80 new hydrants and began a replacement program. Over the next 20 years, the City plans to assess, and regularly replace hydrants that are 25 years of age or older. The Water Reliability Study recommended that $500,000 be set aside annually for valve replacement and maintenance, and $250,000 be set aside annually for hydrant replacement and maintenance. The City should prioritize this funding in its Capital Improvement Program, and continue to explore outside funding sources to assist with the cost of maintenance and replacement.

Water System Efficiency

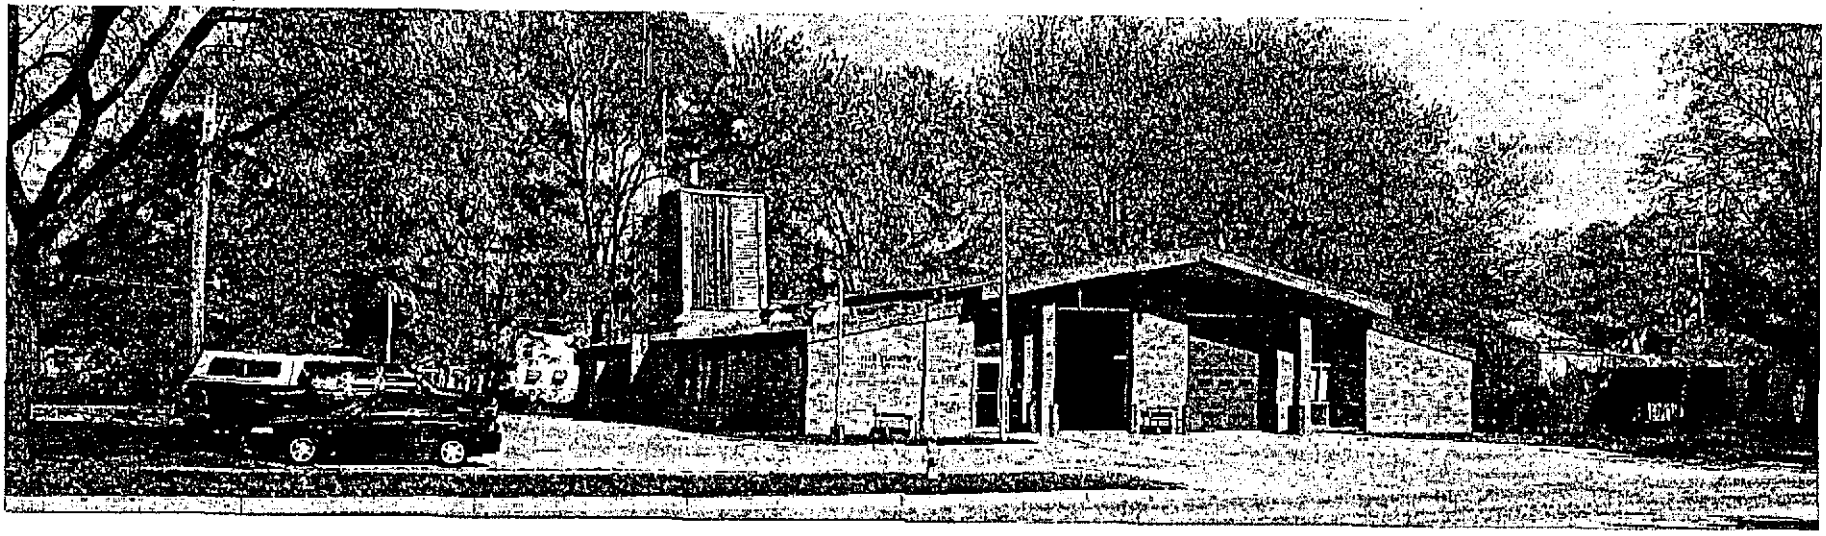
According to the Water Reliability Study, the City's water system is operating at approximately 68% efficiency, far below the typical 85-90% efficiency for other utilities. Reasons for the high-level of inefficiency include water withdrawn from fire hydrants, leaks and water main breaks, faulty or inaccurate meters, unauthorized connections, and unmetered municipal water use. Increasing the efficiency rate to 85% could result in savings up to $2 million annually.

The City should implement the following actions in order to create a more efficient water system:

- Complete a detailed "leak audit" of the City's water distribution system to determine where leaks are occurring, potential measures to mitigate the leaks, and costs associated with those measures.
- Prioritize the recommendations of the leak audit in the City's Capital Improvement Program.
- Implement an education and outreach campaign demonstrating to businesses and residents the need to reduce water usage and ways to do so through low-cost or no-cost changes in behavior and demand.
- Identify opportunities to incrementally discontinue water services in specific areas as they transition to less intense development or green space in accordance with the Land Use Plan.

Long-term Maintenance

The Water Reliability Study calls for the replacement of over 11 miles of major transmission water main, over one mile of minor transmission water main, and the replacement of 3,000 meters each year. This is in addition to the investment recommended for valve and hydrant replacement or maintenance described previously. The City should prioritize these improvements in its Capital Improvement Program, and consider their impacts on economic development, blight removal, reliability, coordinated infrastructure upgrades, and other broader goals when establishing the phasing of water system improvements.



Private Utilities

While the City of Flint is responsible for many public utilities and services, private utility companies play an important role in providing power and data technology infrastructure. The City does not specifically regulate or control these utility services. However, it should consider Consumers Energy, Exelon, Comcast, AT&T, Exede, and other power and telecommunications providers partners in providing Flint residents and businesses with high-quality services, including emerging services and technologies that will make Flint more competitive for economic and industrial development. The following are actions the City should implement in order to support the services of private utility companies:

- Enter into Municipal Franchise Agreements with private utility providers in order to ensure long-term use of the City's *rights-of-way* and comprehensive service provisions to all Flint residents.
- Consider ways to efficiently utilize City infrastructure to accommodate private systems *(i.e. fiber optic data lines running* through sewer mains).
- Coordinate infrastructure improvements to reduce the installation costs of utility upgrades.
- Advocate for quality services to all areas of Flint regardless of localized socioeconomic characteristics.
- Maintain a clearinghouse of private utility providers for residents *to understand options related to* desired services and costs.
- Assess the feasibility of free public Wi-Fi in Downtown Flint and other active commercial or residential areas.
- Advocate for infrastructure upgrades in priority economic development areas as a way of attracting business investment.
- Maintain publicly available *information comparing local* utility providers to peers in other communities in order to demonstrate their relative performance in terms of quality and cost.

WASTE MANAGEMENT *SERVICES*

In March 2013, the City of Flint outsourced municipal trash collection by entering into a multi-year contract with Republic Services, Inc. The City also sold its fleet of 20 garbage trucks to Republic for $1.5 million. This agreement will save an estimated $1 million annually.

Currently, Genesee County's municipalities and townships use a variety of public and private waste management providers (including Republic), creating inefficiencies and redundancy. To generate cost savings, the City should work with the County to explore the potential development of a unified Waste Management Authority. Such an authority would be a regional partnership that collectively develops or bids for one garbage provider. An authority's centralization of services and increased service volume can lead to lower costs, better recycling options, and more effective waste management for Flint.

*Other regions across the na-*tion have successfully executed similar models, including those of Saginaw, MI, Sacramento, CA, and Portland, OR.

In the past, the City has not been an active partner in the development and implementation of the state required County Solid Waste Management Plan, which regulates the collection, transportation, delivery, *and disposal of* solid waste in Genesee County. To lay the foundation for the creation of a potential Waste Management Authority, the City must become more involved in the development and implementation of the Solid Waste Management Plan and demonstrate a more collaborative spirit with the County.

Recycling Services

In April 2013, as a result of a new contract with Republic Services, Inc., Flint residents were once again provided curbside recycling. A similar City managed recycling program was terminated in 2001 due to budget cuts. While this new service is showing promise, participation rates remain low, leading to high-fixed costs.

The City and key environmental partners should work with Republic to increase resident *buy-in and awareness of recycling* opportunities. The City should also work to expand recycling to include all multi-family housing. By increasing the number of tons recycled annually, the City can be a responsible steward of the environment and reduce costs.

EFFICIENT CITY GOVERNANCE

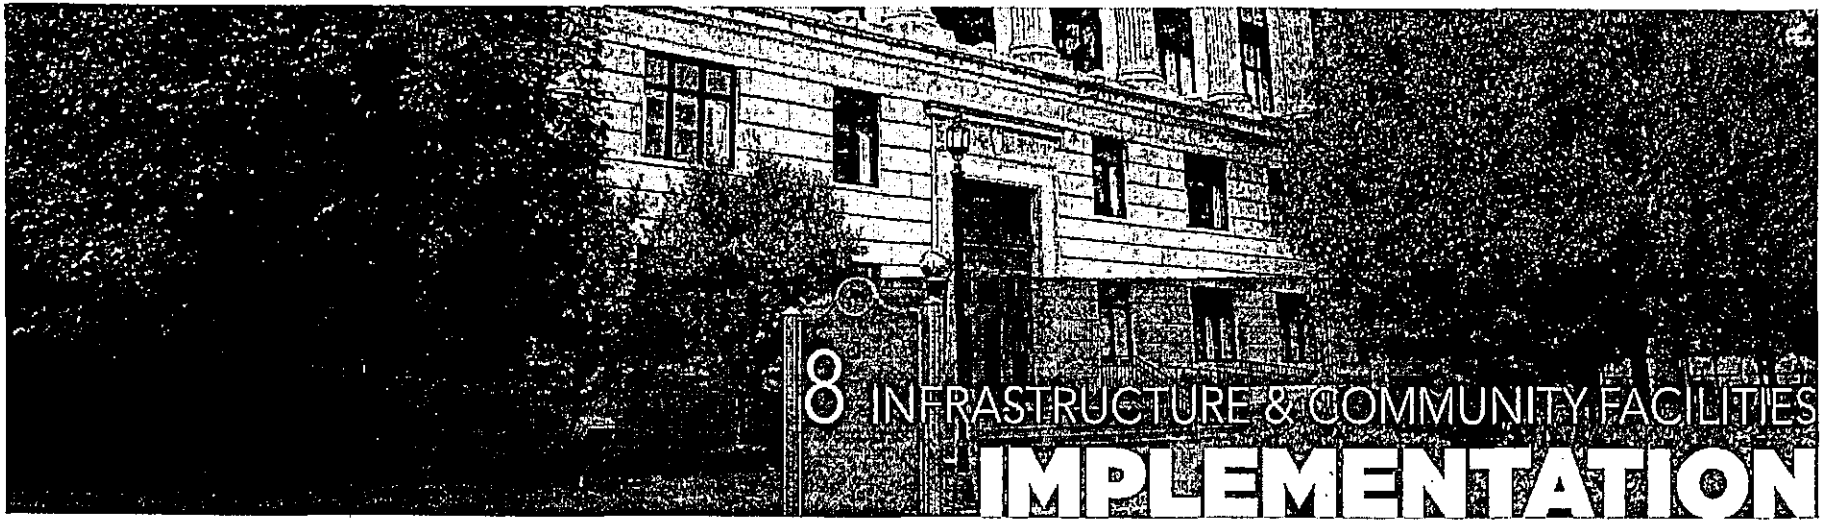
The Infrastructure and Community Facilities Plan identifies a wide range of infrastructure and capital improvement projects. Successful implementation of these projects will require a fiscally sound and strategic approach to city governance. The Master Plan is the first step in this direction. It is a model of transparency, the foundation for future community engagement, and the beginning of long-term strategy and *planning in City Hall.*

Multi-Year Budgeting

Under emergency management, the City has begun to practice multi-year budgeting and forecasting. This approach to budgeting should continue as it will enable the City to properly plan for large projects that can take more than a single fiscal term to complete and will provide a blueprint beyond immediate needs. In planning for the long-term health of the City's infrastructure, it will be important to have a firm understanding of anticipated revenues and what funds will be required to close the gap between need and financial capacity.

The City should implement a two-year budgeting process based on five-year financial projections and a five-year strategic plan. This strategic plan should be based on Master Plan recommendations, and should be made readily available to the public for review along with all financial information, to ensure the transparent use of funds.

Additional discussion regarding the use of the Master Plan to inform budgeting and other aspects of *City governance is located in the* concluding chapter, *Chapter 12: Moving Forward.*



8 INFRASTRUCTURE & COMMUNITY FACILITIES IMPLEMENTATION

This section presents the strategies needed to implement the goals and objectives of the Infrastructure and Community Facilities Plan. Taken together, the objectives and strategies included in this section provide specific direction and serve as a guide for the evaluation of development proposals and land use alternatives.

To provide the City with a reliable policy guide for decision-making, the objectives and strategies are based significantly on community input received through the master planning process. In addition to broad community input, these objectives and strategies are based on input from the 10-member Infrastructure and Community Facilities Advisory Group, Steering Committee, City officials, City staff, and observations and assessment from the Imagine Flint Project Team.

Implementation Matrix

The following Implementation Matrix groups strategies by topic within each objective and identifies anticipated time frame, relative cost, and the entities, including City of Flint departments and partner organizations, potentially responsible for the implementation. The matrix also identifies key metrics needed to track implementation progress.

Time Frame

A general timeframe is assigned to each strategy, considering the cost of various types of improvements and their ability to set other actions in motion. Generally, low-cost strategies with easy implementation are given the short-term time frame, though some other actions are given this designation based on their high-level of priority in meeting community objectives or ensuring the safety of residents.

Each strategy in the Implementation Matrix is indicated with one of the following:

- *Short:* low-cost, ease of implementation, directly addressing top priorities, or critical to the advancement of other strategies, and to be implemented within the next 1-5 years
- *Medium:* important actions that have some level of significant cost, and can be implemented within the next 5-10 years
- *Long:* actions that often require significant amounts of funding that must be planned for over time, or require other strategies to be completed prior to their implementation

Public Cost Estimate

Public cost estimate is represented by a scale ranging from $ to $$$. The costs in this column refer *only* to public costs. Below is a description of the cost scale:

- $: Actions that require primarily internal staff time requiring mostly regulatory changes, policy updates, or strategic partnerships with limited outside funding required
- $$: Actions that require outside consulting services assistance or relatively minor investment in infrastructure or project development
- $$$: Actions that require intensive planning, engineering, or design, and significant investment in infrastructure or project development

Responsible Entities & Partner Organizations

City government alone is not capable of implementing the Master Plan. This is a community vision which relies upon Flint's greatest assets, its people and community stakeholders to help implement desired aspirations.

With regard to citing those entities responsible for implementation, it should be noted that it is anticipated, from a policy standpoint, that the Mayor and City Council will be involved in the majority of these actions.

Where a City Department should be involved, that department has been listed. Where general administrative leadership is needed, the City of Flint has been listed. Strategies, such as recommended technical studies and analyses that would likely benefit from outside expertise, have also been highlighted.

Unforeseen Partnership Opportunities

Every effort was made to identify a comprehensive list of potential partner organizations for inclusion in the implementation matrix. As a community of over 100,000 with a rich history of volunteerism and over 100 foundations active in Genesee County, there may be instances where a deserving organization that is well-matched to one of the plan objectives or strategies, has been excluded from a list of potential partners for a given topic.

Similarly, there may come a time when a partner organization identified in the implementation table merges with another organization or otherwise ceases to exist. As with the rest of the Master Plan, the implementation table is a flexible document that should be regularly updated and revised to reflect the evolving needs and assets of the Flint community.

Progress Indicator

Key progress indicators have been provided for each strategy grouping. Progress indicators identify quantifiable metrics for which data should be available on a regular basis, and indicate desired trends for each metric. These indicators represent measurable achievements that move the City toward realization of Master Plan objectives. These progress indicators will enable the City to monitor its effectiveness at implementing plan recommendations.

INFRASTRUCTURE & COMMUNITY FACILITIES IMPLEMENTATION MATRIX

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Objective 1	**Repair and right-size key neighborhood infrastructure to increase resident safety, quality of life, and efficiency.**				
Access & Infrastructure	Evaluate existing traffic patterns and densities on City streets to implement "road diets," or the narrowing of less traveled streets to reduce maintenance costs, increase visual appeal, and promote walkability.	Long	$$$	• City of Flint Transportation Division • MDOT	• Decrease in the number of lane miles of roadway
	Partner with neighborhood groups to identify sidewalks in need of repair or replacement and develop a streamlined system of prioritization and implementation.	Medium	$$		• Increase in number of miles of sidewalks improved or installed
	Construct new and repair existing crosswalks in key areas to promote walkability and safe passage.	Medium	$$		• Increase in number of ADA-compliant crosswalks
Neighborhood Facilities	Re-evaluate existing community centers and City park structures to ensure prioritization based on proximity to residents, overall demand, and location relative to other parks.	Medium	$$	• City of Flint Parks and Recreation • Flint Community Schools	• Increase in investment per capita in community centers and park structures relative to the population within a given service area
	Increase structural quality of neighborhood service centers (formerly police mini-stations).	Medium	$$		
	Partner with the Flint Community School District to market and repurpose vacant school sites for uses consistent with the Land Use Plan.	Medium	$$		• Increase in square footage of former school structures re-purposed for active uses
Objective 2	**Ensure longevity, reliability, and efficiency of City utilities.**				
Long-term Planning	Modify infrastructure, design standards and landscaping palettes to reflect anticipated changes in climate.	Short	$	• City of Flint Utility Division • City of Flint Parks and Recreation	• Decrease in the ratio of linear feet of active infrastructure to the population of Flint • Linear feet of utility lines or facilities analyzed, inspected, and recorded within the past 12 months
	Continue proactive development and execution of long-term infrastructure goals, capital improvement plans, and budgeting strategies.	Short	$		
	Coordinate gradual implementation of green spaces and lower density neighborhoods with the City utilities department in order to reduce fixed infrastructure costs and "right size" water and sewage piping.	Medium	$$		
	Leverage latest computer technologies to map all utilities and public services and make information readily accessible in a central database to City departments and key stakeholders for informed decision-making.	Short	$$		
Service Coordination & Infrastructure Planning	Work with Consumers Energy to assess existing lighting footprint and reorient light placement to meet current and expected future needs.	Medium	$	• City of Flint Utility Division • Private Utility Companies • Karegnondi Water Authority (KWA)	• Decrease in the cost per unit for the delivery of energy, water, and other utilities • Increase in the amount of permeable surface throughout the City • Decrease in the number of reported incidents of utility breaches caused by demolition or excavation
	Explore the viability of local energy or hot water districts that provide efficiencies to users and integrate green technologies for the creation and distribution of resources and services.	Medium	$		
	Implement new policies, in concert with the state, to diversify opportunities for managing rainwater.	Short	$		
	Continue development of the KWA pipeline and make necessary upgrades in water infrastructure – such as water treatment, pumping, and transmission piping – to maximize benefits of the new partnership and ensure adequate water access for residents.	Medium	$$$		
	Evaluate options from KWA development for moving towards a coordinated regional water distribution network.	Long	$$$		
	Strengthen coordination between demolition entities and City utilities, gas, and power companies.	Short	$		
	Establish a Solid Waste Authority with Genesee County as a way to reduce garbage costs.	Long	$$		
	Coordinate with neighboring communities, Genesee County, and service providers to explore new infrastructure opportunities.	Short	$		
Preventative Maintenance	Develop a comprehensive plan to address the City's six failing and/or obsolete dams along the Flint River.	Short	$$$	• City of Flint Utility Division	• Decrease on the linear footage of dams designated as hazardous
	Implement corrective actions for the City's sewer system – as prescribed in the December 2011 Sewer System Evaluation Study, funded by the Michigan Department of Environmental Quality – and continue planned repairs and upgrades over time.	Medium	$$$		• Decrease in the percentage of manholes impacted by inflow and infiltration
	Identify and implement techniques to divert some portion of rainwater from City infrastructure, such as rain barrels, on-site detention, permeable surfaces, etc.	Medium	$$		• Increase in the total acreage of private properties that utilize innovative stormwater management techniques
Objective 3	**Modernize City and community facilities.**				
Maintenance & Reuse	Coordinate all upgrades and repairs of City facilities such as City Hall, the Police Department, and the Fire Department with detailed priorities outlined in the Capital Improvement Plan.	Medium	$$	• City of Flint Utility Division • Police Department • Fire Department	• Decrease in energy and water usage for publically-owned facilities and properties • Decrease in the total number of days public facilities remain vacant or inactive
	Develop a City property disposition procedure to ensure the sale of unused City properties to responsible partners with a priority given to buyers and projects with a demonstrated public benefit.	Short	$		
	Recognize the public library as a key community asset and work with a wide range of partners to ensure its long-range sustainability.	Medium	$$		
Modernization & Performance	Embrace best practices in school design and the learning environment shown to increase academic capabilities of students.	Medium	$$$	• City of Flint Utility Division • Flint Community Schools • Local Non-profit organizations	• Increased investment in improved or expanded public facilities • Increase in the number of households or square feet of businesses with access to free wi-fi • Increased square feet of public buildings and properties that attain LEED Silver certification or better • Increase in ADA-compliant community facilities
	Partner with the county and key local stakeholders to fund the re-opening, repair, or expansion of select community centers, City pools, and recreational facilities, as necessary.	Medium	$$$		
	Work to develop free wireless Internet accessibility in key community areas.	Medium	$$		
	Implement green building techniques in public facilities in order to minimize reliance on infrastructure and respond to long-term climate change.	Medium	$$$		
	Development and implement an ADA Transition Plan for community facilities and infrastructure.	Medium	$$$		

INFRASTRUCTURE & COMMUNITY FACILITIES IMPLEMENTATION MATRIX

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Objective 4	**Leverage green technology to reduce energy costs, improve air quality, and increase long-term sustainability.**				
Supporting Systems & Programs	Transition street lights from high-pressure sodium or mercury vapor bulbs to LEDs and utilize off-grid, solar power for generation in extremely low-density/high-vacancy areas.	Medium	$$	• City of Flint Utility Department • City of Flint Transportation Division • MTA • Private Utility Companies	• Decrease in the percentage of purchased power used to service municipal facilities and infrastructure • Increase in the percentage of households and businesses that have access to curbside recycling programs • Increased percentage of MTA and City vehicles that use clean burning fuels or electric power • Increased energy and water savings of improvements made to public facilities
	Expand participation in recycling and composting programs to reduce waste and strain on City garbage services.	Medium	$$		
	Increase awareness of water-conservation options in both City facilities and in the home.	Short	$		
	Work with MTA to expand their bus fleet using alternative energies.	Medium	$$		
	Partner with energy companies and local stakeholders to develop new creative financing opportunities for implementing green technologies that have high up-front costs but pay back savings over time.	Short	$		
Development Practices	Retrofit City and institutional properties, and site the latest in on-site energy generation such as geothermal, solar, and/or wind to reduce City energy costs.	Long	$$	• City of Flint Planning & Development Department • Local Colleges & Non-profit Organizations • City of Flint Utility Department	• Decrease in the percentage of purchased power used to service municipal and institutional facilities and infrastructure • Increase in the total square footage of white or green roofs
	Provide a toolbox for residents and business owners highlighting techniques for on-site stormwater management, energy reduction, reduced water usage, green building techniques, etc.	Short	$		
	Promote white topping of roofs & development of rooftop gardens.	Medium	$$		
	Encourage green site selection, site development, and building practices, as defined in the Land Use Plan.	Short	$$		
Objective 5	**Expand opportunities for blue infrastructure development.**				
Water Management	Utilize open spaces and surplus land, as defined in the Land Use Plan, for targeted absorption of rainwater to lessen stress on City sewers.	Medium	$$	• City of Flint Utility Department • Karegnondi Water Authority (KWA)	• Per capita increase in the amount of stormwater collected and managed on-site
	Capture and clean stormwater.	Medium	$$		
	Leverage creation of KWA pipeline to develop innovative blue infrastructure spin-off and economic development opportunities.	Medium	$$$		
Objective 6	**Develop and exectute a coordinated City network of street trees.**				
Urban Tree Canopy	Establish a list of appropriate plant materials that are resilient to anticipated climate change, and reference the plant list in public works standards and zoning regulations.	Short	$	• City of Flint Planning & Development Department • City of Flint Transportation Division • MDOT	• Increased number of climate-adaptive trees and landscape installations planted annually • Increased number of trees planted annually within 100' of highways and railroads • Increase in the number of trees and amount of landscape area in the public realm along arterials and collectors
	Implement carbon forest infrastructure around highways and railroads to minimize neighborhood air pollution and noise.	Medium	$$		
	Plant trees along main corridors to increase visual appeal, reduce pollution, mitigate storm water runoff, and counter blight.	Long	$$		
Objective 7	**Provide municipal services consistent with the Master Plan.**				
Coordination & Collaboration	Respond to place-specific needs based on the Future Land Use Plan.	Medium	$$$	• City of Flint Planning & Development Department • City of Flint Utility Department • Local Non-profit organizations	• Increase in the number of "hits" for on-line or printed information regarding the performance of City services • Decrease in the total cost of providing a continued level of services through consolidation or cooperation
	Improve citizen access to performance information and complaint resolution related to City services.	Medium	$		
	Simplify the City's departmental structure around Finances, Infrastructure, Planning and Development, and Public Safety.	Short	$$		
	Identify and examine opportunities for shared services.	Medium	$$		

INFRASTRUCTURE & COMMUNITY FACILITIES IMPLEMENTATION MATRIX

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Objective 8	**Work with residents, businesses and other stakeholders to foster development of the City and its infrastructure in a manner consistent with the Master Plan**				
Organization & Information	Provide Flint residents and community volunteers with information and training that enables the capacity to create change in neighborhoods.	Short	$	• City of Flint Planning & Development Department • Local Non-profit organizations	• Increase in the number of trained neighborhood liaisons
	Establish a City of Flint Planning and Development Department responsible for leading and sustaining long-term planning, blight elimination, building safety, permitting/licensing and community/economic development.	Medium	$$		
Objective 9	**Operate in an open and financially stable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits.**				
Responsibilities & Accountability	Establish a revenue estimating process that assures integrity in the budgeting process.	Short	$	• City of Flint Planning & Development Department • City of Flint Utility Division	• Decrease in annual discrepancy between budgeted and actual costs for various services or projects • Increase in the City's municipal bond rating
	Update and expand the City's financial information available online for public review.	Short	$		
	Establish a 2-Year Budget along with a 5-Year Financial projection and a 5-Year Strategic Plan.	Short	$		
	Review the City's Public Improvement Fund capacity for general infrastructure improvements, deficit elimination and bond financing.	Short	$

MASTER PLAN FOR A SUSTAINABLE FLINT

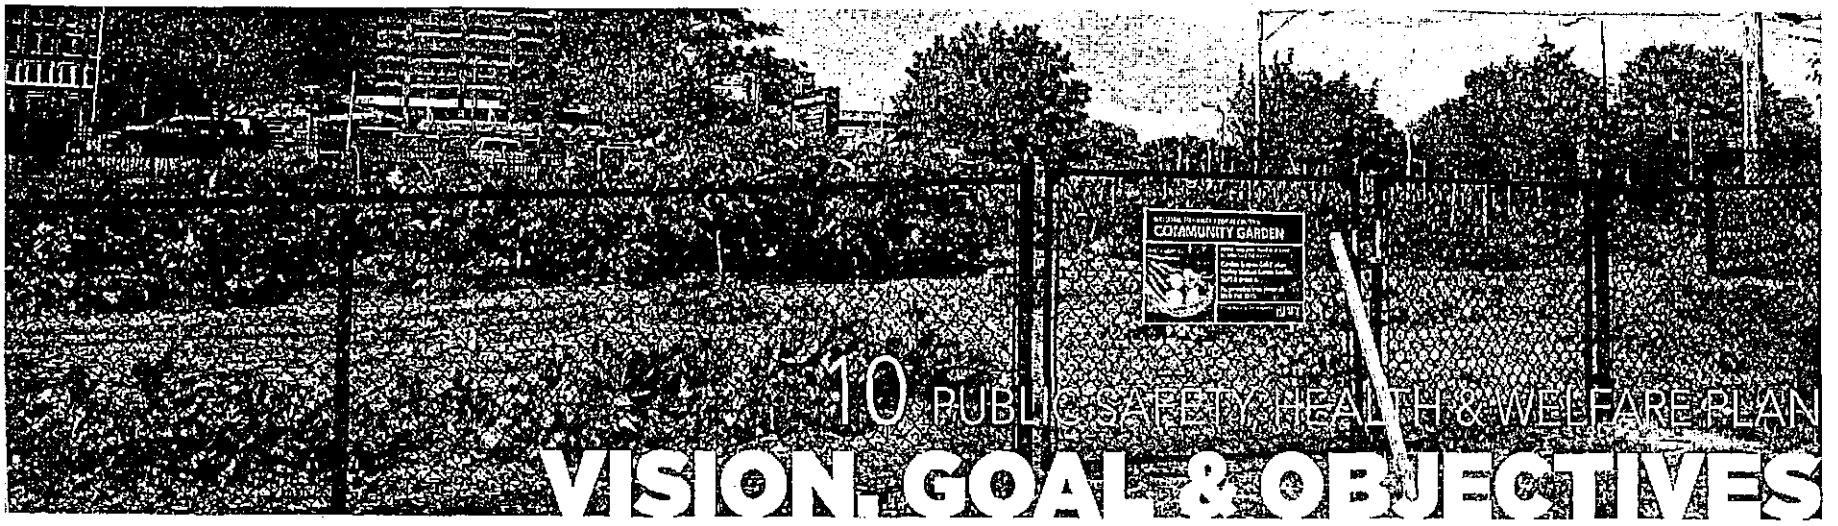
10 PUBLIC SAFETY, HEALTH & WELFARE PLAN

VISION P. 233

GOAL & OBJECTIVES P. 235

RECOMMENDATIONS & BEST PRACTICES P. 237

IMPLEMENTATION P. 255



10 PUBLIC SAFETY, HEALTH & WELFARE PLAN
VISION, GOAL & OBJECTIVES

Imagine Flint as one of the safest cities in the country, with a proactive and technologically-savvy police force trusted by residents, and a coordinated partnership between law enforcement, residents, educators, social service providers, and public health officials to drive down crime.

Imagine Flint as a regional hub for fresh and locally grown produce, where a thriving movement of entrepreneurial growers transform vacant lots into gardens and provide healthy foods to schools, farmers markets, restaurants, and stores across the City.

Imagine all of Flint's youth growing up in stable neighborhoods that are clean, safe, and welcoming, patrolled by police officers known to residents and home to community centers providing around-the-clock activities and services for youth.

Over the next twenty years, Flint can achieve this vision. However, we must first face existing realities: Flint leads the nation in violent crime, relations between the police and the public are strained, many neighborhoods are saturated with liquor stores and blight, and too many residents lack a healthy diet of fresh foods and exercise.

The Public Safety, Health, and Welfare Plan is a road map to overcoming those obstacles and to actualizing a new community vision. By following the recommendations outlined in this chapter, Flint can become a safe and healthy place for all residents to live and thrive.

SOCIAL EQUITY & SUSTAINABILITY

Gun violence, mass incarceration, and negative health outcomes disproportionately affect low-income communities of color. By building trust between the police and residents, investing in our at-risk youth, and providing the tools necessary for living a healthy life, Flint can reduce inequities and become one of the healthiest and safest communities in Michigan.

QUALITY OF LIFE

Public safety and health are fundamental pieces of overall quality of life. Neighborhoods should be safe, secure environments that lead to prosperous individuals, positive social interactions, and lifelong healthy behaviors.

YOUTH

Children and young adults are disproportionately affected by unsafe and unhealthy environments. Actively engaging the City's youth has significant effects on reducing crime, decreasing unhealthy behaviors, and promoting positive choices during adulthood. We must provide our youth with safe environments in which to live, learn, and play.

RESHAPING THE ECONOMY

The welfare of a community has dramatic effects on economic growth. Crime and the perception of crime stifle investment, while employers seek healthy, reliable workers. In Flint, the healthcare and medical industries are also major drivers of the economy, and the development of a robust local food system will lead to job growth.

ADAPTING TO CHANGE

Negative trends in health and crime statistics are symptoms of the changes that have occurred over the past few decades. Moving forward, Flint must develop new approaches to solve persistent, longstanding problems. This includes treating crime as a public health epidemic and recognizing that key investments must be made in not just law enforcement, but also education, healthcare, and social services.

CIVIC LIFE

Community health and safety are intertwined with a thriving and dynamic civic life. Safe and active public places allow opportunities for interaction and discussion among neighbors that would not happen otherwise. Similarly, healthy outdoor activities such as running or hiking, as well as team sports such as football or baseball, bring people of different backgrounds together and increase civic camaraderie.

GOAL

Flint will be a safe and healthy place for all residents and visitors.

GUIDING PRINCIPLES

The ways in which the Goal & Objectives of the Public Safety, Health & Welfare Plan have been influenced by the guiding principles are indicated using the following symbols.

- ○ Social Equity & Sustainability
- ◉ Reshaping the Economy
- ○ Quality of Life
- ◔ Adapting to Change
- ● Health
- ◔ Civic Life

Objective #1

Eliminate environmental contributions to crime.

Demolishing abandoned homes, fixing broken street lights, and shuttering liquor stores out of compliance with the law shields our youth from harm and increases overall quality of life. Smart urban design, community partnerships, and city planning can also facilitate more "eyes on the street," thus reducing the likelihood of criminal activity.

○ ●

Objective #2

Build trusting relationships between police and residents, empowering citizens to contribute to the safety of their neighborhoods.

A trusting partnership between police, residents, and local stakeholders is critical in preventing and solving crimes. Expanded community policing activities, consistent two-way communication, and strategically located neighborhood service centers will empower residents to actively work with the police in their neighborhood to ensure safe streets.

○ ○ ● ◉

Objective #3

Develop a state-of-the-art, efficient, and proactive public safety departments.

Flint's police and fire departments must be fully staffed and modernized with high-tech equipment to become efficient, well organized, data driven, and proactive. By developing close partnerships with other public safety bodies and arming officers with state-of-the-art tools, our police can aggressively deter criminal activity and quickly solve crimes.

○ ◉

Objective #4

Reduce gun violence, violent crime, and arson.

Flint must overcome its reputation as one of the nation's most violent cities. While remaining tough on violent crime, we must also recognize that Flint cannot "arrest its way out of the problem." As such, the City and local law enforcement should take a holistic approach through partnerships with community organizations and social services, health providers, and educators to offer alternative paths to at-risk youth and ex-offenders.

Ridding the streets of illegal guns and violent criminal activity will not only save lives, but stabilize families, stimulate economic investment, increase physical and mental health outcomes, and reduce social inequities.

○ ○ ●

Objective #5

Ensure universal access to quality healthcare services and facilities.

All citizens deserve quality, accessible, and affordable health services. Residents must be made aware of the extensive network of existing health programs, insurance enrollment opportunities, and preventative care services available to them. While the City's role in healthcare is very limited, it should actively support policies, practices, and funding opportunities that expand services and the accessibility of facilities as well as positive health outcomes.

○ ●

Objective #6

Develop a local food system.

Transforming vacant lots into gardens or urban agriculture plots is a creative re-use of land that produces affordable fresh foods for residents. A new network of local and sustainable growers also reduces "food deserts," creates jobs, and provides valuable health and civic benefits to the community.

○ ○ ○ ○ ● ○

Objective #7

Promote exercise and active lifestyles.

Improvements in the City's built environment – such as increased walkability, more miles of bike lanes, and enhanced Flint River recreation – facilitate exercise and healthy behaviors. Active lifestyles increase health and happiness, and provide our youth with numerous extracurricular and recreational activities.

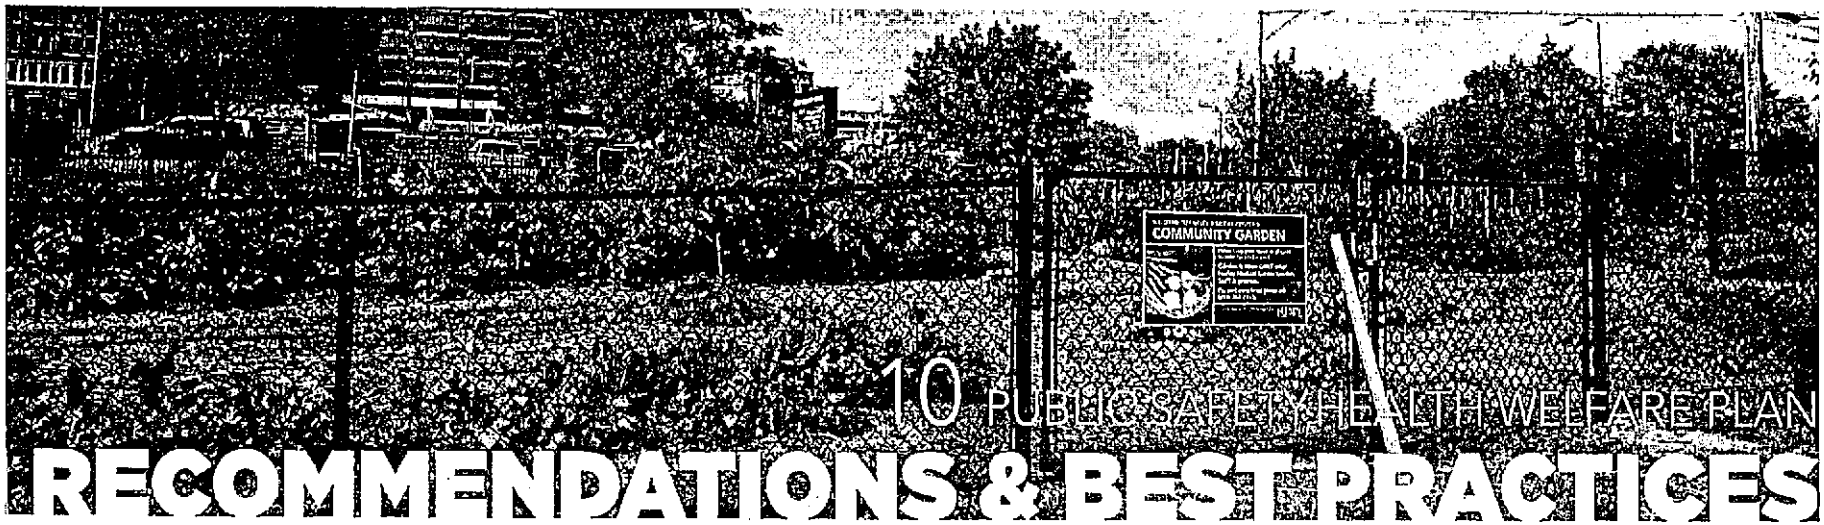
○ ●

Objective #8

Provide youth with a safe and healthy upbringing.

Flint must protect its youth from harm and align resources to invest in their future. By reducing child poverty, educating students about healthy lifestyle choices, and preventing at-risk youth from criminal activity, we can ensure that our next generation of leaders are healthy, properly educated, and fully prepared for adulthood.

○ ●



10 PUBLIC SAFETY, HEALTH, WELFARE PLAN

RECOMMENDATIONS & BEST PRACTICES

The Public Safety, Health, and Welfare Plan addresses Flint's most critical social issues.

Crime affects not only the everyday quality of life for Flint's residents, but also the City's regional and national perception. Moving forward, increasing the safety of residents will be dependent upon providing adequate resources to our at-risk youth; finding innovative new strategies, technologies, and partnerships to prevent crime; and sustaining effective, proactive, and responsive police and fire departments. Success can only be achieved by strengthening collaboration between City staff, State and County officials, community organizations, social service providers, and concerned residents.

Health and welfare are closely linked to other important chapters of this Master Plan. Access to local healthy foods will be fostered by strategic long-term land use policies and equitable economic development strategies. Active recreation and access to the environment will be dependent upon the availability of quality open spaces, and the preservation of the Flint River and other ecosystems.

Healthy transportation choices will rely on investment in sidewalks, bike paths, and supporting systems that provide full accessibility to all residents, regardless of age or level of mobility. Social service providers and community organizations must reinforce agencies and institutions that provide health care and education. Through this holistic and collaborative approach, the Flint community will be empowered to instill positive change that leads to a healthier population and a higher quality of life.

STATE-OF-THE-ART POLICE & FIRE DEPARTMENTS

The Flint Police Department (FPD) and Fire Department (FFD) make the best use of limited funding, but face staffing and equipment shortages that hinder their ability to adequately protect and serve the public. A top priority of the City should be to identify new revenue streams that can help sustain adequate personnel levels.

That said, given the uncertainty of funding in the future, it is more important than ever to find innovative new methods of reducing crime and arson with limited resources. This may include deepening patrol and investigative partnerships with other law enforcement agencies, developing strategic relationships with community groups, engaging youth, and embracing new technologies that can more efficiently deploy resources and stop criminal and arson activities before they happen.

Public Safety Budget

The revenue for the Flint Police and Fire Departments is primarily drawn from the City's General Fund. Overall, 80% of the General Fund is allocated to public safety, which includes funding for 9-1-1 operations and the District Court. Although the City maintained a balanced budget during the 2013 fiscal year, long-term public safety funding is not stable. Deficits are projected in the future and significant parts of police and fire operations are funded through grants that will eventually expire.

In November 2012, Flint voters authorized a property tax increase that is projected to raise $5 million annually for public safety. The increased tax levy will help mitigate staff losses and bring more stability to personnel levels that currently are dependent on short-term grant funding. With property values in the City continuing to decline, the identification of new sources of funding, including increased property taxes, increased income taxes, state revenue sharing, and grant funding is crucial for providing basic public safety services.

Staffing & Collaboration

According to a year-long study conducted by Michigan State University, both the Police and Fire Departments are understaffed, causing inefficiencies in delivering effective service. Budget cuts have forced the City to layoff police officers and firefighters over the past five years. In 2013, the City employed 129 police officers, compared to 265 officers in the 2008 fiscal year. Currently, the City has just 1.2 officers per 1,000 residents, which is lower than Detroit (4 officers per 1,000 residents), Grand Rapids (1.6), and Lansing (1.9). According to the report, the ratio of violent crimes to detectives is 118:1, twice as high as any comparable city.

Insufficient staffing levels make it difficult for the FPD to implement proven crime-fighting strategies, including a community policing strategy. Furthermore, the inadequate staffing levels are causing police response times to rise. The number of detectives on staff is also very low at just 15, especially when compared to the high amount of violent crime investigations.

Collaboration amongst law enforcement agencies increases the efficiency and availability of officers to spend time in Flint's neighborhoods. Security personnel for some institutions and agencies already extend their patrols into surrounding neighborhoods. The FPD should collaborate with institutions throughout the City to promote the cooperation of security teams in their patrol areas. Potential institutions to develop partnerships with include University of Michigan – Flint, Kettering University, Mott Community College, and Hurley Medical Center.

Secure Cities

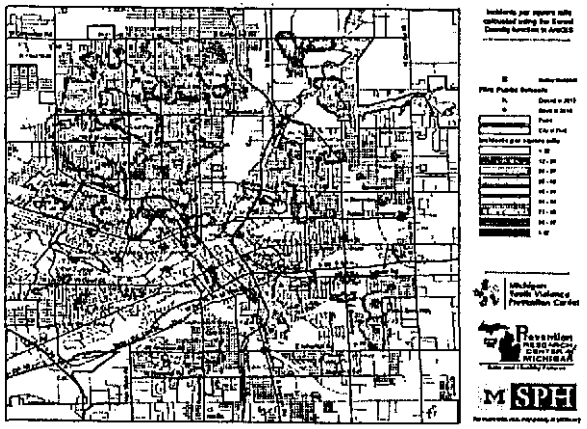
In early 2012 Governor Rick Snyder proposed his Secure Cities Partnership Plan. Under the Plan, Michigan State Police officers have been assigned to assist local law enforcement in four Michigan cities – Flint, Detroit, Pontiac, and Saginaw. More than 30 troopers and detectives in Flint are helping to coordinate teams of local, state, and federal law enforcement officers conducting directed patrols and providing investigative resources. Secure Cities has been a successful example of how the Flint Police Department can work with other agencies to supplement local efforts, and the City should explore similar opportunities with other agencies in the future.

Auxiliary/Reserve Force

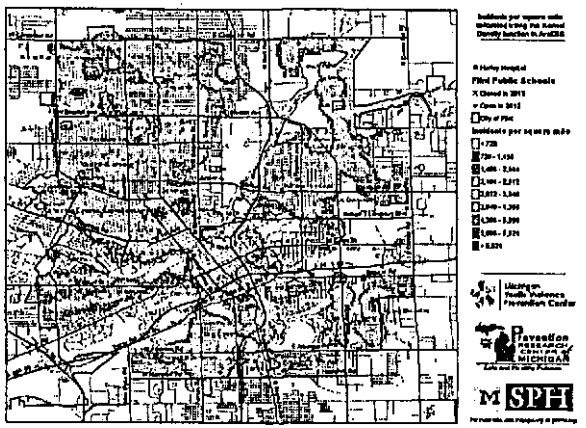
Auxiliary police, sometimes called special police, are part-time reserves for a regular police force. The structure and composition of auxiliary forces can vary, with officers being armed or unarmed, paid or volunteer. They usually have the power to make arrests, but may be limited in other regular police capacities. Auxiliary forces are often called upon to assist Police Department officers during weekend shifts, summer months, or special events. There are currently four Volunteers in Police Service (VIPS) programs operating in Genesee County.

The City should explore the creation of an auxiliary police force to help alleviate the FPD's staffing shortages. This force would be a third option to accompany expanding the FPD and implementing more informal community policing programs discussed later in this chapter.

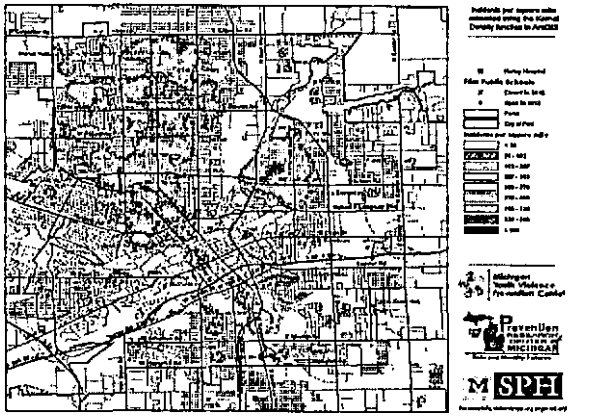
Homicide Offenses, 2005-2011



Assault Offenses, 2005-2011



Arson, 2005-2011



An example of collaboration and data-sharing, the University of Michigan's Prevention Research Center in the School of Public Health produced a report that analyzed crime in the City.

Embracing Data & Technology

With access to complete, up-to-date data sources, the City, the FPD, and community members have more resources to develop the best possible solutions and alternatives to address Flint's crime problems. Crime statistics are occasionally reported in Flint, but not routinely. The FPD and FFD should collect and manage comprehensive crime and fire statistics for the entire City. Data should be routinely tracked, some made publicly available, and used to inform decisions and provide benchmarks for progress. The Police and Fire Departments should develop a comprehensive data and information strategy that uses crime and staffing statistics to assess department needs and determine the spatial deployment of officers and firefighters.

A number of versatile technologies are available to the Police and Fire Departments to assist them in fulfilling their primary missions. Since new technology is constantly being developed, the following examples do not represent a comprehensive list of systems that Flint agencies should adopt, but merely illustrate the types of technology that have been successful elsewhere.

DDACTS

Data-Driven Approaches to Crime and Traffic Safety (DDACTS) are the basis for most of the new technology approaches to increase the efficiency of public safety. DDACTS is a general term for any approach to crime prevention technique which uses data linked to a geographical location to understand where crimes typically occur and predict where they will happen in the future.

Some examples of technology available for municipal law enforcement are:

CompStat

A DDACTS called Comparative Statistics (CompStat) has been implemented in major U.S. cities like New York, Washington, D.C., Los Angeles, Baltimore, and others. The effectiveness of this approach depends on many different factors, but as an example, the preliminary results of the implementation of CompStat within the Baltimore County Police Department show that over the first three months, thefts declined by an average of 27%, crashes declined by 25%, and 49% more vehicles were stopped. If implemented correctly, this kind of data usage can prevent and reduce crimes more efficiently and proactively.

FARS

Fatal Analysis Reporting Systems (FARS) is an online data system run by the National Highway Traffic Safety Administration. It utilizes a concept similar to CompStat to link all fatal car crashes to a geographical location in hopes of future prevention. FARS attaches supporting information to these events, such as victim ages, time of incident, and the cause of the incident (driving under the influence, speed, etc.), to better identify unsafe road conditions and make better predictions about the likelihood of future incidents.

CAD

Computer-Aided Dispatch (CAD) consists of a central computer linked to smaller portable computers used in the field. These systems can include features such as incident information, location verification, time-stamping, and incident dispatch linked to the location of an officer for efficient dispatch and shorter response times. New patrol cars are being equipped with features that have this technology for more hands-free capability. These vehicles are already being used in Flint. The benefit of this kind of technology is that it can be implemented in phases in order to reduce the initial costs.

ShotSpotter

ShotSpotter is a system used as a direct defense against gun violence. The system requires the installation of acoustic surveillance equipment throughout an area, to pinpoint the precise location of a gunshot in real time. This system provides immediate alerts without anyone needing to call 9-1-1. It can report the exact time and number of rounds fired, as well as the shooter's position, speed, and direction of travel. This system can be a huge benefit to any community looking to reduce and prevent gun violence and has already helped communities such as Milwaukee, Wisconsin; Omaha, Nebraska; and South Bend, Indiana.

Citizen Communication

9-1-1 Consolidation

Another prospective opportunity for collaboration and technological upgrade is the consolidation of emergency dispatch services. Currently, Flint and Genesee County are served by three separate 9-1-1 call centers. Collapsing centers into one regional call center can reduce redundancies.

Citizen Reporting

When used in tandem with non-9-1-1 call centers, citizen reporting systems can also help streamline incident reporting and eliminate wasted resources. The Desk Officer Online Reporting System (DORS), a popular case management software from a company called Coplogic, is one such system that enables agencies to collect reports from citizens online. DORS reduces the need for personnel to handle every incident report and gives citizens a convenient way to report minor incidents, crime tips, and submit forms through an online service available 24 hours a day. The FPD already utilizes DORS, but many residents do not know about the system. The City should build community awareness of the citizen reporting system in conjunction with other public safety outreach measures.

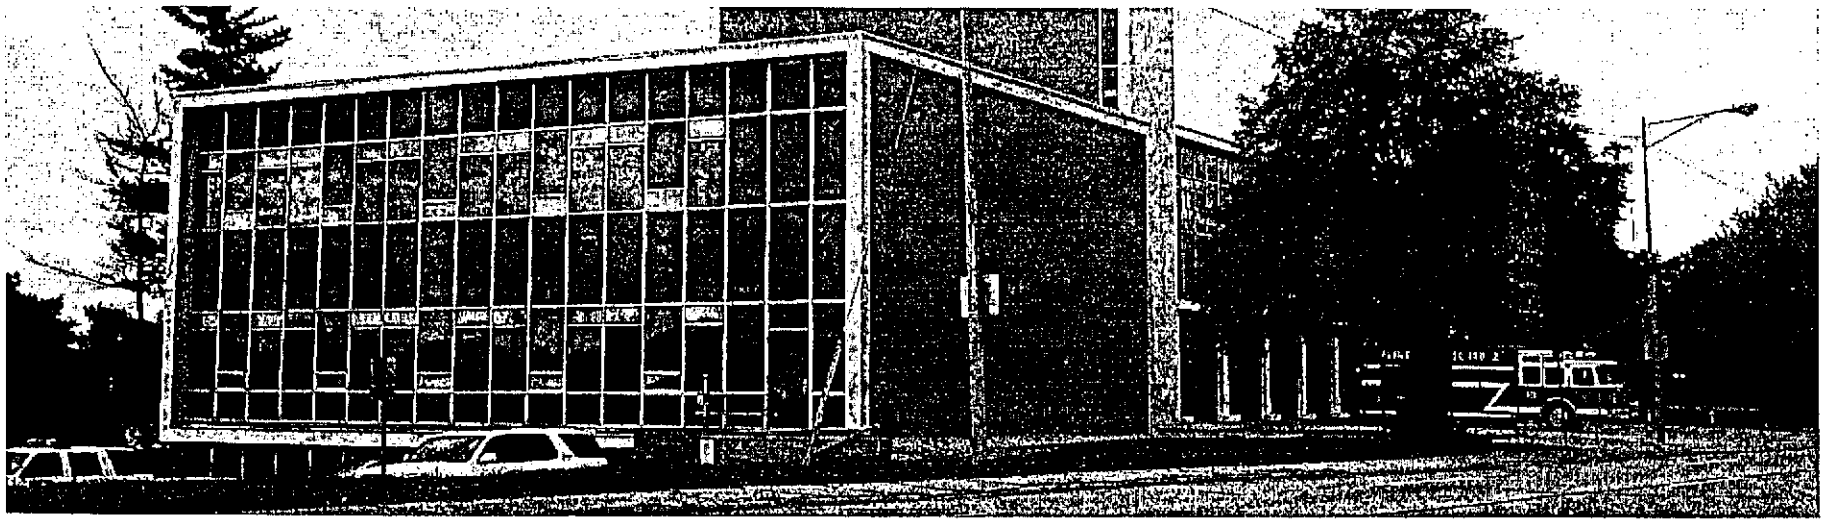
Institutional Partnerships

Since systemized information reporting requires staff and budgeting, the FPD should consider leveraging institutions like University of Michigan-Flint and Kettering University, as potential resources for collecting and synthesizing data. This would provide students with material for crime education as well as create a partnership between the FPD and local universities.

Such partnerships are already proving useful. For example, the University of Michigan's Prevention Research Center published a data report for crime in Flint in 2011. According to that report, there was a total of 17,312 criminal incidences between January 1st and December 31st, 2011. Assault was the most frequent offense, with one occurrence per 21 residents in Flint. The study utilized incident reports to map the general locations of crimes and identify potential "hotspots" of criminal activity throughout the City. Density maps were created for several types of crime reported between 2005 and 2011. This analysis can be used directly by the FPD to help managed its resources effectively.

Training & Software

The most advanced crime prevention technology is meaningless if its operators cannot use it properly. Flint's police officers, firefighters, and support staff need continual training to appropriately use and maximize the benefit of any new data analysis techniques and technology that the City's agencies adopt. Beyond simply purchasing new gadgets, the FPD, FFD, and other agencies must also make a cultural shift to embrace this new style of operation.



Arson Prevention

The Flint Fire Department (FFD) has inadequate resources to promptly respond to all calls for service. Annual budget shortfalls have led to the closure of several stations, and a decrease in the number of firefighters on staff. The number of arsons began to increase in 2010 after budget cuts resulted in the layoffs of firefighters. As a result of these shortfalls, the FFD has a fire insurance rating of 5 out of 10, which is worse than surrounding communities.

The City should take a three-pronged approach in working with the Fire Department to decrease arson in Flint. First, the City should assist in the prevention of arson. This may include the continued demolition of dilapidated or condemned housing that may be a target for arson, neighborhood watch programs, outreach and awareness, and special events. Second, hire additional staff to better meet Flint's public safety needs. Third, the City should assist the Fire Department in extinguishing fires by ensuring roadway connectivity to all portions of the City and maintaining water service with reliable infrastructure, hydrants, and water pressure.

The majority of arsons in Flint occur in dilapidated or abandoned homes. Prioritizing the demolition of these structures should be the City's primary strategy to reduce arson. More information about blight elimination can be found in ***Chapter 5: Housing and Neighborhoods Plan.***

Utilizing the United States Fire Administration (USFA)

The United States Fire Administration (USFA) is a strong resource for reducing arson rates. Established by the Federal Emergency Management Agency (FEMA) in 1984, the USFA's mission is to reduce deaths, injuries, and property losses due to arson. The strategies outlined below utilize USFA information and resources regarding arson prevention, Fire Department funding, and firefighter training.

Awareness Programming

The City should provide citizens with tools to reduce the incidence of arson. The following strategies outline ways of combating arson:

- The City should participate in the USFA Arson Awareness Week (AAW) in early May. The program promotes awareness of arson issues and provides citizens with measures to safeguard their home from arson. Each year, the AWW has a specific theme. The theme for 2013 was "Reducing Residential Arsons."
- The FFD should work with Flint Community Schools to implement fire prevention programs that educate school children about the danger of fires. According to the USFA, some of the main motivations for arsons are curiosity, vandalism, or simple excitement. Educating children on the dangers of fires and their harmful results will help reduce arson driven by these motivations.
- The FFD should develop a community Arson Watch Program. Like the existing successful community policing programs, this program would educate members on how to recognize and report suspicious activities.

Fire Department Programming and Training

The FFD should utilize USFA programs and other techniques for arson prevention. USFA programming provided for local fire departments can include:

- *Fire/Arson and Explosion Investigation Curriculum* The USFA provides numerous courses for local fire departments that are designed to provide critical knowledge and skills to investigate fires, identify potential arson-related crimes, and prepare cases for successful prosecution in court.
- *Arson Module* Fire service and law enforcement agencies can develop and implement arson prevention initiatives, allowing them to use their resources in the most efficient and effective manner. The module can assist the FFD in the assessment of arson cases and create a comprehensive database to record potential arson trends. Identifying trends will allow the Fire Department and Police Department to develop a needs assessment for neighborhoods that need to be patrolled more frequently.

Funding Opportunities

In May 2012, the City received a $6.9 million Staffing for Adequate Fire and Emergency Response (SAFER) grant from the Federal Emergency Management Agency (FEMA); a grant which aids fire departments that struggle to meet standards for staffing, response times, and other operations. The grant money saved 32 firefighter positions in Flint and required the hire of seven new recruits.

The USFA offers additional grants for fire department activities that the City could pursue to pay for equipment, staffing, and fire prevention measures. The other core grant programs of the USFA are:

- *Assistance to Firefighters* Grant Funding from the Assistance to Firefighters Grant (AFG) can be utilized to purchase vital equipment, protective gear, emergency vehicles, training, and other important resources needed to protect the community from fire hazards. The grant is made available to fire departments and nonaffiliated emergency medical service organizations.
- *Fire Prevention & Safety Grants* The Fire Prevention & Safety Grants (FP&S) assist with funding for projects that take preventative measures against fire and related hazards. Populations with a high-risk of injury or death by fire-related hazards are the primary target of the program.
- *Other Funding* There are many other funding alternatives and grant programs available through the USFA. Additionally, USFA provides thorough informational resources and guidelines about alternative funding mechanisms, including local revenue, State and Federal funding programs, and private-sector sources, as well as how to access those financial resources.

CITY OF FLINT

Public Safety Facilities

The foundation of the City of Flint's community policing policy is the idea that "public safety is everyone's responsibility." The community policing policy encourages the Police Department to establish relationships with the neighborhoods they serve, partner with residents to identify potential issues, leverage community organizations and volunteers, and take preemptive action to prevent crime.

Abundant interaction points between the police department and the community are a key element of community policing. For the model to work correctly there should be physical points of contact in every neighborhood. Flint employs the use of neighborhood service centers (formerly police mini-stations) to maintain a visible presence, provide limited services to their surrounding areas, and serve as an interface between residents and police.

The City should ensure that public safety facilities, including police stations, fire stations, and neighborhood service centers, are located and staffed to minimize emergency response times to all areas of the City. Areas designated as residential place types in the Land Use and Development section of this Master Plan should be given priority when services and facilities are planned.

Place Types with a Residential Component

- Green Neighborhood
- Traditional Neighborhood
- Mixed Residential
- University Avenue Core
- Downtown District
- Neighborhood Group Jurisdiction

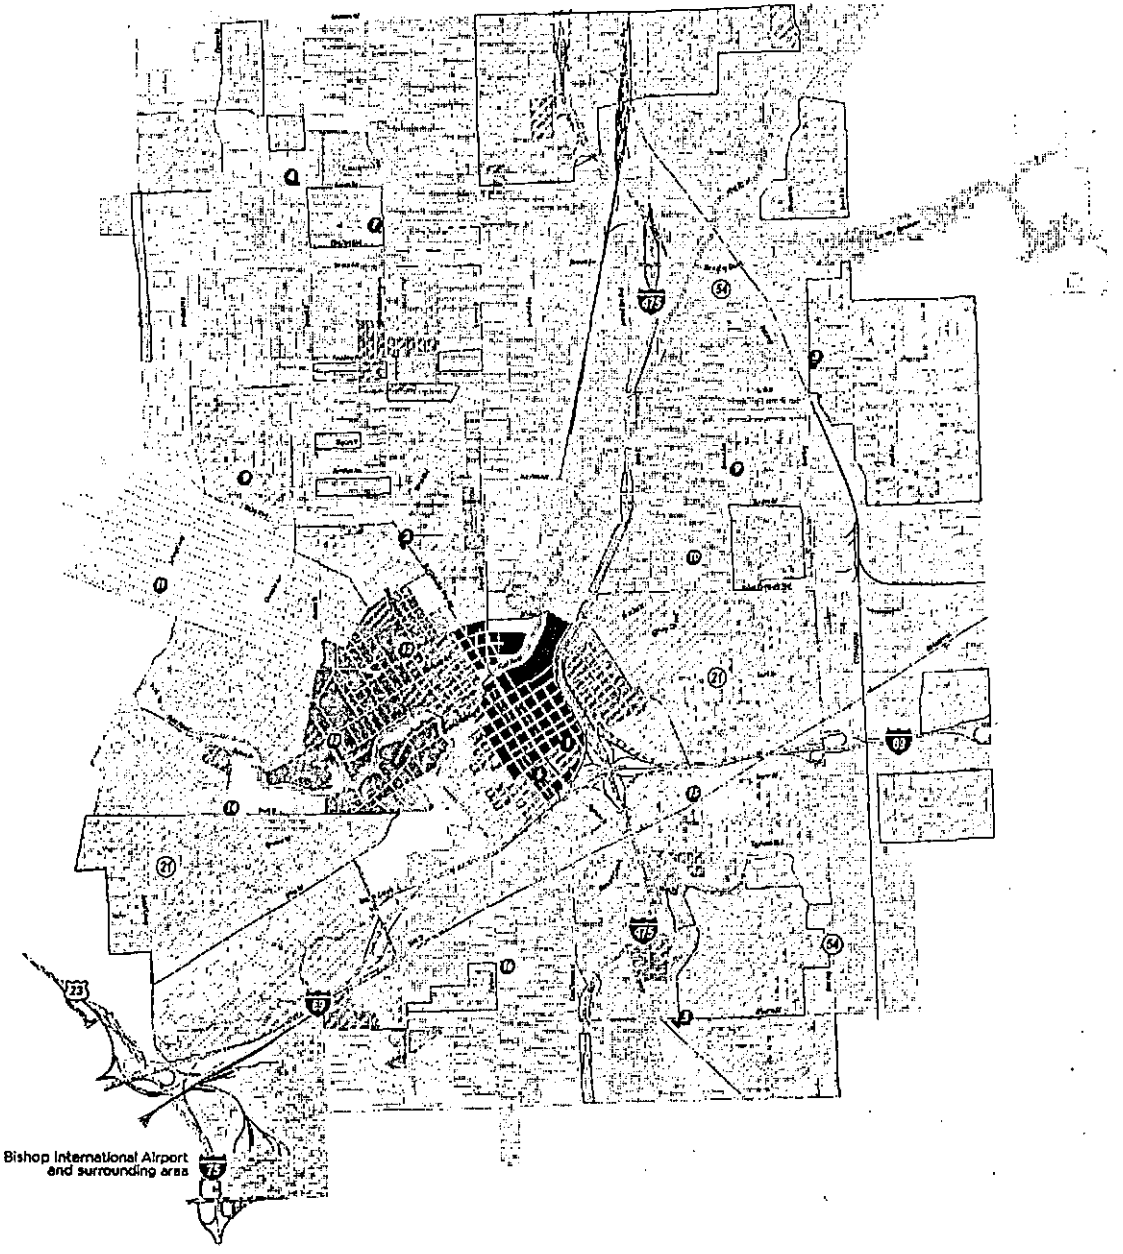
15. *Howard Estates (closed)*
16. *Southside*



CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN

A 2011 study of Flint residents revealed that 77% of respondents were either "somewhat fearful" or "very fearful" of crime in their neighborhood. A well-designed, clean, and activated public realm can lead to a reduction in both the perception and occurrence of crime. Instead of installing security cameras, speed radar, or other traditional and costly policing methods, several key components of "Crime Prevention through Environmental Design" (CPTED) aim to preemptively deter criminal activity, increase safety, and reduce fear in a potential crime hotspot. The City should develop CPTED strategies through zoning changes, City ordinances and policies, public awareness campaigns, and financial incentives.

Key CPTED concepts include:

- *Territoriality* Signs, fences, or artwork should be used to promote a sense of ownership of a given space.
- *Natural access control* Geographic barriers, landscaping, and gateways that delineate transitional, public, private, and semi-public areas can restrict access to crime-prone areas.
- *Informal surveillance* The strategic placement of buildings, windows, roads, and walkways, as well as activating public spaces through regular use, maximize the visibility of people, parking lots, vehicles, and the overall site. More bystanders with "eyes on the street" create a space that is unsuitable for criminal activity.
- *Regular maintenance* Proper upkeep (mowing the lawn, trimming landscaping, regular and thorough trash pick-up, road maintenance, fixing broken fixtures) instills pride in a space and indicates that criminal activity is unwelcome.

BENEFITS OF CPTED

In a Philadelphia precinct, burglaries and thefts dropped by 90% after police helped neighborhood volunteers clean up vacant lots and plant gardens. Crimes in the neighborhood averaged at only four per month compared to the previous 40 crimes per month.

Demolition, Code Enforcement & Blight Court

As a corollary to the principles of CPTED, areas plagued by poor property maintenance and vacancies can foster criminal activity and create a perception of crime. Such blight sends a clear signal to criminals that laws will not be enforced, while also making residents feel endangered and uncomfortable. Strategic demolition of blighted properties and strict code enforcement should be integral parts of Flint's crime reduction strategy.

Blight reduction strategies including demolition, code enforcement, and blight courts are described in detail in *Chapter 5: Housing and Neighborhoods Plan.*

COMMUNITY PARTNERSHIPS

Flint's public safety problems can't be solved by reactive law enforcement alone. Instead, the City and its public health and safety partners must work together on an approach that involves preventive programs alongside traditional ones. A new proactive, data-driven law enforcement apparatus must include community organizations including neighborhood groups and faith-based organizations, social service, health, education, and workforce development stakeholders in every step of the process.

Public agencies cannot achieve Flint's public health and safety goals alone. Residents and businesses must also be willing to invest in their neighborhoods to make Flint safe, healthy, and livable. Community involvement in law enforcement has a long history in Flint, and should have a prominent place in its future.

Community Policing

The foundation of Flint's community policing policy is the idea that "public safety is everyone's responsibility." This policy encourages the Police Department to establish relationships with the neighborhoods they serve, partner with residents to identify potential issues, leverage community organizations and volunteers, and take preemptive action to prevent crime. This approach is aimed at producing a cooperative, proactive policing strategy that is tailored to meet the unique needs of each neighborhood.

The City of Flint was a community policing pioneer in the 1970s, with a network of organizations and crime watches effectively protecting the City. However, this approach was put aside in the 1980s when foot patrols were replaced by vehicular patrolling.

Today, both residents and Police Department representatives have expressed a strong desire for a return to community policing, but staff and financial shortfalls at the FPD have slowed down implementation.

A community policing approach should be re-implemented in Flint, but the FPD's resources cannot currently provide the staff, time, and budget required. There are a high number of community organizations and programs dedicated to addressing crime in Flint like Flint Lifeline and the Police Athletic League (PAL). These organizations could be key players in a community policing strategy, but are not fully leveraged. The following approaches can be taken toward implementing community policing within the limitations of City resources.

[illegible]

Community policing must be fully supported and continually sustained by the City to be effective. Beyond funding challenges that must be addressed over time, the ideals of community policing must become a core element of the way the City and its departments function and interact with the public. Within the FPD, community policing should be embraced at all levels, from the Chief of Police to officers, detectives, administrative staff, and others. All other agencies and departments within the City should support the concept and collaborate with each other on its implementation.

Source: Flint & Genesee Chamber of Commerce

Leveraging Community Volunteers

The City of Flint benefits from an extremely engaged community. Volunteers and neighborhood organizations are a valuable asset, and should be utilized as a way to involve citizens in law enforcement and complement FPD efforts. An umbrella program called the Blue Badge Volunteer Corps was established by the FPD in 2009 to recruit and engage citizen volunteers in public safety. The program includes more than 40 community-based organizations and over 150 trained volunteers. However, the Blue Badge program experiences difficulties in recruitment and the effective use of resources.

The City should explore strategies to recruit, connect, retain, and utilize volunteers effectively and efficiently, such as a year-round recognition program for volunteer efforts, expanded use of social media, or a campaign to promote community service as a core part of what it means to be a citizen in Flint. In addition to individual citizen involvement, many community organizations provide crime prevention support.

In order to better serve the populations they are intended to serve, the City should take an active role in coordinating the region's non-profit organizations and foundations resources to improve communication between these organizations and their target populations. This notion is discussed in more detail at the end of this chapter.

Opportunities for Neighborhood Interaction

Abundant interaction points between the Police Department and the community are a key element of community policing. For the model to work correctly, there should be physical points of contact in every neighborhood. Traditionally, this has been accomplished through the utilization of foot patrols in assigned areas. However, there are other methods of creating these points of connection.

Flint employs the use of neighborhood service centers (formerly police mini-stations) to maintain a visible presence, provide limited services to their surrounding areas, and serve as an interface between residents and police. These centers are used for community activities and training programs, and also serve as accessible locations for citizens looking to report criminal activity or seek information. Currently these centers are staffed by volunteers.

This model should be maintained since, unless additional funding is identified, it is impractical for the City to provide full-time staff at all centers.

Blue Badge volunteers should be utilized to staff the neighborhood service centers. To further enhance citizen-police communications, police officers should be encouraged to regularly attend meetings hosted by neighborhood associations or community organizations. Ideally, the same officer would attend all meetings in a general geography so that meaningful relationships can be forged with that particular neighborhood. In order to avoid extended shifts and over-time pay, "flextime" could be utilized to offset when officers go to meetings, shortening other shifts in exchange.

Holistic Partnerships

An active and engaged non-profit and philanthropic community are important assets in achieving the desired public safety and health objectives and strategies.

The City should seek creative ways to make use of the great resources available to address Flint's crime issues. Law enforcement must work with social services, education, workforce development providers, as well as businesses to develop true community partnerships to prevent crime and reduce repeat offenses.

Wrap-around Neighborhood Centers

To provide needed community services and enhance sense of community, the City should promote the development of "Wrap-around Neighborhood Centers" throughout the community.

Located primarily within the Neighborhood Center and City Corridor place types that provide for the day-to-day retail and service needs of local residents, wrap-around centers should provide a variety of different services to the community from one central location.

Such a facility could be used as a health facility, an entertainment venue, a place of learning, social services office, or a recreation center. Wrap-around centers are an effective way of tackling crime prevention efforts at all levels, but also in coordinating and leveraging resources and filling gaps in neighborhood services.

Neighborhood Services

Wrap-around Neighborhoods Centers could serve as an anchor of well-being, filling gaps in services and ensuring that every neighborhood is equipped with tools to create a supportive environment. They can provide safe, supervised places for youth during after school and evening hours, a place for neighbors to meet and socialize, a place for senior adult programs, a place of accessible health and mental services, a safety facility, a much needed space for neighborhood and other group meetings, and space for various programs such as art, fitness, yoga, and after school programs.

Community Engagement

Additionally, Wrap-around Centers could serve as anchors for outreach and engagement. Moving forward, as the City evaluates the implementation of Master Plan recommendations at the neighborhood scale, wrap-around centers could provide the venue and physical anchor for ongoing outreach efforts to ensure that community concerns are properly heard and addressed.

Locating Wrap-Around Centers

The City should work with its partners to explore potential locations for Wrap-around Neighborhood Centers. Several of Flint's neighborhoods have experienced school closures which have strained local sense of community. The City should partner with the Flint Community Schools to evaluate the potential for the adaptive reuse of vacant school buildings as Wrap-around Neighborhood Centers. Already centrally located and community based, the school buildings could provide a low-cost option for future centers as well as transform underutilized spaces into valued community assets. For more on the adaptive school reuse, see *Chapter 8: Infrastructure and Community Facilities Plan.*

JOY TABERNACLE CHURCH

Located within Flint's Civic Park Neighborhood, Joy Tabernacle Church is a stabilizing community anchor that combats blight, promotes youth development, and collaborates on job training programs. Led by Pastor Robert McCathern, their efforts to "re-vision abandonment" through blight elimination techniques have begun to transform one of Flint's most blighted neighborhoods into one of stability and visual appeal.

A member of the Genesee County Land Bank's Clean and Green program, Joy Tabernacle maintains over 80 properties annually while employing neighborhood youth between the ages of 16 and 24. In collaboration with the Land Bank, they have also launched a pilot program that covers the windows of abandoned houses with vinyl images, giving the appearance of occupancy and attention. Their leadership and commitment to the safety and appearance of the Civic Park neighborhood serves as a great example of grassroots community activism.

Integrating Ex-Offenders

Repeat offense trends have increased in Flint, demonstrating the need for more effective re-entry methods for ex-offenders. Overall, 2,075 Flint residents are known "recent offenders," or have both a state felony conviction and are currently on parole or probation. This does not include federal felonies or individuals with felonies who are out of the criminal justice system.

Residents have voiced a need to focus on the challenges of prisoner re-entry in a thorough and comprehensive manner. In conjunction with current State prisoner re-entry efforts, the City should invest in programming and resources targeted at providing services to individuals with a criminal background who have completed their sentence, and are looking for a second chance. Flint's various re-entry partners, such as the State of Michigan Genesee/Shiawasee County Prisoner Re-entry office, Career Alliance, Michigan Works, Mott Workforce Development, New Paths, Catholic Charities, and others should collaborate to better serve ex-offenders attempting to integrate back into the community.

The City can work to raise awareness and encourage the expansion of prisoner re-entry programs that connect ex-offenders with a variety of employment opportunities, mentoring services, housing options, and other resources.

Flint Lifeline

Flint Lifeline Intervention Networking Together (formerly CeaseFire FLINT) is a program of "focused deterrence" developed in partnership with the City, the Flint Police Department, and Flint Area Congregations Together (FACT). Flint Lifeline also involves Michigan State Police, Michigan Department of Corrections, US Department of Justice, and local social service and workforce development providers. Participants in the program are criminal suspects with enough evidence compiled against them to justify an arrest warrant. If the suspect meets certain criteria, prosecutors and the police can decide to admit the suspect into Flint Lifeline, instead of moving forward with court proceedings. Once in Flint Lifeline, participants receive aid to help them change their lives, including opportunities for housing, employment, and job training.

Flint Lifeline represents a community strategy to addressing crime through positive intervention. It depends upon strong cooperation between law enforcement agencies, social service providers, government, faith leaders, and the community at large. The City should continue to monitor the outcomes of the program and expand it if it proves successful. The City should also explore similar programs and partnerships that can replace incarceration with intervention.

Youth Safety & At-Risk Youth

Safe Routes to School

Safe Routes to School (SRTS) is a federal program signed into law in 2005 that is aimed at improving the health and safety of children by enabling and encouraging them to walk and bike to school. Formerly a component of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), in 2012, the SRTS program was rolled into the Transportation Alternatives Program (TAP) under Moving Ahead for Progress in the 21st Century (MAP-21). This consolidation is occurring over a multi-year process, so the City should verify the status of current programs and the TAP program to ensure that all potential funding sources are explored.

Each year, states receive federal funds that can be distributed to local SRTS programs. The local programs can use this funding for infrastructure or non-infrastructure improvements that enhance the safety of pedestrian and bicycle safety for children traveling to and from school. The City should seek SRTS funding to implement recommendations detailed in *Chapter 6: Transportation and Mobility Plan*.

BENEFITS OF YOUTH PROGRAMS

A Bakersfield, CA school district began an after-school program for more than 1,300 students. Within the district boundaries, crimes against children dropped by 46% compared to only 8% in the rest of the city.

Michigan Youth Violence Prevention Center

The Flint community has tremendous concern for the City's youth, especially those at-risk of criminal and gang activity. Seeking to reduce violence and create a supportive environment for young citizens, the Michigan Youth Violence Prevention Center (MI-YVPC) in Flint, helps to implement youth violence prevention strategies by researching different approaches and creating relationships with community partners. Funded by the CDC, MI-YVPC's six programs address youth violence in several areas. The programs are designed to address either low- or high-risk youth, and are focused on either the individual, relationships, or the community. The information below summarizes their spectrum of approaches.

- *Individual* Youth Empowerment Solutions (YES) provides youth an outlet to make a difference through community improvement projects and Project Sync provides counseling to youth treated at the Hurley emergency department.
- *Relationship* Fathers & Sons strengthens the relationship between young boys and fathers to improve connectedness and reduce negative behaviors. The mentoring component of the program provides a mentor to at-risk youth at the Boys and Girls Club.
- *Community* In collaboration with the Genesee County Land Bank, Clean & Green helps to improve properties in the Flint area to create a better environment for youth. Community Mobilization works with local community organizations and residents to reduce violence.

Boys and Girls Club

The Boys and Girls Club is a place for kids ages 7-17 to be after school and throughout the summer. The idea behind the Boys and Girls Club is to create positive and proactive environments for school-aged kids and young adults to spend time constructively; when parents are not normally available to them due to work schedules. With two locations in the Greater Flint Area, and programs that focus on education, leadership, life skills, art, and fitness, the Boys and Girls Club of Greater Flint currently serves 80-120 individuals per day after school, and an average of 480-500 kids per day in the summer. The Club has a low-cost to its users and is a great asset to the City of Flint.

Source: Flint & Genesee Chamber of Commerce

Big Brothers Big Sisters
Big Brothers Big Sisters partners with many government and community entities, individual sponsors, and volunteers to bring positive relationships to children and young adults ages 6-18. Programs involve spending time with each other, meeting either at school or out in the community, and supporting the friendship with activities together or in groups that keep kids away from violence and trouble. Big Brothers Big Sisters has helped both "Littles" and "Bigs" in Flint stay connected through positive relationship building.

Gun Violence
With the US having the highest number of gun-related injuries among developed countries, gun violence is a relevant and difficult issue to deal with throughout the nation. There are many ways to begin preventing gun violence for the community as a whole, and for youth in particular.

These strategies will involve extensive cooperation with educational institutions throughout the City, as well as community groups, religious organizations, and other partners.

COST OF GUN VIOLENCE

In 2010 there were 105,177 injuries involving guns in the US.

Flint was *fifth*, in Michigan, for the number of recovered firearms in 2010 at 182, increasing from 89 in 2007.

In their book "Gun Violence: The Real Costs," Jens Ludwig and Philip Cook argue that gun violence costs roughly $100 billion annually in social costs.

Ludwig and Cook also claim that every crime-related gunshot wound imposes costs on society on the order of $1 million.

Steven Levitt's analysis of data on a national sample of urban areas suggests that, on average, every homicide reduces a city's population by 70 people.

COMMUNITY HEALTH

The health of residents is a critical issue in Flint. Genesee County ranked 78th out of 82 Michigan counties for overall health in a recent Robert Wood Johnson Foundation County Health Rankings report, including 77th in health behaviors, 67th in physical environment, and 75th in social/economic factors. CDC data identifies the County as being 4th in the state for physical inactivity, 6th for obesity, and 3rd for adult diagnosed diabetes. Genesee County mortality rates for eight of the ten leading causes of death in 2007 exceeded those of both the Michigan and US.

Community health is an integral element in providing the overall quality of life for Flint residents. Addressing community health cannot be done by the City alone, but must be achieved by working closely with the region's health care providers, public health organizations, and local non-profit organizations. This section of the plan presents recommendations to improve current health conditions to help ensure that all residents are provided with resources that enhance their quality of their life and their health.

Community Health Stakeholders

Much of the health data and policies for Flint residents are generated by four major institutions: the Genesee Health System, the Genesee County Health Department, the Greater Flint Health Coalition, and the Prevention Research Center of Michigan. These four institutions provide updated community health statistics as well as programs for residents to improve upon reported health standards. These institutions are essential to maintaining the community's public facilities, services, and organizations that make a community function, and are key contributors to the quality of life enjoyed by residents.

Genesee County Health Department
The Genesee County Health Department has the statutory responsibility for County residents, businesses, and schools. The Health Department aims to prevent disease, promote health, and protect the public from environmental hazards to health. The Department pays particular attention to eliminating racial, social, and economic inequalities and uses prevention and intervention strategies that target underlying causes.

Genesee Health System
Renamed under a new authority in 2012, GHS supports recovery, prevention, health, and wellness of the body, the mind, and the community by providing services and support to Genesee County residents who suffer from developmental disabilities, serious mental illness, serious emotional disturbances, and adults and children with substance use disorders. GHS is accredited nationally by CARF, the Commission on Accreditation of Rehabilitation Facilities.

Communities Against Diabetes

Funded through the Centers for Disease Control and Prevention with local support provided by the National Kidney Foundation of Michigan, a coalition made up of organizational partners and community members has formed "The Flint Better Health Together" (FBHT). This alliance promotes healthy living and positive choices to decrease the unequal impact of diabetes in the community, and their mission is reflected ensuring that, "Flint is a socially responsible community where the root causes of health inequity are addressed."

Prevention Research Center of Michigan (PRC/MI)

The Prevention Research Center of Michigan is one of 37 Prevention Research Centers funded by the Centers for Disease Control and Prevention. Established in 1998, the Prevention Research Center of Michigan (PRC/MI) is based at the University of Michigan School of Public Health in Ann Arbor. The Center conducts community-based prevention research to improve health and prevent disease especially focused on populations with a disproportionate share of poor health outcomes.

Speak to Your Health! 2011 Community Survey

The PRC/MI conducts a biennial survey. The Speak to Your Health! Community Survey examines a wide range of issues related to individual and community health in Genesee County. The survey conducts a needs assessment, planning and program evaluation, health data analysis in the County, and geographic mapping of information that enables identification of asset and needs areas.

Greater Flint Health System

- *Hurley Medical Center*, which includes the Hurley Children's Hospital and Mott's Children's Health Center, is a level 1 trauma center bringing innovative, leading-edge technology and medical services to Flint and Genesee County. Hurley Medical Center has specialties in neonatal, diabetes, kidney transplantation, trauma, and bariatric care.
- *McLaren Regional Medical Center* is recognized as one of the top integrated health networks in the nation. McLaren Flint is a tertiary teaching facility with 416 beds located in Flint. They are affiliated with the MSU College of Human Medicine for its medical residency programs.
- *Genesys Regional Medical Center* is a regionally integrated health care delivery system with a complete continuum of care. Over 140 family physicians in the Genesys network act as health advocates, offering resources to outpatient, ambulatory care, physical medicine treatment, and mental health services.
- *Flint Public Health & Wellness Campus*, run by Michigan State University, will be part of a $5.65 million project that involves demolishing Genesee Towers, renovating the former Flint Journal printing facility, and starting a new Flint Farmers' Market in Downtown. The new medical center will integrate medical training and public health to create a healthier Flint community.

Greater Flint Health Coalition

Most of the available health data specific to Genesee County is generated by The Greater Flint Health Coalition (GFHC), a non-profit healthcare coalition whose mission is to improve the health status of Genesee County residents and the quality and cost effectiveness of the local health care system. The Greater Flint Health Coalition consists of 26 partner organizations.

GFHC Health Impact Study

In 2012 the GFHC release their Healthy Impact Study. The Study outlines data such as unemployment, poverty, Medicaid, and other assistance program enrollment, and also identifies trends and future implications for the health of Genesee County residents.

Conclusions of Studies

Key health impacts and assessment priorities identified by the Genesee County REACH program and the Speak to Your Health! 2011 Community Survey GFHC Health Impact Study determined that many of the community's health related issues are due to demographic, social, and economic factors as well as the physical environment.

Mental Health

Flint must foster a positive and safe school climate by enhancing access for youth to mental health services and strengthening partnerships among schools, law enforcement, and public health organizations. The City should improve coordination efforts with Flint Community Schools to create a system of trust throughout the community as a whole. If this is achieved, other strategies and suggestions will have a better chance of being effective.

Another way to enable a safer community is to institute a public health campaign that encourages people in distress to seek help. Family members and friends need to know how to seek mental health assistance for others or for themselves. This process can aid in shifting the societal views toward helping the community become safer and healthier.

CHILD POVERTY

According to the US Census Bureau, 58% of Flint children were living in poverty in 2012. While this number is decreasing, it is still the second highest in Michigan following Detroit, and more than double the state average of 25%. This Plan contains strategies to fight child poverty and other youth issues, but community dedication over the long-term is needed to truly make a difference.

Source: Flint & Genesee Chamber of Commerce

REACH 2010

The REACH program was one of the first initiatives in the County, which focused on fostering mobilization, improving health care, and reducing racism for mothers. The program puts an emphasis on where racism may play a role in disparities in the community, since typically the infant death rate for African Americans is much higher than for white infants.

Part of the program's success was due in large part to the partnership between the Genesee County Health Department and local community-based non-profit organizations. The partnership fostered a deep understanding of racial dynamics and enabled the Department to tailor projects to fit the needs of the people they were intended to assist.

During the period of the REACH 2010 initiative, the African American infant mortality rate in Genesee County dropped from a high of 23.5 deaths per 1,000 live births to an all time low of 15.2. The rate for white infants dropped from a high of 13.1 to 8.9. The ratio of disparity decreased from a high of 3.6 African American infant deaths for every white infant death to 2.4.

CREATING HEALTHY ENVIRONMENTS

Environmental issues such as pollution, crime, property abandonment, lack of areas to exercise outdoors, and poor access to healthy foods disproportionately impact residents who are low-income, minority, or uninsured. The recommendations outlined in the other chapters of this Plan effectively promote a physical environment that fosters healthy living for Flint residents.

In addition, the City can promote overall health by focusing on other things that have more subtle influences on the physical environment.

Reducing Health Disparities

All demographic, social, and economic risk factors are higher among Flint residents compared to the national average, where higher rates of poverty and lack of health insurance are associated with poorer educational outcomes, income and employment levels, and crime and incarceration rates.

Data for minority, low-income, and uninsured populations indicate that these populations are experiencing even worse health outcomes when compared to the population as a whole. For example, the rate for chronic diseases such as cancer and diabetes, sexually transmitted infections, and hypertension are higher among African American populations in Michigan and Genesee County than other groups.

The REACH program is a model of one successful approach that the City should seek to replicate for other health issues in minority communities. Health officials should also consider impacts on communities of color and low-income communities, when making decisions about where to locate health resources. Investing in the cultural competence of social service organizations, public safety departments, health providers, and decision makers would improve their ability to serve culturally diverse populations.

Drugs & Alcohol

Per capita liquor store density in Genesee County is higher than 90% of other Michigan counties. While City of Flint residents have access to only nine grocery stores, there are 54 liquor stores within City limits. This is a significant problem for the City of Flint, both in reality and in image. Alcohol outlets can be directly and indirectly related to crime. Many cities across the country including Baltimore, Chicago, and Los Angeles, are revoking liquor licenses in high-crime neighborhoods as part of their overall crime prevention strategy. The City should reduce the number of liquor licenses to be more appropriate for Flint's population, prioritizing the elimination of problem establishments in high crime areas.

The City should also promote healthy habits among its citizens by adopting policies to reduce the excessive use of drugs and alcohol. This can be done by:

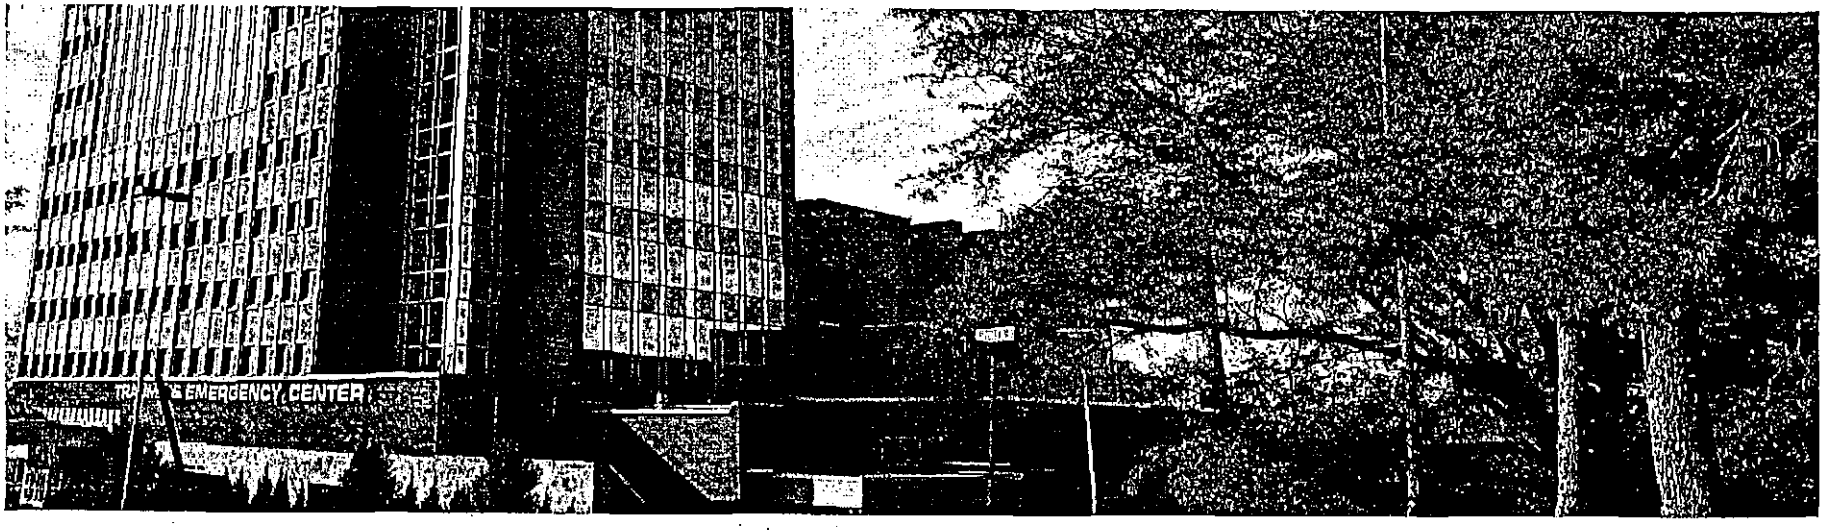
- Banning smoking in City-owned buildings, parks, and other properties
- Utilizing the Global Smoke Free Partnership strategies to design a 100% smoke free workplace with voluntary participations by institutions and major employers
- Working with healthcare providers to expand treatment options for those suffering from smoking, other substance dependence, and mental illness
- Enacting City ordinances restricting signage for alcohol and cigarettes

EMERGENCY PREPAREDNESS

Emergency preparedness, disaster planning, and hazard mitigation is crucial for a community to be secure and resilient. Adequate planning before a disaster occurs means that a city has the operational capabilities to mount an effective response in the event of emergencies, including natural disasters, man-made hazards, and terrorism. Emergency preparedness planning for the City of Flint is overlapped by a number of organizations, including the local chapter of the Red Cross, the City, Genesee County, and the State of Michigan.

To improve Flint's emergency preparedness, the City should:

- Coordinate the City's emergency planning efforts with the County;
- Ensure the City's emergency plan is up to date and that it addresses continuity of operations; and,
- Encourage citizens to understand and prepare for emergency situations



HEALTHCARE ACCESS

The value of uncompensated care provided by the Genesys Health System and McLaren Regional Medical Center effectively doubled between 2006 and 2009. Over the same period, the community's primary safety-net provider, Hurley Medical Center, which has consistently reported the City's highest level of uncompensated care, experienced a 25% increase.

These trends pose a number of future implications for healthcare and resident health in Genesee County. Growing numbers of medically uninsured residents affects the long-term financial stability of hospitals and physicians, strains the capacity of community-based safety-net providers, spurs physician out-migration, and hinders future recruitment efforts.

The first step to improving the healthcare system in Flint is increasing collaboration between the City's hospitals, the Michigan Department of Corrections, mental health organizations, and housing services. The City should *partner with the Greater Flint* Health Coalition to stabilize the health care system and facilitate greater access to health care resources. The cooperative effort will bring together expertise and resources to ensure a continuum of care.

Accessible Medical Facilities

Locating pharmacies, treatment facilities, and clinics in high-poverty neighborhoods is important to providing healthcare to persons with limited access to transportation or limited mobility. The City and its partners should establish strategically located community centers to provide entry points for health and human services. Locating pharmacies and clinics in the Land Use Plan's Neighborhood Center place type, which is intended to provide daily goods and services to surrounding neighborhoods, will help give residents in high-risk communities quick and easy access to healthcare. The City should also encourage pharmacies, treatment facilities, and urgent care clinics to locate in high-risk neighborhoods.

Residents that are not within walking distance of medical facilities and do not have access to personal vehicles have to rely on public transit to access healthcare. The City should collaborate with the Mass Transportation Authority to ensure public transit routes *reliably and conveniently connect* these neighborhoods to major health care centers.

Preventative Health Care

Health issues such as nutrition, physical activity, sexually transmitted infections (STI), and pregnancy can be tackled with a more preventative approach through awareness campaigns and public education. Many resources exist for these health issues, but can go widely unknown by the populations they are designed to serve. The City should work with health organizations like the Genesee County Health Department and the Greater Flint Health Coalition to expand or create collaborative partnerships with institutions throughout Flint, such as schools, faith-based organizations, and community groups, to promote awareness of both health risk factors and resources available to the public.

Outreach to the public can be as minor as educational talks to youth groups or as extensive as broad marketing campaigns, but all levels of health outreach have the potential to positively impact the citizens of Flint. The City should collaborate with existing *community-based health improvement* campaigns to maximize exposure to healthy lifestyles. This could include working with Resource Genesee, the University of Michigan and the Prevention Research Center of Michigan's HOPE project, and other health partners to expand the existing clearing house for all public health information.

Awareness & Enrollment in Health Care Services

Health issues in Flint are compounded by the fact that many residents who are eligible for lower cost, or subsidized health care programs like Women, Infants, and Children (WIC), the Affordable Care Act (ACA) Exchange, and the Genesee Health Plan are not signing up for these services. For instance, in Genesee County, participation rate among those eligible in WIC is only 60%. The problem is that many residents do not sign up because they do not understand how, or they do not know they are eligible.

The City should collaborate with existing community-based health improvement campaigns to maximize exposure of health care and insurance options available to Flint residents.

All levels of health outreach have the potential to increase enrollment rates and increase health care coverage city-wide.

To promote the Affordable Care Act Exchange for example, state health agencies are opening brick-and-mortar stores in malls and urban areas to target those most in need of health insurance, showing informational videos during professional sporting events, printing ads on prescription drug bags, and many other techniques unique to their region. On a more local level, health organizations like the Genesee County Health Department and the Greater Flint *Health Coalition, could partner* with Flint's religious institutions and community based groups to host enrollment fairs to assist residents in signing up for health programs.

CITY OF FLINT

Access to Healthcare

Locating pharmacies, treatment facilities, and clinics in high-poverty neighborhoods is important to providing healthcare to persons with limited access to transportation or limited mobility. The City should establish strategically located community centers to provide entry points for health and human services. The City should also encourage pharmacies, treatment facilities, and urgent care clinics to locate in high-risk neighborhoods.

Residents that are not within walking distance of medical facilities and do not have access to personal vehicles have to rely on public transit to access healthcare. The City should collaborate with the Mass Transportation Authority to ensure public transit route reliably and conveniently connect these neighborhoods to major health care centers.

Areas designated as residential place types in the Land Use and Development section of this Master Plan should be given priority when services and facilities are planned.

Access to Healthcare Legend

- *Place Types with a Residential Component:*
  - *Green Neighborhood*
  - *Traditional Neighborhood*
  - *Mixed Residential*
  - *Civic/Cultural Campus*
  - *University Avenue Corridor*
  - *Downtown*
- *Residential Place Types with Poor Transit Access*
- *MTA Bus Routes*
- *Pharmacy*

Healthcare Facilities Inventory

Clinics

1. *Genesee County Free Medical Clinic*
2. *Genesee County Health Department*
3. *Genesys West Flint Health Center*
4. *Hamilton Community Health Network - North Pointe Clinic*
5. *UM-Flint Urban Health and Wellness*
6. *Hamilton Community Health Network - Main Clinic*
7. *Genesee Community Health Center*

Hospitals

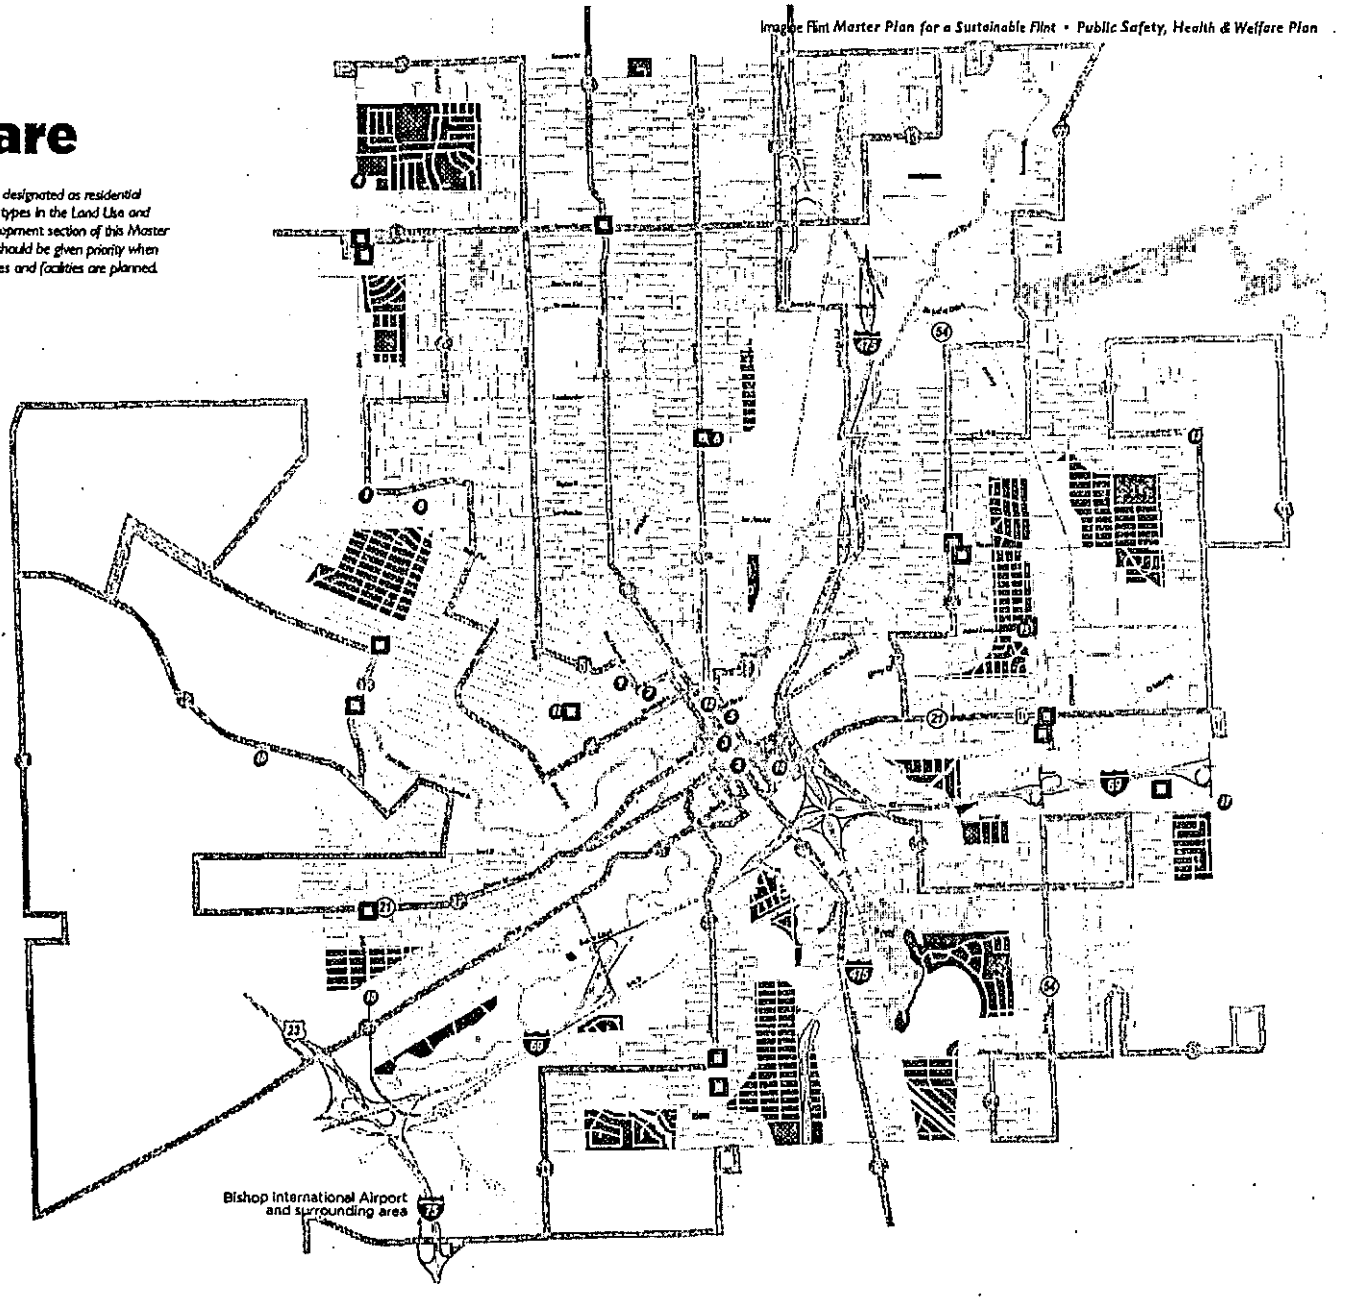
8. *McLaren Regional Medical Center*
9. *Hurley Medical Center and Hurley Children's Hospital*

Urgent Care Facilities

10. *Emergency Medical Center*
11. *Flushing Road Urgent Care*
12. *Genesys Downtown Flint Health Center*

Miscellaneous Facilities

13. *Heartland Health Care Center-Briarwood*
14. *Wellness AIDS Service*
15. *Michigan Health Specialists*
16. *Planned Parenthood - Flint Township*
17. *Planned Parenthood - Burton*



NUTRITION & ACCESS TO PRODUCE

A lack of access to fresh, nutritious food is a barrier to healthy lifestyle choices and contributes to Genesee County's 36% obesity rate. Urban agriculture and community gardening are immediate ways to introduce fresh produce to the community, while also bringing vacant land back into active use. New food retailing outlets can help revitalize these communities, contribute to economic development, and improve access to healthy foods. Additionally, providing a more well-rounded diet in the City's schools will promote healthier eating habits and lifestyles for Flint's youth that lead to many benefits later in life.

Right to Farm Act

The 1981 Right to Farm Act is administered by the Michigan Department of Agriculture and Rural Development to protect farmers who conform to the Generally Accepted Agricultural and Management Practices (GAAMPs), or who were established before the surrounding land use changed to incompatible uses. The GAAMPs have been revised a number of times throughout the years. They apply to practices ranging from management and utilization to wastewater management and odor management. Issues with the Act came to light in the last few years due to the increasing popularity of urban agriculture and similar practices.

A revision to the Right to Farm Act's regulations allows cities with more than 100,000 people to develop their own ordinances for agriculture, so long as those cities exempt any farms that have started operating prior to new city rules. This revision made in 2011 allows the City of Flint to exempt themselves from the GAAMPs, and hold their own agriculture ordinances.

Urban Food Production

Urban agriculture and urban gardening are becoming popular ways to reuse urban land, provide fresh, locally-grown produce, educate youth about health and food production, and employ local residents. The distinction between urban agriculture and urban gardening, although not black and white, is based on the scale and intensity of the operation. Either category may choose to market and sell their products.

Urban Agriculture

Urban agriculture, the larger-scale practice of urban food production, involves cultivating, processing, and distributing food, and is generally practiced for an income, although not always. Overall yields are smaller, but yields per unit area are often higher than traditional rural agriculture, as urban agriculture requires space-saving measures and concentrated plots. They focus on higher value crops and low-impact growing techniques, avoiding some of the historical problems of integrating agriculture and urban life. Most forms of urban agriculture use organic methods of production, so they typically rely on some amount of imported soil.

Urban agricultural land ranges in size from a few contiguous residential yards to larger-scale operations. One of the largest documented urban agricultural operations in the United States is six acres. Facilities sometimes integrated into urban agricultural land operations include storage structures, potting sheds, greenhouses, and kitchens. Heavy equipment is not used due to the nature of the location, so equipment tends to be limited to hand tools. Typically, urban agriculture requires amendments to traditional zoning in order to accommodate its operations and manage its impacts. Urban agriculture can be implemented in many ways, including:

- One or more contiguous residential lots owned by a homeowner or leasing agent, where the space is often leased in exchange for produce or a percent of the food sales.
- Urban spaces, such as parking lots and rooftops, that are owned by a private land owner or business and often require raised beds due to lack of soil.
- Parks and public green spaces, or portions thereof, owned by local government and run by a local organization and utilized for gardening.
- Institutional land, including hospitals or universities, where an under-utilized portion of the site is used for gardening and/or research.
- Vacant lots or under-utilized sites that are often temporary and require raised beds due to a lack of soil quality.
- Agriculturally zoned land within the City limits.

In keeping with the goals of the Land Use Plan, intensive, large-scale urban agriculture would be allowed only in the Green Innovation place type. Less intensive, small-scale urban agriculture would be allowed under Green Innovation, but also the more residential Green Neighborhood place type. On-site sales would require commercial zoning for any operation.

Urban Gardening

Urban gardening is a smaller-scale operation on a single parcel of land that is maintained by an individual or a group. Urban gardens are aimed at providing fresh produce and social benefits to a neighborhood, such as increased activity, a sense of community, and a connection to the environment. They are not typically focused on generating income, but some urban gardens may involve the sale or distribution of produce. Under the new Land Use Plan, urban gardens will be allowed in any residential place type.

Garage Sales

Currently, the sale of food products on-site is not allowed in residential areas. However, a Flint resident may obtain a permit to conduct a yard sale. Minnesota allows the sale of urban agricultural products on-site as a special event. The City should allow for the sale of agricultural products on-site via a similar process as permitting yard sales.

BENEFITS OF PROVIDING ACCESS TO LOCAL PRODUCE

New York City: Green Carts, Healthy Bodegas, Health Bucks, and FRESH

In New York City, the Departments of Health, Planning, Housing, Economic Development, and the Mayor's Office all played a role in developing and implementing several innovative programs including: Green Carts, to help produce vendors locate in underserved neighborhoods with high rates of obesity and diabetes; Healthy Bodegas, to improve healthy offerings in corner stores; Health Bucks, to promote produce purchasing at farmers' markets; and FRESH, to provide zoning and financial incentives to promote grocery store development, upgrading, and expansion in underserved areas.

Pennsylvania Fresh Food Financing Initiative

The Pennsylvania Fresh Food Financing Initiative has helped develop supermarkets and other fresh food outlets in 78 underserved urban and rural areas, increasing access to healthy food for nearly 500,000 residents and creating or retaining 4,860 jobs.

Ongoing Support for Fresh & Healthy Foods

The popularity of urban agriculture and urban gardening is clearly evident in Flint, which has over 200 active agriculture operations or community gardens. In many cases, vacant and unused lots are converted into active gardens. While there are many groups working in Flint to ensure local access to fresh and healthy food, there are a few that are more prominent:

Flint Farmers' Market

The Flint Farmers' Market provides an exchange for local produce in Flint. The market currently has 30 vendors in one building and 50 more vendors outside. The indoor market operates on Tuesdays, Thursdays, and Saturdays year round, while the outdoor market operates from May through October. The market provides educational programs throughout the year, and it partners with other community organizations to provide food to low-income families through the Double Up Food Bucks program. In addition to produce, the Farmers' Market hosts live, local music on most market days as well as several events throughout the summer.

The market's manager, Uptown Reinvestment Corporation (URC), has announced plans to expand their market at a new location in the former Flint Journal printing facility in Downtown Flint in 2014. This facility is directly across the street from the central MTA terminal, making it easily accessible by transit for low-income individuals. In the past several years, Downtown Flint has experienced a revitalization with many renovated buildings, new businesses, and increased housing choices. The new facility will be double the building footprint of the current market, providing a 200-person meeting room and a commercial kitchen that will become an incubator and test kitchen for entrepreneurs and vendors.

'edible flint'

The mission of 'edible flint' is to support Flint residents in growing and accessing healthy food in order to re-connect with the land and each other. While 'edible flint' supports food gardening and healthy food access through training, education, networking, and providing garden services, it does not manage any gardens directly. Key activities include operating a co-operative to sell food, organizing an annual garden tour, leading a training course for new growers, and providing tilling, soil testing, and compost delivery for new gardeners (as funds are available).

Flint River Farm

Flint River Farm is one of the largest urban farms in the City of Flint and sits on nearly two acres of land across 16 lots near Downtown. While this farm is large for urban standards, it is a small, organic operation by industrial agriculture standards. The farm is run by two local farmers and is largely funded through a $90,000 one-year Ruth Mott Foundation grant, but is also community-supported. This operation allows local community members to subscribe to a once a week box of produce for a 16-week season for a flat, pre-established and contracted rate. The River Farm also has volunteer days, and educational classes and workshops for community members to attend.

Hurley Community Garden

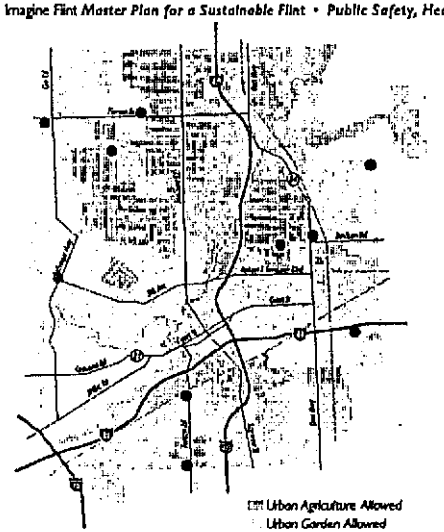
The Hurley Community Garden is located just near the Hurley Medical Center and provides beautiful landscape for the patients, visitors, and workers at Hurley Medical Center as well as the surrounding neighborhood. Additionally, the Community Garden aims to bring the community together to maintain the area, while fighting local hunger through donations to the Food Bank of Eastern Michigan and to the needy people within the immediate community. With rows of beautiful flowers, plants, and nearly 50 different vegetables and ample sidewalks between plots, anyone of its visitors can enjoy the produce and calming space that it creates.

Implementing Urban Food Production

There are challenges in determining where urban food production should be, how large it can be, who can participate, and how it should function. Providing a legal framework is challenging, given a lack of clarity about urban agriculture activities in the City's existing Code of Ordinances.

The City, in partnership with the Ruth Mott Foundation, Genesee County Land Bank, and Michigan State University Extension, reviewed existing legal barriers to urban agriculture and explored strategies for fostering it going forward.

A recent article in the *Journal of Agriculture, Food Systems, and Community Development* titled "Creating a legal framework for urban agriculture: Lessons from Flint, Michigan" provided information on this issue. Promoting urban agriculture within Flint will require amending existing policies and must be addressed when the City rewrites the zoning code.



Urban Agriculture Allowed
Urban Garden Allowed
Existing Grocery Stores

Source: Flint & Genesee Chamber of Commerce

Grocery Stores in Flint

Flint residents spend more than $32 million on food and beverages outside the community, as the City's nine grocery stores meet only some of their needs. Additionally, a large portion of grocery sales within Flint are made at other businesses such as small independent shops, convenience stores, and gas stations. As a recent study found that only 21% of convenience stores sampled in the City offer fresh produce. As such, these uses often do not represent a reasonable quality option for fresh, healthy food.

The City should:

- Work with community groups, residents, and other government agencies to identify areas that lack access to healthy food and to understand local economic conditions and regional food systems.
- Work with investors, developers, and major grocery stores to facilitate the siting of new stores in affected neighborhoods.
- Identify, market, and assemble parcels that are appropriate for grocery store development.
- Compile a strong, succinct marketing package to developers that includes relevant market data, site information, and available incentives.

Once a grocery store is established in a community, additional food access actions must be undertaken to maximize market reach.

- Longer term transportation and land use planning should promote the co-location of food retail, transit access, and affordable housing.
- The City should evaluate existing transportation routes and improve the coordination of bus routes, bus stops, and schedules or add van pools or shuttles to maximize transit access to grocery stores and farmers' markets.
- The City should partner with retailers to launch programs such as mobile markets, grocery shuttles, and grocery van delivery to improve access to healthy food.

School Programming

The school environment is a major influence on children's food choices and eating habits. Schools can ensure that available food and beverage options are healthy to help young people eat food that meets the dietary recommendations outlined by the Surgeon General. The City should work with Flint Community Schools to educate children, parents, and educators about the value of nourishing food and its positive effects on overall health and development.

HEALTHIERUS SCHOOL CHALLENGE

The HealthierUS School Challenge (HUSSC) establishes rigorous standards for schools' food quality, participation in meal programs, physical activity opportunities, and nutrition education, and is a good resource for seeking information related to healthy food implementation in schools. Participation in this and similar programs by Flint Community Schools is a good way to promote nutrition and celebrate significant milestones and achievements.

The City should also work with the School District to find practical solutions for enhancing current lunch programs. This includes reviewing existing beverage/snack vending machine contracts in the City's schools.

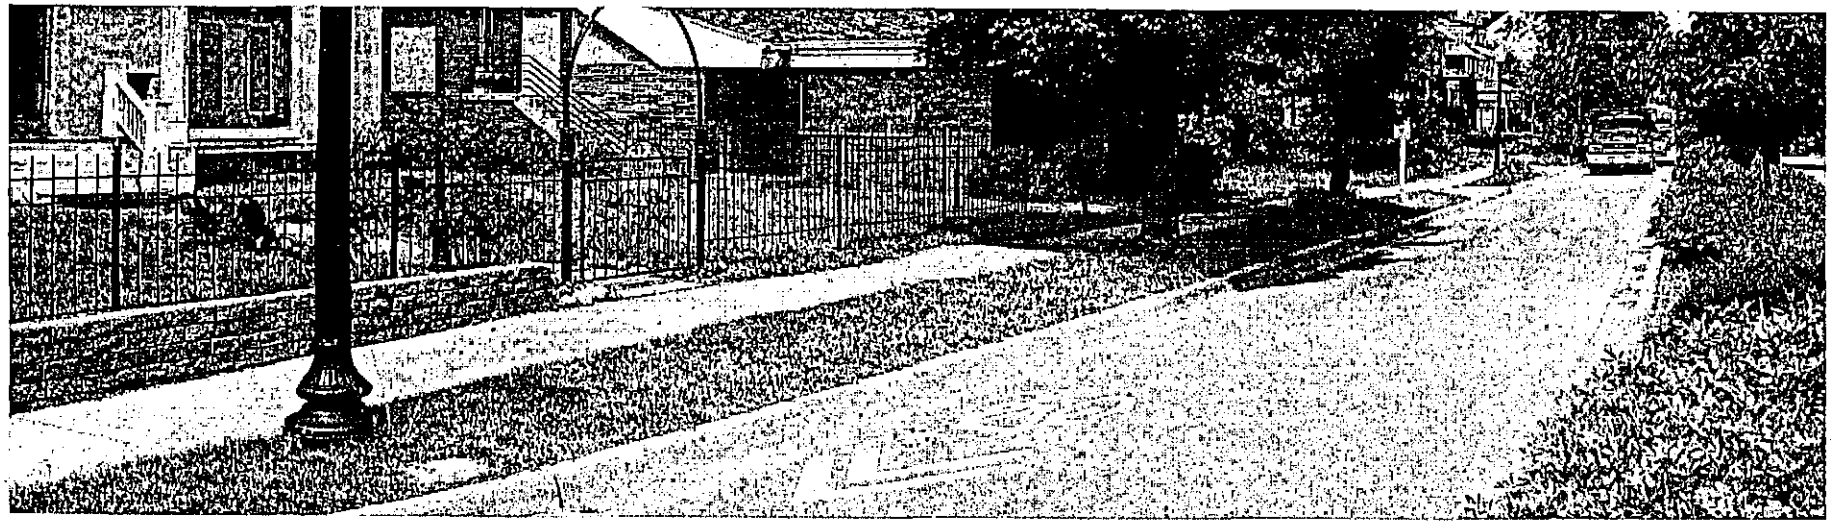
The expanding urban agriculture movement presents a good opportunity for Flint's schools to utilize the resources on hand. Schools should partner with community garden and urban agriculture groups to integrate food education into their curriculum.

PHYSICAL ACTIVITY & EXERCISE

According to a 2012 Greater Flint Health Coalition report, approximately 31% of Flint residents get physical activity less than once per week. Regular physical activity like walking, biking, and other active recreation has immense benefits for health. The City can play a proactive role in reversing poor health trends by encouraging physical activity through changes in policies, programs, and the built environment.

Walkability & Bikeability

When combined in the right urban form, components of the built environment can contribute directly to physical health. The physical layout and design of buildings, streets, and sidewalks and the siting of open space, public facilities, and other uses directly determine the walkability and bikeability of a community. The Surgeon General advises that 30 minutes of walking five days a week, which will significantly reduce the risks to adults for health condition like obesity, respiratory problems, heart disease, and other chronic diseases, while also contributing to healthy bones, muscles, and joints. In addition to their physical health and safety benefits, walkable communities generally enhance residents' overall quality of life and contribute to their neighborhood's unique identity.



HEALTH & WALKABILITY

- On a daily basis, each additional hour spent driving is associated with a 6% increase in the likelihood of obesity, while each additional kilometer walked is associated with a 5% reduction in this likelihood.
- Forty-three percent of people with safe places to walk within 10 minutes of home met recommended activity levels; just 27% of those without them met the recommendation.
- Residents are 65% more likely to walk in a neighborhood with sidewalks.
- People in walkable neighborhoods do about 35-45 more minutes of moderate physical activity per week, and are substantially less likely to be overweight or obese than similar people living in low-walkable neighborhoods.
- Easy access to transit can also contribute to healthy physical activity. Nearly one third of transit users meet the Surgeon General's recommendations for minimum daily exercise through their daily travels.

In a walkable and bikeable community, it is easier to accumulate the recommended 30 minutes of activity since daily tasks, such as commuting to school or work and running errands, can be performed by walking and biking rather than driving. Individuals have to make these personal choices about active modes of transportation, but the infrastructure investments from local government can influence those choices. In many cases, people who may want to walk or bike may not be able to due to inadequate pedestrian infrastructure, land use and zoning patterns, traffic conditions, or road designs.

Specific recommendations to improve walkability and bikeability throughout the City including ones related to sidewalks, trails and paths, complete streets, ADA compliance, and more, are provided in *Chapter 6: Transportation and Mobility Plan*. Pursuing responsible land use and zoning patterns and encouraging new types of development are also effective tools to create walkable environments. *Chapter 4: Land Use Plan* describes places in Flint where compact, walkable neighborhoods could flourish.

Recreational Programming

Varied recreational opportunities make physical activity interesting, enjoyable, and encourage life-long fitness habits. Just 30-60 minutes of regular physical activity can result in significant mental and physical health benefits. The benefits of staying active include reduced obesity, a diminished risk of disease, an enhanced immune system, strong bones, and increased life expectancy. Regular physical activity can also reduce the risk of depression, increase self-esteem, reduce mental impairment, and improve sleep.

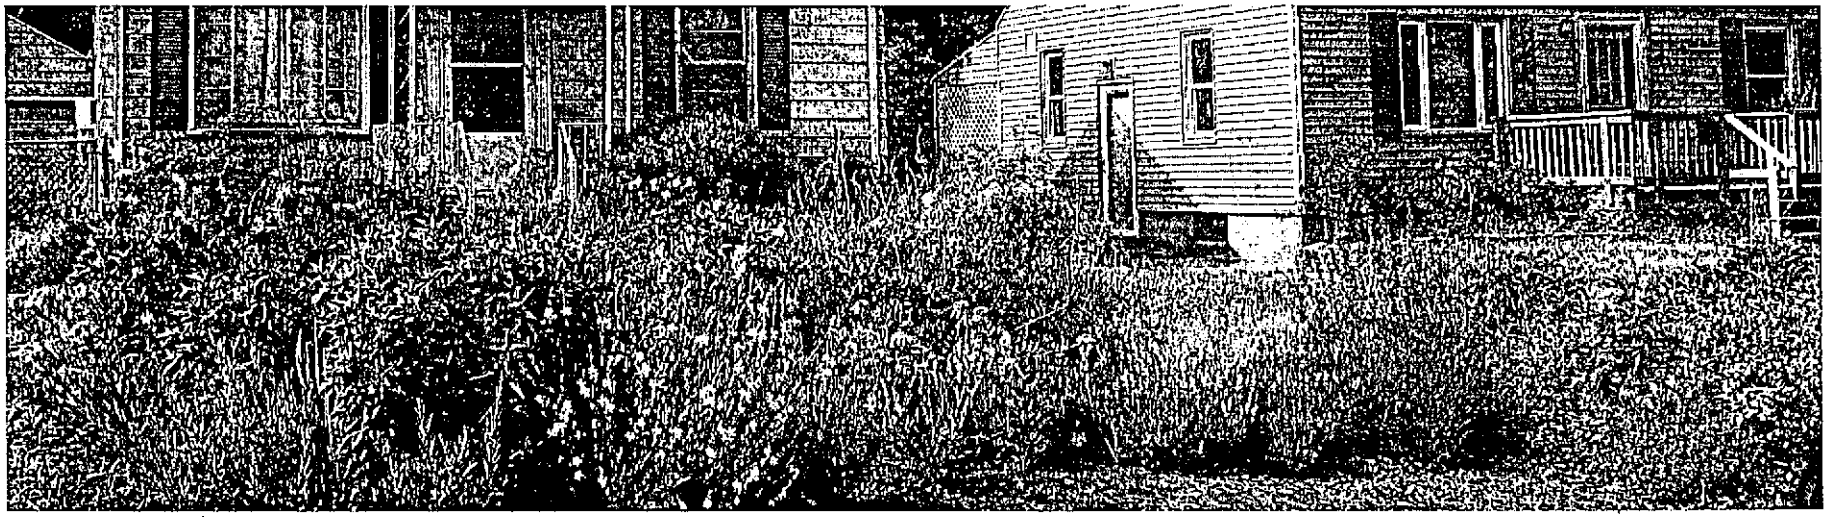
The City should make physical activity fun, safe, and accessible by making opportunities more readily available and actively promoting the link between parks and recreation resources and improved mental, physical, and societal health. Detailed recommendations for recreational programming can be found in *Chapter 7: Environmental Features, Open Space, and Parks Plan*.

THE BENEFITS OF A HEALTHY WORKPLACE

A workout program initiated by the multinational company Johnson & Johnson, improves health in its employees by incentivizing healthy living. Their process begins with an annual, online health-risk assessment, where employees self-report everything from diet and exercise habits to cholesterol levels. Compliance in the program is near-universal because if employees don't participate they pay a penalty of $500 more toward their health insurance premium.

Based on the assessment, employees work with health care professionals to make lifestyle changes. J & J assist their employees in making better choices by offering healthy options in their cafeterias and vending machines, Wii Fit stations and gym in their facilities, and an energy performance training program.

Studies of the outcomes have shown that the program achieved $565 in annual health care savings per US-based employee from 2002 to 2009. More importantly, J & J employees were less likely to be at high-risk for high blood pressure, obesity, and tobacco use.



COMMUNITY ORGANIZATIONS & FOUNDATIONS

Community organizations and foundations play a significant role in providing services in Flint. Serving missions as wide-ranging as healthcare and maintaining vacant lots, community organizations and foundations provide services that often times are not provided by the private, for-profit or government sectors. In 2010, there were an estimated 119 active foundations in the City of Flint and Genesee County with total revenue of $122.5 million. Collectively they provided an estimated $112.0 million in charitable contributions to the Genesee County community in 2010.

In addition to non-profit community organizations and foundations, in 2012 Genesee County had a total of 236 social organizations and 311 religious organizations. While the total net impact of these organizations is hard to quantify financially, they are undoubtedly responsible for valued social, health, and general welfare services.

All of these groups are important to the long-term success of Flint residents and the larger community, and the City should proactively seek opportunities to partner with them. Within this broad set of service providers, there are some organizations that manage large-scale social services:

- *Charles Stewart Mott Foundation:* The Charles Stewart Mott Foundation is a private foundation that is focused both locally and internationally and provide grant funding through four program areas: Civil Society, Environment, Flint Area, and Pathways Out of Poverty.
- *Ruth Mott Foundation:* The Ruth Mott Foundation strives to "advocate, stimulate, and support community vitality." The foundation is providing funding for arts and culture, beautification, and health promotion.
- *Metro Community Development:* With a mission to expand and enhance quality housing and community development initiatives in Flint and Genesee County, Metro Community Development (MCD) organization provides programs, housing development, and lending services for individuals, families, and businesses.
- *Community Foundation of Greater Flint:* The Community Foundation of Greater Flint (CFGF) is a non-profit organization that provides tools and resources to help individual, families, businesses, and other non-profit organizations achieve their charitable and financial goals. The CFGF spends $4 million annually on grants and program sponsorship in Flint.
- *Other Local Service Providers:* The City should work to coordinate services provided by a number of local organizations, including the Boys and Girls Club, YWCA, YMCA, Big Brothers, Salem Housing, Flint NIP, Court Street Village Housing, United Way, and others. These organizations, in conjunction with those previously described, represent a broad spectrum of potential social services.

Coordinated Community Services

Flint is blessed with an active population made up of individuals who are invested in the betterment of the community. The City should continue to support the efforts of all who wish to volunteer in a constructive and collaborative way. However, with so many organizations providing a vast array of services, it is likely that there is overlap, redundancy, and inefficiency when looked at holistically.

The City should advocate for the coordination of community services from the consumer's perspective. The City should work with community services partners to determine the most equitable and efficient way to implement this, whether it is the formation of a City staff position, a non-affiliated non-profit umbrella organization, or an informal consortium of representatives from recognized community service providers. Regardless, the outcomes of this effort should be:

- Service provisions that are more closely coordinated among partners to ensure that resources are maximized and services are of the highest possible quality.
- Central clearinghouse of information that allows the consumer to easily query available services based on the type of service, area of the City, preferred affiliations, or other factors.
- Coordinated fund raising and networking that maximize the exposure of all service providers.
- Forum for service providers to share lessons learned regarding financing, regulations, outreach, marketing, and other aspects of operations and management.

Comprehensive Marketing & Outreach

With so many community groups offering so many different services, communicating the services provided to the people that need them can be challenging. Creating a network will significantly help market services to the Flint and Genesee County population. The network would facilitate a regional multi-media marketing campaign to draw people from outside Flint. A campaign should especially market programming to Flint's youth, a population that Flint residents see as underserviced. Additionally, local staff or a volunteer located at City Hall, could act as a "one-stop shop" concierge for what programs are available.

A website combining the various organizations services and programming could describe all of the cultural offerings in Flint as well. It could also host an online questionnaire, gathering information about local interests, demographics, and marketing and outreach approaches. This information could be used to tailor outreach techniques to best inform citizens of cultural opportunities in Flint.

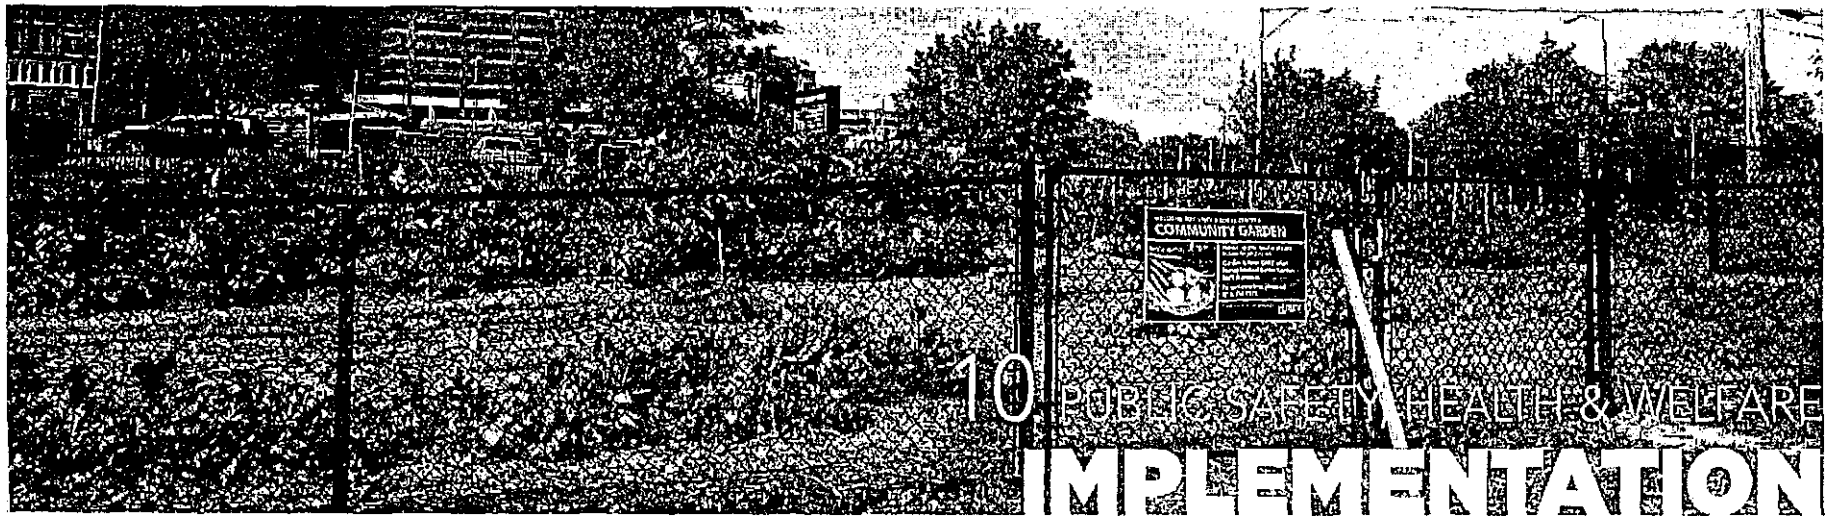
The City and its community organizations should partner with the Flint and Genesee Chamber of Commerce, which already markets many of the region's main attractions. Joint initiatives could include:

- Development of a coordinated website describing all cultural offerings;
- A regional multi-media marketing campaign to draw people from outside Flint;
- Use of local staff or volunteer as a "one-stop shop" concierge for what programs are available;
- Implement a consolidated survey; or,
- A joint marketing campaign to youth.

Expanded Funding Options

Funding is a significant challenge confronting Flint's community service providers. The City should partner with Genesee County and local organizations to procure financing for on-going and desired programming. Some of these sources include:

- Grants through the National Endowment for the Arts (NEA) to fund artistic excellence, creativity, and innovation in the Flint community.
- Three programs administered by the Michigan Council for Arts and Cultural Affairs (MCACA) for community facilities improvements.
- Explore new donor programs, like Power2Give.org to expand financial support.



10 PUBLIC SAFETY, HEALTH & WELFARE IMPLEMENTATION

This section presents the strategies needed to implement the goals and objectives of the Public Safety, Health and Welfare Plan. Taken together, the objectives and strategies included in this section provide specific direction and serve as a guide for the evaluation of development proposals and land use alternatives.

To provide the City with a reliable policy guide for decision-making, the objectives and strategies are based significantly on community input received through the master planning process. In addition to broad community input, these objectives and strategies are based on input from the 15 member Public Safety, Health and Welfare Advisory Group, Steering Committee, City officials, City staff, and observations and assessment from the Imagine Flint Project Team.

Implementation Matrix

The following Implementation Matrix groups strategies by topic within each objective and identifies anticipated time frame, relative cost, and the entities, including City of Flint departments and partner organizations, potentially responsible for the implementation. The matrix also identifies key metrics needed to track implementation progress.

Time Frame

A general time frame is assigned to each strategy, considering the cost of various types of improvements and their ability to set other actions in motion. Generally, low-cost strategies with easy implementation are given the short-term time frame, though some other actions are given this designation based on their high level of priority in meeting community objectives or ensuring the safety of residents.

Each strategy in the Implementation Matrix is indicated with one of the following:

- *Short:* low-cost, ease of implementation, directly addressing top priorities, or critical to the advancement of other strategies, and to be implemented within the next 1-5 years
- *Medium:* important actions that have some level of significant cost, and can be implemented within the next 5-10 years
- *Long:* actions that often require significant amounts of funding that must be planned for over time, or require other strategies to be completed prior to their implementation

Public Cost Estimate

Public cost estimate is represented by a scale ranging from $ to $$$. The costs in this column refer only to public costs. Below is a description of the cost scale:

- $: Actions that require primarily internal staff time requiring mostly regulatory changes, policy updates, or strategic partnerships with limited outside funding required
- $$: Actions that require outside consulting services assistance or relatively minor investment in infrastructure or project development
- $$$: Actions that require intensive planning, engineering or design, and significant investment in infrastructure or project development

Responsible Entities & Partner Organizations

City government alone is not capable of implementing the Master Plan. This is a community vision which relies upon Flint's greatest assets, its people and community stakeholders to help implement desired aspirations.

With regard to citing those entities responsible for implementation, it should be noted that it is anticipated, from a policy standpoint, that the Mayor and City Council will be involved in the majority of these actions.

Where a City Department should be involved, that department has been listed. Where general administrative leadership is needed, the City of Flint has been listed. Strategies, such as recommended technical studies and analyses that would likely benefit from outside expertise, have also been highlighted.

Unforeseen Partnership Opportunities

Every effort was made to identify a comprehensive list of potential partner organizations for inclusion in the implementation matrix. As a community of over 100,000 with a rich history of volunteerism and over 100 foundations active in Genesee County, there may be instances where a deserving organization that is well-matched to one of the Plan objectives or strategies has been excluded from a list of potential partners for a given topic.

Similarly, there may come a time when a partner organization identified in the implementation table merged with another organization or otherwise ceases to exist. As with the rest of the Master Plan, the implementation table is a flexible document that should be regularly updated and revised to reflect the evolving needs and assets of the Flint community.

Progress Indicators

Key progress indicators have been provided for each strategy grouping. Progress indicators identify quantifiable metrics for which data should be available on a regular basis and indicate desired trends for each metric. These indicators represent measurable achievements that move the City toward realization of Master Plan objectives. These progress indicators will enable the City to monitor its effectiveness at implementing Plan recommendations.

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Codes, Ordinances & Policies	Implement a streamlined, proactive code enforcement strategy in partnership with the Flint Police Department.	Medium	$	• Neighborhood Organizations • Neighborhood Safety Officers • Flint Police Department • City of Flint Planning Development Department • City of Flint Law Department • Michigan State Police • US Department of Justice • City of Flint Planning & Development Department • City of Flint Facilities Maintenance • City of Flint Transportation Division • Flint Community Schools	• Decrease in code violations • Decrease in blighted properties city-wide • Decrease in number of non-compliant businesses • Decreased number of liquor stores per capita • Decreased number of structures that represent arson and crime hot-spots • Decrease in malfunctioning lights city-wide
	Develop a "Blight Court" to prosecute blight and code enforcement violations.	Medium	$$		
	Strengthen existing City ordinances and advocate strengthening State laws regarding salvaging scrap material from homes.	Short	$		
	Amend the zoning code to reflect the best practices in Crime Prevention through Environmental Design (CPTED).	Short	$		
Safety & Infrastructure	Work with the State to revoke the business and/or liquor licenses of establishments not complying with the law.	Medium	$		
	Continue to evaluate the existing street lighting system to ensure it meets current needs and that all lights are fully functioning.	Short	$		
	Develop "safe routes" to schools by implementing the recommendations of the Transportation and Mobility Plan.	Long	$$		
	Take spatial analysis of violent criminal activity and arson into account when prioritizing demolitions.	Short	$		
Neighborhood Initiatives	Strengthen neighborhood watch capabilities with accepted protocols, standards of performance, and incorporation of youth into watch activities.	Short	$	• Community and faith-based groups • Flint Police Department • Flint Fire Department • City of Flint Planning & Development Department • Michigan State Police • Flint Community Schools • Volunteers • Neighborhood Groups • Block Clubs	• Increased number of active neighborhood watch and block club groups • Increased number of Blue Badge volunteers • Increased number of fire education events • Decrease in neighborhood arsons
	Promote the cooperation and technological integration of watch groups.	Short	$		
	Expand opportunities for community fire prevention and safety training.	Short	$		
	Embrace best practices in community policing.	Short	$		
	Expand the Police Department's "Blue Badge" volunteer program.	Medium	$		
	Increase the number of block clubs by offering training toolkits and mini-grants.	Medium	$$		
Police/ Community Collaboration	Increase law enforcement presence at school, after-school, and community organization activities.	Medium	$$	• Flint Police Department • Flint Fire Department • Genesee County Sheriff • Michigan State Police • US Department of Justice • Flint Community Schools • After school programs • Resource Genesee	• Increase in number of staffed service stations • Increase staff levels at special events • Increase in neighborhoods with public safety action plans • Decrease in neighborhood based crime
	Hold community conversations between police officials and residents regularly throughout the year.	Short	$		
	Develop neighborhood public safety action plans in partnership with law enforcement, community groups, faith-based organizations, and local businesses.	Medium	$		
	Expand the role of neighborhood service centers (formerly police mini-stations), including the staffing of assigned community policing personnel to each location and the incorporation of service centers into other programs.	Long	$$		
	Establish a Joint Citizen and Police Committee to instill citizen confidence in local law enforcement.	Short	$		
Efficiency & Capacity Building	Increase Flint Police and Fire Departments staffing levels.	Long	$$	• Flint Police Department • Genesee County Park Rangers • Area Colleges & Universities	• Increase level of Police Department Staffing • Decrease in Police response times
	Explore creation of an auxiliary or reserve force to assist full-time officers.	Short	$$		

PUBLIC SAFETY, HEALTH & WELFARE IMPLEMENTATION MATRIX

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Innovation & Technology	Participate in regionalization and shared services, such as 9-1-1 consolidation and unification of the Flint area's two district courts.	Medium	$$	• Flint Police Department • Flint Fire Department • Genesee County Sheriff • Michigan State Police • Michigan Department of Corrections • US Department of Justice • 9-1-1 • Area Colleges & Universities • Genesee County Park Rangers	• Increased participation in IT training sessions for law enforcement • Increase amount of law enforcement data collected
	Implement a modern computerized crime statistics system to drive strategy, adapt staffing levels, and promote officer accountability.	Medium	$$		
	Increase opportunities for officer training in information technology.	Short	$		
	Centralize data and reporting in a user-friendly website where residents can obtain up-to-date crime statistics, crime maps, and communications from the Flint Police Department.	Medium	$		
	Work with the Flint Police Department, Michigan State Police, Genesee County Sheriff's Office, and other law enforcement partners to develop uniform, shared data protocols.	Short	$		
	Build upon efforts of the Criminal Justice System Advisory Council to provide continuous assistance to the Police Department on state-of-the-art operations and technology.	Short	$		
Building & Establishing Partnerships	Encourage residents to report low-priority crimes either online or at neighborhood service centers in order to keep more officers on the street.	Short	$	• Flint Police Department • Flint Fire Department • 9-1-1 • Area Colleges and Universities	• Decrease in improper 9-1-1 calls • Increase in the percentage of low-priority incident reports filed on-line or at service stations
	Increase coordination and communication between EMTs and law enforcement when responding to 9-1-1 calls.	Short	$		
	Reduce 9-1-1 misuse by educating the public about proper emergency protocols.	Short	$		
Police Presence & Effectiveness	Strengthen participation in and resources for multi-jurisdictional task forces.	Medium	$	• Flint Police Department • City of Flint Planning Development Department • Genesee County Sheriff • Genesee County Land Bank • Michigan State Police • US Department of Justice	• Increased number of beat patrols • Increased frequency of parole and probation violator sweeps • Decrease in number of violent crimes • Decrease in outstanding warrants
	Expand the street presence of federal law enforcement agencies.	Medium	$$		
	Deepen patrol partnerships with the Michigan State Police and the Genesee County Sheriff's to more effectively prevent crime.	Short	$		
	Develop a regional investigative bureau to utilize best practices in case preparation and court participation.	Long	$$		
	Increase the frequency of parole and probation violator sweeps.	Medium	$		
	Develop tough, equitable, data-driven, and consistent gun crime prosecution policies with the United States Attorney General, the Michigan Attorney General, and the County Prosecutor.	Short	$		
	Ensure City lockup remains open.	Short	$$		
Program Integration & Strengthening	Re-establish pre-trial and probation services in the District Court serving Flint.	Medium	$	• Genesee County Courts • Flint Housing Commission • Flint Police Department • US Department of Justice • Resource Genesee • Flint Lifeline (CeaseFire FLINT)	• Decrease in public housing agencies without public safety plans • Increase in number of guns taken off the streets • Increase in percentage of participants in ex-offender programs • Decrease in gang-related crime • Decrease in the annual number of violent crimes
	Create comprehensive public safety plans for public housing agencies.	Short	$		
	Implement an ongoing gun buyback program to reduce the number of illegal guns.	Medium	$$		
	Raise the awareness and capacity of prisoner re-entry programs, which would connect ex-offenders with a variety of employment opportunities, mentoring services, housing options, and other resources.	Short	$		
	Develop a gang violence prevention strategy that aims to educate youth about the risks of gang participation.	Short	$		
	Support existing and develop new research-driven programs of "focused deterrence," such as the Flint Lifelines program.	Medium	$		
Arson Awareness & Prevention	Create and maintain a comprehensive data base to record potential arson trends around the City.	Short	$	• Flint Area Reinvestment Office • Flint Fire Department • Flint Community Schools • Community Centers	• Increased participation in person awareness and prevention programs • Decrease arsons
	Pursue grant funding from the United States Fire Administration (USFA) to fund Fire Department activities.	Short	$		
	Participate in Arson Awareness Week to provide all residents with strategies to combat arson in their neighborhoods.	Short	$		
	Encourage the Fire Department to participate in USFA arson prevention programs to decrease the number of annual arsons.	Short	$		
	Work with the Fire Department to implement in-school fire prevention programs to educate children about the danger of fires.	Short	$		

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Outreach & Awareness	Work with Resource Genesee and other health partners to expand the existing clearing house for all public health information, with special emphasis on reaching homeless populations.	Short	$	• Health & Fitness advocacy programs and organizations • Flint Area Congregations Together • Hospitals and Providers • City of Flint Planning & Development Department • Healthcare providers • Greater Flint Health Coalition • MTA • Community-based organizations • Flint Community Schools	• Increase in "hits" on health related websites • Increase in the number of eligible Flint residents enrolled in Medicaid and WIC • Increase in the percentage of residents with health insurance • Increase number and frequency of bus routes that provide access to healthcare facilities • Increased number of people using Flint health care facilities for preventative services • Decrease of child poverty rate • Increase in number of schools offering healthy food options • Decrease in the amount of known buildings or sites containing lead
	Participate in collaborative partnerships with faith based institutions and community groups to promote awareness of or provide key health services such as Medicaid enrollment or immunization.	Short	$		
	Develop a broad marketing and outreach campaign to ensure all community members see and hear about all available healthcare resources.	Medium	$$		
	Establish strategically located community centers to provide entry points for health and human services.	Medium	$$		
Access & Availability	Encourage pharmacies, treatment facilities, and urgent care clinics to locate in underserved neighborhoods.	Short	$		
	Support policies, practices, and funding opportunities that expand healthcare services and increase accessibility of facilities to residents.	Short	$		
	Work with the MTA to evaluate and modify public transit schedules for convenience and reliability in traveling to healthcare locations.	Short	$		
Quality & Care	Work with relevant stakeholders to enact structural changes in healthcare delivery reimbursement models.	Medium	$		
	Increase collaboration between hospitals, Michigan Department of Corrections, mental health organizations, and housing services to ensure a continuum of care.	Short	$		
	Ensure that reduction of child poverty remains a key metric and central consideration for all new and existing social services.	Short	$		
	Reduce the amount of lead in buildings and soil by education, remediation, and/or mitigation.	Long	$$		
	Work with schools and community centers to promote healthy food offerings.	Medium	$		
Food Production	Revise the City's zoning ordinance to align with the Land Use Plan, facilitating local food production, distribution, and retail sales in appropriate areas.	Short	$	• City of Flint Planning & Development Department • City of Flint Utility Division • Genesee County Land Bank • Flint Community Schools • Urban agriculture organizations	• Increased acreage of land dedicated to food production • Increased number of school garden programs • Increase in the percentage of produce in grocery store provided by local growers • Increased number of municipal composting sites throughout the City
	Streamline and/or ease the acquisition process for parcels intended for urban agriculture, community gardens, food production, distribution, and local food businesses.	Short	$		
	Adopt an urban agriculture policy that supports local growing, provides recommendations to improve access to local food, and ensures compatibility with adjoining uses.	Short	$		
	Promote the development of community gardens and other agricultural uses consistent with the Land Use Plan's place types, based on the availability of land banked parcels in these areas.	Short	$		
	Evaluate opportunities for municipal composting.	Medium	$		
	Support local food planning efforts by linking local growers with merchants, markets, convenience stores, restaurants, and grocery stores.	Short	$		
	Encourage the establishment of school gardens.	Medium	$		
Access to Food	Support efforts of the State, County, and non-profit organizations to encourage fresh food retailers to accept public food assistance programs.	Short	$	• City of Flint Planning & Development Department • Social service providers • Area Farmers Markets • Local businesses • Urban agriculture organizations	• Increased number of fresh food retailers accepting public food assistance programs • Increase in the percentage of produce in restaurants from local growers
	Promote neighborhood composting and post-demolition clean-fill enforcement within appropriate place types consistent with the Land Use Plan.	Short	$		
	Create strategies and provide incentives for restaurants and stores throughout the City to utilize locally grown and harvested produce.	Short	$		
	Create strategies and provide incentives to foster healthy convenience stores in neighborhood centers throughout the City.	Short	$		
	Strengthen satellites of the Flint Farmers Market in underserved neighborhoods.	Medium	$		
Community Engagement	Maintain an inventory of local food production sources, including community gardens, urban agriculture, and other activities.	Short	$	• City of Flint Planning & Development Department • Flint Community Schools • Health & Fitness advocacy programs and organizations • Urban agriculture organizations	• Increased number of food production sites in the City • Increased number of schools participating in the Farm-to-School Program
	Increase public awareness of the individual benefits of fresh, healthy, and local food.	Short	$		
	Facilitate a community engagement process to create a Food System Plan for the City of Flint.	Medium	$		
	Partner with schools to establish a Farm to School program to connect the City's schools and local growers to serve healthy meals in school cafeterias.	Medium	$		
	Establish a Food Policy Council	Short	$		

STRATEGY		TIME FRAME	PUBLIC COST ESTIMATE	DEPARTMENT / ORGANIZATION	PROGRESS INDICATOR
Personal Mobility	Revise the City's zoning ordinance to incentivize the development of walkable mixed use neighborhoods.	Short	$	• City of Flint Planning & Development Department • Flint Transportation Division • Health & Fitness advocacy programs and organizations	• Increased amount of new bicycle infrastructure and facilities • Increase in ADA-compliant intersections • Decrease in the percentage of Flint's population considered at risk of obesity, hypertension, etc. • Increase of Genesee County health rankings as compared to other Michigan counties
	Support bicycling through bike lanes, trails, storage, signage, active transportation campaigns, and other recommendations from the Transportation and Mobility Plan.	Medium	$$		
	Enhance walkability by ensuring Americans with Disabilities Act (ADA) compliance for all sidewalks and crosswalks, repairing and maintaining sidewalks, instituting clear street signage, increasing crosswalks in priority and high-traffic corridors, and other recommendations from the Transportation and Mobility Plan.	Medium	$$		
Active Health & Welfare	Leverage unique natural assets such as the Flint River and associated trails to increase biking, jogging, walking, kayaking, and other healthy activities.	Short	$	• Flint River Watershed Coalition/Corridor Alliance • City of Flint Planning & Development Department • Healthcare providers • Flint Parks and Recreation Department • Genesee County Parks • Business Community • Greater Flint Health Coalition	• Increased percent of residents who participate in active exercise programs • Increased number of employers sponsoring wellness programs and strategies
	Maximize recreational opportunities for citizens through public pools, parks, and gymnasiums.	Medium	$$		
	Collaborate with existing community-based health improvement campaign to maximize exposure to exercise and healthy lifestyles.	Short	$		
	Implement comprehensive workplace wellness strategies, starting with major employers.	Short	$		
	Ban smoking in City-owned buildings, parks, and other properties, and encourage voluntary participation from other institutions and major employers.	Short	$		
Early Intervention	Increase capacity for mentoring services for at-risk children in coordination with local non-profit organizations and churches.	Medium	$$	• Flint Police Department • City of Flint Planning & Development Department • Flint Community Schools • Flint Area Congregations Together • Urban agriculture organizations • Priority Children • Conflict Resolution Center • Community-based and faith-based organizations	• Decrease in child poverty rate • Increased number of business "safe havens" • Increased participation in youth mentoring and conflict resolution programs • Decrease in the number of violent crimes
	Expand mediation and conflict resolution services to ensure disputes end non-violently.	Short	$$		
	Ensure that reduction of child poverty remains a key metric and central consideration for all new and existing social services.	Short	$		
	Develop, in partnership with law enforcement, health, education, and social service stakeholders, a comprehensive strategy to prevent at-risk youth from criminal activity.	Short	$		
	Work with the business community to identify and market businesses that are safe places to go in a crisis or get access to help.	Short	$		
Education & Employment	Encourage area employers to offer summer employment opportunities, internships, and apprenticeships to students.	Short	$	• Universities & colleges • Healthcare providers • Social service providers • Greater Flint Health Coalition • Business community • Flint & Genesee Chamber of Commerce and TeenQuest • Genesee Intermediate School District	• Increase in youth summer employment • Increased participation in youth development programs • Increase in grant funding for early childhood programs
	Bolster linkages between City youth and the area's four colleges to promote aspirations for higher education.	Short	$		
	Expand successful youth development programs which prepare disconnected youth for societal re-engagement.	Medium	$$		
	Pursue funding opportunities from a range of sources, including Federal, State, and local grants, for expanded prenatal services and early childhood education.	Short	$		
Health & Wellness	Work with schools and community centers to promote healthy food offerings.	Short	$	• City of Flint Planning & Development Department • City of Flint Facilities Maintenance • Flint Community Schools • Health & Fitness advocacy programs and organizations • Flint Parks and Recreation Department • Urban agriculture organizations • Green and Healthy Homes Initiative	• Increased funding for lead remediation • Increased number of schools with healthy food options • Decrease in the number of liquor stores per capita
	Work with coordinated school health teams, school districts, parent-teacher organizations, student groups, and community partners to expand opportunities for youth physical activity both during and outside of school hours.	Short	$		
	Promote awareness of the risk factors for sexually transmitted infections (STI) and teen pregnancy through increased partnerships with schools, churches, and other community organizations.	Short	$		
	Reduce the amount of lead in buildings and soil by education, remediation, and/or mitigation.	Long	$$$		
	Bring the number of liquor licenses into line with the City's population, as defined by State law.	Short	$$		
	Enact City ordinances restricting signage for adult uses, alcohol, and cigarettes.	Short	$

PLACEMAKING TOOLKIT

JUNE 2013 | DOUGLAS VOIGT ASSOCIATES | CITY OF FLINT PLANNING STAFF

WHAT IS PLACEMAKING?

In 1960, Flint's population almost reached 200,000, requiring the development of areas beyond the original 1920s Comprehensive Plan footprint. As the population rapidly declined, many once vibrant areas of the City were abandoned and slowly began to deteriorate, ultimately resulting in widespread blight. As the City has secured funding over the last several years for demolition, thousands of vacant lots have been left behind. These vacancies also present the City with a huge opportunity to re-invent our land use pattern for the 21st Century.

Through 'Placemaking', residents can redefine their neighborhoods and create a unique sense of place with distinctive characteristics, whether these areas are now dense with multi-family housing or less populated with single family houses on large plots of land. This sense of place should reflect the area's function within the community as well as the character of local residences and businesses. The placemaking concept underscores the fact that all places are important to the collective functioning and livelihood of the City.

What is the Placemaking Toolkit?

The Placemaking Toolkit is a series of place types that will be used to identify desired future land use, development pattern, and character for all areas of the City. Each place type is defined using a concise, descriptive narrative alongside a visual definition of desired character and function. These place types will form the basis for the Land Use Plan, a primary component of the Master Plan, and will inform the development of long term strategies to guide future development and reinvestment throughout Flint.

Several of the place types are based on desired land use and development patterns that already exist within Flint. As such, a key function of the toolkit will be to strengthen existing neighborhoods, commercial districts and corridors, and industrial/employment uses.

Damage Assessment and Emergency Status Report

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/06/2016 08:00:00
Operational Period End:	01/08/2016 17:00:00
Situation Report No.	2
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/07/2016 08:00:00 Thu
SEOC Hours of Operation End:	01/07/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 4, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

MSP/EMHSD GIS Section Update

Accomplished Today:
- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:
- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Incident Response/Recovery Priorities/Objectives

1. Activate the State Recovery Task Force
2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.
4. Establish SEOC operational period and hours of operations.

5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
6. Develop a comprehensive GIS strategy.
7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
9. Provide technical assistance to the local Damage Assessment process.
10. Establish a Joint Information Center (JIC) and develop a public information strategy.
11. Monitor MI CIMS for resource requests and address as appropriate.
12. Establish and disseminate cost center information for the incident.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational at 1 p.m. on Jan. 6 and operational from 8 a.m. to 5 p.m. on Jan. 7. State agencies at the JIC included the Departments of Licensing and Regulatory Affairs, Health and Human Services, Agriculture and Rural Development, Environmental Quality, and Michigan State Police.

During the 8 a.m. to 5 p.m. operational period, Gov. Rick Snyder held a press availability with Flint Mayor Karen Weaver. In addition, a round-table press briefing occurred at 1 p.m. at the 4000 Collins Road facility.

Objectives included:

- Oversaw and managed the state of Michigan public information duties due to emergency declaration.
- Held a 4 p.m. conference call with Genesee County PIO Sheriff Robert Pickell and city of Flint PIO Lead Sean Kammer.

Information Gathering
- Created media monitoring reports about the disaster as needed.
- Crafted talking points about the ongoing disaster, including a better description of the emergency declaration process.
- Crafted social media posts about state efforts underway during the disaster recovery process.
- Created graphics for social media efforts.

Information Dissemination
- Answered phones and manage media inquiries in regards to the Flint Water situation.
- Worked to establish a GovDelivery account; post link of website to sign up.
- Finalized details, media invite list and host a media roundtable.

External Affairs
- Worked on planing a conference call between command staff and affected state legislators and congressional Jan. 8, 2015.

Administrative
- Worked on filling staffing for the next operational period.

Logistics
- Worked on fixing email accounts.
- Worked to established a location with Genesee County and the city of Flint for a Unified Joint Information Center by the end of the week.
- Established a conference call line for the media roundtable.

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
Jan 7th 2016 4pm update:
MDARD and Genesee Local Health Dept. agreed to move guidance on water to a regulatory requirement. New language (after JIC approval) will be going out to retail food establishments and restaurants with follow up inspections and sampling. Planning will continue on logistics for sampling.
Animals - call into the Genesee County Animal Control Shelter not yet returned; will try again tomorrow.

American Red Cross (ARC)

The MSP/EMHSD planners asked the American Red Cross to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. We are working on this and calling upon Red Cross colleagues to contribute to it. We've briefed Red Cross Regional and Divisional management on this incident. The Red Cross will provide situational awareness regarding the services related to the water contamination that individual NGOs are providing to Flint residents.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Corrections (MDOC)

Approximately 75 staff members are working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Environmental Quality (MDEQ)

The Michigan Department of Environmental Quality (DEQ) staff continue to conduct testing in the Flint Schools.

Human Services (MDHS)

Summary for both Health & Human Services
Participated in 9:30 State Agency briefing,
Attended Recovery Task Force / Recovery Branch meeting.
Coordinating between CHECC and JIC.
Local MDHHS staff active in local EOC.
Participated in MDHHS 12:30 Flint Water Lead Project call
Gathering information on water filter acquisition, distribution, installation, life span and replacement.
Providing update to Executives
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA upgraded to a mandatory department for this incident

Attached is a Point of Contact (POC) List

Attached is a Work Report indicating what work LARA has done today in City of Flint

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids participating in morning SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Insp. Bolger is monitoring the incident via MICIMS and participating in State Agency Briefings.

Supreme Court

January 6, 2015:
08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing.
DTMB tasked with finding co-location site for the Joint Information Center within the Flint State Office Building. DTMB conference room is available to be used for the JIC with a media meeting room also available. DTMB Network and Telecommunications Division working on installation of additional telephone and data lines.

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

Since the declaration by the Governor on January 5th, the State Emergency Operations Center (SEOC) has been fully activated and working with local and state agencies to ensure a coordinated response to the incident. Since the activation, the SEOC has activated command staff, state agency EMC's, and implemented the Recovery Branch under the Operations Section.

SEOC Update:
Accomplished today (January 8):
- Recovery Branch is working to develop a enhanced method for outreach to all individuals.
- DHHS is working to develop a method for distribution of water.
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).
- Held first legislative call today.
- JIC continued to develop messaging and has implemented a co-located JIC in the City of Flint.
- SEOC staff provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed 3 EMHSD/SEOC liaisons to assist the local EOC.
- Worked on developing incident objectives for the next operational period.
- FEMA Liaison Officers are on site at the SEOC and are assisting and providing technical expertise as needed.

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

MSP/EMHSD GIS Section Updates
Accomplished Today (January 8):
- Produced Water Point of Distribution Map (POD).
- Produced Filter Point of Distribution Map (POD).
- Met with Genesee County Emergency Manager to discuss POD locations, and hours of operation. He will also be sending us data on new facilities serving as POD's with hours of operations.
- Attempted to geocode list of properties that have received a water filtration system. Geocoding encountered a problem due to original database format. We continue to clean up the database.
- Attempted to get data on the zip codes; local contact has not yet responded.
- Met with GIS from Flint to discuss data and methods.
- U of M contacted us to set up a meeting on how best to proceed with digitizing water lines
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow (January 9):
- Finalize updated list on water filter distributions map.
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Establish time to meet with U of M.
- Finalize water filter distributions map.
- Finalize plan for data distribution methods.

Volunteer and Donations Management:
- SEOC staff, Local EOC, and local organizations had a call with General Motors about possible donations.

Local EOC Update:
The following actions have been coordinated and supported through the Genesee County EOC since activation:

Genesee County Sheriff's Office:
- Distribute filter and water to affected population (172 attempted contacts with 27 personnel on 01/07/2016).
- Provide security at EOC and incident facilities.
- Sheriff Pickell is serving as the PIO for Genesee County.
- Operate EOC and manage incident through Emergency Management & Homeland Security Office.

Genesee County Health Department:
- Developing messaging (health education) for affected population.
- Provide nutritional counseling.
- Elevated blood level case management.
- Provide IT support for filter distribution database and GIS mapping.
- Developing Lead Poison Prevention Plan.

Genesee County Equalization Department:
- Provide addresses, demographic, socioeconomic data for incident planning and forecasting.
- Provide GIS mapping services.
- Preliminary assessed damages on public and private infrastructure impacts in coordination with City of Flint.

Genesee County Community Action Resource Department (GCARD):
- Warehousing/staging of filters for distribution to affected population.
- Distribution of filters to affected population from two locations in the City of Flint.

City of Flint Fire Department:
- 5 Fire stations will serve as PODs for water and filter equipment on Saturday, 01/08/2016, 0900AM to 1600PM.

Flint Community Schools:
- Nothing reported at this time.

Michigan Department of Health and Human Services:
- Filter distribution at one location in the City of Flint.

United Way of Genesee County:
- Receive and manage donations (cash and goods).
- Public information through 211.
- Facilitating coordination and control among local agencies.

Foodbank of Eastern Michigan:
- Warehousing/staging of water for distribution to affected populations.
- Identify and operate PODs for water (8 sites identified by 12:00 noon, 01/08/2016).
- Water inventory by end of day, 01/07/2015: Food bank has 376 cases of water.

Hurley Medical Center:
- Nothing reported at this time.

The county EOC has issued five resource requests to the SEOC (all in progress) by 12:00 noon on 01/08/2016.

Upcoming Forecast
Forecast Update for Flint, MI area: Saturday 1/9 through Thursday 1/14:

* Saturday (Jan 9): rain with mild temperatures
* Sunday (Jan 10): snow, cold, wind and hazardous travel
* Monday (Jan 11) through Thursday (Jan 14): very cold with a few snow showers

Rain will occur on and off through Saturday evening. Saturday will see high temperatures around 45 degrees. Temperatures will fall quickly overnight Saturday night, with temperatures in the mid 20s by noon Sunday and in the teens by Sunday evening. Strong winds Sunday will result in wind chill values near zero and time to frostbite from exposure of 30 minutes or less.

Snow is expected to develop around or just before sunrise Sunday. Around 2 to 4 inches of snow will be possible in the Flint area Sunday with the heaviest snow expected Sunday late morning/early afternoon.

Snow and cold will result in icy roads and hazardous travel conditions Sunday. Wet roads may ice up in the middle of the night Saturday night before snow begins on Sunday. A few power outages due to snow and wind may be possible Sunday.

Monday (1/11) through Thursday (1/14): On and off snow showers. Very cold air will be in place. Daytime high temperatures will only climb to around 20 degrees with overnight low temperatures around 10 or colder. Wind chill values Monday (1/11) through Thursday (1/14) will be in the teens and single digits above zero with time to frostbite from exposure of 15 to 30 minutes.

Agency Summaries

Joint Information Center / Public Information Officer

Jan 7, 2016

The Joint Information Center (JIC) was operational at 1 p.m. on Jan. 6 and operational from 8 a.m. to 5 p.m. on Jan. 7. State agencies at the JIC included the Departments of Licensing and Regulatory Affairs, Health and Human Services, Agriculture and Rural Development, Environmental Quality, and Michigan State Police.

During the 8 a.m. to 5 p.m. operational period, Gov. Rick Snyder held a press availability with Flint Mayor Karen Weaver. In addition, a round-table press briefing occurred at 1 p.m. at the 4000 Collins Road facility.

Objectives included:

- Oversaw and managed the state of Michigan public information duties due to emergency declaration.
- Held a 4 p.m. conference call with Genesee County PIO Sheriff Robert Pickell and city of Flint PIO Lead Sean Kammer.

Information Gathering
- Created media monitoring reports about the disaster as needed.
- Crafted talking points about the ongoing disaster, including a better description of the emergency declaration process.
- Crafted social media posts about state efforts underway during the disaster recovery process.
- Created graphics for social media efforts.

Information Dissemination
- Answered phones and manage media inquiries in regards to the Flint Water situation.
- Worked to establish a GovDelivery account; post link of website to sign up.
- Finalized details, media invite list and host a media roundtable.

External Affairs
- Worked on planing a conference call between command staff and affected state legislators and congressional Jan. 8, 2015.

Administrative
- Worked on filling staffing for the next operational period.

Logistics
- Worked on fixing email accounts.
- Worked to established a location with Genesee County and the city of Flint for a Unified Joint Information Center by the end of the week.
- Established a conference call line for the media roundtable.

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
Jan 7th 2016 4pm update:
MDARD and Genesee Local Health Dept. agreed to move guidance on water to a regulatory requirement. New language (after JIC approval) will be going out to retail food establishments and restaurants with follow up inspections and sampling. Planning will continue on logistics for sampling.
Jan 8th 2016 4pm update:
Animals - Shelter Director Paul Wallace has obtained some documents to help ascertain what entities (that are not tracked via licensing and registration) that would be housing animals: 1) All the City of Flint street (physical) addresses that are on City of Flint water, 2) All the "Out-County" (physical) addresses that are on City of Flint water. The Shelter Director is also pulling the possible animal holding/gathering facilities in reference to that listing which will provide the rest of the contacts. MDARD will be getting copies of all of these lists soon. Other shelters are not on City of Flint water.

American Red Cross (ARC)

The American Red Cross will be standing up a 'limited' Disaster Relief Operation by the end of today. This will enable us to provide a more comprehensive response to community needs in Flint as they are made known. We will now be more readily able to bring in resources from outside the Flint area.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Community Health (MDCH)

MDHHS is collaborating with the MDHHS PIO in the JIC to provide health related information for the document that will be delivered to all homes in Flint.

Collaborated with LARA to obtain a contact list of all health professionals in Genesee County for distribution of Guidelines for Lead Testing in Children.

Per Genesee County Health Department, all inquiries about lead testing are being referred to 211 or their individual healthcare provider.

Dr. Eden Wells, Chief Medical Executive, participated in the Congressional Briefing.

Corrections (MDOC)

Administration for the MDOC has been notified and is updated on current situation. There are approximately 75 staff members working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Environmental Quality (MDEQ)

The DEQ laboratory is prepared to accept and process 400 water samples pre day, 7 days a week. DEQ Incident Management Team staff are supporting the local Emergency Operations Center with personnel in Incident Command positions.

Human Services (MDHS)

Participated in 9:30 State Agency briefing.
Updated resource requests.
Local MDHHS staff active in local EOC.
Sent MCSC to Genesee Co to coordinate various volunteer efforts.
Helping with donation management efforts at the local level.
Gathering information on water filter acquisition, distribution, installation, life span and replacement.
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

Communicating with DEQ regarding additional water testing in Flint schools.

Gathering information from the Plumbing Division regarding plumbing authority within the city of Flint.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids participating in morning SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Insp. Bolger is monitoring the incident via MICIMS and participating in State Agency Briefings.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing.
Co-located JIC has been setup for the public information officers, along with a media meeting room. Facilities supervisor assisted with unloading and equipment setup.
Received list of agency public information officers to have access to the Flint Office Building added to their ID cards.
Resource request received for a truck and driver needed to pick-up pallets of water and cartridges within the city and deliver them to five city fire stations on Saturday.
Resource request received to locate warehouse space within the city to act as a distribution and intake site for donated water, cartridges and filters. DTMB Real Estate Division contacting resources within the city for available locations.

Operational Period

Operational Period Begin:	01/11/2016 08:00:00
Operational Period End:	01/12/2016 17:00:00
Situation Report No.	4
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/09/2016 08:00:00 Sat
SEOC Hours of Operation End:	01/09/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of potential health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

Since the declaration by the Governor on January 5th, the State Emergency Operations Center (SEOC) has been fully activated and working with local and state agencies to ensure a coordinated response to the incident. Since the activation, the SEOC has activated command staff, state agency EMC's, and implemented the Recovery Branch under the Operations Section.

SEOC Update:
Accomplished today (January 9):

- Logistics
  - o Worked with Red Cross to recruit volunteers at churches (obtained 2 per site).
  - o Obtained church addresses and passed them on to the county, DTMB, DHHS and GIS.
  - o Address cards have been developed and distributed to Flint Fire Department for tracking. Information from the address card is continuously being entered by MDHHS employee. Updates will be sent to SEOC Human Services POC throughout the day.
  - o Logistics is working with DTMB to get the door-to-door flyers printed. Once these are done, will work on getting those to Flint and distributed to teams.
  - o Printed cards for churches were provided to the DTMB drivers to deliver with the materials to each church on Sunday.
  - o Assigned various requests: supply truck to follow teams, trucks to transport teams and materials, security officer for EOC and for each team, long and short term storage options, plan for individuals not able to drive to return test kits, determine locations in Flint that already have large surplus of water on hand and have them deliver to food bank for distribution, identify method for getting address cards back from churches to EOC, and individuals at storage sites to serve as warehouse managers.
  - o Need to update POD boards from the local EOC, any resources should be requested from the SEOC.
  - o Set up direct bill at hotel in local area.
  - o Make sure information is being entered into MI CIMS.
  - o Reiterate to continue to request resources in MI CIMS.

- JIC
  - o Developed a door hanger with state agency PIO's and DHHS SME's for canvassing.
  - o Developed a single page sheet similar to the website for distribution.

o Released a press release today at 1pm establishing location of water resource sites.
o Tentative media briefing tomorrow at 2pm at Flint fire station.
o Trevor Hawks is working with the JIC on the door hanger.

• Recovery Branch
o Currently working on the overall plan for the door-to-door operations.
o Training has been confirmed for Monday to train teams deploying for the door-to-door operations scheduled to start Tuesday.
o Training will take place at 1 p.m. on Monday afternoon at the DHHS office on Clio Road. DEQ and DHHS will provide the training.
o Recovery Team hours of operation will be Tuesday through Friday from 8:30 a.m. to 5 p.m.
o Logistics are being worked out for the teams and trucks to handle stocking and re-stocking of materials during daily operations.
o Will begin working with the local EOC first thing tomorrow to determine the areas of Flint to focus our efforts and work out the remaining details.

• Planning Section
o Objectives have been updated and SitRep will be distributed today.
o Facilitated three SEOC agency and local EOC briefs.
o Worked with FEMA LNOs on planning cycle and draft objectives.
o Completed Sit Rep and draft IAP and summary bullets for command.
o Completed draft ICS forms for branch chiefs to use to track tasks.

• Operations Section
o A third FEMA LNO arrived today to provide technical assistance.
o A 10:45 conference call was held with the Genesee County EOC, specifically state personnel, to discuss processes for the upcoming days.
o At this time, all 5 fire stations have received water, water filters, replacement cartridges and water testing kits with American Red Cross at each location to assist with delivery of resources and collection of addresses receiving them (data collection cards delivered by F/Lt. Gabe Covey).
o The arrangement of 2,000 filters, to be taken to 9 local churches on Sunday, January 10, is ongoing. Working on outreach for 1 additional church.
o A 3:30 briefing was conducted in the SEOC to provide status updates.
o As we advised you at 3:50, the County EOC has no support from the City of Flint. For smooth operations and the ability to serve the residents of Flint, a liaison is necessary in the EOC. This is also important to keep the Flint Mayor is appraised of activities being conducted in the city.

• Finance Section
o Continuing to track personnel resources located in the SEOC and local EOC for use in spend plan development;
o Located hotel in the Flint area for staff on travel status to stay and have bill send directly to SEOC.
❑ Holiday Inn – Flint
5353 Gateway Centre Drive
Flint, MI
810-232-5300
❑ Contact Finance Group Chief or appropriate State EM to set up initial stay and billing information.
o Monitoring resource request board for costs incurred by state agencies for inclusion in spend plan.

The SEOC continues to provide:
• Situational awareness.
• Common operating picture/objectives.
• Coordination with city/county.
• Potential coordination with federal agencies.
• Incident prioritization.
• Coordination of life/health safety measures.
• Provide resources.
• Public Information Control.

MSP/EMHSD GIS Section Updates

Accomplished Today (January 9):
• Produced a Point of Distribution Map. Contains four types of distribution points; Churches, Water Resource Sites (Fire Departments), Filter Distribution Sites, Water Distribution Sites.
• Produced Filter Distribution Map.
• Developed process of how best to handle geocoding the household filter locations, worked on processing the data.
• MI CIMS password resets.
• Worked on map of franchise customers outside of Flint.
• Produced maps for MDARD on food establishments and Local Health Departments.
• Produced map of Church Filter Distribution map for DTMB.

Tasks for Tomorrow (January 10):
• Update Distribution Map with new information.
• Update Filter Distribution map by Household.
• Complete Franchise Customers outside of Flint by zip code.
• Discuss a time to meet with U of M.
• Finalize plan for data distribution methods.

DTMB:
• Reached out to local EOC to find out what space is available for large media briefings.
• DTMB has truck and driver scheduled to pick up water kits on Monday at noon from the State Lab.
• Scheduled two drivers to assist in the delivery of water filters to churches on Sunday morning.
• Reached out to DTMB Real Estate for additional information on the warehouse facility.

DHHS-CH

- 2-1-1 Director successfully contacted. Has been put in contact with MDHHS PIO to discuss/resolve caller wait times and messaging.
- Spoke to Genesee County Emergency Preparedness Coordinator for situational awareness. Reiterated the importance of messaging at this time, from the calls that the LHD has received from the public regarding ongoing water and filter distribution.
- Had conversation with donation management coordinator for local EOC. They will be in route to local EOC, estimated arrival 3:00PM. They will check in with local logistics.

DEQ
- IMT will be arrived at EOC today.
- DEQ Laboratory personnel will coordinate with LARA on the Freeman Elementary faucet replacement plan.
- The lab will have 1000 narrow mouth bottles ready for pick up by Noon on Monday (1/11). Coordinating with DTMB and Recovery on pickup, delivery and staging area.
- LARA will need to coordinate the school testing and Freeman Installation/Testing with DEQ Steve Busch 517-643-2314, buschs@michigan.gov and George Krisztian.
- Briefing provided to Chief Hagler days operations.

Local EOC Update:

- Identified resources needed/available to distribute to churches tomorrow, working with logistics at local level. Find GCCARD resource status level- Ops cleared up that the resources have been picked up by DTMB truck for tomorrow; SEOC logistics need locations where to take them. District Coordinator and DTMB will coordinate with driver for church drop locations and times.
- 9 churches have been identified at this time; currently the SEOC is still planning to have 10 locations. The last church will be identified by the SEOC.
- Red Cross volunteers will be utilized for church distribution as needed.
- Sheriff teams are established and working to canvas neighborhoods. The local EOC is working to establish a neighborhood priority for to ensure the recovery teams are not over lapping what the Sheriff teams have completed. POC from Sheriff is currently at the EOC. They will be updating activity log, updating data for GIS to develop a community grid and color coating the maps.
- EOC is working to ensure the consistency of forms the current teams are using and what teams will be using on Tuesday.
- EOC is initiating the process for volunteers and donations management, the local level is requesting further direction from the state on this process.
- SEOC DHHS Human Services staff had a conference call with local donations management and volunteer management POCs; they will be meeting Tuesday will local resources to develop understanding of what community groups are currently doing.
- United Way with support to help in the donations management process. Request by state staff in local EOC to have both individuals (donations and volunteer management staff) in the local EOC until sites are set up.
- Continue to ensure the local level is coordinating with the SEMC. Any information request coming from the SEOC to local level is per Capt./Executive Office.
- Identified a back log on updating who has received a kit in database. Per DHHS, local health department has been updating information when received.
- Donations Management to draft idea of plan (currently onsite), hopefully to have a plan today.
- DC working with ARC on the church drop off plans tomorrow. Working to have Red Cross in place prior to drop off.
- Have a request for water drop off at the churches as well. Do have access to water at Flint schools if the schedule drop off does not arrive.
- Working on the logistics plan in at the local level.
- Reception at the fire stations has been great, working on finalizing a logistics plan to do resupply if resources are depleted midday.

Request/Task Assignment Definitions
- Assigned: Currently waiting for review by Logistics Group Chief and designation to appropriate agency.
- Cancelled: Item or task is no longer requested.
- Complete: Resource or task assignment has been fulfilled.
- In Progress: Being reviewed by appropriate agency.
- Mobilized: Resource is currently being delivered to local area.
- Need Additional Information: Agency is working with requestor to obtain further information on task or resource.
- On-Scene: Resource is currently on site for use/distribution.

Resource Requests
- Assigned: No current outstanding assessments
- In progress: 12
o Additional water filter resources (7 requests total)
❑ 30,000 additional filters
❑ 20,000 bottles of water
o Long term storage
o Truck transport
o Environmental Testing and Consulting (ETC) Lead Investigator
o Data Collection Cards
o MDARD sampling kits- 500 requested
- Cancelled: None
- Complete: 4
o JIC Set Up
o 1,000 Water Filters/Cartridges
o Water supply at Fire Department
o Water Filters for Churches
- On-Scene: 4
o Genesee County Section Chief
o Genesee County IMT Coordinator
o Genesee County Planning Section Chief
o Genesee County Logistic Section Chief
- Need Additional Information: 1
o Water testing kit staging for 3,000 kits

Task Assignments
- Assigned: 2
o Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.

o Activate JIC plans
• Cancelled- 2
o Activate the State Recovery Task Force (2 requests)
• Complete- 10
o Volunteer Management Team
o GIS Support Staff
o Research West Virginia Emergency Recycling
o Genesee County Healthcare Provider Contact Information
o JIC Email Accounts
o Provide technical assistance to the local Damage Assessment process
o Establish SEOC operational period and hours of operations.
o Safety Officer
o Activate donations Management Team
o Coordinate response and recovery activities with MIVOAD and identify potential mission areas
• In Progress- 15
o Monitor MI CIMS (2 assignments)
o Establish and maintain coordination between city, county, state, federal and subject matter experts
o Obtain and maintain situational awareness and common operating picture of all activities (2 assignments)
o Technical assistance for local damage assessment
o Volunteer assignment to assist at churches
o Development of four Recovery Teams
o Identify a collocated facility for JIC
o Coordinate response and recovery activities with MIVOAD and identify potential mission areas
o Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
o Develop a comprehensive GIS strategy
o Establish and disseminate cost center information for the incident
o Two additional positions for JIC
• Mobilized – 1
o Establish and maintain coordination between city, county, state, federal and subject matter experts

Incident Response/Recovery Priorities/Objectives

1. Activate the State Recovery Task Force
2. Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate subject matter experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.
4. Establish operational period and hours of operations.
5. Investigate and identify available programs for assistance with direct or related impacts.
6. Develop a comprehensive GIS strategy.
7. Identify critical resources for acquisition and allocation.
8. Coordinate response and recovery activities and identify mission areas with MIVOAD.
9. Facilitate and coordinate technical assistance among state agencies and to local agencies.
10. Provide technical assistance and facilitate the local Damage Assessment process.
11. Establish a Joint Information Center and develop a public information strategy.
12. Monitor MI CIMS for resource requests and address as appropriate.
13. Establish and disseminate cost center information for the incident.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational from 8 a.m. to 5 p.m. on Jan. 9. State agencies at the JIC included the Governor's Office, Departments of Licensing and Regulatory Affairs, Health and Human Services, Environmental Quality, and Michigan State Police.

Tasks accomplished during the operational period included:
- Issued JIC News Release No. 2 about the water distribution sites at select Fire Stations in the city of Flint.
- Managed inquiries on the JIC hotline about the ongoing situation, covering topics ranging from FEMA in the State Emergency Operations Center to where people or companies can submit donations.
- Began coordinating a media event for Sunday, Jan. 10, at one of the Flint Fire Station water distribution sites, including local officials.
- Drafted a media advisory for the Sunday, Jan. 10, media event, possibly at Fire Station No. 1.
- Created social media posts about the water distribution sites and the Flint water website.
- Continued development of a door hanger for the community outreach efforts beginning next week.
- Continued developing a public service announcement.
- Updated the www.michigan.gov/flintwater website.
- Staffed for the next operational period.
- Conducted a media monitoring report.

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
Jan 7th 2016 4pm update:
MDARD and Genesee Local Health Dept. agreed to move guidance on water to a regulatory requirement. New language (after JIC

approval) will be going out to retail food establishments and restaurants with follow up inspections and sampling. Planning will continue on logistics for sampling.
Jan 8th 2016 4pm update:
Animals - Shelter Director Paul Wallace has obtained some documents to help ascertain what entities (that are not tracked via licensing and registration) that would be housing animals: 1) All the City of Flint street (physical) addresses that are on City of Flint water, 2) All the "Out-County" (physical) addresses that are on City of Flint water. The Shelter Director is also pulling the possible animal holding/gathering facilities in reference to that listing which will provide the rest of the contacts. MDARD will be getting copies of all of these lists soon. Other shelters are not on City of Flint water.
Jan 9th 2016 4pm update:
MDARD has received maps created by the SEOC GIS that locate the food service establishments.
MDARD is identifying activities to date and providing coordination in development of strategy for a plan for public nutrition, education and availability together with MDHHS, MDE, and the Genesee Health Department. MDARD together with MDHHS identified a brief nutrition message to be included on the door-to-door hangtag being developed by the JIC.

American Red Cross (ARC)

Yesterday (Friday, 1-8-16) volunteers from the American Red Cross did accompany and support the sheriff's distribution team as requested. We also initiated a formal Disaster Relief Operation (DRO 608-16) before the end of the day yesterday. The DRO headquarters is established at the Red Cross offices in Flint at 1401 S. Grand Traverse and is activated.

Today (Saturday, 1-10-16) our volunteers are staffing distribution sites established at 5 Flint fire stations where supplies of water, filters, and water testing kits are available for residents to pick up. We were not requested to support the sheriff's distribution team today. Our DRO headquarters is working today to arrange to have volunteers at each of (up to) 10 churches where filters are to be distributed tomorrow. This will be in addition to continuing to staff the distribution points at the 5 fire stations.

AuxComm

Advised Red Cross, who were concerned about the number of available volunteers, that ARES in Genesee County may be able to help.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Community Health (MDCH)

CHECC remains at Activation Level 1 - Normal Operations, with 24hr Duty Officer

Request from GCHD for lead investigators working on environmental health investigations has been forwarded to State Epidemiologist/Administrator and Environmental Health Division Director.

Spoke to Genesee County Emergency Preparedness Coordinator for situational awareness.

Tom Page, 2-1-1 Director, was successfully contacted. he was put into contact with MDHHS PIO to discuss/resolve caller wait times, prompting, and messaging.

Corrections (MDOC)

Administration for the MDOC has been notified and is updated on current situation. There are approximately 75 staff members working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) Laboratory (lab) provided 1000 water test kits for stock at points of distribution . 500 kits have been prepared for Department of Agriculture and Rural Development inspectors for pickup Monday morning. 1000 additional kits will be prepared for pickup Monday for supply for the teams scheduled to begin on Tuesday. Additional supplies continue to be ordered to provide for testing kits. DEQ lab staff are scheduled to provide training to the teams in Flint on Monday afternoon.

DEQ staff are coordinating with Licensing and Regulatory Affairs (LARA) for the implementation of the Freeman Elementary faucet replacement plan.

F/Lt. Wolf continues to fully support the State Emergency Operations Center as the DEQ representative coordinating department resources and capabilities and other duties as assigned by the State Director. DEQ staff are supporting local activities where needed.

Human Services (MDHS)

Participated in AM & PM State Agency briefings,
Completed 5 and updated the remaining resource requests.
Local MDHHS staff remain active in local EOC as human service lead.
MCSC serving as local volunteer coordinator.
MCSC serving as local donation management coordinator.
Confirmed avenue for people to volunteer.
Confirmed avenue for people to donate.
Confirmed filter allocation is still at adequate level for estimated resource requests.

Worked with Recovery on Door to Door plan. Confirmed MDHHS will have at least 10 volunteers next T- F for door to door work. CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA's proposal for a pilot faucet replacement program for Freeman Elementary School was approved.

Working on putting together a list of what the next steps are with tasks to be completed.

Coordinating with DEQ to complete additional testing at Flint schools.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in morning SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Resource Request Received to establish a Safety Officer at the Genesee County EOC. Lt. Amy Dehner has been assigned by 3rd District Command and has reported to Local EOC.

Request for troopers to attend training event that will be provide information on filters, replacement filters, water test kits, and operations on Monday, 1 p.m., at the DHHS Office at 4809 Clio Road, Flint 48501. One squad of on-duty troopers are requested to be in attendance in a community service role. Duration of this assignment will be for approximately 1 hour. This request is being coordinated by Lt. Dehner at Local EOC. Troopers have been identified and contacted directly by Lt. Dehner and provided with information for this request.

Request for four troopers in uniform and patrol vehicle to work with volunteers in a community service role in the affected area beginning Tuesday, Jan 12, 2016. This operation will be ongoing and the end date has not been determined. Hours of operation will be 8:30am - 5pm daily. Meeting place will be GCCARD at 2727 Lippincott Boulevard, Flint 48507. This request is being coordinated by Lt. Dehner at Local EOC

MSP Public Affairs has activated MSP PIO F/Lt. Dave Kaiser as the MSP PIO at the Local EOC.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing.

PIO requested that the co-located JIC at the state office building phones be moved to the larger meeting room and they will use the smaller room to meet with media when needed. DTMB Telecom will make the switch Monday morning. PIO also requested a large space in the city to conduct large scale media briefings. Contacted UM Flint Campus's facilities director for possible options.

Facility found (3,000 Sq. Ft.) that could be used as a distribution point for water, filters and cartridges if needed. MSP to provide guidance next week if space will be needed.

DTMB Mail and Delivery Services driver picked up pallets of water, filters, cartridges and testing kits and made deliveries to fire stations on Saturday. Two drivers will report back to Flint on Sunday to deliver the remaining filters to churches for distribution. DTMB to provide a driver and truck to pick-up an additional 1,000 water test kits in Lansing and deliver to Flint on Monday.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/11/2016 08:00:00
Operational Period End:	01/13/2016 08:00:00
Situation Report No.	5
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/10/2016 08:00:00 Sun
SEOC Hours of Operation End:	01/10/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of potential health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

Since the declaration by the Governor on January 5th, the State Emergency Operations Center (SEOC) has been fully activated and working with local and state agencies to ensure a coordinated response to the incident. Since the activation, the SEOC has activated command staff, state agency EMC's, and implemented the Recovery Branch under the Operations Section.

SEOC Update:
Accomplished today (January 10):

- Logistics
  - o Worked on figuring out a long-term storage option. Because GCCard is large enough, centrally located and comes staffed, we are going to use this for a while until a logical long-term storage option can be found. GCCard has 75,000 sq. ft. and has warehouse managers to assist with tracking resources coming in and out.
  - o Requested an inventory of what has been distributed so far. Determined that the local health department wouldn't staff anyone during the weekend, so the only numbers we could obtain have not been updated since 1/8/16.
  - o Assigned someone at the local EOC to find anyone to enter the address cards collected from all the distribution sites. In order to determine what areas are in greater need, these address cards are essential for the GIS tracking and reporting.
  - o Determine water quantities in Flint.
  - o Worked with recovery on needs for door-to-door operation.
  - o Completed 204's for 3 objectives.
- Assigned requests:
  - o Extra volunteers for the added fire department hours. (MDHHS – Thelen)
  - o There was an extra church that was added. A request went through to ensure they received supplies and volunteers. (Local EOC)
  - o Flyers were created, printed and distributed to the 9 churches. (JIC, DTMB and Local EOC)
  - o Gate Operations for the broken SEOC Gates. (MSP)
  - o More cards for churches & FD's. (Logistics)
  - o Locate replacement filters in the Flint area. (Local EOC)
  - o Deliver 6 pallets of donated water to GCard. (ARC)
  - o Develop re-stock plan for distribution sites. (local EOC)

o Box trucks to assist with the door-to-door operation.
o Purchasing more replacement filters.
o Door hangers.
o Extra staffing for Brianna needed and assigned to begin Monday morning.

• JIC
o Flyer for churches approved.
o Door hanger's ready for teams tomorrow – may need to be picked up.
o Media availability went very well, great coverage.
o Sheriff still operating the strike team and coordinating with local EOC.
o Requested PSA on the radio. Media has been approved and working with MAB.
o Received good press on PODs.
o Working on developing signage for PODs.
o 211 advised about influx of calls – let JIC know if issues arise.
o Social media messaging continuing.
o Finalizing JIC Battle Rhythm.
o News release likely going out tomorrow regarding canvassing in neighborhoods.
o Tuesday – embed state PIO with one of the canvassing teams to liaison with media.
o Google PR offered any available assistance, mapping-warehousing-transportation.
o JIC moving tomorrow to Flint, likely need hotels, media room requirements to DTMB.
o Materials being transferred into bi-lingual (Spanish) using Civil Rights resources.
o Planning media avail tomorrow.

• Recovery Branch
o Expanded operational hours for canvassing.
o Working with the EOC to find most impacted areas for canvassing.
o Working with F/Lt. Mike Johnson for developing a strategy for teams in the field Tuesday.
o Training tomorrow will provide training on filters, strategy, safety, and water testing kits.
o Getting additional staffing tomorrow.

• Planning Section
o Objectives have been updated and SitRep will be distributed today.
o Facilitated three SEOC agency and local EOC briefs.
o Worked with FEMA LNOs on planning cycle and draft objectives.
o Completed Sit Rep and draft IAP and summary bullets for command.
o Completed draft ICS forms for branch chiefs to use to track tasks.

• Operations Section
o Ensured the delivery of water and filters to the 9 churches in the Flint area.
o Discussed strategies for community outreach (door to door).
o Worked on facility safety at Collins Road (gate issues/lighting).
o Manage Task assignments for the SEOC (Press avail/door hangers/rules for water pickup).
o Requested a second DC to assist in Region 3 (Lt. Russo), start time TBD.
o Requested product information required to design signs for the fire stations to make it visibly apparent to the public. Awaiting feedback from fire stations (through Lt. Roach).
o Developed Branch Directors within the SEOC to reduce span of control (specifically Human Services Branch Richard Thelen) and Health and Environmental Branch (Jennifer Lixey-Terrill).
o Worked to identify a storage location within the City of Flint for water and supplies. G-CARD is identified as temporary location.
❑ GCCard is large enough, centrally located and comes staffed. We will use this sight temporarily until a logical long-term storage option can be found. GCCard has 75,000 sq. ft. with warehouse managers to assist with tracking resources coming in and out.
o Distributed to date (1/8/16). Logistics has asked GIS to provide us daily updates of how much was distributed each day.
❑ 12,386 filters
❑ 1,985 replacement filters
❑ 354 Pitchers
❑ 2500 Lead Testing Kits
o Local EOC was asked to identify someone to enter the information collected on address cards from all the distribution sites as essential for the GIS tracking and reporting.
o Fire stations were initially established for 9am-4pm operations; this has been extended to 9am-9pm operation. Volunteers were located to accommodate these operations. This will continue as long as the need is realized.
o Logistics is in process of locating additional replacement filters.
o Establishing and tracking of resources is a priority. Staffing has been assigned to get a good handle on these to ensure distribution sites maintain an appropriate level of inventory.

• Finance Section
o Continuing to track personnel resources located in the SEOC and local EOC for use in spend plan development;
o Located hotel in the Flint area for staff on travel status to stay and have bill send directly to SEOC.
❑ Holiday Inn – Flint
5353 Gateway Centre Drive
Flint, MI
810-232-5300
❑ Contact Finance Group Chief or appropriate State EM to set up initial stay and billing information.
o Monitoring resource request board for costs incurred by state agencies for inclusion in spend plan.

The SEOC continues to provide:
• Situational awareness.
• Common operating picture/objectives.
• Coordination with city/county.
• Potential coordination with federal agencies.
• Incident prioritization.
• Coordination of life/health safety measures.
• Provide resources.
• Public Information Control.

MSP/EMHSD GIS Section Updates
Accomplished Today (January 10):
- Submitted report on total number of filters, pitchers, and replacement cartridges to Logistics.
- Printed map of wards for the City of Flint with Points of Distribution overlaid.
- LARA maps of Health Facilities and Active Facilities in progress.
- Geocoding water filter distribution addresses.
- Devise a method for measuring water filter distributions throughout the city. We will sum filter distribution by city block and produce distribution maps by block.
- DDACS Crime map overlay onto distribution map.

DTMB:
- Jeanette Doll at SEOC. Spoke to driver who is in Flint at first delivery church.
- Obtaining 3 quotes for printing of flyers for the churches this morning.
- Sent flyer to printer, provided Michelle with pickup information. Should be ready within the hour.
- DEQ requesting assistance with water bottle contract as vendor is running out of bottles and money ran out on contract. DTMB procurement director will work with DEQ on solution.
- Flyer ready for pickup shared information with logistics and Michelle.
- Spoke with DTMB Telecom director who confirmed that phones in co-located JIC will be ready in the larger room for Monday morning.
- Spoke with DTMB Mail Services on truck availability. Four trucks with drivers are available beginning Monday morning if needed.
- Coordinated contact with U of M Flint for use of media rooms.
- 4 cube trucks and drivers are available Tuesday.

DHHS-CH
- Appointed as Health Branch Director in the SEOC. Branch consists of MDEQ, MDARD, and MDHHS (health side only).
- Confirmed with the JIC and the LEOC in Genesee County that updates to 2-1-1 on water resource sites being listed on the pre-recorded 2-1-1 message will be provided to 2-1-1 daily by the JIC.
- Confirmed with Tom Page, Executive Director of 211, that the 211 pre-recorded messages for Monday, January 11, 2016, will include a listing of the water resource sites by zip code in Genesee County.

DEQ
- DTMB contacted to advise of POTENTIAL vendor / contract issues. Contingencies are currently being developed.
- Requested water kits be palletized and pre-staged on loading dock for pick up tomorrow to lab director.
- Update on water test tubes.
- MDARD- 500 1/11/16
- Sent out- 1000 1/8/16
- On hand- 500 1/11/16
- Lab to order 3,000 on 1/11/16. Lab ordered 1,000 on 1/8/16.
- Location secured for shipment of additional test bottles as the GCCARD. Info relayed to Lab Director.

Local EOC Update:

- Working to coordinate resources at the local level to maintain distribution of supplies at all PODs.
- Seeing supplies rapidly disappear from PODs today. Working to make sure POD managers are notifying us when they start running low.
- Working to establish a warehouse for local resource storage.
- Deploying additional District Coordinator tomorrow (Lt. Mark Russo).
- Working to establish minimum trigger points for resources at PODs.

Request/Task Assignment Definitions
- Assigned: Currently waiting for review by Logistics Group Chief and designation to appropriate agency.
- Cancelled: Item or task is no longer requested.
- Complete: Resource or task assignment has been fulfilled.
- In Progress: Being reviewed by appropriate agency.
- Mobilized: Resource is currently being delivered to local area.
- Need Additional Information: Agency is working with requestor to obtain further information on task or resource.
- On-Scene: Resource is currently on site for use/distribution.

Resource Requests

- Assigned: 1
  - Box trucks for water resource teams.

- In progress: 13
  - Additional water filter resources (7 requests total).
    - 30,000 additional filters.
    - 20,000 bottles of water.
  - Long term storage.
  - Truck transport.
  - Environmental Testing and Consulting (ETC) Lead Investigator.
  - Data Collection Cards.
  - MDARD sampling kits- 500 requested.

- Cancelled: None

- Complete: 5
  - JIC Set Up.
  - 1,000 Water Filters/Cartridges.
  - Water supply at Fire Department.
  - Water Filters for Churches.

- On-Scene: 4
  - Genesee County Section Chief.

o Genesee County IMT Coordinator.
o Genesee County Planning Section Chief.
o Genesee County Logistic Section Chief.

• Need Additional Information: 0

Task Assignments

• Assigned: 5
o Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
o Activate JIC plans.
o Create GovDelivery topic for public information.
o Establish method for routine communication of resource inventories and distribution amounts.

• Cancelled: 2
o Activate the State Recovery Task Force (2 requests).

• Complete: 16
o Volunteer Management Team.
o GIS Support Staff.
o Research West Virginia Emergency Recycling.
o Genesee County Healthcare Provider Contact Information.
o JIC Email Accounts.
o Provide technical assistance to the local Damage Assessment process.
o Establish SEOC operational period and hours of operations.
o Safety Officer.
o Activate donations Management Team.
o Coordinate response and recovery activities with MIVOAD and identify potential mission areas.

• In Progress: 26
o Monitor MI CIMS (2 assignments).
o Establish and maintain coordination between city, county, state, federal and subject matter experts.
o Obtain and maintain situational awareness and common operating picture of all activities (2 assignments).
o Technical assistance for local damage assessment.
o Volunteer assignment to assist at churches.
o Development of four Recovery Teams.
o Identify a collocated facility for JIC.
o Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
o Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
o Develop a comprehensive GIS strategy.
o Establish and disseminate cost center information for the incident.
o Two additional positions for JIC.

• Mobilized: 1
Establish and maintain coordination between city, county, state, federal and subject matter experts.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Upcoming Forecast

-Forecast Update for Flint, MI Area: January 10, 2016
- Break from significant snow Sunday afternoon through Monday late afternoon.
- Snow returns Monday night and continues through Tuesday with very hazardous travel expected.
- Very cold temperatures expected through the entire week. The cold could limit ability to remove ice from road surfaces.
- Time to frostbite from exposed skin will be 15 to 30 minutes all week
- Bottled water stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week.

-Sunday (Jan 10):
- Heaviest snow coming to an end around 12pm. Around 1 inch of additional accumulation possible before snow ends. Some periodic light snow after 12pm, no significant additional accumulation expected. Hazardous travel likely with icy roads and blowing snow.

-Sunday afternoon (Jan 10) through Monday evening (Jan 12):
- On and off light snow with no significant accumulation expected. Icy roads likely for Monday morning and Monday evening commutes.

-Monday evening (Jan 11) through Tuesday (Jan 12)
- Snow and blowing snow will create hazardous driving conditions, very low visibility, and icy road surfaces. Could see 2-4 inches of accumulation in the Flint area. This snow event will impact all of the Lower Peninsula, so transportation to and from the Flint area will be very hazardous Monday night through Tuesday.

-Wednesday (Jan 12) through Saturday (Jan 16):
- Very cold with a few snow showers. High temperatures around 20-25 degrees, low temperatures around 10-15 degrees.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational from 8 a.m. to 5 p.m. on Jan. 10. State agencies at the JIC included the Governor's Office, Health and Human Services, and Michigan State Police.

Tasks accomplished during the operational period included:
- Finished coordinating and held a media event for Sunday, Jan. 10 at Flint Fire Station No. 1.
- Sent a media advisory for the Sunday, Jan. 10, media event at Fire Station No. 1.
- Drafted and sent JIC News Release No. 3 about deploying water resource teams in the city of Flint.
- Created social media posts about the water distribution sites and the Flint water website.
- Continued development of a door hanger for the community outreach efforts beginning next week.

- Continued developing a public service announcement.
- Updated the www.michigan.gov/flintwater website.
- Staffed for the next operational period.
- Conducted a media monitoring report.

Agriculture and Rural Development (MDARD)

Jan 10th - 1/10/16 - Briefed Director Clover Adams after a.m. call. MDARD goals over the next few days: 1) Food - identification and prioritization of food service and food retail businesses and coordination with Genesee Co. Health Department on notification and inspection related to water usage; 2) Animals - continue outreach and education to animal facilities, in coordination with Genesee Co. Animal Control; 3) Review history and look at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

American Red Cross (ARC)

Today the American Red Cross provided volunteers to staff 14 distribution sites (5 fire stations, 9 churches). The church sites distributed water and water filters while the fire station sites additionally distributed filter cartridge replacements and water testing kits.
To facilitate distribution the ARC delivered water filters and bottled water to the church distribution sites. Throughout the day we have maintained representation at both the Genesee County EOC and Michigan's SEOC.

Early in the day we noted that there had been no instructions with the water testing kits delivered to Fire Station #6. Our plan to fix this by making photo-copies from instruction sheets delivered to another station were delayed due to some logistical issues which have been resolved. Copies are now in progress for both station #6 and station #8 (station #8 ran out of instructions today).

ARC headquarters has made plans and assignments to assure that we continue to staff the distribution sites at the 5 fire stations from 9 am. to 9 pm. each day through next Sunday (1-17-16). We are committed to deliver 6 pallets of bottled water, supplied by our Grand Rapids office, to G-CARD tomorrow (Monday, 1-11-16).

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis. Provide background on LEP/Bi-lingual and bi-cultural needs and resource obligations as well as resource and referral list qualification.

Community Health (MDCH)

Spoke to MDHHS PIO regarding the issue of water sampling test kit instructions not being provided with the test kits given out on 1/09/16 at one resource site location. DEQ confirmed with American Red Cross that local volunteers are making photocopies of the instructions to ensure adequate supply going forward.

Spoke to LEOC logistics regarding potential state facility resources available via MOUs between the private sector and MDHHS. The status of this resource request is on hold.

MDHHS EMC for ESF#8 was appointed as Health Branch Director in the SEOC. Branch consists of MDEQ, MDARD, and MDHHS (health side only).

Spoke with the JIC and MDHHS leadership to determine the need for a 24/7 phone line for questions regarding health and Flint water. It was determined by MDHHS, the JIC, and LHD that the message would instead be to call 2-1-1 or contact their primary care provider, rather than setting up a separate toll free number.

Confirmed with the JIC and the LEOC in Genesee County that updates to 2-1-1 on water resource sites that are listed on the pre-recorded 2-1-1 message will be provided to 2-1-1 daily by the JIC.

Confirmed with Tom Page, Executive Director of 211, that the 211 pre-recorded message for Monday, January 11, 2016, will include a listing of the water resource sites by zip code in Genesee County.

Held a conference call with CHECC leadership and MDHHS ESF#6 EMC to discuss the CHECC level of activation.

Corrections (MDOC)

January 8, 2015:

Administration for the MDOC has been notified and is updated on current situation. There are approximately 75 staff members working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) Laboratory (lab) provided 1000 water test kits for stock at Flint points of distribution. 500 kits have been prepared for MDARD inspectors for pickup Monday morning. 1000 additional kits will be prepared for pickup Monday for supply for the teams scheduled to begin on Tuesday. 3000 kits are being ordered Monday morning to supplement stock. DEQ lab staff are scheduled to provide training to the teams in Flint on Monday afternoon. Contracts are being identified and examined to possibly expand vendor capabilities for providing additional resources.

DEQ staff are coordinating with Licensing and Regulatory Affairs (LARA) for the implementation of the Freeman Elementary faucet

replacement plan.

DEQ and DNR staff are supporting state and local activities where needed.

Human Services (MDHS)

Participated in AM & PM State Agency briefings,
Updated resource requests.
Volunteer Coordinator at local level coordinated with ARC on FD staffing for extended hours of 9:00 - 21:00
Confirmed filter allocation is still at adequate level for estimated resource requests.
Worked with Recovery on Door to Door plan. Confirmed MDHHS will have volunteers next T- F for door to door work.
Late last night ordered 30,000 additional filters and replacement cartridges. ETAs coming
Ordered 93 pallets of water from South Carolina. ETAs coming
Appointed Human Services Branch Director, Branch includes MDHHS including Aging & Adult Services, MDE, MDCR,& ARC
Brought in Human Services EMC backup.
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA's proposal for a pilot faucet replacement program for Freeman Elementary School was approved.

Working on putting together a list of what the next steps are with tasks to be completed.

Coordinating with DEQ to complete additional testing at Flint schools.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will staff SEOC Monday, Jan 11. Otherwise, will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

A resource request was received to staff a Capitol Security Officer at the Collins Rd. facility from 0730 hrs until 1800 hrs on 1/10/16 only. An officer arrived at 1025 hrs and the facility will be staffed until 1800 hrs. This request was fulfilled.

A resource request was made to determine if the door to door operational hours should be expanded. Based on information received from Lt. Dehner it was determined the hours would remain 8:30 AM - 5 PM. Additionally, the Troopers assisting on this detail are to be used for security only.

A resource request was received to provide a security/safety briefing to the Water Resource Teams during the training scheduled at 1 p.m. on Monday, Jan 11 at DHHS Office. Specific items to include would be team safety, weather concerns, and any items determined important by MSP. Daily deployment briefings will be needed at 0830 at the GCCARD facility for all teams to include safety, security, and daily work assignments. The Recovery Branch Director will provide the daily work assignment to Lt. Dehner by 0800 hrs. Lt. Dehner will be responsible to assign one of the field personnel assisting the door to door operations to brief the group at the GCARD facility each morning. This resource request was assigned to the MSP REP.

The ICS 208 Safety Message/Plan was reviewed and driving information was added.

A safety briefing was provided to EOC and SEOC personnel during the briefing meetings.

Technology, Management and Budget (MDTMB)

Worked with University of Michigan Flint PIO for an area on the campus to conduct press briefings. Chancellor contacted and onboard with the state using their facilities as needed. Provided contact information to the JIC.

DTMB Real Estate Division located a warehouse facility within the city with 100,000 square feet that may be used.

DTMB Mail and Delivery Services drivers delivered water filters to drop off sites within the city. Drivers remained in the city and assisted with transporting of water throughout the day. DTMB has a driver and truck scheduled on Monday to pick-up additional

1,000 water test kits in Lansing and deliver to Flint. Mail and Delivery Services has four trucks/drivers available on

DTMB Telecom assisted in moving joint information center in the Flint Office Building telephones to larger room.

Printed 2,000 water informational flyers on Sunday morning to provide to churches. Purchased filters and replacement cartridges to ensure availability until large order arrives.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/11/2016 08:00:00
Operational Period End:	01/13/2016 08:00:00
Situation Report No.	6
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/11/2016 08:00:00
SEOC Hours of Operation End:	01/11/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 10):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

- Logistics
o Worked on maintaining supplies and track resources at each of the local PODs.
o Worked to establish a Red Cross warehousing/logistics team to assist GCCARD.

- JIC
o Media event at the Genesee County Office Building.
o Governor and Capt. Kelenske spoke.
o Video for distribution will be filmed today
o MDHHS is working on radio PSA information
o Working on getting Comcast and Dish Network to provide channel for looped information and POC for Google.

- Recovery Branch
o Working with MSP to develop areas for canvassing and trained staff.
o Working with JIC to make sure PIO is connected with the team they will shadow.

- Planning Section
o Worked with the local EOC to get accurate inventory information.
o Supported logistics by reaching out to local and regional businesses to establish a steady water supply.
o Worked with GIS branch to refine strategy

- Operations Section
o SEOC has expanded hours of operation to be from 8am-8pm.
o Fire stations up and running today and providing resources to the citizens.
o Tomorrow will be a planning day for the SEOC for the next operational period.
o Tasked planning section with assisting logistics with water resource investigation and procurement.
o The State Deputy Director and FEMA LNO contacted governmental agencies for possible water procurement.
o Internal resources for bulk water delivery have been identified.
o Some water donations have been attained to supplement supply and will begin distribution periodically over the next two weeks.
o An ongoing purchase of bottled water that been established through Home Depot to deliver 6,000 cases of water per day. The first delivery will occur tomorrow.

- Finance Section
o Established direct billing accounts with three food establishments that can deliver lunch to staff in the Local EOC and JIC.
o Continuing to track SEOC staff and provide guidance on procurement and tracking SEOC costs. Task in progress as it is long term and continuing.

- GIS Branch Updates
o Updated distribution sites map.
o Submitted a request to ESRI (GIS Vendor) to supplement our technology and provide professional services in support of the incident.
o Updated Flint DDACTS (crime analysis) hotspots.
o Setup ArcGIS in conjunction with Flint GIS staff.
o Configured mobile app for field data collection during MSP neighborhood visits.
o Began mapping lead service lines (anticipate having draft of lead service lines Friday).
o Coordinated with local IT managers overseeing filter tracking system to streamline data collection.

DTMB:
- Cards were printed for churches and fire stations by 11:30am. Two additional trucks for distribution will be in the City all week. Trucks are available to deliver resources until 9 pm.
- Two trucks are being deployed to assist with supply distributions in the neighborhood.
- Contacted Home Depot; starting Tuesday they will deliver 4 truckloads of water to GCCARD for the next 5 days.

DHHS-CH
• The Community Health Emergency Coordination Center (CHECC) has officially elevated its level of activation to "Level 2 - Partial Activation." Currently the CHECC is staffed with BETP leadership and Section Chiefs only. SMEs will be brought in as necessary.
• Coordinating with MDE and MDARD on nutritional planning communications.
• Coordinating with the CHECC to determine status of Environmental Testing and Consulting Lead Investigator(s) request.

DEQ
• DTMB will pick up a shipment from the lab at 3pm today. The lab will have as much as they can have ready on the loading lock at 3pm.
• Simplified sampling form that has gone to DTMB to print and will be there tomorrow.
• There were 1,382 bottles picked up today, Monday afternoon. There are approximately 3,200 bottles remaining in Lansing. These will all be ready to ship tomorrow afternoon.

Local EOC Update:
• Local EOC operational hours are from 8am-9pm.
• Working to coordinate resources at the local level to maintain adequate supplies at all PODs.
• Demand has exceeded supplies and supplies are moving rapidly from PODs today. Working to make sure POD managers notify us when they start running low.
• Working to establish a warehouse for local resource storage.
• Additional DC Mark Russo
• Established trigger points for resources at PODs and hourly inventory reporting from the PODs.
• Discussed potential long-term water sources between local EOC and SEOC.
• Established planning cycle/meeting scheduled for 1/12/16.
• *Developed Sit Rep #1.*
• Met with Natasha Henderson to request deployment of City representative at local EOC.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Watches/Warnings

Upcoming Forecast
Forecast Update for Flint, MI Area: Posted 945am January 11, 2016

• Snow and wind will return after 5pm Monday (Jan 11) and will continue through Tuesday (Jan 12) with very hazardous travel expected.
• Very cold through the entire week. The cold could limit ability to remove ice from road surfaces
• Frostbite time for exposed skin will be 15 to 30 minutes all week.
• Bottled water *stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week*

-Until around 5pm Monday (Jan 11):
• Periodic light snow with limited accumulation expected today. Icy roads are expected for Monday evening commute.

-Monday 5pm (Jan 11) through Tuesday Night (Jan 12)
• Snow and blowing snow will create hazardous driving conditions, very low visibility, and icy road surfaces. Could see 2-4 inches of accumulation in the Flint area. This snow/blowing snow will impact all of the Lower Peninsula, so transportation to and from the Flint area will be very hazardous Monday night through Tuesday.
• Snow will blow back on to treated roads. Rapid Changes in visibility and road conditions are likely. This type of weather is typical when Michigan has some road closures and larger multi-car accidents.

-Wednesday (Jan 13) through Saturday (Jan 16):
• Very cold with a few snow showers. High Temperatures around 20-25 degrees, Low temperatures around 10-15 degrees.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational for the first time in Flint from 8 a.m. to 5 p.m. on Jan. 11. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, and Michigan State Police.

Tasks accomplished during the operational period included:
• Coordinated with the Governor's Office for a 2:30 p.m. press conference in the city of Flint. This action item included multi-agency collaboration and the development of talking points under a very tight timeframe.
• Created a script for a Comcast video PSA.
• Finalizing radio PSA with the Michigan Association of Broadcasters.
• Secured a field PIO and state videographer and photographer for embedding during water resource team operations.
• Drafted a media advisory announcing the water resource teams, including a media opportunity.
• Looking into Comcast/Dish Network dedicated video.
• Continued to monitor media and social media.
• Issued and drafted social media posts about the ongoing situation.
• Worked with DTMB and facilities to ensure a functioning Flint JIC.

Agriculture and Rural Development (MDARD)

Jan 11th - 1/11/16 - MDARD Activities: Have updated the guidance document to be a regulatory document for water in retail food and restaurants/food service; document is going through the approval process including the JIC. MDARD is making plans for distribution and then follow up. On animals - we expect to get a list of kennels, clinics, rescue organizations, etc., by the end of the day for additional outreach. Any materials will be coordinated through the JIC. MDARD provided information on water companies in the State as potential contacts for supplies of water.

MDARD goals over the next few days: 1) Food - identification and prioritization of food service and food retail businesses and coordination with Genesee Co. Health Department on notification and inspection related to water usage; 2) Animals - continue outreach and education to animal facilities, in coordination with Genesee Co. Animal Control; 3) Review history and look at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

American Red Cross (ARC)

Today the American Red Cross provided volunteers to 5 fire stations to distribute water, filter, replacement cartridges, and water test kits. Inventory reports from these distribution sites are now being made hourly. Throughout the day we have maintained representation at both the Genesee County EOC and Michigan's SEOC.

Early in the day we noted that DEQ was hoping to find volunteers to assemble water test kits prior to distribution. The Red cross indicates it is ready to secure such volunteers once we have a formal request.

We have also been notified that a request for a warehousing team will be coming to the ARC. Our Flint headquarters has been made aware of this pending request and expects to be able to activate a team once we have the details.

We will be staffing the 5 fire station distribution sites again tomorrow from 9am to 9pm.
Our headquarters will also be participating in two meetings convening an expanded group of community partners on Tuesday.

Civil Rights (MDCR)

Continued to provide support and assistance to assigned Human Services branch assignment and other SEOC activities. Briefed MDCR Community Relations Division staff; sourced non-Christian places of worship.

Community Health (MDCH)

Coordinating with MDE and MDARD on nutritional planning communications.

Coordinating with the CHECC to determine status of ETC lead investigator(s) request.

Requested that the Human Services EMC have visibility of CHECC Activity Logs.

Task assignment for IMATS support has been re-assigned to the CHECC.

Requested that the CHECC research the availability of volunteer support for the door-to-door operations.

Spoke to the Local Health Department Emergency Preparedness Coordinator regarding the data entry of distributed filters. She is currently collecting all of the information cards from various locations and working with American Red Cross volunteers to get that data entered into the database as quickly as possible.

CHECC will be looking into the nutritional planning for MDHHS.

Held a conference call with CHECC leadership staff to discuss activities. Reassigned the request for information from the Bureau of Epidemiology to the CHECC to facilitate.

The Community Health Emergency Coordination Center (CHECC) has officially elevated it's level of activation to "Level 2 - Partial Activation." Currently the CHECC is staffed with BETP leadership and Section Chiefs only. SMEs will be brought in as necessary.

Corrections (MDOC)

The MDOC continues to monitor the situation and our staff as well as our clients in the community. Water will remain available at the office for both staff and clients to use whil at the Parole and Probation offices in the area. EM staff from the MDOC will contiue to monitor MiCIMS and attend briefings. We remain available to assist in addressing this situation.

Education (MDE)

MDE is distributing nutrition guidelines for "Help Fight Lead Poisoning with a Healthy Diet" handout. Additional MDE staff trained for SEOC. (1/11)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities:
- Delivery of 1500 water test kits to MCCARD
- 10,000 water test bottles ordered
- Sampling form developed in collaboration with the City. 20,000 printed.
- SEOC Staffed
- DEQ personnel supporting local needs

Human Services (MDHS)

Participated in AM & PM State Agency briefings,
Updated resource requests.
Training was completed for the Door to Door Distribution plan at our Clio Road office.
Received a reach out from Meijer and Walmart on how they can help. Held conference call with Meijer, they will be delivering water today to GCCARD. Walmart information sent to logistics.
We have received a schedule for water deliveries.
CHECC was upgraded to Level 2 Activation

Licensing and Regulatory Affairs (LARA)

LARA Excutive Staff met and was updated on the situation in Flint. This will be a weekly meeting.

Spoke with the Flint Superintendent of Schools, Mr. Tawwab regarding the faucet pilot program. He has approved us to move forward with this program.

Joe Madziar, LARA's Plumbing Division Chief, will be going to Freeman Elementary to develop a material list.

We are working with Tony Sitko, building manager for Flint, to coordinate a schedule for the Plumbing Division to be able to get into the school to complete the work.

I am communicating with the DEQ to schedule re-testing for Freeman Elementary pilot project.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Request received to determine who is leading the deployment efforts for this project (location for distribution, etc.). Lt. Dehner will provide coordination of distribution from the local EOC.

GIS maps with dots where distribution or pick-up has already been made and been provided to Lt. Dehner in both email and printed form.

Resource request has been submitted for 8 iPads that are loaded with GIS information, so that those working on distribution can just enter it on-scene, rather than keeping paper logs.

We are trying to determine if someone has walk routes previously identified to reduce backtracking and provide a good way to make sure we hit all locations. US Postal Service delivery routes will not work for this purpose as some homes do not get home delivery and use a PO Box instead. Inquiry has been made to Flint Water Department for their meter reading routes to determine if this will meet this need.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

DTMB Mail Services provided two drivers to assist with supply deliveries in the city for the week. Two additional drivers will be onsite Tuesday to assist with door-to-door supply needs. Additional drivers are available if needed.

DTMB Print and Graphic Services provided expedited service on water-testing English and Spanish cards, information cards for churches and fire departments, water sampling billing return sheet and bathing information.

Provided access to the facility and parking structure for the PIOs working out of the Flint State Office Building. DTMB providing additional security personnel at the building.

Procurement office assisted in a conference call with vendor on acquiring additional water testing kits as well as other contracts as needed to fulfill resource requests.

Situation Report No.	7
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/12/2016 08:00:00 Tue
SEOC Hours of Operation End:	01/12/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 12):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

- Logistics
o Worked on maintaining supplies and track resources at each of the local PODs.
o Worked to establish a Red Cross warehousing team to assist at two new warehouse locations.
o 50,000 sq. ft. warehouse facility established and will begin accepting resources Wednesday January 13, 2016.
o Working with DTMB to locate vehicles needed for Water Resource Canvassing on Thursday, January 14, 2016.

- JIC
o Media was imbedded with a canvassing team today.
o Media coverage on the canvassing was very positive.
o Approved a MDARD fact sheet for distribution.
o The Governor's office has pushed out a video PSA lead by Capt. Chris Kelenske.

- Recovery Branch
o Working with MSP SEMC to expand door to door teams this week. Expanded canvassing scheduled for Thursday January 14, 2016.
o Canvassing today was successful and put 4 teams of 6 in the field.
o Totals resources distributed in canvassing operation for 1/12/16:
❑ 217 Door hangars.
❑ 117 Water (cases).
❑ 112 Faucet filters.
❑ 3 Pitchers.
❑ 48 Water test kits.

- Planning Section
o Developed real time tracking system for local resources.
o Working with GIS to include local POD numbers in live GIS distribution map.
o Completed IAP for the next operational period and the Situation Report for daily activities.

- Operations Section
o Fire stations up and running today and providing resources to the citizens.
o Water resources have been scheduled to fill the designated warehouses.
o Filter resources have been procured and will be delivered over the week to fill the warehouse.
o Second warehouse 100,000 sq. ft. has been procured.
o American Red Cross warehouse management team on site at GCCARD.
o Daily Numbers:
❑ Filters.
- 2,000 delivered.
- 64,700 ordered.
❑ Replacement Cartridges.
- 10,400 delivered.
- 184,300 ordered.
❑ Water (cases).
- 7,824 delivered.
- 19,152 ordered.
❑ Test Kits.
- 6,601 kits delivered.
- 1,000 ordered.
- Finance Section.
o Continuing to monitor SEOC staffing and costs incurred on a daily basis.
o Develop projection of anticipated costs for response and short-term recovery.

• GIS Branch Updates.
o Today we began migrating content to ArcGIS Online to streamline resource management operations.
o Deployed ArcGIS Online Collector App to field teams and tracked resources and site visits. Building a similar tracker for PODs to track the status of resources distributed.
o We continued to work on updating old mapping products to include newer infrastructure. Lead analysis is ongoing and is at 10% of the city lines.
o We have coordinated with local partners to develop a draft map of lead service lines to prioritize resources deployment. Finalized map will be developed by U of M Flint in mid-February.

DTMB:
• Procured additional filters/cartridges to maintain field supply and build supply in warehouse.
• DTMB real estate is finalizing lease of 100,000 sq. ft. warehouse for supplies.
• Incoming supplies by end of week.
o 39,500 faucet filters.
o 41,600 replacement filters.

DHHS-CH
• The Community Health Emergency Coordination Center (CHECC) has officially elevated its level of activation to "Level 2 - Partial Activation." Currently the CHECC is staffed with BETP leadership and Section Chiefs only. SMEs will be brought in as necessary.
• Coordinating with MDE and MDARD on nutritional planning communications.
• Coordinating with the CHECC to determine status of Environmental Testing and Consulting Lead Investigator(s) request.
DEQ
• 10,000 additional water testing kits have been ordered.
• Arranged for DEQ staff to deploy to GCCARD to supervise water kit assembly.
• Arranged for DEQ staff to deploy as a field observer to assist in tracking water kit supplies and samples.

Local EOC Update:
• Requested Red Cross warehouse teams for both warehouses.
• Working to establish a warehouse for local resource storage.
• Worked with SEOC to better track resource distribution and levels.
• Secured assistance for inventory management at GCCARD warehouse.
• 2-1-1 is rerouting calls for homebound seniors to Sheriff's office, resulting in approximately 100 home deliveries.
• Red Cross warehouse team on site at GCCARD today.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Upcoming Forecast

Forecast Update for Flint, MI Area: Posted 1030 am January 12, 2016

• Snow and blowing snow to continue off and on into Wednesday night (January 13). Hazardous travel expected at times.
• Very cold through Wednesday night (January 13). The cold could limit ability to remove ice from road surfaces.
• Time to frostbite from exposed skin will be 15 to 30 minutes through Wednesday (January 13)
• Bottled water stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week

Through Tuesday Night (Jan 12)
• Snow and blowing snow will create hazardous driving conditions in very low visibility and icy road surfaces. Up to an additional 2 inches of accumulation possible in the Flint area. Could see long periods without snow, or a long period of continuous snow.
• Snow will blow back on to treated roads. Rapid changes in visibility and road conditions are likely. This type of weather is typical of the weather that occurs when Michigan has some road closures and larger multi-car accidents.

Wednesday through Wednesday night (January 13)
• On and off snow showers. Less snow expected than Tuesday. Could see an additional inch of accumulation. Gusty winds continue through

Wednesday evening. Very cold air will remain in the area.

Thursday (January 14) through Saturday (January 16):
• Slight warming of temperatures to near 30 degrees during the day. Temperatures in the teens still expected at night. Off and on snow showers to continue into the weekend. Best chance for additional accumulating snow looks to be Friday afternoon (January 15) through Saturday night (January 16).

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 5 p.m. on Jan. 12. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, Natural Resources, and Michigan State Police.

Tasks accomplished during the operational period included:
• Held an 8:15 a.m. media event where media members had an opportunity to get footage and photos of the water resource teams as they go door-to-door to distribute free bottled water, water filters, water filter replacement cartridges and water testing kits to residents throughout Flint. A photographer/videographer was embedded with the team.
• Collaborated on a Governor's news release about a Public Service Announcement featuring Capt. Chris Kelenske from the Michigan State Police. The PSA provided information about the resources currently available for free to all Flint residents, including water filters, replacement filters, bottled water, water testing kits, and blood testing.
• Issued Web and social media content about the water resource teams.
• Reached out to local and nonprofit PIOs to become active participants in the JIC.
• Finalized MDARD letter and fact sheets to food establishments.
• Sent water filtration video to Comcast. Working to get a Dish Network contact.
• Arranged for an interview with the New York Times, including directors from DEQ and MDHHS.
• Began preparing a news release to include numbers, including teams, sites, local and American Red Cross.
• Monitored traditional and social media.
• Received 17 calls from the news media on the JIC media hotline.
• Expanded JIC staffing and roles.
• Confirmed digital billboard to encourage residents to call 211 for water resources and information.

Agriculture and Rural Development (MDARD)

Jan 12th - 1/12/16 - MDARD Activities: Food Safety: The updated guidance document for water in retail food and restaurants/food service is done and awaiting final ok in the JIC/SEOC; could go out in US Mail as early as Wed. MDARD Food staff will start scheduling water sampling and inspections for next week. MDARD has requested a map overlaying food facilities with the known areas most impacted to help prioritize follow up.
Animal health update: notifications to potentially impacted facilities are nearly complete. After further coordination with Genesee County Animal Control, the three animal shelters in the Flint area are not on City water. The Michigan Veterinary Medical Association notified all veterinarians in the region last week; MDARD will be individually following up with the two clinics. There are no kennels or pet grooming facilities in the City. Genesee Animal Control will be contacting pet stores and the known households that serve as animal rescue operations and does not need MDARD assistance.
MDARD is also looking at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

American Red Cross (ARC)

Again today the American Red Cross provided volunteers to operate the distribution sites at the 5 fire stations. We added staff to this effort to be better able to manage inventory at those sites. We also brought in a warehousing team to manage inventory at the G-CARD site. Additionally ARC put together a team to work on assembling water test kits at the G-CARD site before the kits go out to the distribution sites. A logistics planner has now been deployed from the ARC national headquarters to assist the SEOC logistics Group Chief.
Tomorrow we expect to continue staffing the 5 fire station distribution sites, and will be standing up a volunteer reception center to process event-based volunteers. Assembly of the water testing kits will continue as needed.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities.

Community Health (MDCH)

Provided lead health impact information requested to planning section for presidential letter.

Tasked CHECC with coordinating with Sue Kangas and Farrah Hanley to track financial expenditures.

CHECC is working to ensure that contact lists are current in the MI-Volunteer Registry, should volunteers from the registry be needed. Tracking responses from MI-Volunteer Registry query.

Received confirmation from MDHHS Environmental Health regarding NSF certification requirement for filtering lead from water.

CHECC is coordinating with HHS to obtain EMPower data regarding medically dependent individuals in Flint.

Requested that the CHECC contact Lowes regarding the ability to purchase Brita faucet filters.

Confirmed that +100,000 sq. ft. is available in Lansing through MDHHS MOU with private sector partner. On standby if these resources are necessary.

"Enhanced Lead Testing Guidelines Recommended for Children in Flint, MI," developed by Dr. Wells, was sent to healthcare providers via Medscape - WebMD at 0700 today.

Community Health Emergency Coordination Center (CHECC) is activated at a Level 2 - Partial Activation, consisting of BETP leadership staff and CHECC Section Chiefs.

Corrections (MDOC)

The MDOC continues to monitor the situation and our staff as well as our clients in the community. Water will remain available at the office for both staff and clients to use whil at the Parole and Probation offices in the area. EM staff from the MDOC will contiue to monitor MiCIMS and attend briefings. We remain available to assist in addressing this situation.

Education (MDE)

MDE is distributing nutrition guidelines for "Help Fight Lead Poisoning with a Healthy Diet" handout. Additional MDE staff trained for SEOC. (1/11)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities:
- Delivery of 6101 water test kits to GCCARD
- Verification of NSF/ANSI 53 certified filters for future ordering
- Arranged for DEQ staff deployment to supervise volunteers assembling water kits at GCCARD
- Arranged for DEQ staff deployment as a field observer to assist in tracking water kit supplies and samples
- Established additional vendors for supply of water test bottles

Human Services (MDHS)

Participated in AM & PM State Agency briefings.

Updated resource requests.
Confirmed delivery to GCCARD versus Home Depot to complete the delivery of 2000 filters, 18,400 replacement cartridges.
Arranged for DTMB to pick up around 700 (23) cup pitchers from schools surplus. Plan is to split these up between the FDs.
Made contact with Menards to identify filters and replacement cartridges and relayed that information to DTMB for procuring options.
Had conference call with MDHHS finance. They have concerns of the accountability of our purchases and who's driving the ordering. I explained the urgency and the process. They understand now and said carry on.
Identified 16 MDHHS staff volunteers who will be assisting in the door to door distribution operation for Wednesday, Thursday, and Friday.
16 local MDHHS staff participated in the mission of the Water Resource Teams today.
CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

LARA Excutive Staff met and was updated on the situation in Flint. This will be a weekly meeting.

Spoke with the Flint Superintendent of Schools, Mr. Tawwab regarding the faucet pilot program. He has approved us to move forward with this program.

Joe Madziar, LARA's Plumbing Division Chief, has provided a material list for Freeman Elementary. The list was provided to DTMB for procurement. We are awaiting an ETA from DTMB on the materials.

We are working with Tony Sitko, building manager for Flint, to coordinate a schedule for the Plumbing Division to be able to get into the school to complete the work.

I am communicating with the DEQ to schedule re-testing for Freeman Elementary pilot project.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

January 8, 2016
MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

Contact info for VAAA Executive Director is:

Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

On 1/11/16 AASA forwarded to MSP/GIS over 1,400+ NAPIS addresses of Flint seniors who received in-home services in FY15. The NAPIS file was sent encrypted and did not include client names. The NAPIS file included 1,029 HDM, 138 CM, and 30 CCS clients.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Lt. Pummill, local EOC, has requested 3 additional box trucks for neighborhood delivery. Request has been sent to logistics, Request # SEOC - 1378446.

Resource request received for 4 additional MSP personnel to assist with distribution on Wednesday 1/13/16. Request has been forwarded to Lt. Pummill at the Local EOC. Staff has been identified and the personnel list has been provided to Recovery.

Task assignment has been submitted to Logistics to determine how many 5 person distribution teams can be supported on Thursday and Friday. Support would need to include filters, replacement filters, water, test kits, pamphlets, and trucks to transport.

MSP is in the process of identifying available staff to support this effort with the plan to staff up to the level that can be supported by logistics.

A request has been submitted to SEOC Logistics, DTMB, for approximately 20 smart devices that are network enabled that we can install the GIS application onto so that they activity can be tracked real time. These devices do not need to be connected to the state network.

Technology, Management and Budget (MDTMB)

DTMB Mail Services provided three additional drivers and trucks to assist with door-to-door supplies, this is in addition to the four drivers and trucks already working in the city. Also picked up additional water test kits in Lansing and delivered to Flint this afternoon to ensure kits were available at the distribution sites.

DTMB Real Estate assisted in procuring 100,000 feet of warehouse space and writing the rental agreement. Procurement office acquired additional water filters and refill cartridges that will be delivered on Thursday to the warehouse for distribution.

Twelve trucks of water will be delivered tomorrow and water filters and replacement cartridges will be delivered on Thursday.

Working on resource request to acquire 20 tablets to send out with MSP personnel to help record supplies being delivered in the field.

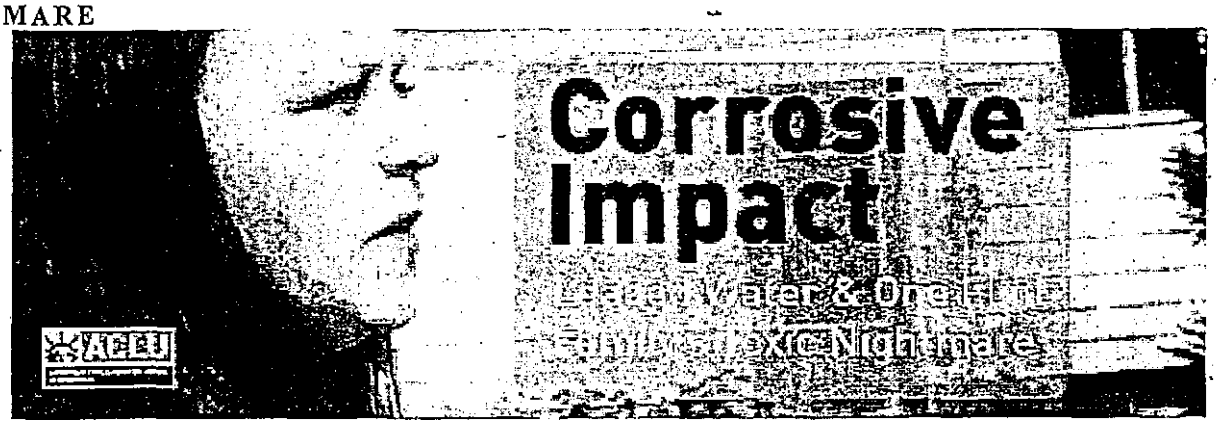
CORROSIVE IMPACT: LEADED WATER AND ONE FLINT FAMILY'S TOXIC NIGHTMARE



It took a while for LeeAnne Walters to realize the full impact of the number: 13,200.

Walters—a stay-at home mom with four sons and a husband in the Navy—had seen other numbers reflecting the quality of drinking water at her Flint home that were devastating. But 13,200? She'd never seen anything like this.

The city had tested her water twice in this past March and both times found dangerously high levels of lead—104 parts per billion (ppb) and 397 ppb, respectively.

Those numbers filled her with dread, because they meant her family had been exposed to high levels of a terribly toxic heavy metal that put her children's future in jeopardy.

But it was the result of a third test of the tap water in her home, performed by independent experts at Virginia Tech university, that most stunned Walters.

"It took a while for me to wrap my head around it," said Walters.

The VT researchers discovered lead levels in Walters' water reached a jaw-dropping 13,200 ppb—more than twice the amount at which the U.S. Environmental Protection Agency classifies water as hazardous waste.

"When I saw those numbers I was shocked," said Virginia Tech professor Marc Edwards, a former MacArthur Fellow and respected authority on corrosion in drinking-water systems, who oversaw the tests.

Edwards played a key role in discovering the problem of corroded water pipes and lead in Washington, D.C. drinking water during the early 2000s, in what has been described as one of the worst contamination events ever seen in an urban water system, with resulting increased incidence of childhood lead poisoning, miscarriages and fetal death.

In terms of lead levels, the Walters family's numbers eclipsed even the worst D.C. homes.

"I have never in my 25-year career seen such outrageously high levels going into another home in the United States," said Edwards. "This was literally hazardous-waste levels."

But the condition of Walters' tap water raises a much more far-reaching question: Since the city moved away from Detroit's water system and began pumping water from the Flint River, how many other families have been put at risk by the city's questionable testing procedures and handling of the water supply?

The Walters family surely isn't alone in dealing with the threat of lead-laced drinking water. About half of Flint's 40,000 homes are a half-century old or older, built at a time when water service lines were typically made of lead.

And according to various experts, including an EPA water-quality specialist, the city's actions are only exacerbating the threat.

"What the public needs is accurate information," explained Miguel Del Toral, regulations manager for the Ground Water and Drinking Water Branch of the EPA's Region 5.

Instead, the city is utilizing testing measures that almost ensure that worst-case scenarios such as the one facing the Walters family escape detection, asserted Del Toral in an internal EPA memo provided to the ACLU of Michigan.

Compounding the threat is what Del Toral describes as the continued inability of officials to adequately treat water coming into people's homes from the Flint River.

"I don't want to scare people unnecessarily," said Del Toral in a phone interview from his home in Chicago. "But there is absolutely a problem in Flint that needs to be addressed right away."

During his interview with the ACLU of Michigan, Del Toral said he was willing to go on the record with his concerns, but that he was doing so as a private citizen, not as a representative of the EPA.

EPA rules, he said, required that such interviews be routed through the agency's public affairs people. But he's willing to speak out nonetheless, he said, because of the potential harm to the public is so great, and the need to address it is so urgent.

WATERING DOWN THE TESTS

Perhaps the most vexing problem in all of this is the contamination caused by the city's decades-old network of lead and iron pipes—a problem directly connected to the switch to river water, and the city's failure to adequately treat it.

Under the U.S. Environmental Protection Agency's rules, if lead reaches a level of 15 parts per billion in water, the source of the problem must be identified and corrected.

In early March, after months of requests (and only after Walters had received a doctor's note raising concerns about problems with the water), the city finally conducted a test. It found lead levels of 104 ppb the first time. A second test recorded a level of 397 ppb.

Blood tests, taken after those water-sample numbers were reported, revealed that one of her children, a four year old, had lead poisoning.

The news was devastating, said Walters, and the concern it creates for her child's future is haunting.

"Lead can affect almost every organ and system in your body," according to the EPA's web site. "Children six years old and younger are most susceptible ... Even low levels of lead in the blood of children can result in: behavior and learning problems; lower IQ and hyperactivity; slowed growth; and hearing problems."

Those dangers made Walters all the more determined to get her questions answered.

For one thing, she wanted to know why residents were being instructed to "pre-flush" water lines before drawing samples that would be tested by the city

After much searching, she found Del Toral at the EPA's Region 5 in Chicago. He explained to her that her instincts were right, and that she had good cause to be concerned about the way testing was being done.

"The practice of pre-flushing before collecting compliance samples has been shown to result in the minimization of lead capture and significant underestimation of lead levels in drinking water," wrote Del Toral in an internal memo dated June 24.

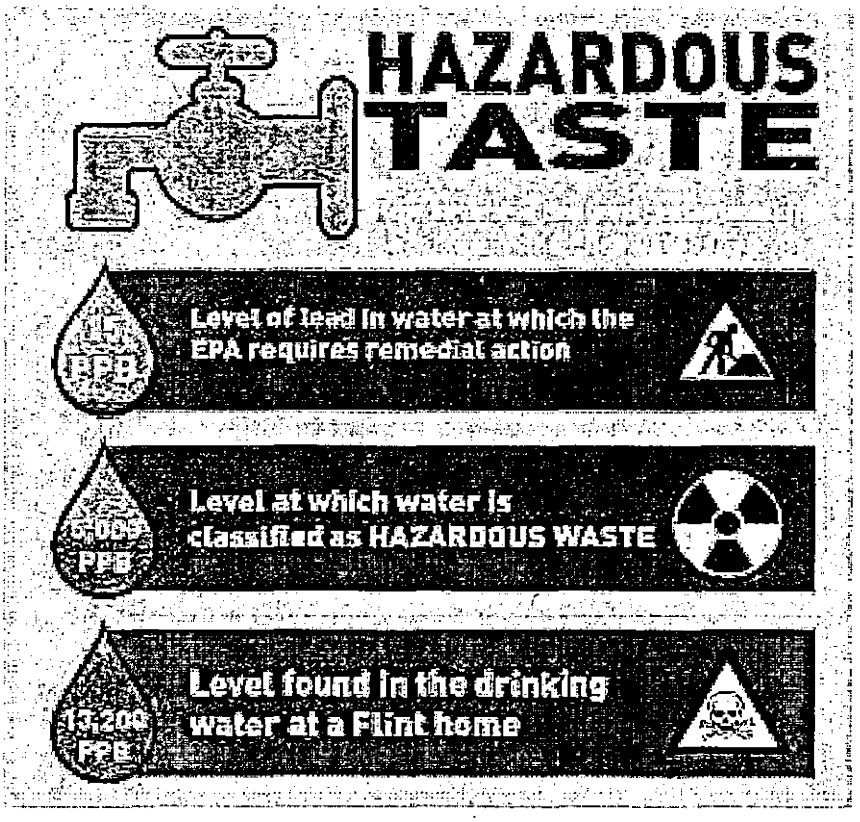
Del Toral went on to say that the city's testing methods were a "serious concern" because they "could provide a false sense of security to the residents of Flint regarding lead levels in the water." As a result, he warned, residents could fail to take the necessary precautions to protect their families from lead in the drinking water.

Virginia Tech's Edwards completely agrees with Del Toral's assessment.

"The net effect of a 'pre-flush' is to greatly reduce the likelihood of detecting lead in samples collected ... that would normally be present in the consumers drinking water," Edwards wrote in an email. "I have long maintained that the practice should be banned, as it artificially lowers the amount of lead detected in samples versus typical consumer exposure."

Asked about these concerns, city spokesman Jason Lorenz offered the following email reply: "While I cannot directly respond to Mr. Del Toral's remarks without first contacting the EPA Region 5 office, I can say that the City of Flint follows all the testing procedures and schedules as required by the U.S. EPA."

He added that the Michigan Department of Environmental Quality (MDEQ) endorses the city's sampling method. The MDEQ did not respond to phone calls and e-mails seeking its comments on the controversy.



Del Toral contended in an interview that what Flint's doing is actually exploiting a "loophole" in the law.

"From a technical standpoint, there's no justification for the way Flint is conducting its tests," Del Toral said. "Any credible scientist will tell you [the city's] method is not the way to catch worst-case conditions."

There is no legitimate reason for the city's methodology, said Del Toral.

EPA rules, he said, required that such interviews be routed through the agency's public affairs people. But he was willing to speak out nonetheless, he said, because of the potential harm to the public.

FLUSHING OUT REAL ANSWERS

It was Del Toral who, after determining that the lead problem plaguing the Walters family was coming from outside their home, connected LeeAnne with Edwards at Virginia Tech.

Instead of taking a single sample after a line had been "pre-flushed" under the city's direction, Edwards instructed Walters to collect a series of samples from water that had been allowed to sit in the service line long enough to accurately reflect levels the family could be exposed to under normal use.

(Meanwhile, that same service line, dug up and replaced after the sample collection, was found to be made of lead in one section and iron in another.)

Edwards tested the water and discovered that the lead contamination ranged from 200 ppb to the 13,200 ppb figure that stunned LeeAnne Walters—and should likewise shock many others.

Given the age of much of Flint's infrastructure, Edwards agrees with Del Toral's assessment that the test results they found at the Walters home amount to an alarm going off, and others in the city need to pay attention.

"I do not see any reason why there would not be serious problems occurring in at least some other Flint homes," said Edwards.

In 1986, the U.S. Safe Drinking Water Act was amended to prohibit the use of lead pipes in public water systems. Every house built before that is potentially at risk, said Edwards. About half of Flint's roughly 40,000 homes are at least 50 years old.

Making things worse is the fact that the high levels of chlorine being used to treat Flint's dirty river water lead to the creation of a carcinogenic byproduct know as total trihalomethanes, or TTHM. To keep TTHM levels down, the city is adding ferric chloride. The trouble is, that additive can also accelerate the corrosion of lead and iron pipes.

Adding yet another layer to the problem is something the city is not doing.

According to Del Toral, Flint should be adding corrosion-control chemicals designed to help keep lead and copper in pipes from leaching into drinking water. Doing so is required by federal regulations, wrote Del Toral in his memo.

"To our knowledge, that is inaccurate," said Flint spokesman Lorenz. "Before the plant was placed in operation, the City (and our engineering firm) had numerous discussions with DEQ personnel and inquired if corrosion-control chemicals – typically phosphates -- needed to be included in the treatment process. The use of these chemicals was not required or mandated."

What's indisputable is this:

Flint's water contained corrosion-control chemicals until April 2014, when Flint's ties to the Detroit water system were severed. Flint officials hailed that changeover as a cost-cutting move for a city facing a financial crisis so severe it had been placed under the control of a state-appointed emergency manager.

Discontinuing the use of the anti-corrosion chemicals allowed toxic scale built up on the insides of pipes over the past decades to be released into water flowing into people's homes, explained Del Toral.

In his memo, Del Toral warned: "The lack of mitigating treatment is especially concerning as the high lead levels [that result] will likely not be reflected in the City of Flint's compliance samples due to sampling procedures used..."

In other words, at the same time the city is exacerbating the problem, it's conducting tests that will probably fail to identify the true extent of the threat.

Del Toral described the situation as a "major concern."

"In the absence of any corrosion control treatment, lead levels in drinking water can be expected to increase," he warned in his memo.

The EPA offered Flint officials the use of agency experts to help get the situation under control, said Del Toral, but added that, to his knowledge, the city has so far declined all help.

LeeAnne Walters said that when she asked why city officials weren't taking the EPA's offer of assistance, she was told, "We don't need it."

Flint spokesman Lorenz, on the other hand, maintained that "the city continues to work closely with the MDEQ and the EPA Regional Office."

As for Walters's family, that the city has finally replaced the service line leading to their home, and lead levels have dropped below the 15 ppb EPA action level.

The problem now, she said, is that water currently coming out of her tap tinged yellow and smells of rotten eggs. City officials have given her no explanation as to the possible cause of that.

It is just one more in a long list of questions that need to be addressed.

"What we need," said Walters, "are more answers."

But it's not just answers the people of Flint require.

They also need solutions. And, as Del Toral's EPA memo emphasizes, they need them immediately.

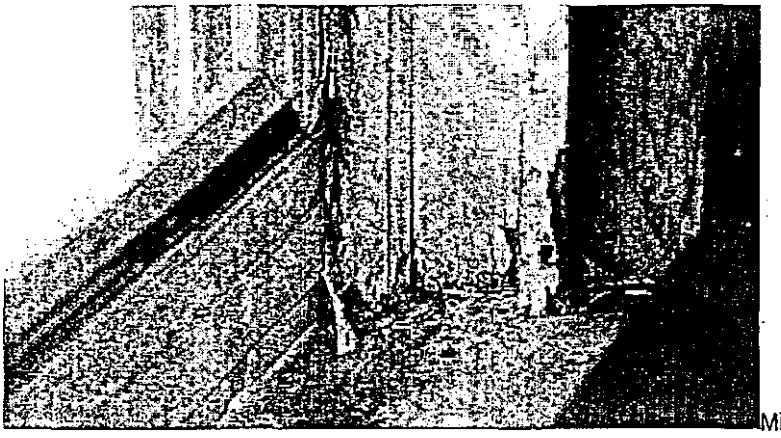
In Flint and beyond, lead remains irreversible scourge among Michigan's children

2010 Flint
2012 KCS data
2014

By Mike Wilkinson | Bridge Magazine

on December 13, 2015 at 7:00 AM, updated December 13, 2015 at 7:07 AM



Michigan children often are exposed to lead paint in older homes. Although numerous programs exist to help families address the lead threat in their homes, the problem remains widespread. *The Center for Michigan/Bridge Magazine*

Across Michigan, in cities large and small, lead poisoning continues to plague children, limiting them in school and on the playground.

Although much of the state's focus has been on lead-poisoned water in Flint, the metal continues to turn up annually in the bodies of thousands of children across the state, at percentages well above the numbers that raised red flags in Flint.

Elevated blood-lead levels are reported in higher percentages of children in parts of Grand Rapids, Jackson, Detroit, Saginaw, Muskegon, Holland and several other cities, showing the scourge of lead has not been eradicated despite decades of public health campaigns and hundreds of millions of dollars spent to find and eliminate it.

"This is still an issue. It's not going away," said Dr. Eden Wells, chief medical executive of the Michigan Department of Health and Human Services.

Many in the state were shocked this year by findings in Flint: After a steady decline in lead levels, those began to rise in 2014 after the city switched its water source from Lake Huron to the Flint River. That change in water supply, experts said, triggered the increase in lead poisoning, because more corrosive river water might have stripped lead from older pipes and led it into the drinking supply.

The uptick in Flint, cited by researchers, led state officials to confront dangers in the city's water. Five percent of the Flint children tested had elevated levels of lead, although parts of the city had much higher percentages.

Consider lead exposure rates in other parts of Michigan:

- In Detroit at five ZIP codes, more than 700 children tested positive in 2013, or almost 15 percent of the 4,910 children tested.
- In Grand Rapids, almost one in 10 children of those tested in five ZIP codes tested positive.
- In Ludington, almost 13 percent of the 229 children tested in 2013 registered elevated lead levels.

"We do have areas in our state and areas in our country where children are at risk," Wells said. "We've got to do as much as we can."

Common culprits

Flint's unfolding water crisis this year brought to the foreground a danger long known to rob children of cognitive and physiological function and impulse control.

High levels of lead found in students in the Detroit Public Schools system have been linked to the city's low test scores.

In the 48206 ZIP code on the west side of Detroit, 20.8 percent of the 701 kids tested had elevated levels in 2013, the most recent year tested.

In much of the state where lead is a problem, the sources of poisoning have been traditional culprits: old lead paint on homes built before 1978 and lead residue in dust and soil. Young children particularly are susceptible because of their proximity — on the ground — to the most common sources of lead. They crawl on their hands, pick up dust and dirt and put their hands in their mouths.

Because of the well-documented dangers of lead, pediatricians test children.

"And every week, there are more kids on" a weekly statewide report on elevated lead levels, said Paul Haan, of the Healthy Homes Coalition of West Michigan, which works to eliminate household dangers to make children safer and healthier.

Parts of Grand Rapids have some of the highest concentrations of children with lead, he said.

The most recent report had a tally of 90 children.

Constant struggle

Flynn FK

Far fewer Michigan children, however, have tested positive for lead poisoning in recent decades. In 2012, 4.5 percent of those tested in Michigan showed elevated lead levels, more than five times less than the 25.6 percent a decade earlier.

In 2013, the percentage sank to 3.9 percent, which still amounted to almost 5,700 children younger than 6 who were tested. Each had lead levels above 5 micrograms per deciliter. Although no amount is considered safe, 5 micrograms is the threshold experts said constitutes a "much higher" level than most children.

The effects on children's nervous systems and brains are obvious to parents and teachers: Youngsters cannot stay on task, retain information or progress academically and socially. Even low amounts of lead might steal points from a child's intelligence — cognition they cannot get back, because lead poisoning is irreversible.

Dr. Eden Wells, chief medical executive with the Michigan Department of Health and Human Services, said lead exposure remains a serious problem across much of the state. *The Center for Michigan/Bridge Magazine*

Some researchers suggested the overall reduction of lead levels in recent decades, mainly from the elimination of lead in gasoline, explains the decline in violent crime in the United States and elsewhere. However, in those children where lead exposure is found, the implications remain profound and heart-breaking.

Kieya Morrison is a preschool teacher in Detroit and a former longtime kindergarten teacher. Recently, her class had a young girl with elevated levels of lead in her system (teachers are apprised of health issues with children).

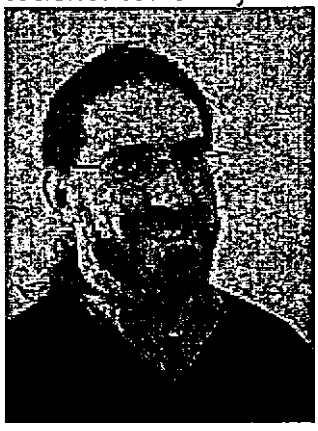
Learning was difficult for the girl, and Morrison repeatedly tried to teach her about simple shapes: "This is a triangle. This is a square."

For the girl, it was a constant struggle.

"She had cognitive problems. She had trouble processing things," Morrison said. "She could not retain any of the information."

At her preschool in Detroit, where the teacher-student ratio was 1-to-8, Morrison was able to give the girl more attention and "catch her" when she fell behind.

The girl's family moved out of the area after preschool. Morrison said she feared what happened to the girl once she reached kindergarten and first grade, where there might be one teacher for every 30 students.



Paul Haan, of the Healthy Homes Coalition of West Michigan, said children with elevated lead levels in Grand Rapids are commonplace. *The Center for Michigan/Bridge Magazine*

"You really get lost," Morrison said of the older grades. "There's nothing to catch you."

Solving the problem

In addition to federal and state money, foundations are pouring money into programs across Michigan that help pay for eliminating lead sources in older homes when a family cannot afford such work.

Progress remains slow. In the past 10 years, those programs have paid for lead abatements in 1,500 homes in West Michigan. However, an estimated 60,000 homes need lead abatement in that region, Haan said.

Quantifying the extent of the problem is difficult. A 1998-2000 study estimated 38 million homes in the United States had lead-based paint, and 24 million had "significant lead-based hazards." In many cases, homeowners eliminate the danger when they repaint a house or replace older plumbing fixtures.

In many places, however, where the housing stock is the oldest and incomes the lowest, dangers persist. In cities such as Detroit and Muskegon, foundations and the U.S. Department of Housing and Urban Development have devoted money to tackling a problem that continues to confound officials.

Although the state also has a program to help pay for abatement, its budget is limited. During the past year, 180 homes have qualified through the state program, said Wells, the state's chief medical executive.

In addition to the discontinuation of lead in gas, much of the decline in lead levels in recent decades is attributed to changes in construction materials — lead paint was banned in 1978 — and to public health activism. The state reaches out to parents and health care providers and provides information on where families may turn for help.

Pediatricians are encouraged to test all children ages 1 and 2 for lead, and testing is required for Medicaid patients. If the test is positive, the results are confirmed with another blood test. Family and home histories are taken — the source of lead might be from a parent's workplace or the home.

Haan said lead is treated as a medical problem, but the effects extend far beyond a blood test. Apart from cognitive and physiological scars, the toxicity of lead has been correlated to long-term effects on society at large, including wages, higher incarceration rates and the welfare system.

More needs to be done to eliminate the problem before a child tests positive, experts said. "The problem is," Haan said, "we're still using kids as lead detectors."

Places with higher lead rates than Flint

Across Michigan, thousands of children are dealing with the effects of lead poisoning. Although much of the focus has been on lead in Flint's water supply, many parts of the state have percentages of children with elevated levels of lead that exceed rates in Flint — often from lead paint in older homes.

Emergency declaration 12-15-2015
Flint EOC activated 12-17-2015

Flint's Water Crisis Just Became A Double Emergency

Turns out declaring an emergency doesn't make the emergency go away.

- Arthur Delaney Senior Reporter, The Huffington Post
- Philip Lewis Fellow, The Huffington Post

12/16/2015 01:09 pm ET | Updated 1 day ago

JeCorey Hawkins had a scary moment with the water in Flint, Michigan, in September. The 22-year-old psychology student had stooped at a drinking fountain at his university when the water took on a grainy texture in his mouth.

"I was very creeped out because I didn't know if I would be sick," Hawkins told The Huffington Post on Tuesday. He said he and his family, which lives in Flint, hadn't been drinking tap water since earlier this year, though he trusted the University of Michigan's efforts to test and treat water on its Flint campus.

Flint's water problems turned out to be worse than most people realized when a local pediatrician reported in September that more children were being poisoned with lead, a dangerous neurotoxin. The continued problems with the water prompted Flint Mayor Karen Weaver to declare an emergency Tuesday.

"I am requesting that all things be done necessary to address this state of emergency declaration, effective immediately," Weaver said.

It's the second emergency declaration over toxic water for the beleaguered city -- Genesee County, which surrounds Flint, declared an emergency for the same reason back in October.

Jamie Curtis, chairman of the Genesee County Board of Commissioners, told HuffPost he didn't understand what Weaver hoped to achieve with her declaration, saying the mayor hadn't been in touch with any demands. He said the commission would take it up at its Jan. 4 meeting.

"I'm not sure what her declaration is," Curtis said. "What I don't think the people of Flint need ... is nothing more than rhetoric saying, 'I've declared this emergency,' but nothing comes of it."

The county's Oct. 1 declaration warned Flint residents not to drink the water unless it had been specially filtered and confirmed not to have high levels of lead.

The trouble started in 2014 when emergency managers appointed by Michigan Gov. Rick Snyder (R) decided to try saving money by switching Flint's water supply from the Detroit system to the Flint River. Local officials toasted the decision, though residents immediately complained about the taste, smell and appearance of what came from their taps. Most importantly, the new water turned out to be more corrosive, causing lead to leach from Flint's old pipes – and into the city's kids.

Research published by Flint pediatrician Mona Hanna-Attisha in September showed levels of lead in children's blood spiked at the same time as the water switch. Elevated blood lead levels are especially harmful for children, who can suffer stunted growth and irreversible brain damage. In October, after denying any problem, state officials acknowledged they failed to treat the water to adjust for its corrosiveness, and Snyder signed legislation switching Flint back to Detroit's water.

The city has told residents it could take as long as six months for the water lead levels to decline.

A Dec. 11 report from the Michigan Department of Environmental Quality said the state found elevated blood lead in 39 of 1,836 Flint residents who had testing done since early October. Blood lead levels can decline in a matter of weeks after a person is exposed to lead.

This week, in response to Weaver's new disaster declaration, a spokesman for Snyder referred HuffPost to previous statements from the governor's office outlining actions already taken, including an Oct. 2 action plan and the Oct. 21 creation of a special task force to investigate what went wrong and recommend solutions.

Hawkins wasn't impressed by the latest emergency declaration.

"It's kinda scary, but at the same time, it's like, the water has been this bad, you know, for all this time," he said. "They just decided to put a name to it at this point."

Hawkins has two younger sisters, 10 and 7 years old, who he said have suffered some hair loss, which is a common complaint among Flint residents who can't avoid bathing with the water.

"There is no reason for them to be losing hair at their age," Hawkins said.

This article has been updated with information from a Department of Environmental Quality report.

Reporter's notebook: Some state officials still in denial or misinformed over Flint River decision

By LINDSEY SMITH · DEC 17, 2015
ShareTwitter Facebook Google+ Email

I don't blame the governor's press secretary for not understanding exactly who made the decision to have Flint pump its drinking water from the Flint River. It was a complicated-decision making process with multiple key players that lasted at least a few months.

Back in the spring of 2013, when this decision was made, Governor Rick Snyder's press secretary, Dave Murray, was one of "us"; a journalist working for *The Grand Rapids Press/MLive*.

He was one of the familiar faces around town among the smaller group of reporters in Michigan's second largest city. And let's face it; none of us were paying close attention to the water decision that was going on 100 miles away in Flint. It wasn't our beat, after all.

But for the last 12 weeks or so, pretty much all I've done is try to answer a single, important question: How in the world did the "Flint water crisis" happen?

The answer is so complex I couldn't cram all the details into the one hour-long documentary I was tasked to write. Shameless plug – you can listen to the documentary "Not Safe to Drink" here.

The first draft of the documentary included a very lengthy section detailing who made the decision to switch to the Flint River and the months long process that determined the city's fate.

But it got cut out.

It got cut because we decided that detailing the city and state officials who had a hand in that decision, to some degree, doesn't really matter. The bottom line is that the state regulatory agency responsible for overseeing water quality, the Michigan Department of Environmental Quality, should have ensured that water was safe to drink. The MDEQ failed on that front, we now know, to disastrous effect. We think it's in the public's interest to understand how that happened.

By not requiring Flint to treat the river water in a way that would've helped keep lead out of the drinking water, MDEQ became the most important focus for the "accountability" portion of this documentary.

Through months of research and lengthy, recorded interviews, my editors and I came to the conclusion that, had the water experts (specifically officials at MDEQ and the engineering firm Flint's emergency manager hired), done a better job, then *who* made the decision to go to the Flint River shouldn't have mattered. If they would've required corrosion control treatment, treatment any normal large city in America uses, treatment that the federal government has now made completely clear is absolutely required, the lead problems Flint has faced may not have ever happened.

I don't mean to be flip. Of course it matters *who* made the decision to switch to the river. But after that first edit, we decided we weren't going to spend one third of an hour-long documentary hashing out the "who-did-what-when" on the financial side of this decision if the more imperative complex issue we needed to convey was the major screw-up on the water treatment side of the decision.

So that five-page-long chunk in the first draft of the documentary about the financial decision that was made in the spring of 2013 got cut down to the following:

Flint was broke -- like "nearing bankruptcy" broke.

Flint had a string of these state-appointed financial hatchet men during this time -- trying to get the city's finances straight.

They were looking for savings everywhere, and they had their eyes on the expensive water they buy from Detroit, so when Genesee County decided to build a new water system, one that's separate from Detroit, Flint was definitely interested in joining.

Once it was clear Flint could save millions of dollars a year with the new system, Flint got on board.

But there was a catch. The new water system wasn't built yet, and it wouldn't be ready until the summer of 2016, at the earliest.

And once Detroit realized Flint was going to leave its system, it jacked Flint's water rates up even more – to the tune of $10 million over the two years the new pipeline would be under construction.

So in the spring of 2013, Detroit kind of had Flint over a barrel.

It was state treasury officials who got creative.

Their solution?

Forget Detroit, Flint's emergency manager said. Let Flint get really cheap water from the Flint River.

The governor's press secretary, Dave Murray, called me Wednesday morning to take issue with this account. "That is simply not accurate," he told me. With less than four hours until the documentary aired, I didn't have time to argue. I had already had this discussion ad nauseam with his predecessor, Sara Wurfel, and with Treasury Department spokesman Terry Stanton. I referred Murray to my news director, Vincent Duffy.

The governor's press office followed up on this call with a specific complaint to me and the news director. They didn't think this part was accurate:

It was state treasury officials who got creative.

Their solution?

Forget Detroit, Flint's emergency manager said. Let Flint get really cheap water from the Flint River.

In an email, the governor's Deputy Press Secretary Anna Heaton wrote:

"That's not factual information for your readers and listeners. In fact, in the spring of 2013, the Flint City Council, and Mayor Walling, made the decision to switch to Karegnondi, and in the meantime, take some of its water from the Flint River. This was approved at the city council meeting in a 7-1 vote on Monday, March 25, 2013. Their decision was then sent to the emergency manager to approve. In fact, at the time, Flint City Council President Scott Kincaid said "I've never been a fan of staying with Detroit."

It is critical to note that Flint and Genesee Co. had been in discussions to start their own water authority for years before this decision was reached. They had been gathering information on a switch and leaning toward that decision far before the Gov. was even in office."

Here's what's true about what the governor's press folks are saying.

Yes, Flint had an interest in joining the new Karegnondi Water Authority before Governor Rick Snyder was in office.

Yes, Flint City Council voted on March 25, 2013 to join the Karegnondi Water Authority.

This is why I wrote "Once it was clear Flint could save millions of dollars a year with the new system, Flint got on board."

But the governor's press folks are either sorely misinformed or willfully blind to what happened after that vote.

Months and months after dealing with us reporters picking apart this decision, they still don't get it. I'm not breaking any news here. They should know this stuff by now.

Nowhere in that vote or other votes did Flint City Council say, "We support getting water from the Flint River." Yes, there was one councilman who did openly support that. But as a board, that vote never happened. Flint leaders never made that call (not that they had the authority to make such a call at that time anyway.)

Some state officials continue to confuse Flint's vote to join the Karegnondi Water Authority with the state appointed emergency manager's decision to temporarily switch to the Flint River.

I gotta be honest, after all the research I had done, I had a really rough time coming to terms with the fact that I simply did not have time in this documentary to recount the ins and outs of this decision more in depth. Even though it is super complicated, perhaps now is a good time to drag out the details.

For the sake of Michigan Radio's readers and listeners, and in response to the folks at the governor's press office, I've taken another crack at breaking down this part of the story.

Here's what happened when, and who was in charge:

- **July 2011:** Rowe Engineering presents Flint City Council with a study evaluating the city's options for drinking water. The high cost of water prompts city officials to study their options. The study looks at three options; staying with Detroit's water, switching to the Flint River, and getting on board with the KWA, the new water system that's now being built in Genesee County. The study shows staying with Detroit is the most expensive option in the long run. Switching to the Flint River is cheaper than Detroit in the long run, but making it a permanent source would require more than $60 million up front; to remove dams, to find ways to dispose of residuals from the water treatment process, and to upgrade the city's water treatment plant. The most favorable option, the study found, was going to KWA.
- **December 2011:** Financial reviews show Flint's finances are so bad, Governor Rick Snyder appoints Flint's first emergency manager. To start it was Michael Brown, but there are four different guys who hold this position over the next four years.
- Fast forward a year, to **December 20, 2012.** Because of the financial emergency, the decision about the best, most affordable water for Flint hasn't been made yet. But according to a report commissioned by the state treasury's office, on this day, there was a meeting with treasury and city officials. They discuss Flint's water options again. The report says that, on this day, it was decided that treasury officials would study only two options; staying with Detroit water or switching to KWA. Here are the key paragraphs on page two of this report, which comes out in **February 2013**:

  "... An option for the Flint (Water Treatment Plant) to supply the City of Flint without being supplied from either (Detroit) or KWA was initially considered. The preliminary investigation evaluated the cost associated with the required improvements to the plant and to the Flint River dam system. Although it appeared that this was a viable option, Flint in a meeting on December 20, 2012 with the Treasury, stated that the City did not want to pursue the option and it is no longer being considered."

  One thing to note, Treasury Department Spokesman Terry Stanton did point out that they also tried to figure out a way to blend Detroit's water with the Flint River water, to save the city money. But those talks broke down.

  Detroit Water and Sewer Department Board Chair Jim Fausone told me that's because Detroit was concerned that Flint wouldn't be able to treat the river water properly. If there were any problems at people's tap, it could be difficult to figure out which water source was causing problems.
- **March 2013:** Flint City Council votes in favor of joining KWA. The board does this even though it has no authority with the state emergency manager in place.
- **April 2013:** State treasury officials approve Flint's move to join KWA. The same month, Detroit sends Flint a letter announcing Detroit would end Flint's long term contract to buy water, citing a legal clause in the contract. Many times, spokespersons for Michigan's Treasury Department, the Governor's Office, and even Flint's emergency managers themselves have erroneously claimed this is the point where Detroit "cut Flint off" from the water supply. Yes, Detroit notifies Flint it will give the city one year at the long term contract rate structure, but after that, it would need to negotiate another contract. The other, shorter term options were more expensive than the longer term deal. Detroit, by no means, kicked Flint off its water system, as many state officials have claimed.
- **June 2013:** Flint Emergency Manager Ed Kurtz hires an engineering firm "for assistance in placing the Flint Water Plant into operation using the Flint River as a primary drinking water source for approximately two

years and then converting to KWA." Later that week, people from that engineering firm, Michigan's Department of Environmental Quality, Genesee County and Flint's water department met to determine if temporarily switching to the Flint River was feasible. They decided "the Flint River would be more difficult to treat" but that it was a viable source. They said there would be "obstacles" to get everything in place before April 2014, when Flint's contract with Detroit would end, but that it was "reachable." Lastly, they decided, "with support from LAN engineering which works with several water systems around the state, quality control could be addressed." I tried to talk to LAN engineering. They declined to comment.

- **March 2014:** Flint's Emergency Manager Darnell Earley sends a letter to Detroit's water system, refusing the final short term contract offer. It acknowledges the option to continue buying water from Detroit. But these short term offers would've cost Flint at least $10 million more over the two years it would take to build the new water system Flint will join next year. Instead, Earley writes, "the City of Flint has actively pursued using the Flint River as a temporary water source." The only people with any authority over this decision were Flint's string of emergency managers.
- **April 2014:** Michigan's Department of Environmental Quality signs permits that approve "Improvements to the City of Flint Water Treatment Plant to enable treatment of Flint River water on an interim basis until the KWA Lake Huron Water Supply is available for connection and use by the City of Flint."

Again, I'm not breaking any major news with this.

The ACLU's Curt Guyette has been nailing this point home for a while now.

<img src="http://michiganradio.org/sites/michigan/files/styles/default/public/201504/toastingFlintwater_0.jpg" alt="Flint officials toast each other as they flip the switch to the Flint River.">
Flint officials toast each other as they flip the switch to get water for the city from the Flint River.
Credit WNEM-TV

Through his Freedom of Information Act Requests, he discovered the letter from Darnell Earley, declining Detroit's offer to purchase water.

He's also caught numerous officials on video saying Detroit "cut Flint off" from the water system. Here's a video that gives you an idea of the spin machine at work.

The Detroit Free Press did a breakdown in late November too. They couldn't find a document that determines exactly which person made the call to put the Flint River back on the table as a viable option. But, ultimately, Paul Egan highlighted the same two important documents I saw – the February 2013 report for treasury that says the Flint city leaders were no longer considering the river as an option and then the June 2013 decision from Ed Kurtz, to hire an engineering firm to prepare Flint's Water Treatment Plant for the Flint River.

Snyder names Flint water coordinator after concerns raised

Posted: Friday, December 18, 2015 8:03 am http://www.petoskeynews.com/news/state-region/snyder-names-flint-water-coordinator-after-concerns-raised/article_9672899f-a3e8-5633-b285-f5e611065b2d.html

Snyder names Flint water coordinator after concerns raised Associated Press |

LANSING (AP) — Gov. Rick Snyder has named a point person to coordinate the state's response to the Flint water crisis after concerns about organization were raised by members of an independent task force that he created.

Harvey Hollins, who directs his Office of Urban Initiatives, will coordinate efforts, according to a letter Snyder wrote Tuesday and was released Thursday.

Snyder created the Flint Water Advisory Task Force in October to review state, federal and local governments' actions after children were found to have elevated levels of lead in their blood and it was determined that corrosive river water was leaching lead from aging service lines.

Task force members wrote a letter to the Republican governor last week citing the absence of a coordinated framework that "measures results and clearly delineates responsibilities," including goals and timelines. Snyder agreed and, at the task force's recommendation, supported an online "dashboard" to keep the Flint community, public health authorities and state agencies updated.

Snyder also said public relations specialist Chris De Witt has been brought on to "strengthen community outreach efforts."

The 99,000-resident city stopped getting its water from Detroit's system last year in a cost-cutting move while under state emergency management but had trouble with water from an interim source, the Flint River. The state initially downplayed lead concerns but ultimately had to commit $10.6 million to reconnect Flint to Detroit and to respond with filters, testing and other services.

oct. 1 ?

Local authorities declared a public health emergency, and on Monday, Flint's new mayor declared a separate state of emergency and activated the city emergency operations center.

Senate Minority Leader Jim Ananich, D-Flint, said there should be more urgency within the Snyder administration.

"Political appointees and public relations people are what got us into this mess, and they aren't who we need leading us out of it," he said in a statement. "Anything less than a professional trained in emergency management or public health will not suffice."

The task force is expected to release a report and recommendations early next year. In its letter to Snyder, the five-person panel said more steps need to be taken to reach additional children for blood-lead testing, follow up with those who have elevated levels and continue water testing. The task force also said the independent coordinator must engage with community stakeholders to "begin rebuilding community trust in state actions."

"While the task force is far from done with our work, the initial review has presented a very disturbing situation that will require many actions to help those that have suffered," said co-chairman Ken Sikkema, a former Senate majority leader. "We saw no reason to wait until the final report to make these initial recommendations."

what are they?

Governor's task force on Flint water crisis releases early recommendations

http://www.mlive.com/news/flint/index.ssf/2015/12/state_task_force_on_flint_wate.html

By Ron Fonger | rfonger1@mlive.com
on December 17, 2015 at 11:04 AM, updated December 17, 2015 at 7:20 PM

FLINT, MI — Current actions to protect the public from lead in water appear to be taking place without a system to measure results and delineate responsibilities, according to a task force charged with reviewing Flint's lead-in-water crisis.

In a letter to Gov. Rick Snyder, who appointed the Flint Water Advisory Task Force in October, the group acknowledged steps, including distribution of free water filters, that have been taken to carry out the governor's plan to address lead levels in the city's drinking water.

But the group also makes initial recommendations for improvement, including that the state address:

- The need for the Michigan Department of Health and Human Services and Department of Environmental Quality to set goals for actions in collaboration with local and federal agencies and organizations.
- The need for a set of corresponding timelines for the goals.
- The need to establish responsibility for meeting the goals in a timely fashion and for contingency plans for the state if the goals are not being met.
- The need for clear, regular communication with the Flint community and stakeholder groups regarding action steps and updates.
- That a single person or entity — "potentially independent of any one particular state agency" — serve as the point person to coordinate ongoing work.

"While the task force is far from done with our work, the initial review has presented a very disturbing situation that will require many actions to ... help those that have suffered," task force member Ken Sikkema said in a news release issued Thursday, Dec. 17.

The task force also released the governor's response to its letter. In it, Snyder said he has seen progress and recognizes "there is more work that must be done to ensure that this progress continues" regarding the Flint water crisis.

The task force letter said it is important that someone "potentially independent" of any state agency be appointed to coordinate ongoing activities and report on mitigation measures.

Snyder's letter recommends Harvey Hollins, the governor's director of the Office of Urban Initiatives, act as coordinator of Flint water work.

"Harvey is well-versed in the issues and the challenges faced by our cities and will be effective in this role," the letter said.

The governor's letter said he supports the suggestion of a dashboard approach to making information "about our work and progress more accessible to the Flint community" and that he has retained Chris DeWitt, a former Democratic strategist, to strengthen community outreach and "make sure residents have access to the information they need."

State Senate Minority Leader Jim Ananich, D-Flint, said in a statement Thursday that Flint needs a trained emergency management professional to coordinate assistance efforts here.

"Political appointees and PR people are what got us into this mess, and they aren't who we need leading us out of it," Ananich's statement said. "Anything less than a professional trained in emergency management or public health will not suffice."

The governor announced creation of the task force Oct. 21, the same day U.S. Rep. Dan Kildee, D-Flint, and Ananich called for the U.S. Environmental Protection Agency to carry out a similar review.

The EPA later agreed to carry out its own review, which also is ongoing.

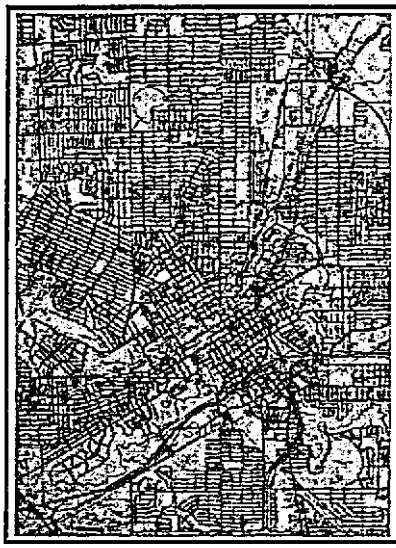
Members of the state task force on Flint water are Sikkema, of Public Sector Consultants; Chris Kolb, of the Michigan Environmental Council; Dr. Matthew Davis, of the University of Michigan Health System; Eric Rothstein, of the Galardi Rothstein Group; and Dr. Lawrence Reynolds, of Mott Children's Hospital.

Sikkema and Kolb are co-chairmen of the task force.

Dave Murray, press secretary for Snyder, said in an email Thursday the governor and administration continue to cooperate with task force members, "who are making a thorough review of all city, state and federal responses and procedures related to water in Flint."

"We also expect members will make recommendations that could address potential challenges in other cities moving forward," the statement said. "Today's interim report and recommendations are one step in that process. We appreciate that the task force members are investing their time and expertise to help us ensure that people in Flint — and across our state — will have access to safe, clean water."

MDEQ reassignment by Dec. 30 to current Urban Initiatives director, Brad Wurfel, Spokesman



City of Flint Water System Facts

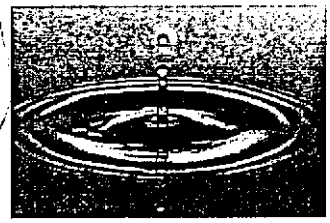
Over 600 Miles of Distribution Mains

Over 7000 Valves
Over 3909 Hydrants

Over 46,000 users in 2006
Only 31,000 users in 2014

What Can Impact Water Quality ?

- Condition of source water
- Temperature
- Organic material
- Retention time in system
- Low flow
- Dead ends
- Main Breaks
- Repairs



Quality Indicators

- Chlorine residual
- Total coliforms

Task force lays most blame for Flint water crisis on MDEQ

By VINCENT DUFFY · DEC 29, 2015

A task force appointed by Gov. Rick Snyder says Michigan's environmental regulatory agency is primarily responsible for the state's failure to ensure safe drinking water for Flint residents. The Flint Water Advisory Task Force says in a letter to Snyder that the state Department of Environmental Quality "must be held accountable for that failure."

The letter was made public Tuesday. You can read it here.

Corrosive Flint River water leached lead from service pipes into homes after the city switched last year from Detroit water. Elevated blood-lead levels later were found in some children. Department of Environmental Quality Director Dan Wyant and spokesman Brad Wurfel both resigned Tuesday.

Task force co-chair Ken Sikkema says in the letter that "Flint residents were exposed to toxic levels of lead in their water primarily due to a regulatory culture of passive technical compliance."

The FWATF letter stated in part:

"We believe the primary responsibility for what happened in Flint rests with the Michigan Department of Environmental Quality (MDEQ). Although many individuals and entities at state and local levels contributed to creating and prolonging the problem, MDEQ is the government agency that has responsibility to ensure safe drinking water in Michigan. It failed in that responsibility and must be held accountable for that failure."

"The City of Flint's water customers—fellow Michigan citizens—were needlessly and tragically exposed to toxic levels of lead through their drinking water supply. They deserve a commitment to properly assess responsibility and ensure accountability. They also deserve a commitment to needed mitigation in both the short and long term. The Flint water crisis never should have happened. Having failed to prevent it, state government should coordinate a sustained, public-health-focused response to remedy, to the fullest extent possible, the impacts on the Flint community."

The letter outlined three areas where MDEQ failed:

- Regulatory Failure
- Failure in Substance and Tone of MDEQ Response to the Public
- Failure in MDEQ Interpretation of the Lead and Copper Rule

This is the second letter sent by the Task Force. The first, sent earlier this month, made several recommendations concerning coordination of state efforts that were supported and implemented by Governor Snyder.

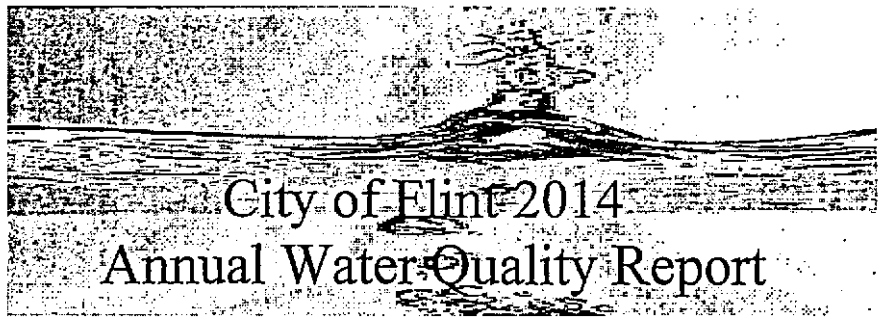
The full FWATF report is expected to be completed in early 2016.

Members of the Task Force include:

1. **Matthew Davis,** M.D., M.A.P.P., is professor of pediatrics and internal medicine at the University of Michigan Health System and professor of public policy at the Gerald R. Ford School at the University of Michigan.
2. **Chris Kolb** is president of the Michigan Environmental Council.
3. **Lawrence Reynolds,** M.D., is a pediatrician in Flint who serves as president of the Mott Children's Health Center.
4. **Eric Rothstein** is a national water issues consultant and principal at the Galardi Rothstein Group. He served as an independent advisor on the creation of the Great Lakes Water Authority.
5. **Ken Sikkema** is a senior policy fellow at Public Sector Consultants. (Full Disclosure - he is also a regular commenter on Michigan Radio.)

The FWATF was formed by Governor Snyder to review actions regarding the Flint water system and offer recommendations both for Flint and Michigan to protect the health and safety of state residents.

Flint Mayor Karen Weaver
Flint City Council President Kerry Nelson

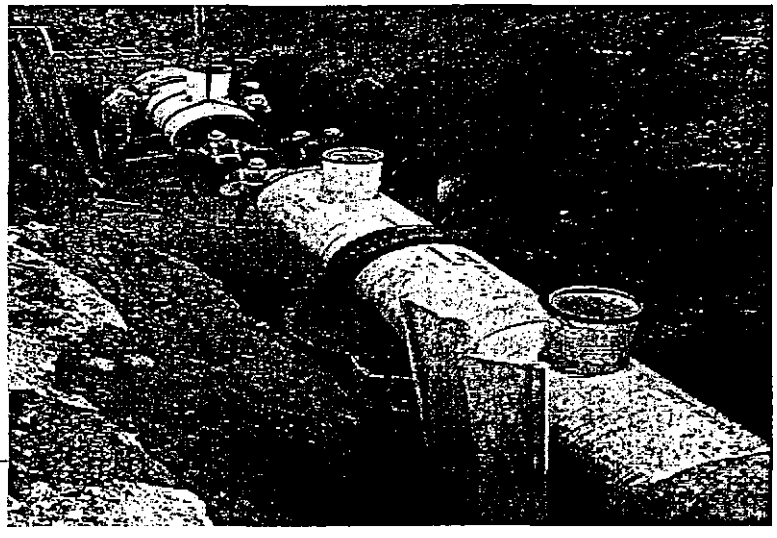


The Consumers Annual Water Quality Report provides important information about your drinking water. This report includes information about the source of the water, health information, a chart summarizing regulatory required testing results, and a table giving explanations of important terms to understand when viewing the test results. The City of Flint Department of Utilities is dedicated to providing quality drinking water to the residents of the community. The Flint Water Plant operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations, and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water. Information about your drinking water is available on the City of Flint web page at *www.cityofflint.com* or by calling the City of Flint Water Plant at (810) 787-6537. The Safe Drinking Water Hotline at (800) 426-4791 is a resource for health related questions and water quality issues. General drinking water information can also be found on the USEPA web site at www.epa.gov/safewater/.

Water Source

The City of Flint began using the Flint River as a water source in May of 2014. Flint is located roughly in the middle of the Flint River Watershed. The Flint River watershed includes Holloway Reservoir, C.S. Mott Lake, Kearsley Lake, and numerous streams and creeks that drain to these lakes or directly into the Flint River. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, and the City of Flint Utilities Department conducted a source water assessment in February 2004 to determine the susceptibility of potential contamination. The susceptibility rating is a seven-tiered scale ranging from "very low" to "very high" based primarily on geologic sensitivity, water chemistry, and contaminant sources. The Flint River source water intake is categorized as having a very high susceptibility to potential contaminant sources.

The use of the Flint River as a source water for the City of Flint Water Treatment Plant was a temporary move, driven largely by economics and the financial state of the City. The City of Flint joined the Karegnondi Water Authority (KWA) in 2010. The KWA consists of a group of local communities that decided to support and fund construction of a raw water pipeline to Lake Huron. The KWA will provide the City of Flint Water Treatment Plant with source water from Lake Huron. The KWA pipeline is currently under construction, and is scheduled to be completed by the end of 2016.



KWA pipeline construction

General Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by the public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- **Microbial contaminants;** such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- **Inorganic contaminants;** such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- **Pesticides and herbicides;** which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- **Organic chemical contaminants;** including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- **Radioactive contaminants;** which can be naturally occurring or be the result of oil and gas production and mining activities.

General Information (cont.)

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-comprised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that the lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint Department of Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If you are concerned about elevated lead levels in your home's water, you can minimize your potential exposure to lead in your water by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

2014 & Current Drinking Water Issues

The City of Flint did experience drinking water issues in the summer of 2014. Issues began with areas of the city experiencing "rusty" water. This was largely due to the fact that the city distribution system contains hundreds of miles of cast iron pipe. As these pipes age and degrade, iron is released, causing the water to exhibit color. The change in source water, water main breaks, and routine maintenance to the system also contributed to this problem.

The City of Flint received violations from the Michigan Department of Environmental Quality (MDEQ). The violations included a total coliform and E. coli in August and September of 2014, and a corresponding total trihalomethanes (TTHM) violation in December of the same year. As the city distribution system testing began to detect bacteria, system flushing increased, and chlorine addition to the water at the treatment plant also increased. The resulting increased chlorine addition then resulted in the higher formation of trihalomethanes.

While facing these issues, the City of Flint took steps to confer with industry professionals and state regulators in regards to treatment plant operation and distribution system operation. In November, TTHM levels were below the Maximum contaminant level set forth in the Michigan Safe Drinking Water Act.

Moving Forward

The City of Flint has taken many steps to correct the underlying issues that resulted in the drinking water violations. Water Treatment Plant corrective actions that were taken immediately after the issues occurred included:

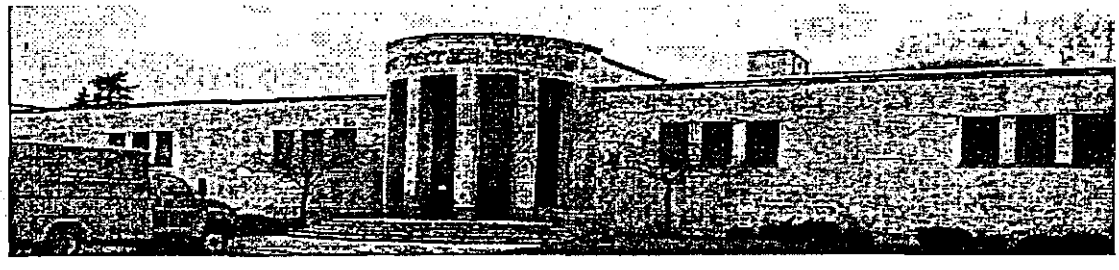
- Limiting the use of storage reservoirs during the warm weather months.
  - Warm water temperatures and water age are large contributors to the formation of THM's.
- Optimizing ozone pretreatment by updating control programming along with cleaning and inspection of the ozone generators.
  - Ozone is a powerful oxidant that provides a level of disinfection along with taste and odor control.
- Currently finalizing the installation of granular activated carbon (GAC) to the filtration process, which should be complete by the end of July 2015.
  - GAC will reduce THM's by removing the chemical precursors that react with chlorine to form the THM's.

Moving Forward (cont.)

Distribution system corrective actions that were enacted include:

- Increased water main flushing in an effort to alleviate stagnant water.
- Update distribution system water hydraulic model, to determine possible problem areas.
- Repaired or replaced several large water main valves, which were inhibiting the designed flow of water through the system.
- Planning and budgeting of 24' transmission water main repair in area of concern in the distribution system.
- Begin a complete distribution system evaluation of the 7000 water main valves that control the flow of water throughout the city. This project will be complete in July of 2015 and will provide information on where to proceed with further repairs and future projects.

The City of Flint is dedicated to resolving the issues that are facing the water system, and will continue to move forward as we prepare for the future. The City would like to thank all the residents and customers for their patience and understanding as we face the challenges ahead. The trials and tribulations that we have faced with the switch to the Flint River as a source water will prove to be important as we move ahead as a member of the KWA. Some of the distribution system issues experienced in 2014 while using the Flint River may also have been experienced with a different source water. As we continue to address the issues and take steps to be proactive, we can assure a future of quality drinking water in the City of Flint.



If you have any questions about this report or other concerns please contact the City of Flint Water Plant (810) 787-6537.

2014 Regulated Detected Contaminants
Monitored at Treatment Plant

Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Inorganic Chemicals						
Fluoride	mg/L	4	4			No
Nitrate	mg/L	10	10	0.5	0 – 0.5	No
Metals						
Barium	mg/L	2	2	0.03	0.02 – 0.03	No
Selenium	mg/L	0.05	0.05	0.001	0 – 0.001	No
Pesticides						
Atrazine	mg/L	0.03	0.03	0.0003	0 – 0.0003	No
Organics						
Total Xylenes	mg/L	10	10	0.0005	0 – 0.0005	No

More than 100 other chemicals were monitored throughout the year that were not detected. The list of various classifications these chemicals are associated with include metals, carbamates, herbicides, pesticides, organics, and radiological.

Total Organic Carbon, TOC			
Regulated Contaminant	Required Monthly % Removal	Minimum Monthly % Removal	Monthly % Removal Ranges
Total Organic Carbon	50	53	53 - 68

Finished water and Source water samples are collected and analyzed monthly to calculate percent removal. Total organic carbon includes numerous chemicals that are found naturally in surface waters. Certain chemicals found in this group are precursors to the disinfection byproducts trihalomethanes and haloacetic acids.

Turbidity		
Highest Single Measurement (Cannot exceed 1NTU)	Lowest Monthly % of Samples Meeting Turbidity Limit (< 0.3 NTU in 95% of samples)	Violation
0.22	99.1	No

Turbidity is a measure of the apparent cloudiness of water, usually attributed to particulate matter. The turbidity data in the chart above is measured from the water plant tap every 4 hours. Turbidity is monitored throughout each stage of the treatment process in 4 hour intervals, and in one of the final stages of treatment, filtration, turbidity is monitored continuously with in line meters, and verified every 4 hours in the laboratory.

In 2014, the EPA required the City of Flint and other communities to conduct further testing on unregulated contaminants at the treatment plant and the maximum residence time in the distribution system. The monitoring results will be utilized by the EPA to determine if these chemicals should be regulated. The unregulated contaminant monitoring that yielded results are presented in the chart below

Unregulated Contaminant Monitoring			
Regulated Contaminant	Unit of Measure	Highest Level Detected	Range of Detection
Chromium	ug/L	0.40	0 – 0.4
Hexavalent Chromium	ug/L	0.40	0.34 – 0.40
Strontium	ug/L	130	120 – 130
Vanadium	ug/L	0.20	0 – 0.20

2014 Regulated Detected Contaminants
Monitored in Distribution System

Disinfectant Residuals						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Chlorine Residual	mg/L	4.0	4.0	3.5	0.1 – 3.5	No

Microbiological Contaminants				
Regulated Contaminant	MCL G	MCL	Highest Number detected (in 1 month)	Violation
Total Coliform bacteria	0	The presence of coliform bacteria in > 5% of monthly samples	15	Yes
E. coli Bacteria	0	0	1	Yes

Disinfectant residuals and microbiological contaminants are monitored at 8 locations throughout the city distribution system, and at the 2 drinking water reservoirs and pump stations located out in the distribution system. At least 100 samples are collected and analyzed each month.

Lead & Copper						
Regulated Contaminant	Unit of Measure	MCLG	Action Level AL	90th Percentile Value	Number of samples over AL	Violation
Lead	ug/L	0	15	6	2	No
Copper	mg/L	1.3	1.3	0.11	0	No

Lead and copper monitoring was conducted from June through December 2014 with the collection of 100 samples. Samples were collected by residents from the taps at their residence. Thank you to all who participated in collecting samples.

Disinfection By-Products						
Regulated Contaminant	Unit of Measure	MCL G	MCL	Highest Level Detected	Range of Detection	Violation
Total Trihalomethanes (TTHM)	ug/L	n/a	80	196	33.3 -196.2	Yes
Haloacetic Acids (HAA)	ug/L	n/a	60	64	5 - 64	No
Bromate	ug/L	10	10	23	0 - 23	No

DBPs

Disinfection by-products occur as a result of the water treatment process. Bromate is formed as a result of using ozone as a treatment additive. Ozone is used to help control taste and odor issues, and as a pre-treatment disinfection. Naturally occurring bromide reacts with Ozone to generate bromate. Bromate is monitored monthly, and compliance is based on a yearly average.

TTHM's and HAA's are formed as a result of utilizing chlorine in the treatment process. Naturally occurring compounds known as TOC's (total organic carbon) react with chlorine to form TTHM's and HAA's. The temperature and the age of water increase the formation of THM's and HAA's, and as a result, during the warm months of the year is when levels were at their highest. Samples are tested quarterly from 8 sites throughout the distribution system and compliance is based on a running annual average at each individual site.

Key to the Detected Contaminant Tables		
Symbol	**Abbreviation for**	**Definition/Explanation**
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichoroacetic, and trichloroacetic acids. Compliance is based on the total .
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in d water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromoochloromethane and bromoform. Compliance is based on total.
ug/L	Micrograms per Liter	A microgram = 1/1,000,000 gram 1 microgram per liter is equal to 1ppb

Template from prior event (2014 flood)

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

First announcement Apr 25, 2014 Switch to Gov't R. but later terminated by Mayfield Gov't

(Date of Request)

The Honorable //// //////
President of the United States
The White House
Washington, D. C.

Through: Regional Administrator [NAME]
FEMA Region _____
City, State, Zip Code

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare a [major disaster or emergency] for the ***(name of the State or Indian tribal government)*** as a result of ***(name type of incident and incident date as identified in the declaration request form)***.

[The following information is required for ALL requests. Provide additional information that is not contained in the form. If requested information is included in the form, it is not necessary to repeat in the cover letter.]

Describe deaths and/or injuries associated with the event.

Describe voluntary agency assistance provided to the community in anticipation of or as a result of the event. (including but not limited to activities taken by the American Red Cross (ARC), Salvation Army, Southern Baptists, and Voluntary Organizations Active in Disaster; voluntary agency and/or municipal shelter information, including the number of shelters open, the peak population, total number of overnight stays, and when the shelters closed; number of mental health contacts made by voluntary agencies; number of ARC cases open and closed; number of clean up kits provided; number of meals served; number of fixed and/or mobile feeding sites; level of ARC operation (I-V); and any other type of assistance that was provided by voluntary organizations).

Indicate whether a State of Emergency has been declared, when and to what areas are included in the declaration. Indicate if affected jurisdictions have also declared states of emergency.

Provide a description of damage as a result of the event (such as the impact the event has had on the affected area and population; disruption of normal community functions and services, including damage to any critical facilities that have been rendered non-operational by the event and extended or widespread loss of power or water; emergency conditions that may be present,

health and safety hazards, status of repairs, and estimated completion date(s), if known.

Provide information on PDA findings and how and where they were conducted, including accessibility concerns, if additional space needed from the form.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this disaster:

Describe what has been done to respond to the disaster, including actions pending or taken by the State, local, or Indian tribal governments. Describe any State, local or Indian tribal government Individual Assistance programs.

Provide the disaster history of the State or Indian Tribal government over the past 12 months, including Stafford Act declarations and declarations by the Governor or Tribal Chief Executive and the extent to which the State or Indian tribal government has expended its own funds; list areas that have sustained damage from this event and other disasters in the previous 12 months; and include any other pertinent factors that would have a bearing on the State or Indian tribal government's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.

[The following information is required for requests for Individual Assistance.]

Provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations. Include a comparison of the percentage of the State, local, or Indian tribal government averages and national averages.

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
National Average	%	$	%	%	
State/Tribe Average	%	$	%	%	
List Jurisdictions Requested	%	$	%	%	

* *Indicate source of data cited*

[The following information is required for requests for Public Assistance.]

Provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include in your discussion significant impacts to specific areas. If any local communities have sustained significant damage and

have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita.

Discuss level of insurance coverage.

If applicable, include estimates for emergency dune restoration on non-engineered beaches that may be eligible for the placement of temporary berms in order to eliminate or lesson the threat of additional damage from a five year event. Identify all damage associated with engineered beach projects and indicate whether or not the damage associated with those beaches is included in the PDA information. Note that beach projects under the authority of the United States Army Corps of Engineers, are not eligible for Public Assistance, as they are under the authority of another federal agency, therefore costs associated with such projects should not be included in the PDA information. Such costs should be identified in Enclosure C.

Insert concluding statement.

Sincerely,

//////////////
(Governor or Tribal Chief Executive)

initial draft text re: Flint

1

January ??, 2016

(Jan. 6 briefing notes on back)

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since May 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to a dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,413	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	445,589	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.3%	52.6%	43.4%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an official bankruptcy (declared in 2XXX) appeared to provide one of the clearest means to sort through the many debts and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. A disproportionate number of the city's residents are in poverty. A disproportionate number of the city's residents have disabilities (functional needs).

Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23 percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25 percent. In the City of Highland Park, the poverty level is closer to 50 percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17 percent and its median household income, at $44,982, also lags nearly 8 percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6 percent, 8.4 percent, and 11.1 percent, respectively) that exceed the state average of 7.7 percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well above the national average of 6.2 percent.) The City of Highland Park has an unemployment rate that exceeds 23 percent, while the City of Detroit's rate exceeds 17 percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double digits.

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this disaster:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with section 401 of the Stafford Act. On that same date, under my authority as Governor, I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to, providing direct assistance to the affected communities and to individuals, assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship, and taking appropriate actions to keep those affected facilities, infrastructure, and services operational.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this

request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions"; Maps, weather, and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

(3) ARC not yet involved at this point
LARA helped DEQ with testing. Flint + Genesee oversee their own plumbing but lack inspectors - need assist from state. (Capt use of emps?)

Terrace room to be used as initial JIC with PIOs.

Gov. rep: pending lawsuit + potential lawsuit under Safe Drinking Water Act. Do jobs, but take care re: litigation vs Gov.

MDOT many pipes are under roads + coordination wld be good. (w. EPA)

Lt. GT Roach: Gen. Co. Pub Hlth Dept, GCARP? (Pub Assist from) water distrib, filter distr, educ., Pb testing clinic (coord w DHHS United Way, Flint Health Dept. over 23K filters + replacement cartridges so far, Co. GIS getting underway. Coord w DT.

ATTACHMENT 1 TO MAJOR DISASTER REQUEST

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	XX.X%	$XX,XXX	XX.X%	XX.X%	XX.X%	XX.X%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

Data Sources
U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

(2) (briefing continued) some fixtures/fountains > 100 ppb
Fall 2015 schools testing + actions required ~25 to 50 samples per school, 200-300 samples total per facility. 4 samples per sampling point, (after different flush times) 10 consecutive samples. Info to spreadsheets + reports,
Oct 15 switched back to Detroit water
Dec. 9, '15 supplemental PO_4 addition began, duplicate. water filters available for free.
Use of Erosion controls slow but do not stop the leaching process.
Any resident of Flint can get a bottle to fill with sample for H_2O testing. Results posted online.
Overall slight downward Pb trend. But some values well over 100 ppb. 2500 ppb at a child care facility!
No historical test results there to compare with (schools) Some historical data exists elsewhere to compare. (no mention of the comparison)
Not a problem only of Flint's. "Low-lead brass fixtures" could still have as much as 8% Pb,
increasing recognition
Dr Wells: Excavation + manipulation of lead lines tends to exacerbate particulate levels,
Capt: review the EMP for all relevant information. All info to go out through PIOs.
(except internal coord + calcs)
Ethel DHHS: allocation to buy water + filters. 2 pickup locations in Genesee (at DHHS offices) free filters
Neil? Water purchases from S. Carolina.
and? MDARD Food service, processing, restaurants. Pb affects animals as it does humans (company animals)
? Dept. Educ re: school meals?

1-6-2016 SECC Briefing 9 AM

pre-meeting questions:
Lead (corrosion control chemicals) and testing? treatment?
THM trihalomethanes (ferric chloride, which can accelerate corrosion & lead deposition)
emergent from over-chlorination

Start of briefing:
Overall goals: assess situation, prioritize, coordinate. Life-safety issues. Water supply. Unified command: Flint city, county, state, Michigan
SECC activation 8-5 M-F
2015-10-01-City of Flint water source shortage
Maintain activity log in WebEOC.
IC + gen staff 11 AM assign
IC objectives mtg 10 AM.
Unified command: Flint city, county, state, Michigan
Overall goals: assess situation, prioritize, coordinate. Life-safety issues. Water supply. Unified command: Upon initial meeting
Gov. declared state of emergency. Prez disaster declaration does not apply here, but emergency is possible to supplement state efforts.

Lead pipe replacement program (MDEQ check Jen Boyer)
GIS Map Filter distribution, home locations. gaps in distrib (+ testing?),
Nutrition distribution program? Long-term recovery styles. Restore trust in state govt.
JIC will be set up.

Dr. Wells: DNHS chief medical executive; Pb as neurotoxin; affects every system in the body - lowers IQ
Esp problematic in developing children - esp if not enough Fe, Ca. 5 µg/dL 10 µg/dL no safe level; lead exposure
gastric, ulcers, anemia, etc incl. death. Cognitive + developmental delays, attention + behavioral disorders
Sources: gasoline (till 1970s), paint, pipes pre 1978 homes, ammunition + firearms, soils industrial sites. Air pollution
CLIP - childhood lead prevention program, Screened at age 1 & 2 those who test high (≥5 µg/dL evaluated for exposure/cause
critical action level 45 µg/dL immediate medical treatment chelation treatment to remove Pb
investigation - sources of Pb in environ.
Water concentration does vary seasonally,
x̄ ± T, Pb diffs Targeted area old cities,

(VA tech Mark Edwards independent testing of water)
~~Lead~~ elevated Pb ~~confirmed~~ declining in Flint

Mike Sobocinski's notes from the SEOC briefing of January 6, 2015:

Capt. Kelenske: This activation is different from many. Overall goals will include assessing the situation, prioritizing actions, and coordinating between agencies, identifying life-safety issues. SEOC activation hours are currently 8a-5p Mon-Fri. MI CIMS event titled 2015-10-1-City of Flint water contamination/shortage. Maintain activity logs in MI CIMS. Battle order set up for today: IC objectives meeting 10am, assign work tasks 11am IC + general staff, 2pm planning meeting, IAP approved 3pm, Unified command initial meeting 4pm. Governor declared state of emergency. Presidential disaster declaration will not apply here, but an emergency is possible to supplement state efforts. Lead pipe replacement program to be checked into – perhaps by Jen [Boyer?] of MDEQ. GIS mapping to cover filter distribution, home locations, distribution/testing gaps, etc. Nutrition distribution program [correct title?]. More of a long-term recovery style of approach. Goal to restore trust in state government. JIC will be set up.

Dr. Wells (DHHS chief medical executive): Pb as neurotoxin, affecting every system in the body, lowering Fe and Ca. Especially problematic in developing children under age 6, esp if not getting enough Ca, Fe. Standards have become increasingly strict over time, with Pb levels formerly 10ug/dl to warrant action, then lowered to 5ug/dl, and today Pb is treated as having no safe exposure level.

[NOTE: she is referring to blood concentration levels of micrograms per deciliter, not to be confused with water concentrations referred to elsewhere in units of micrograms per liter: ug/l. I'm using u to represent the greek letter mu, symbol for the "micro" prefix]

Health problems from lead include gastric problems, ulcers, anemia, etc. including death. Cognitive & developmental delays, attention & behavioral disorders. Pb sources include gasoline and paint (until the 1970s), pipes (esp. pre-1978 home construction), ammunition and firearms, soils & industrial sites, air pollution (especially in summertime). CLPP "clip" Childhood Lead Prevention Program. Screenings at age 1, age 2. Those who test >5ug/dl (national standard) are evaluated for environmental exposures/causes. Critical action level 45ug/dl – immediate medical treatment, chelation treatment to remove Pb, and investigation of Pb sources in environment. Water concentration does vary seasonally, with temperature and Ph changes. Old cities are targeted areas for higher risk. Virginia Tech independent testing of water. [From her limited description, I was unclear in the end of the relationship between these results and other tests.] Elevated Pb levels generally declining, including in Flint, until 3rd quarter of 2014 [fiscal quarter or calendar year??]. Hurley Medical Center deals with the high-risk area in Flint. American Journal of Public Health issue of 2 weeks ago had study published on this topic. Water is not the only source of Pb in the area. An increase was measured in 2 Flint zip codes [485]03 and [485]04 although it didn't reach statistical significance. Need to pin down high-risk areas – Pb levels can and do drop when environmental exposure is reduced. Testing since Oct. 1 [2015], to Dec. 18 [period for specific results, assuming testing still continues after Dec. 18?]. Improper water filter use, or non-use (e.g. after Detroit water restored in Flint), has caused problems. Pb has half-life of less than 30 days. Department [hers or in the city of Flint?] surveillance results: 23 children under 6, 7 children age 6+, 13 adults who had blood levels above 5ug/dl. 12 elevated Pb blood level investigations; now including water testing, but Pb in dust, paint, and soil was also found. 1 hospitalized (level in the high

30s of ug/dl). HUD-funded program at the state level [name?] Coordination with Wayne State University and Flint campus of [she had said MSU, but it is likely that it is instead U-M Flint]. Misinformation exists re: questions like whether it's okay to shower or bathe in the water [she provided no answer for her own example – is it okay?]. Much local support exists. Info sent through schools with the children who attend them. SNAF, WIF [double check?] nutritional programs for young children. Would like to test as many young children (under 6) as possible in the city. See MI.gov or Flint Water for information about filters – Home Depot as a partner. MDEQ includes blood Pb level in their testing reports.

Question asked: Are there other substances of concern besides Pb in water? A: yes, bacteria, Cu (esp. for those with Wilson's disease), and "other chemicals." [MDEQ person later fills in a couple of these: total trihalomethanes, TTHM and halo-acetic acids, HAA5, which both fall under the category of disinfectant by-products DBPs]

George Christian [correct spelling?] of the MDEQ (Flint action plan coordinator): Flint had used the Flint River as a source before 1967, in 1967 switched to use of Detroit Water and Sewer Department DWSD for its water supply. Jan 2006 discussions began with Karegnondi Water Authority KWA. April 17, 2014 [event? Possibly the end of DWSD supply?]. May 2014 city began using Flint River water. Aug-Sept Boil water notices issued in part of the city of Flint, for E. coli and total coliform violations. [NOTE: spoke too quickly for me to accurately catch all of the dates/events he mentioned. People really should provide their info in writing rather than rely upon verbal briefs under distracting SEOC conditions!] Had the Flint River as a back-up supply all along, which is why the facility there was still maintained [paraphrase; didn't catch exact wording]. Late 2014-early 2015 DBPs: HAA5 and TTHM, with carbon as a treatment to remove these compounds. Sequence of tests: first at 6ppb 90th percentile level [he didn't explain this well at all, but normally this would mean that the 90th percentile value is at or above the bottom 90% out of all ranked values in a list]. 2nd round of tests: up to 11ppb, compared to EPA's action level of 15ppb. Corrosion control treatment [a means of reducing lead concentrations in the water]. There were also issues reported involving the color, odor, and taste of Flint water. Virginia Tech Pb testing Sept 5 [?], 2015, with Pb advisory issued by Flint. Fall 2015 schools testing and actions required. Some fixtures and fountains above 100ppb. 4 samples per sampling point, after different flush times, 10 consecutive 1liter samples, 200-300 samples total per facility [math not exact, must be estimates], Info placed into spreadsheets and reports. Oct. 15 Flint switched back to DWSD water. Dec. 9, 2015 supplemental phosphate [PO$_4$] addition began. Use of erosion controls do slow but do not stop the leaching process (of lead into the water). Any resident of Flint can obtain a bottle and take water samples in for testing; results posted online. Water filters are available for free. Overall slight downward Pb trend, but some values are well over 100ppb. One child care facility measured at 2500ppb. No historical test results there [in schools?] to compare with, but some historical data exists elsewhere to compare. [No mention of the comparisons themselves] Not a problem only of Flint's, increasing recognition of problem more broadly. "Low-lead brass fixtures" could still have as much as 8% lead. [not sure whether he said this or Dr. Wells]

Dr. Wells: Excavation and manipulation of lead lines tends to exacerbate particulate levels.\

Capt. K: Everyone review the MEMP to look for relevant information. All info to go out through PIOs (except for internal coordination and calculations).

Richard [Thelen?] of DHHS: allocation to buy water and filters, 2 pick-up locations in Genesee – free filters [locations not specified, are they at DHHS offices?]. Water purchases from South Carolina.

Brad [Deacon?] of MDARD: Food services, processing, and restaurants are also of interest. Lead affects animals as it does humans, so companion animals may be affected.

??? of the Dept of Education? "DEA" or "DoA"? [people were not introduced properly] said something about school meals.

ARC not yet involved at this point.

LARA helped DEQ with testing. Flint & Genesee oversee their won plumbing but lack inspectors – need assist from state (Capt: or through EMAC use)

Terrace Room to be used as initial JIC, with PIOs there.

Governor's Representative [name?]: pending lawsuit against governor, potential lawsuit under Safe Drinking Water Act. Everyone do your jobs, but take care, remembering litigation potential.

MDOT [Eileen Phifer?]: Many pipes are under roads and so coordination would be good; shared objectives probably exist w MDOT, EPA, etc.

Lt. BJ Roach, MSP: Genesee Co. Public Health Dept, GCARP [??] (public assistance forum) are involved: water distribution, filter distribution, education, Pb testing clinics (coordinated with DHHS), United Way, Flint Health Dept. Over 23K filters and replacement cartridges provided so far. County GIS getting under way – coord w MSP GIS?

Capt K: submit action items to Tom Weber for IAP. Everyone stay until noon and review MEMP, then to decide whether needed after lunch today.

Tony: Required agencies already known to be needed to stay: MDEQ, DHHS, Education, Talent & Economic Growth, MDTMB, MDARD.

Sobocinski, Mike (MSP)

From: Sobocinski, Mike (MSP)
Sent: Wednesday, January 06, 2016 2:18 PM
To: MSP-seocda2
Cc: plangc
Subject: RE: SitRep1 Executive Summary

Thanks, Henrik
I do actually have some recommendations...

The first involves the nature of the wording of the overall incident.

1. Instead of "introduction of lead into the public water supply, which has caused elevated blood lead levels" I would suggest wording which does not suggest a clear causal effect: "presence of lead in the public water supply, and the detection of elevated blood lead levels"

Studying the rest for factual accuracy, according to my knowledge so far, leads to the following notes:

2. I have an official Flint water report stating May 2014 as the start of Flint River water, not April, so I think that may need to be changed.
3. In the next sentence, I doubt whether the water should be called "untreated" – one of their solutions for over-chlorination (ferric chloride to offset total trihalomethane levels) seems to have been a partial cause of accelerated corrosion. "Treatment" has multiple meanings. Here, it should mean water corrosion-control chemicals.
4. "Elevated blood lead levels in young children" might be interpreted as "all young children in Flint" unless it is worded more carefully.
5. My notes from MDEQ this morning had Oct. 15 as the date of returning to Detroit water... I can double-check that with other sources.
6. The abbreviation for Detroit water should be DWSD, but the third paragraph says "DSWS" and "DWSW" and these should be corrected.

Hope you find this initial input to be of use.
I'll be doing some more study to further assess this information. I have some really useful official documents from Flint with good info to be sorted through and compared...
Thanks!

Subject: SitRep1 Executive Summary

Mike,

Here the first draft for the Executive Summary for the first SitRep.

Thanks,
Henrik

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the

started in 2014

county in response to the introduction of lead into the public water supply, which has caused elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

In April 2014, the City of Flint switched from the Detroit Water and Sewer Department (DWSD) to the Flint River as their primary water source. The untreated corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWS as their primary water source on October 16, 2015. Funding to reconnect to DWSW was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSW system, water in the City of Flint is still not safe to drink.

too much?

OK if filtered + tested as low lead?

Sobocinski, Mike (MSP)

From: Katarsky, Anthony (MSP)
Sent: Tuesday, January 05, 2016 4:46 PM
To: MSP-EMHSD-Division
Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration. EMHSD will **activate the SEOC tomorrow at 0800** and will conduct a briefing at 0900 on the event. All state agencies will be represented. I ask that only those personnel requested to play SEOC roles and section managers attend the 0900 briefing due to space constraints. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;
- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

If you have any questions, please let me know.

Anthony P. Katarsky
Assistant Division Commander
Michigan State Police
Emergency Management and Homeland Security Division

Briefing notes Jan. 7 9:30a
Tom Weber: sit rep 1 published, ICS202 to be published shortly [internal use only], disaster recovery unit be established within ops
ARC (phone); DHHS: Richard Thelen - outreach + educ to local health care providers. JIC up. Web mid-season. filters + replacement cartridges GCCARD 2 local distrib. contracts; 2 local locations, MDHHS officers, Genesee Co. community action resource dept
MSP GIS: coordinating w. city + county - Mapping filter locations. Pipelines. service entry points at homes, lead service lines to homes. latency time in pipes x lead conc. in water. MSU x data on SES. 4K records - will digitize, push contracted by city to perform.
Capt: Gen Co. Sheriff Dept ~ 50 persons, 4 trucks to distrib. ~ 5K filters "screen or type" to high-risk areas of city
Weber: Gen Co GIS coord w. United Way, Food Bank.
DARD, Brad Deacon: local health dept insp restaurants, DARD local pop + ice machines
Dept Educ, Louis Burgess: drafting message to Gen ISD re: all involved schools. Food centers in many places, inquire w. all who run food program re: water source/use. Incl. pub, private, charters, academies, Educ PIO needed on JIC will be added text to be reviewed by state before distrib. all w. food programs.
MDept Corrections: nothing new, precautions taken since last year? Have messages been sent to state employees who work in Flint (occasional visits) owned/operated cooler/jugged water served since last year. Yes, notify for all state employees; bottled water available (Lisa) MDTMB Jeannette N.
MDEQ George Christian?
Insurance + Financial Svcs: not sure.

tghgt Adult Svcs Steve Setterley? outreach to Tri-Valley? agency on aging to find/seek list of seniors

MSP Ops: Establishing State recovery task force (Joel Pepper, lead) and Recovery branch (Barbara Briggs), w/ MIVOAD, PHHS

MSP logistics - track quantity of water needed, trucks, etc. 2 logistics staff from MSP deployed to local EOC.

Ron PIO: JIC fully operational as of yesterday PM. JIC News Release #1

1-800 line EMD today #

website MI.gov/Flintwater "top level" site.

9am Snyder mtg w. Flint mayor, their media release.

1pm Media roundtable Governor then tour of SEOC, after that.

Capt. SEOC presence this afternoon 1PM onward re: media tour.

Tomorrow: legislative & Congressional calls.

TED? Jeremy Hedger coord w. MSHDA

MEDC? planning services? Tom: Thirtee to be included in State Recovery task force.

Capt. FEMA: 2 liaison officers arriving ~ 3PM (not FCOs, just to assist Capt)

MICIMS activity logs needed from PIO and GIS§. Daily briefing to occur at 9:30 until otherwise advised.

Mike Sobocinski's notes on January 7, 2015 SEOC briefing (9:30am):

Tom Weber: situation report #1 was published. ICS202 to be completed shortly (Capt: that document will be for internal use only). Disaster Recovery Unit is being established within Operations Section.

American Red Cross (phone): coordination of some kind [unclear]

DHHS (Richard Thelen): outreach and education to local health care providers. JIC is operational. Web MD Medscape – available [?extra details unclear]. Distribution of filters and replacement cartridges continues. Two local MDHHS offices and two Genesee County Community Action Resource Department (GCCARD) offices are involved in this. [I looked GCCARD up online to find and verify its correct name; Some other local government office was also named, but I didn't catch it]

MSP GIS section: Coordinating with city and county. Online dissemination of mapped info looks likely soon through a viewer that allows users to browse the information themselves. Currently mapping filter locations. MSU extension socioeconomic data is available for city residents, to represent spatially. Pipelines and service entry points (at homes) are mappable. Lead(ing) service lines to homes are mappable. 44,000 records to be worked on through coordination with University of Michigan Flint campus, to make the information digital (probably contracted by the city to do so). Latency time in pipes correlates with lead concentration in homes, so an analysis could be performed with information on pipe and service line locations/lengths...

Capt. Kelenske: Genesee County Sheriff Department using about 50 persons with trucks to distribute about 5,000 filters (of the "screw-on type") to the high-risk areas of the city.

Tom Weber: Genesee County GIS is coordinating with the area's United Way (and?) Food Bank.

MDARD (Brad Deacon): the local health departments inspect restaurants, while the DARD oversees local pop and ice machines.

MI Dept. of Education (Louis Burgess): Crafting a message to the Genesee Intermediate School District regarding all involved schools, including public, private, charters, academies, which have food centers or food programs. To inquire with all who run these regarding their water sources and use. The text of this message is to be reviewed by the state before its local distribution. The Department of Education PIO is needed in the JIC, and will be called.

MI Dept. of Corrections [person not known]: nothing new; precautions taken since last year, with coolers and jugged water being served. Have messages been sent to state employees who work in Flint, especially a general notification to all state employees so that even those who temporarily go to Flint can be informed regarding water?

MDTMB (Jeannette Doll): notes that bottled water is available at the state offices.

Aging and Adult Services Agency (AASA) (Steve Betterly): Outreach to the (Genesee) Valley Area Office on Aging to find/seek a list of seniors.

MSP Operations section: Establishing a State Recovery Task Force, to be headed by Joel Pepper. Establishing a Recovery Branch, to be headed by Brianna Briggs and to involve MIVOAD, DHHS coordination. Use of available subject matter experts, to include Dr. Eden Wells of DHHS and Dr. Mona Hanna-Attisha.

MSP Logistics section: Tracking quantity of water needed, trucks, etc. Two logistics staff from MSP being deployed to the local EOC.

PIO Ron Leix: JIC fully operational as of yesterday afternoon. JIC News Release #1 completed. An 800 number is to be used, and a top-level web site can be found at www.michigan.gov/flintwater. A 9am meeting is occurring between Governor Snyder and the Flint Mayor [Karen Weaver], with a media session to follow. At 1pm, a media roundtable presentation will occur in the Presentation Room at Collins Road, followed by a tour of the SEOC. Tomorrow, legislative and congressional calls.

Capt K: State agency SEOC physical presence this afternoon from 1pm onward.

[Unknown agency] Jeremy Hedges: coordination with MSHDA, potential to provide planning services? (Tom Weber: MSHDA to be included in the State Recovery Task Force.)

Capt K: FEMA has 2 liaison officers arriving about 3pm. These are not Federal Coordinating Officers (FCOs) but are merely to assist the Captain. MI CIMS activity log entries are needed from the PIO and the GIS section. The daily briefings are to occur at 9:30am until otherwise announced.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/06/2016 08:00:00
Operational Period End:	01/08/2016 17:00:00
Situation Report No.	1
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/06/2016 08:00:00 Wed
SEOC Hours of Operation End:	01/06/2016 17:00:00

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a Local State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a Local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A "public health emergency" was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels that exceeded past seasonal levels were observed in City of Flint children, and were subsequently confirmed by Michigan Department of Health and Human Services (MDHHS) epidemiologists.

To mitigate the effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the MDHHS in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, is addressing water issues in the environmental investigations facilitated to identify lead sources in the environment of affected children, and providing health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff, consolidating data from local sources into comprehensive databases, and providing mapping services that support incident analysis and forecasting. Data and maps will be made available regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, predictive blood lead levels for affected areas, demographics, etc.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

Incident Response/Recovery Priorities/Objectives

1. Activate the State Recovery Task Force
2. Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate subject matter experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.
4. Establish operational period and hours of operations.
5. Investigate and identify available programs for assistance with direct or related impacts.
6. Develop a comprehensive GIS strategy.
7. Identify critical resources for acquisition and allocation.
8. Coordinate response and recovery activities and identify mission areas with MIVOAD.
9. Facilitate and coordinate technical assistance among state agencies and to local agencies.
10. Provide technical assistance and facilitate the local Damage Assessment process.
11. Establish a Joint Information Center and develop a public information strategy.
12. Monitor MI CIMS for resource requests and address as appropriate.
13. Establish and disseminate cost center information for the incident.

Damage Assessment Summary

Agency Summaries

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
MDARD will be reviewing activities in both areas and determine appropriate next steps.
4:15pm update Jan 6th
*Call with Animal Industry Division: they are doing outreach to MI Veterinary Medical Assn; MSU College of Veterinary Medicine, and the MSU Diagnostic Center. They will also talk to Genesee County Animal Control about other animal facilities that may need follow up.
*Call with Food & Dairy Division: we will get addresses of food processing, retail and food service to help create a GIS layer; they will talk with Genesee Co. Health Dept. about restaurants using the existing guidance on water. MDARD did provide the guidance on water to all licensed retail food facilities, including convenience stores.
Food & Drug Administration contacted their regulated facilities in October and found no further action is necessary; USDA-Food Safety Inspection Service is looking into what if any guidance or actions they need to do for meat processors.

American Red Cross (ARC)

The MSP/EMHSD planners asked the American Red Cross to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. We are working on this and calling upon Red Cross colleagues to contribute to it. We've briefed Red Cross Regional and Divisional management on this incident. The Red Cross will provide situational awareness regarding the services related to the water contamination that individual NGOs are providing to Flint residents.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Corrections (MDOC)

Brent Travelbee and Mike Farmer attended the briefing and notified all department personnel working in the affected area. Director Washington will be briefed and any additional actions necessary will be completed.

Environmental Quality (MDEQ)

The Michigan Department of Environmental Quality (DEQ) is staffing the SEOC in response to the Flint Water Crisis. Situational awareness has commenced with all state agencies and briefings will continue to be provided. The Flint Action Plan Coordinator continues to report to the Governor's office on department activities associated with this incident. The DEQ Public Information Officer is fully engaged in the Joint Information Center.

Michigan Housing Development Authority (MSHDA)

The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).
We are exploring CDBG grant funds or other assistance from HUD.

Human Services (MDHS)

Summary for both Health & Human Services
Participated in morning briefing.
Provided update to Executives.
Provided master address list of filter distribution to GIS
Participated in CHECC conference call
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA upgraded to a mandatory department for this incident

Attached is a Point of Contact (POC) List

Attached is a Work Report indicating what work LARA has done today in City of Flint

Michigan Economic Development Corporation (MEDC)

MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing and status of items DTMB is addressing.
Reached out to DTMB Commodities Procurement personnel about available and potential contracts to assist in recovery efforts.

Incident Related Images

Jan. 8, 2016 SEOC briefing 9:30am

Tom Weber starts

MSP Ops: conf call w local jurisdictions. water tests needed. only about 600 done out of 45K homes.

Jackie Hampton Drop off test kit - morning test after water has sat for ≥ 6 hrs.

~~Genesee Co~~ ARC: contacted by County (+ sheriff?) ARC to assist with distribution of resources/needs.

State Office on Aging: requested addresses of Flint Seniors who're receiving services; area service on aging working on Gen. C Health Dept.; local partner, Flint Township on ? switch? system

Tom: GIS to sort through which jurisdictions involved. At least 3 other jurisdictions?

MI Dept Agr. MFFRD: New regulatory requirement could cover water handling info for relevant agencies + establish.

MI Dept Education: Louie Burgess - everyone with approved child nutrition program is being ~~contacted~~ contacted - where water from, how handled, do they have relevant info.

MDEQ: Jen Wolf - more water sampling to occur through collaboration w other agencies. Lots; must be dropped off

Lab Capacity 400 samples/day, 7 days/wk

67% samples so far

HHS Richard Theden: Many resource requests for filters, working on order + delivery.

To assist with food + nutrition. (Improve healthfulness of available foods, short-term

DTMB Jeannette Dole: colocated JIC location found in a Flint state office building.

Toll-free phone line to begin at noon today - there Thursday.

NWS (didn't catch name): Snow 2-4", 15-30mph winds expected over weekend. Cold air mass next 10s or below

Talent + EC Devel/MSHDA: Liz Felz? little new

PIO Ron Leix: preparing transition to Flint JIC. 3pm today meeting w. key PIOs (1st face to face rather than conf call)

4 areas for Pub Info 1. Filters 2. water testing who how when 3. Blood level testing 4. Bottled water - where to obtain

web site, but need to go beyond that to access those not online (seniors, etc)

Media coverage: some good, some bad. Rachel Maddow show.

MSP Logistics: verifying equipment + staff for

2 in local EOC - planning + logistics personnel

Tom: IAP objectives suggestions can be sent to Planc by 1PM

get agency sitreps in by 3:30pm in MICIMS to plg.

Jackie: SEOC will be open tomorrow. 8-5

Capt K: Document re: water distribution. Saturday MUST Update MICIMS with actions being done by staff!! Sunday SEOC TBD time

Mike Sobocinski's notes on January 8, 2015 SEOC briefing (9:30am):

Tom Weber leads meeting, Captain joining later by phone and in person at the end.

MSP Operations (Jaqueline Hampton): Had conference call with local jurisdictions. Water tests are needed. Only about 600 homes have been tested, out of about 45,000. There's a drop-off test kit – samples to be taken in the morning, after the water has sat for at least 6 hours during the night.

American Red Cross: Contacted by county [and?] sheriff, to assist with the distribution of resources/needs.

State Office on Aging: Requested addresses of Flint seniors who are receiving services—the area office on aging is working on that. The Genesee County health department is a local partner. Flint Township is on the water system? (Tom Weber: GIS will sort through which jurisdictions are involved – probably at least 3 other jurisdictions.)

MDARD: A new regulatory requirement is being worked on which would involve water handling information for relevant agencies and establishments.

MI Dept of Education (Louie Burgess): Everyone with an approved child nutrition program is being contacted to learn where water is obtained from, how it's handled, and whether they've received the relevant information about it.

MDEQ (Jennifer Wolf): More water sampling will occur through collaboration with other agencies. Kits must be dropped off at homes, due to 6 hour requirement [see MSP Operations reference at top]. MDEQ lab capacity involves the handling of up to 400 samples per day, 7 days per week. Only about 670 samples processed so far.

MDHHS (Richard Thelen): Have received many resource requests for filters. Working on orders and delivery arrangements. Also, to assist with food and nutrition, improving the healthfulness of foods that are available in the short-term.

MDTMB (Jeannette Doll): A co-located JIC location has been found within a Flint state office building. A toll-free phone line is to begin operation at noon today, both at the new JIC and in Lansing.

NWS [didn't catch his name]: Anticipating some snowfall, perhaps from 2 to 4 inches, with winds from 15 to 30 miles per hour expected over this weekend. Much of next week, we'll have cold air, with daily high temperatures in the 20s or below.

PIO (Ron Leix): Preparing for the transition to the Flint JIC. At 3pm today there will be a meeting of the key PIOs—the first face-to-face meeting rather than through a conference call. There are 4 major topics for public information: (1) Water filters, (2) Water testing, (3) Blood lead level testing, (4) Bottled water. Explanations of who, how, when, why, where are being provided. The web site is good, but we need to go beyond that to access those who are not online (e.g. seniors). Media coverage: some has been good, some bad. The Rachel Maddox show focused on various issues.

staff who might stay in Flint. Some have made own arrangements, but she can help re: overnight lodging,

PIO (Nicole ?): Flyer sent to MDTMB. Spanish version [illegible] completion. [illegible]

(Public Info Officer) 230 County Office Bldg media briefing in Flint. News release going out today. Gov, Cap't Miller, director Video PSA arranged for comcast (30 secs) similar to radio PSAs (no HHS work) broadcast soon. speaking, + more

MSP Logistics (Michele Kuzera): Verifying equipment and staff for on-site Flint activity. Two MSP staff are in the local EOC, representing planning and logistics.

Plg Sec: 330 sit reps + summaries submission deadline; 4pm afternoon agency briefing.

Tom Weber: Incident Action Plan objectives can have suggestions submitted to the Planning Group Chief by 1pm. Agency situation reports should be submitted by 3:30pm in MI CIMS and/or to the Planning Section.

Emg K: Replacement staffing underway. Okay to not overwork (time off as needed) although official leave time limited

MSP Ops (Jackie Hampton): The SEOC will be open tomorrow (Saturday) from 8a to 5p.

Capt. Kelenske: He'll be obtaining an important requested document on the subject of water distribution. Staff must update MI CIMS with an ongoing log of their activities. Sunday operation of the SEOC will be determined in the future.

Jan. 11, 2016

Tom Weber reads list of objectives. (IAP) State agency briefing every afternoon now. (SEOC to be open Sat + Sun)

Jackie Hampton: Stay focused on 204's and critical tasks. SEC speaks stand while presenting info.

NWS (Jim ?): Next 48 hrs: 12-15 partly sunny light snow but 8PM onward - snow coming in with winds 2-3" in Flint area 5PM → tomorrow 8PM. T in the teens, blowing snow — need to keep roads clear. Hazardous travel. Cold. Windch <0°F. Frostbite within 1/2 hr exposed skin.

then, Wed pm - FRI occasional light snow, continued cold.

DHHS (Jennifer ?): CHECC partial activation. SMEs to be brought in as needed.

MDARD (Justin Henderson): refers to yesterday's update (no change) - [as if everyone was here yesterday]

MDEQ (Jen Wolf): coord w. lab on test bottles, kits, instruction sheets. TMB, MDARD city // HHS; Seek appropriate dispersion of bottles, to match needs,

MHHS (Richard Thelen): Things proceeding. Setting up for [illegible] tracking at (?) room [site?]. Setting Some Dotting ETAs on all orders, numbers on filters. Have info to GIS for processing;

(missed one yesterday, before Civil Rights)

Civil Rights - withdrawn new

RC: staffed distrib sites at 5 fire stations, 9 churches, helped organize more. (water filters) need larger sites

Nutrition (Steve): pulling senior address list together (those at higher risk). Explore role for nutrition network, [illegible] Ed feeds children. Need: better "food desert" concern

ISP (Matt Bolger): tomorrow walking tour, tablets useful rather than paper form. training re: nutritional needs (Jackie + DHHS also on it)

TMB (Jeannette Bell): cards printed for Gov conference (11? am), Trucks going to Flint, all week transport was arranged. Parking improvements being organized

every branch (Brianna Briggs) - working thru MSP Amy Dehner, going to Flint to provide info, attend trainings, Contact lists being made for teams in Flint. Will coord w. JIC + PIO.

TED (Hoey? Martin family): missed brief statement Local EOC, Mark Forhan ??) didn't catch brief info, speak MSP Logistics (? didn't stand), 4 new churches assisting/label new requests

one other agencies MDOT, etc not updated now.

Mike Sobocinski's notes on January 11, 2015 SEOC briefing (9:30am):

MSP Planning Section Chief Tom Weber leads the meeting, reads list of objectives from IAP. A state agency briefing is occurring every afternoon now. The SEOC was open on both Saturday and Sunday this past weekend.

MSP EMHSD Jackie Hampton: Agencies need to stay focused on completing form 204 and their critical tasks. Those who are speaking in the SEOC should now stand to present their information into the microphone.

National Weather Service (Jim [redacted]): During the next 48 hours will get challenging. Fairly tame light snow right now, but from 8pm onward there will be more snow coming in with winds. About 2 to 3 inches are expected in the Flint area from 5pm today to 8pm tomorrow evening. The expected temperatures will be in the teens. Blowing snow will mean that it will be hard to keep roads clear, creating hazardous travel conditions. Temperatures will be cold and will result in wind chill factors below 0 degrees F. Frostbite would be expected on skin exposed for times less than ½ hour. From Wednesday to Friday, only occasional light snow is expected, but the cold temperatures will continue.

MDHHS (Jennifer [redacted]): The CHECC has been opened, with a partial activation. Subject matter experts will be brought in as needed.

MDARD (Justin Henderson): He refers to yesterday's update [as if everyone was here yesterday], and no change to that update. [Several other agencies simply reported no significant change, or didn't mention anything that sounded specific and important enough for me to include here. Some phone-in agencies might have been too brief or garbled to be included.]

MDEQ (Jen Wolf): Coordination between their lab and various other agencies (city of Flint, DTMB, MDARD, DHHS, etc.) on test bottles, kits, and instruction sheets. Seeking appropriate dispersion of bottles within Flint, to match actual local needs (rather than too many at locations whose needs are not as great as others').

MDHHS (Richard Thelen): Things are proceeding on track. Setting up for 1pm training at [site?]. Getting arrival time estimates on all orders, establishing filter quantities, gave some info to GIS for processing.

American Red Cross: Has staffed distribution sites at 5 fire stations, 9 churches, and helped to organize more (for water and filter distribution). Some larger sites are needed.

Adult Services (Steve [redacted]): Pulling together the list of addresses for Flint seniors who are at higher risk. Exploring the role that could be played by their nutrition network, in response to a "food desert" concern that was raised. The Department of Education feeds children. Better framing is needed for nutritional needs issues. (Jackie: DHHS is working on it.) [My comment: In my experience, the 'food desert' concept was completely overblown, applying an exaggerated name and limited definitions that failed to recognize the true variety and accessibility of foods through various transportation options and exaggerating the low quality of food that is readily available locally, fixating upon particular ideas of raw fruits and vegetables while downplaying the substitutability of frozen vegetables, packaged mixes, etc.

But this is actually the topic that Kari Day had researched for her master's degree, and so we should make use of her expertise on this, if she's interested. I mentioned this to her as she was leaving for Flint and she did say that she's interested in coordinating and providing her expertise on the topic. My own views are merely rooted in theoretical and methodological skepticism, and my own experiences, but she is the one who's done actual research on the subject in Detroit and although she might agree with some of my critiques, I might be off-base in others and certainly don't have her experience in researching the topic. There are legends circulating widely on this topic, typically involving a mythical Detroit grocer selling bad apples for $7 each, and I've pointed out at meetings that such a concept doesn't make any economic sense for a store owner, and that it makes no sense to dismiss the availability of cheap but nutritious frozen vegetables and decently fresh ingredients which are available at places like Subway – but the sole emphasis upon gardens and raw produce grocers, and the offhand dismissal of everything that certain researchers have labeled as "fast food" has horribly overstated the "problem" in most areas. At some point, these debates could be resolvable through actual data. Much of my own criticism stems from personal experience at finding nutritious foods while living in poverty for a couple of years without a car in the middle of Lansing. Although Lansing is obviously not a worst-case scenario, certain principles still apply elsewhere. If transportation available through bus routes, those who can use the bus usually have access to major grocery stores. For those who don't want to take a bus, various substitutes can be found which aren't considered in the dubious research designs I've seen on the subject. For those who are simply stuck at home, it might not matter if they have a garden and store one block away, since immobility is immobility.]

MSP (Matt Bolger): Tomorrow, there will be a walking tour in Flint. Electronic tablets would be useful for data entry, rather than the traditional paper forms.

MDTMB (Jeannette Doll): Cards have been printed for the Governor's conference this morning. Trucks are going to Flint, with transport arranged for all this week. Parking improvements are being organized.

Recovery Branch (Brianna Briggs): Working through MSP (Amy Dehner?) and going to Flint to provide information, attend training session. Contact lists are being made for teams in Flint. Will coordinate with the JIC and PIO.

SEOC Logistics (? [person didn't stand]): Four new churches will serve as distribution points. People should specifically label new requests as such when entering/sending the info in. Do not use the Resource Tracking Board (in MI CIMS) to send notes to oneself.

SEOC Finance (Penny Burger): A hotel is set up for direct billing in the Flint area – unsure how many are traveling there. Would like lists of staff who might stay in Flint, to ensure that a room is available there. Some have made their own arrangements, which could be okay, but Finance can help with overnight lodging.

PIO (Nicole ?): Flyer was sent to MDTMB. A Spanish version is being completed. 2:30pm County Office Building media briefing will take place in Flint. News release for that is going out today. Governor Snyder, Capt. Kelenske, and the MDEQ director are speaking, plus others. Video public service

announcement being arranged for Comcast Cable (30 seconds long), similar to radio PSAs—MDHHS worked on these, being broadcast soon.

SEOC Planning: 3:30 agency situation reports and summaries submission deadline. 4pm afternoon agency briefing will occur.

Tony Katarsky: Replacement staffing is underway. It's okay to not overwork, to take time off as needed, although the official leave time may feel limited at this time.

Capt: all state agency resources brought to bear. Any resistance can be overcome thru SEOC authority
Any state employee can go door to door. But logistics do need to be sorted through.
ASL Team (Brianne Briggs) presented info there + answered Qs. 2 hits given out in some cases (e.g. when concerns w/ filtered water)
Local volunteers are many. If state agencies need to contribute staff, they'll be notified.

PIO (Nicole): stressing the use of filters (announce @ 6pm last night) as the most efficient, EFFective way to secure water. backed by Eden Wells,
Warehousing + inventory mgt system being keyed for inventory system.
Parking issue re: media, but teams getting out in field (not to be distracted by media). Teams are not to engage w/ media - just to do their All media to be referred to PIOs and JIC
Gov office sending daily emails to Flint.
use filters, teams going door to door.
2-1-1 available | PSA video made, website avail, wkg with Comcast to show PSA + filter instructions on on access channel
Billboards going up in Flint re: 211 + web. Mail cards going out. Wkg on Arabic translation for cards.
Getting info on churches to participate - by the weekend?
Inquiries on Pb issues in other areas of the state. City + Co PIOs in JIC. important to have
Qs need on how corporations can donate.
2-1-1 rumors: if Pb in bottled water "quelched"
Some calls to FEMA Natl HQ. Deb NAACP.

Capt: 211 very important. Verify staffing + system there.

ASL (Deaf Pkg (Amanda Bresler)): Updating 204 form. To improve local tracking sheet for resources at fire stations,

Local EOC: Volunteers needed at both warehouses. Don't refer to warehouse as "diplomat".
(Mark Duchaven ?)
Capt: give it a generic name, not even DHHS warehouse.
Focus on what we can do. (And remember to take a breath + step back.)
The smallest slip will be portrayed as a significant event.

Next update 4pm at the latest; may occur sooner.

Jan 12, 2016

2nd tactical meeting

6pm Sit reports due SEOC going until 8

~~Executive~~ IAP goals need

Nat'l WS: Jim Askill? Contacted Genesee Co. EOC added her to list of contacts. "Sloppy" outside today, off + on lake eff snow, Spots Might see snow all day Snow, low temp, wind. Treacherous travel. 15-30 min at frostbite, ~2" accum

On/off snow tomorrow day + night, 1" or less. After next few days might warm up a bit after

Shortages to be addressed - filters + ~~test~~ kits today if ops

Warehouse being opened today. Need equipment at DHHS site (loader, etc) stock on/off wheels. 9600 cases of water/day. Need separate pallets

? Geared to eventually be used for staging only; when more space found. short + long term storage

HHS (Jennifer) Rebel 2 activation. Processing request for warehouse facility. Must sort through

Distributing guidelines message info. Volunteer information + organization - availability of vets)

Dept of Ag + Food (MSHN) (updated guidance dec re: food svc estab being approved thru JIC

Animal shelters, etc. being worked on. Info going out to vets in Flint.

Coord w. Genesee Co health dept, Gen Co animal control (reading off their list of actions)

LARA Work w. DTMB? plumbing chief? en route. Home based day care ctrs list avail.

DEQ Jen Wolff, NSF links online for approved filters. 10K water test bottles on order.

Coord w. ARC, More supplies ordered - another 10K, want at least 2K on hand always, at warehouse

Capt: Make sure Fire Stations have what they need. That's the part that is farther from direct control.

Hum Svcs: Logistics of coord (ARC, etc), ETA truck load from Home Depot, etc better to have truck location than an ETA

(?) ~700 water servings obtained, something in delivery

ARC (Paul Gotter?) trying to decrease staffing; possible to reduce hours (stop at 7?) - hard for volunteers (currently 9 to 9 + staying so) in ctr

some Warehouse teams established. Tomorrow: Volunteer reception ~~hours~~ Center opening

DHHS (Linda) teams prepping for distrib but main focus now is to procure filters

Public Health (Mark) ~15K Spanish, 30K English palm cards, will deliver to Our Lady Guadelupe Ctr, hispanic ctr

Capt must deliver broadly to all at once to not

Area Agency on Aging (?) delivering to 1400 addressed seniors - meals, care managers, wkg w. Flint/Valley Area Agencies on Aging clients information from various senior agencies.

Distrust of filters done, seniors requesting water.

Capt: broaden messaging JIC build trust in filter

State embedment board to check on nursing homes - reduce use of bottled water there

Jackie: able to test filtered water? Build confidence

JIC (Nicole) Haven't heard this. Info on testing filtered water? → DEQ Jen: true - all samples rec'd are being tested

USP (?) Truck shipments, tracking on map, 3 more trucks requested, comparing deployment with shipping

not being turned back although lab doesn't want to ask for samples of filtered water

DMVA (Chad Kendall?) researching resources available to fill requests.

DTMB (Jeanette Bell): Reached out to Meijer's; checking Amazon

3 trucks w drivers to arrive tomorrow

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since May 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as *Shelley versus Kraemer* (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to the dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,143	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	444,341	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.2%	52.6%	43.5%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an emergency manager was assigned by the governor (in 2011), providing greater authority to sort through the many challenges and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. Flint falls into the category of city that has been called a "legacy city" (See *Rebuilding America's Legacy Cities*, edited by Alan Mallach in 2012 and published by American Assembly, Columbia University), caught in the problems of transitioning from its historic mid-20th Century manufacturing base into new roles for 21st Century health and success. It has been caught in a long-term trap of an aging infrastructure combined with dwindling municipal revenues. And although there are opportunities available by which the city might successfully make that transition, its current problems must first be overcome. (Mallach xi, 180-183) In order to offset mismatches between a central legacy city and the disproportionate wealth of the surrounding areas it serves, various planners and urban policy experts (e.g. Norman Krumholz, Myron Oldfield, John Rusk) have found that various forms of revenue sharing may be justified, greater integrating the central districts with the overall metropolitan area whose health is mutually intertwined, or finding ways to fund the health of essential central sections and infrastructure within existing political and organizational structures, networks, and capacities. Cities are legally "creatures of the state" and thus subject to the effects of state policy. Where past policies had resulted in an accumulation of fiscal

problems for central cities, new policies have the potential to help solve these same problems in the long-term. But first, the immediate threats to health for nearly 100,000 permanent city residents, plus tens of thousands of non-residents who make daily use of the city's resources, services, and amenities, must be corrected. The importance of the problems of aging city infrastructure has become clear, but the first step is to protect the health of the area's residents, as longer-term solutions continue to be developed with a keener awareness of the relationship between the health of each central city, and the quality of life for each broader metropolitan area and the state as a whole. A successful response to the current emergency will also help to inform the handling of similar challenges that might occur in other legacy cities, with this one crisis potentially providing the urgency and will to address related problems in other locations, lessening the potential for their infrastructure to produce a similar emergency-level situation.

The city's poverty rate is 2.67 times higher than the national poverty rate, and the city's median household income is less than half of that for the nation as a whole. Average unemployment rates within the city were nearly three times the national rates. A disproportionate number of the city's residents have disabilities (functional needs). Although the percentage of elderly residents is slightly below average, the opposite is true for the percentage of young children under age 5, and it is this age category that is most vulnerable to the effects of lead exposure. The percentage of children under 5 is higher in Flint than the respective percentages for Genesee County, the State of Michigan, and the United States as a whole. (Refer to the following table.)

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

Data Sources
U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

NOTE: The general direction I had started with my draft text was to historically frame this situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Benton Harbor, Pontiac, etc. where huge population losses occurred primarily within the central city, while overall urban area growth continued and resulted in resource splits. Naturally, these references, deriving from a theoretical urban planning perspective, will need to be reviewed for their political feasibility.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982, also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits."

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this emergency:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with

Section 401 of the Stafford Act. On that same date, under my authority as Governor, I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro Detroit flood disaster request letter.
"I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively."

(Provide the disaster history of the State over the past 12 months... List areas that have sustained damage from this event and other disasters in the previous 12 months, and include any other pertinent factors that would have a bearing upon the State's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.)

(If Individual Assistance is being requested, provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations [children under 5]. Include a comparison of the percentage of the state and local government averages and national averages. Indicate source of data cited.) NOTE: This data is provided in Attachment 1.

(If Public Assistance is being requested, provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include a discussion of significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita. Discuss the level of insurance coverage.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf."

Sincerely,

Rick Snyder
Governor

Attachments and Enclosures:

Attachment 1: Demographic Profile of the Affected Counties and Selected Local Municipalities
Attachment 2: Significant State and Local Response and Recovery Actions
Attachment 3: Supporting Maps, Charts, and Photographs

Office of Management and Budget Form No. 1660-0009
Enclosure A: Estimated Requirements for Individual Assistance under the Stafford Act
Enclosure B: Estimated Requirements for Public Assistance under the Stafford Act
Enclosure C: Estimated Requirements for Other Federal Agency Programs
Enclosure D: (Not Applicable to this Request)

Mike Sobocinski's notes on January 12, 2015 SEOC briefing (9:30am):

MSP Resouce unit (acting planning chief?) Amanda Bresler: Reading IAP objectives. SEOC hours will go until 8pm, so 6pm agency situation reports are due. 2pm tactics meeting scheduled.

National Weather Service (Jim Askill?): Contacted Genesee County EOC and added them to the list of NWS contacts. Today's weather is "sloppy," with "off and on" lake effect snow. Some spots might see snow all day, other spots might not see much. Various bands produce spotty effects locally. Today, snow, low temperatures, and winds produce treacherous travel. Frostbite sets in within 15 to 30 minutes on exposed skin. About 1 to 2 inches of snow accumulation will be seen today, then "off and on" snow tomorrow during both day and night—one inch or less. After the next few days it should warm up a bit (to the freezing point?).

MSP SEOC Operations section (Jackie Hampton): Identified shortages need to be addressed: water filters and test kits. Another warehouse is being opened today. Need equipment at DHHS site (loaders, etc.) to move resources on/off vehicles. 9600 cases of water per day are being handled, so space is needed to stockpile that. GCARD (?) to eventually be used for staging only, when more space has been found.

DHHS (Jennifer ??): Currently at a level 2 activation. Processing the request for a warehouse facility. Must sort through the short and long-term storage needs. Distributing guidelines/message information. Also dealing with volunteer information (and organization – the availability of volunteers).

MDARD (Kay Fritz?): Updated guidance document re: food service establishments, and the document is being approved through the JIC. Animal shelters and related tasks are being worked on. Information is going out to veterinarians in Flint. Coordination occurring with Genesee County Health Department and Genesee County animal control. (She quickly reads off their list of actions.)

MDLARA (unknown person?): Doing work with ?plumbing chief? En route. [Didn't catch information clearly] A list of home-based day care centers is available.

MDEQ (Jen Wolf): Refers to online links for approved water filters. 10,000 water test bottles are on order. Coordination with American Red Cross. More supplied ordered – another 10,000 water test bottles. Would like to always have at least 2,000 on hand, at the warehouse.

Capt. Kelenske: Make sure that the fire stations have what they need. That's the area that is farther from direct control (i.e. outside of state framework).

MDHHS (unknown speaker?): Logistics of coordinating with American Red Cross, etc. Given 10am ETA on truck with provisions from/to? Home Depot? retail outlets. But it's more useful to be given a current location of the truck, rather than an ETA. About 700 (something – individual bottled water servings, I think?) were obtained and are being delivered.

American Red Cross (Paul Spotter?): Trying to increase staffing. Is it possible to reduce hours (stopping at 7pm) to accommodate the difficulty for volunteers during the cold weather? (Capt. Kelenske: Current

hours are 9am to 9pm, and will remain so.) Some warehouse teams have been established. Tomorrow, a volunteer reception center is opening.

MDHHS (Brian [redacted]): Teams are preparing for distribution activities, but the main current focus is on the procurement of water filters.

MI Dept. Of Civil Rights (Mark [redacted]): About 15,000 Spanish-language and 30,000 English-language palm cards exist. Would like to arrange deliveries to Our Lady of Guadelupe Church and to the Hispanic center. (Capt. Kelenske: Must deliver broadly to all faith based places at once rather than just to one or two specific ones.)

Office of Services on Aging ([redacted]): Delivery to 1400 addresses with seniors – meals, care management services. Working with the Genesee and Valley Area agencies on aging. Care management clients information obtainable from various senior agencies. Becoming aware of a citizen distrust of filters alone, with seniors requesting water in addition. State and local ombudsmen checking on nursing homes to verify the use of bottled water there—these facilities are all mapped in GIS, so the info is available. (Capt. Kelenske: Must broaden messaging to build trust in filters. Jackie Hampton: Are be able to test filtered water, to build that confidence? Jen Wolf DEQ: All samples received are being tested, so filtered water samples won't be turned back, but the lab doesn't want to ask for samples of filtered water. Nicole Lisabeth PIO: hadn't heard about testing filtered water – official info should be distributed if it's to be done.)

MSP ([redacted] in SEOC): Truck shipments, tracking on map, three or more trucks requested. Comparing deployment with supply.

MDMVA (Chad Randall[redacted]): Researching the resources available to fill requests.

MDTMB (Jeannette Doll): Reached out to Meijer, found that they'd already been shifting their filter supply toward their Flint stores. Checking into Amazon as another source. Three trucks with drives are to arrive tomorrow. A 50' trailer is to be procured. (Jackie Hampton: drivers needed 7a to 10p). Emergency can allow extension of the normal 14 hour limit that drivers can be on the road. About 30,000 palm cards being printed.

Capt. Kelenske: All state agency resources are available and can be brought to bear. Any resistance can be overcome through authorities of/in the SEOC. For example, "any" state employee can go door-to-door [i.e. minus those with physical/health limitations]. But logistics do need to be sorted through.

MSP ([staging?]) Team (Brianna Briggs): Presented info in Flint and answered questions. Two kits were given out in some cases instead of just one (per household), when concerns were brought up about filtered water quality. Local volunteers are many. If state agencies do need to eventually contribute more staff, they'll be notified.

PIO (Nicole Lisabeth): Currently stressing the use of filters as the most efficient way to secure good drinking water for each household, long-term. Backed by Dr. Eden Wells in this—announced at about 6pm last night. A warehousing and inventory management system ([is being used? is needed?]) for an

inventory system. There's a parking issue re: media, but teams are getting out in the field, with instructions not to be delayed/distracted by media inquiries or activities. Teams are not to engage with media, but just to focus squarely upon their assigned tasks. All media are to be referred to the PIOs and the JIC. (Capt. Kelenske: A standard statement to this effect is to be used by workers—not even a "no comment" response, but that all media requests are to go through the PIO/JIC.) The Governor's office is sending daily emails to Flint, advising to use water filters, and that teams are going door-to-door. 2-1-1 is available to call there, a public service announcement (PSA) video has been made, a website is available. Working with Comcast to show the PSA video and to place filter instructions on a public access channel there. Billboards are going up in Flint to inform about the availability of 2-1-1 and of the website. Mailed cards are going out. Working on an Arabic translation for information cards. Getting information on churches to participate—by the weekend? Inquiries obtained regarding any Pb issues in other areas of the state. It's important to have city and county PIOs in the JIC. Some 2-1-1 rumors of lead in bottled water were dismissed/discouraged. Some calls were reported as being made to the FEMA national headquarters, involving concerned agencies such as the NAACP. Questions were also received on how corporations can make donations. (Capt. Kelenske: 2-1-1 is very important. Verify the staffing and system in place there; minimize chance of a shortfall.)

MSP Planning (Amanda Bresler): Updating the 204 form. Working to improve the local tracking sheet for resources at Flint area fire stations.

Local EOC (Mark DuCharme): Volunteers are needed at both warehouses. Don't refer to the new warehouse as "Diplomat" – because there is an existing business it may be confused with.

Capt. Kelenske: Give that warehouse a generic name, not even "DHHS warehouse." Overall, fine job so far. Focus on what we can do, and remember to take a breath or to step back occasionally so that there aren't problems with stress interfering. The smallest detected slip will be portrayed as a significant news event. The next state agency update will be at 4pm at the latest – might occur sooner.

11

Mike Sobocinski's notes on January 13, 2015 SEOC briefing (9:30am):

MSP SEOC Planning chief (Amanda Bresler): leads the meeting: Agency situation reports are due by 6pm. A new IAP is available. Agencies need to update their "204 forms" throughout the day.

National Weather Service (Jim Askill?): Still cautioning about the potential for frostbite in 30 minutes or less (for exposed skin outdoors). Tomorrow's temperatures are expected to rise to about the freezing point (32 degrees F). Possible light rain on Friday could cause icy roads. The weekend will be a little colder, with occasional snow.

MDHHS (?): CHECC is working on a nutritional plan with other agencies. The plan could address education, short-range and long-range goals, and the mitigation of lead vulnerabilities, perhaps working with a farmer's market. Reference to Flint as a "food desert" and to perhaps open a decent grocery store there. A potential lead impact document has been submitted to planning. Currently considering mental health impacts and resources. Following up with local health departments to determine their staff and support needs.

MDARD (Brad Deacon): A document was approved: Requirements for Licensed Food Establishments using City of Flint Water.

MDLARA (?): Coordinating with MDEQ. MIOSHA scientists are to help with residential water testing.

MDEQ (Jen Wolf): Extra staff are in Flint today to help with kits. A field observer is helping to organize and plan for the transport of kits to the lab. Helping with the request for a presidential declaration.

Human Services (DHHS?) (Rich ?): Reports "zero filtration products" at the fire stations as "Good job!" [Unclear to me exactly what and why he is reporting as good.] Regarding trucks, information is needed about the quantities on them, being distributed.

American Red Cross (Paul Spata): Five fire stations are staffed for resource distribution. [something] management team for GCCARD (Genesee County Community Action Resource Department). Began [?? just the start of ARC involvement, does he mean?] assembling water testing kits. Volunteer reception center is active today. "Lauren" [who??] was brought in for logistics planning in the SEOC.

MDHHS (Brian Wilson): Staff volunteers are on site to help with distribution.

[also MDHHS?] (Steve Federly): Valley Aging is "extracting" data on seniors for use by GIS.

Michigan State Police (?): Teams are out now, matched with sheriff personnel. G-event channels were set up on 800 MHz radio: 9 is the primary and 10 is the secondary channel.

Michigan Department of Corrections (Brent Travelbee): Teams are in the area, assisting. A 50' truck was delivered to the food bank. Local shuttle bus will start tomorrow in the area, able to take about 20 persons at a time to obtain resources.

Michigan National Guard (Chad Randall): Some soldiers are to help at distribution points. Just one per location. MING leaders meeting with Flint mayor today.

MDTMB (Jeannette Doll): There is [some sort of unclear] issue with the Court Street warehouse...something which sounded like it involved its seller having a $2 million liability on it. Might need a food-grade warehouse [not sure whether I heard this phrase correctly]. Working on resource requests and replacement cartridges and water.

MSP SEOC Logistics (Penny Burger): Every agency remember to update past assignments and resource requests in MI CIMS. There's been a request for a budget projection of total costs for this year, which would be hard to do more than just guess at right now.

Recovery Team (Brianna Briggs): "Water Resource Teams" are in the field—that is their official name and is to be used. Could place and maintain an extra 15 teams in the field (Friday). Working with Red Cross to assemble real-time data from "pods" at the fire stations.

PIO/JIC (Nicole Lisabeth): Set up [something; could not make it out]. Good media reports at 11pm last night. Monitoring media and clarifying the role of the MI National Guard, who are at resource sites, not going door to door. Red Cross is dealing with distracting media personnel at water distribution sites. Flint's bus system is now including water resource sites on its routes. Arabic-language information card is proceeding ahead, and logo/branding of water resource teams is being worked on. There was some sort of Legionnaire's Disease report in the media today, according to MDHHS.

MSP SEOC Planning section (Amada Bresler): Resource list to integrate with fire stations and local EOC info. The next briefing is at 4pm today.

4PM SEOC briefing, January 13, 2016

Briefing | Sit reps due to 6pm. "Tomorrow is a planning day." Be sure to update 204 tactics, esp pods, farms warehouse.

Health + EMS Branch – MDHHS Comm Hlth (Kathy Wall): wkg on nutritional plan w. several of the agencies
Lori Sangster? Lead on nutritional plan. Disaster behavioral health coord w. CHECC exploring options
checking w. PTAC at SVSUSA (?)
targeted to Stafford Act (Capt: qualifies under emerg as well as DR?)

Some wording changes suggested for factsheet,

MDARD (Brad): Mailing out food establ. requests ~800 of them.

MDEQ (Jon Wolf): Conversation about budgeting more hlth people into (local) EOC,

M [illegible] 2 of 5 trucks w. filters (10/30 (+ 2 other numbers)) are at GCCARD

ARC (Paul Spata): staffing fire station pts of distrib, further coord w. MING on staffing
Volunteer reception set up today. Numbers to be reported in sit rep.
Fielding request to feed to field response teams

MHS (Brian Wilson): their volunteers still in fields. Concerns w iPad fm in cold - better.
awaiting confirmation of replenished stock

? (Steve Bettely): Valley AAA fielding calls, something fell apart re: schedule of water/filter deliveries,
Need to get in touch w. Local EOC re this.
(Brian: Probably fixed last night)
(Capt at Local EOC confirms follow up to Dave Mitchkuyera)

pt: Any More personnel needed to [illegible] by Sheriff's Dept for deliveries? A: Being handled okay by locals so far.
Capt: consider replacing w. health + social staff to free up sheriff personnel for their normal work
(Services for Aging)
(Steve?) off duty teams avail to help w. distrib.

MSP: wkg w. MDOT for shuttle vans, working w. Pub Affairs re: state agency volunteers for weekend

MING (Col. Reynolds) – 1 full time staff at each of the 5 pods. Fed gov will resume handing out water at pods.
800 MHz channel. They needed 33 volunteers obtained 48. (Capt Any feedback on MING soldier presence? Not [illegible])

MDTMB (Jc Doll): warehouse located another site ARC + Wendy Galbreath checking out to replace other site that had problems (court St. school district etc). Stuff to be moved from old to new site.
Based on truck loads: will maintain 8 truck loads per day thru Sat Avail. (can too if needed. (incentive)
117K filters coming in and 39K faucet (bowtie) (faucets) ?
Tablets coming tonight to EOC for GIS app download – to Flint after
Loads to Flint.
(Capt: 80K sq ft full + [illegible] trucks being loaded [illegible] clear out by ?)
Dock #1 by phone
15 trucks waiting,
(Capt: must offload somewhere + not wait)
only 1 loading dock at each facil. Court St won't work.

Local EOC (?): Info entry + radio seems good – only supply on road must be cleared up

MSP Logistics (Penny Hyger): working on trailers + vehicles from Corrections for door to door campaign. Coord w MSP for the Veterans

Finance analysts being finished up. to be reviewed 1st by ?

Planning : progress on tracking Inventory. SitReps due 6pm ~~state~~

Recovery (Kristie Davis): some numbers may not be in yet (paper vs. forms iPads)
374 homes yesterday 377 today or more but fewer vacant homes today
Within new ABC this week for teams Monday is holiday.

(Capt: community reaction? No info yet.)

JIC/PIO (Shannon Banner?): Media hotline increased calls, not overloaded. Some Qs need answers from SEOC.
Good collaboration b/w 2-1-1, CO, State agencies PIO, could use local PIO today.
1130-1230 F. Staff 3 media briefing - very good media turnout, positive.
Waiting for logo approval (local + CO) for response team.
Capt: How is 211 doing - monitored for success, staffing, etc.

JIC/PIO (Nicole Wisabeth): 2-11 going well

(phone discussion Legislatives
Capt: DHHS will handle those Qs but not through SEOC or local EOC - three other channels: Separate issue?

Cleanup

Brianna
Next call tomorrow 9:30a

To: Weber, Thomas (MSP)
Subject: "food desert"

I collected a bit of data and just did some discussion about the conflicting definitions of "food desert." I understand the consideration given in recent years to the concept of "food deserts" but so far I do not see much evidence that any part of Flint should probably qualify as having that problem. It's good that people are concerned, but I think their concerns should reflect realistic challenges and mainstream preferences, rather than idealistic ones proffered by a particular subset of researchers.

Some of the main issues include:

1. A homebound person by definition will not be able to readily access a good food grocery source even if it is located right next door to them (this is a disabililty/mobility limitation issue, not a supply or "desert" issue).
2. Unrealistic definitions which place too much emphasis upon middle class preferences for particular types of fresh produce stands, and don't accept the viability of other sources of the same nutrients (e.g. frozen vegetables, satisfying ethnic dishes rather than just traditional American "tossed salad" ingredients).
3. A narrow focus upon particular definitions of "walkability" that often does not take into account the transit system. Too many researchers presume that someone without a car is simply stuck—not considering the use of buses or getting rides from friends and family. Each public bus route in Flint (see map below) provides access to the downtown bus service center, which is near the farmer's market (for those who want/require fresh produce of a certain type). One of our viable response options could be to provide bus passes to those who don't otherwise have decent transportation options in the city. The question should therefore shift to figuring out whether in-need persons live within a certain range of transit stops, or whether they are adequately served by shuttles, meals on wheels, etc, rather than whether there is a qualifying grocer within a walkable radius of every home.
4. A blanket categorical dismissal of certain kinds of food sources as either nutritionally inadequate (e.g. so-called "fast food," as if it's all the same and all unsuitable), or overpriced (i.e. as if *all* restaurants are necessarily a form of luxury spending that would be of no interest to persons of low income).

From my own first-hand experiences living in poverty in Lansing with no car, I find that most persons in Michigan cities who want a nutritionally balanced diet have ways of satisfying it. Ways which many researchers apparently could not think of. One of the real complications in any case (whether walking to a nearby food market or taking a bus to Meijer) concerns crime and people's fear of it, which realistically forms a separate issue.

In my experience, the correct approach to exploring the topic is not to seek to define places as being a "food desert," but to realistically assess what challenges each resident might face when obtaining food for a healthy diet. Those who own and can use their cars will not have much of a problem accessing whatever foods are in the whole urban area. Those who have friends/relatives with cars might not have much of a problem, either. Those who are homebound clearly would need help, but this would be true regardless of whether they're in a "food desert" or not. Those who don't have the use of a car should be assessed as to whether they have viable access to transit. In the city of Flint, there appears to be pretty good bus route coverage. There are also a lot of restaurants and small groceries. Not all groceries are necessarily carry a full array of food types, of course, but their quality should not be pre-judged (by researchers or by formulas) as "bad" merely due to their relatively small size (or by their sales of tobacco and alcohol – after all, huge places like Meijer also have huge alcohol sections). Some restaurants are certainly overpriced, but again not all restaurants should be presumed to be completely unaffordable to the poor. After all, this is why places like McDonald's and Wendy's have "value" or "dollar menus" – these cost more than they would at Meijer, but are frequently used by patrons with very tight budgets. And even though these places do offer a lot of high-fat, high-sodium foods, it doesn't mean that someone who actually seeks a balanced diet can't find any decent food there. McDonald's discount menu,

for example, offers a side salad and a fruit yogurt cup. Plain baked potatoes, chili, etc. are quite affordable at Wendy's. A Subway vegetarian sub is pretty wholesome stuff. Yet, strict researcher definitions have confused overall consumer preferences with the "unavailability" of nutritional food, and many "food desert" studies have dismissed viable nearby food options out-of-hand, categorically, as "fast food" or as not "whole foods" that appeal to particular standards that exceed FDA definitions for a balanced and nutritious diet. A low-calorie tossed salad from a farmer's market is considered "good" even if most people consider it unsatisfying as a meal, while a satisfying vegetable stir-fry from a local Asian restaurant or market is somehow dismissed by researchers because it's cooked into a hot meal instead of served in raw salad form? Many of the academic studies seem not to realize that a low-calorie salad which might satisfy a sedentary professional office worker is generally unsatisfying to someone whose caloric needs (for example as an outdoor manual laborer) are simply higher.

If you hear about anyone actually meeting to plan for or discuss this topic, please let me know. I doubt that the actual issue or realistic solution is to provide more "decent" grocery stores in Flint so much as to instead serve those who actually have difficulties obtaining transportation to get where they need to—those who neither have access to a car nor are able to make use of the city bus system. It's easier to provide bus passes than to set up particular kinds of food outlets in every neighborhood.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

JOIN THE MSP

Mike Sobocinski's notes on January 13, 2015 - 2nd daily SEOC briefing (4:00pm):

MSP SEOC (Brianna Briggs): leads the meeting: Agency situation reports are due by 6pm. "Tomorrow is a planning day." [No explanation for this statement was provided.] Agencies, be sure to update 204 forms tactics, especially pods, teams, warehouses, etc.

(Health and Environmental Branch, next few agencies) MDHHS Community Health (Kathy Wahl sp?): Working on nutritional plan with several other agencies. Lori (Laura?) Sempler (sp?) will be the lead on that plan. Disaster behavioral health coordination is occurring, with CHECC exploring options, checking with DTAC at SAMSA [references not explained], targeted to Stafford Act qualifications. (Capt. Kelenske: does it qualify under an emergency such as this? This needs to be verified.) Some wording changes were suggested for the fact sheet.

MDARD (Brad Deacon): Mailing out food establishment requirements—about 800 of them.

MDEQ (Jen Wolf): Conversation about bringing more health people into the (local?) EOC.

M???: Two of the 5 trucks loaded with water filters are at the GCCARD. 10,700 filters, [two other large numbers were given for other types of resource there, rattled off too quickly for my poor & tired writing hand to keep up with]

American Red Cross (Paul Spata): Staffing fire station points of distribution. Further coordination with MI National Guard (MING) on staffing. Volunteer reception center was up today; numbers to be reported in the sit rep tonight. Fielding a request to feed field response teams.

MDHHS (Brian Wilson): Their volunteers are still in the field. Heard concerns about some IPads not functioning in the cold, then seemed to work better? Awaiting confirmation of replenished stock.

Offices of Services on Aging (Steve Betterly): Valley Area Agency on Aging has been fielding calls. Something fell apart regarding the schedule of water/filter deliveries—need to get in touch with local EOC on this. (Brian Wilson: probably fixed last night.) (Michelle Kuzera?: Local EOC confirms follow-up to occur [She disappears from phone suddenly, not to reappear]).

Capt. Kelenske: Any more personnel needed by the Sheriff's department for deliveries?

Unknown replacement on phone from local EOC: Being handled okay by the locals so far.

Capt. Kelenske: Consider replacing sheriff staff with area health and social work specialists, to better match staff with their expertise and free up sheriff personnel for their normal duties. (Services on Aging (Steve?): off-duty teams are available to help with phone lines and resource distribution.)

MSP: Working with MDOT for shuttle vans, working with Public Affairs re: state agency volunteers for the weekend.

MI National Guard (Colonel Reynolds): 1 full-time staff at each of the 5 "pods." Friday morning 9am will resume handing out water at the pods. MING needed 33 volunteers, and actually

obtained 48. (Capt. Kelenske: Any feedback on public reaction or questions re: MING soldier presence? A: not known.)

MDTMB (Jeannette Doll): A warehouse has been located at another site. Red Cross and MSP Wendy Galbreath are checking it out as a replacement for the other site that had problems (Court Street school district site). Stuff is to be moved from the old to new site. Based upon truck loads, will be maintaining 8 truck loads per day through Saturday, available on Sunday too, if needed. 117,000 filters coming in, and 139,000 faucet (founts???). Tablets are coming in tonight to the EOC for GIS staff to download an app, then going to Flint in the morning. Information cards sent to Flint. 15 trucks are waiting. (Capt. Kelenske: They must offload somewhere and not wait.) Only 1 loading dock at each facility. Court Street won't work—told that it was vacant and had 80,000 square feet, but it was full. (Someone on phone, Jackie Hampton perhaps?, later announces that the site will be available tonight, after all. Commissioner Curtis had prompted warehouse emptying which is allowing trucks to be moved there now. Equipment and staff available to unload, with warehouse reportedly able to be cleared out tonight. A Dort Highway location is being investigated for suitability.)

Local EOC (unknown person): Information entry and radio [channels?] seem good. Only the issue of supplies waiting on the road (presumably on trucks or in transport) must be cleared up.

MSP SEOC Logistics (Penny Burger): Working on trailers and vehicles from Department of Corrections, for door-to-door campaign. Coordinating with MSP for Thursday and Friday volunteers. Financial analysis being finished up—to be reviewed first by Captain Kelenske before submission.

MSP SOEC Planning (Zach Baker? Couldn't see across room.): Progress on tracking inventory. Sit reps due at 6pm.

MSP SEOC Recovery Team (Kriste Davis): Some numbers may not be in yet—issue of paper substitute for frozen IPads. 394 homes were visited yesterday, plus 378 more today, possibly more, once additional reports are processed. Even if number appears lower today, there was a smaller number of vacant homes today, so the actual number of inhabited homes is higher today. Working with the Red Cross this weekend for teams. Monday is a holiday. (Capt. Kelenske: Any info on community reaction? A: No info yet.)

JIC/PIO (Shannon Banner?): Media hotline saw a markedly increased number of calls, although it was not overloaded. Some media questions need answers to come from the SEOC. Good collaboration with 2-1-1, county, and state agency PIOs. Could use the local PIO today, though. From 11:30a to 12:30p there was a media briefing at fire station #3—very good media turnout, positive in tone. Waiting for the logo approval (from local and county) for the response team. (Capt. Kelenske: How is 2-1-1 doing—being monitored for success of call handling, good staffing levels, etc.? Nicole Lisabeth [JIC/PIO]: 2-1-1 is going well.

(Phone discussion regarding Legionnaire's disease report—[unclear who the participants were].)

Capt. Kelenske: DHHS will handle those Legionnaire's-related questions through separate, normal channels, not through the SEOC or local EOC but through other channels, as a separate matter.

SEOC Planning Brianna Briggs: The next briefing will be tomorrow at 9:30am.

January 14, 2016 SEOC briefing 9:30 am

Wanda Foster 10:30 district processing added to battle rhythm; "Planning day": 12:30 pm submission of ICS 204 forms. Devel. IAP for next ops period (objectives read off).

Gloria Zuber HHS, emstream direction

DEQ (George ?): Q re: when water is considered safe. SEOC answer only (tentative) not for public dissemination yet.
A: complex Q will require consensus decision of all major partners including heads.
Pb + Cu Rule – new 6 month monitoring period in Flint. June 30 deadline 60 samples for Pb, Cu testing. Too long for res – since Dec. 9 PO_4 supplements to discourage pipe corrosion, rebuild protective layer. Mtg w. mayor re: various system access points beyond the Pb+Cu rule's minimum. Seek resident volunteers for monthly H_2O test, to start trend and.
Capt: Being asked door-to-door. Over 60 so far. Will send this info to DEQ.

MSP Ops (Mabe Covey): Addl 88,000 sf warehouse secured.

NWS (Jim Askow): Temps up to freezing today. Mix snow + drizzle potential icy roads where untreated. Tomorrow ~ 46-50 rain showers high temp record not too much rain.
Fri – 1 in a little snow. Sat to teens again and also during next week.

HHS-Env Hlth (Jennifer ?): JONES in CHECC working on emerg vs disast q from yesterday. Mtg on stress FX + mat hlth.
Devel Educ mat'ls, messaging
Short + Long term goals re "food desert" situation?

DARE (Brad Bacon) revised handout approved + going out in mail to food sites. + Wf site, inspections to begin

LARA (Karen Towne) pilot project, chemistry + retesting. Q re: child care licensed facilities: could be added if they want to be testing sites (in-home providers ~ 6 kids). Will research whether actlly exists.

DEQ (Ben Wolf): ensure transport/storage of test kits. Test kits free to all, not just residential (e.g. "No one gets turned away for anything"

Hum Svcs Branch (Richard Helen): data base w. >17K addresses supplied to GIS. 2-1-1 enquiry to "our SER dept"
There is state emergency help available ... to develop messaging

MSP (ARC ?): logistics pipeline plan develope 6 processed yesterday

ARC (Paul Spata): Director opened but not publicized until estab. Today shld be fully open. 10 Em Vehicles staged to support response teams.

Educ (Louie Burgess): getting called from feds e.g. unlicensed child care (≤ 4 kids at one time) checking into info. Director on educ plg team. Flint school district – Educ safety contact with Sch dist for something (very unclear)

HHS (Brian Wilson) volunteers remain active in Flint.

Fin – 2 things (Steve Betterley) sent ≥ 500 add'l names to GIS yesterday. Valley Area Planning Comm Q re:
GCCARD (something about not being involved in something) (Michelle Kuzera & W. Kathy Bolz will follow up to resolve)
putting info on medicaid waiver clients. Teri Simmons will be on 4 pm update

MSP Pub Safety (Insp Bolger): MSP at local EOC (phone from Lt Kirk ?) busses used for shuttle. 36 MSP volunteers today
Adequate filters + water right now (≥ 100K on hand) Wrap up SW side today, then N + NE sides to start
In addition to 5 teams already (10-15 persons per team vs 4 per team?) (Must sync: how many persons vs teams. Dept:
(among many phone) obtained Natives have some sort of inadequacy (open top trailers), need to resolve. (10:30 am follow up call)
Some Connection vehicles working well as shuttles.

LDMVA (?): All went well w. addn soldiers at fire stations. 30+ troops being used today. 1 pm media address today.
Tomorrow ~ 3 soldiers per fire station

LDTMB (Jeannette Doll): Getting water moved over to Clio. Water order program in process. Haul trucks being ordered to fill MSP need. 1.0L
upgraded 9:30 am Home Depot contract now. Replacement filters important for long-term recovery

STEP 1c: RISK ASSESSMENT

This substep and the next one (Vulnerability Assessment) are closely related. Both use gathered information to summarize the risk that each hazard poses to your community. During these two steps, much useful information can be added to the sections that were started for each hazard in the Hazard Identification substep. The tasks involve finding where hazard risks overlap with the people and property you identified in the community profile. The goals of the risk assessment are to map out where hazards exist in your community, and to gain some idea of how often they arise and how much harm they might do in the future. Some hazards may affect your entire community, and may not need mapping if their likelihood and impacts seem to be about the same throughout the area. It will still be important to consider potential impacts they may have on different parts of your community—especially areas that may have a harder time preparing for and responding to an event. The Risk Assessment mainly involves collecting and thinking about this information, which will form the basis for the Vulnerability Assessment to follow. Useful sources of information include base maps from the public works department, road commission or planning department, floodplain information from National Flood Insurance Program Flood Insurance Rate Maps (FIRMs), and Section 302 sites from the Local Emergency Planning Committee (LEPC). Many of the web sites given in the last section (Step 1b: Hazard Identification) contain information that is detailed enough to use for Risk and Vulnerability Assessments in your community.

A valuable part of the Risk Assessment is the hypothetical consideration of "worst-case scenarios" in your assessments, by imagining what would happen if the worst possible catastrophe from each potential hazard actually occurred within your community. This type of analysis will suggest areas of overlap where one hazard causes another (such as severe winds causing infrastructure failures) and an assessment of the limits of your community's response capabilities (for example, a large transportation accident may temporarily overwhelm the Emergency Medical Service's capabilities in some areas).

This section of the workbook provides a general overview of the principles of risk assessment. Specific techniques (that can be used to assess each of the identified Michigan hazards) will be presented in Appendix B ("Detailed Techniques For A Hazard Analysis").

Different Degrees of Risk Assessment

The Risk and Vulnerability Assessment steps of a good hazard analysis involve estimating the *probability* of harm and also estimate the *severity* of harm in your community. This sort of analysis really started with the first steps of the Hazard Identification process, with the question "Is it possible for any of these hazards to affect our community?" Each hazard listed in this workbook (and its companion document, the "Michigan Hazard Analysis") should be considered. In your local hazard mitigation plan, each of the hazards listed in these documents must be addressed in some way. The extent to which they are addressed will depend on the extent that each can affect your community. Here is a list and description of the types of assessments that will be used:

1. Cursory Assessment

This will be used for hazards that are not considered possible or significant in your community. For example, if your community is located hundreds of miles from the nearest nuclear power plant, and you have determined that it is not likely to be affected by any incident from the nearest plants, a cursory analysis will be appropriate for addressing that hazard in your plan. A cursory analysis is merely a short statement explaining to your community **why** a particular hazard is not considered a threat. Careful thought should be given before *any* hazard is dismissed from analysis, because, however unlikely it might seem at first, if "the unthinkable" were actually to happen, people may be up in arms at the claim that it wasn't worth considering. The best kind of cursory analysis will give a reasonable assessment about why a potential hazard was considered a much lower priority than other hazards, at the time of writing.

FOR EXAMPLE:

> "The earthquake threat has been evaluated in our county and found to be of very low priority. Our county has no known fault areas within it, and no historical record of an earthquake event could be found. The effects from a major event in the New Madrid area were determined to be equivalent to Modified Mercalli Intensity Scale measurements in the range of I or II. Thus, in the worst of known scenarios, although it may be possible for some persons to feel minor seismic activity if they are located in the upper floors of buildings or in other sensitive locations, no damages to area structures are anticipated. The capacity of the county's infrastructure systems to withstand such minor trembling has been determined to be satisfactory. Because of the lack of vulnerabilities to this hazard, and the presence of other hazards that currently threaten our county, it was decided that no earthquake mitigation activities need to be undertaken."

Mike Sobocinski's notes on January 14, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning (Amanda Bresler): A 10:30am distribution process meeting has been added to the battle rhythm. Today is a "planning day" [this phrase was still not clearly explained but might refer to the development of a new IAP]. 12:30pm submission deadline for the ICS 204 form. Developing the IAP for the next operational period. (Numerous objectives were read aloud.)

MDEQ (George [redacted]): There's been a question of when the water is to be considered safe. A tentative SEOC answer (*not for public dissemination yet*) – since the question is complex, it will result from a consensus decision of all major partners, including locals. Copper and lead rules: a new 6-month monitoring period has just begun in Flint, involving a June 30 deadline for 60 samples to be tested for Cu, Pb. This routine schedule is of course too long for our current circumstances. Since December 9, phosphate supplements had been added to discourage pipe corrosion, rebuild a protective layer. There's a meeting with the Flint mayor regarding various system access points beyond the Pb and Cu rule's minimum test requirements. Seeking resident volunteers for monthly water test, to start analyzing trends over time. (Capt. Kelenske: It's being asked during the door-to-door visits, and over 60 so far have agreed. This info will be sent to DEQ.)

MSP SEOC Operations Section (Gabe Covey): An additional 80,000 square feet of warehouse space has been secured.

National Weather Service (Jim Askew[redacted]): Temperatures go up to the freezing point today. A mixture of snow and drizzle with the potential for icy roads where roads have been left untreated. Tomorrow from about 11am until about 6pm we expect rain showers, with the high temperatures around 40 degrees F. Not too much rain, a little ponding potential. Then from Friday evening, a little snow, as Saturday temperatures would be back down in the teens again and also during next week. Just one brief warm-up over the next day.

(Health and Environmental Branch, next few agencies)

MDHHS (Jennifer [redacted]): Subject matter experts are in the CHECC working on yesterday's question regarding emergency vs. disaster eligibility of a particular program under the Stafford Act. Working on the stress effects of the event upon mental health. Developing educational materials and messaging. Developing short and long-term goals regarding the "food desert situation." [NOTE – Afterward I gave her my contact info to join discussion of definitions and alternatives, related transportation access ideas such as providing paid bus passes to improve food access.]

MDARD (Brad Deacon): A revised handout was approved and is being mailed out to food service locations, and web posting. Inspections of these locations will begin.

MDLARA (Karen Towne): Something about a pilot project (involving, or in addition to,) insulation and retesting. There's a question involving licensed in-home child-care facilities (up to 6 kids) and asking them whether they want to be water testing sites. Will research whether the authority exists to require testing.

MDEQ (Jen Wolf): Ensuring the transport and storage of water test kits. Heard a report of non-residential (e.g. businesses) told that the kits were only for residential units, but this is not true and therefore must be corrected. Test kits, etc. are free to all, not just residential: "No one gets turned away for anything."

MDHHS? (Richard Thelen): A database with more than 17,000 addresses was supplied to the GIS section. 2-1-1 inquiry regarding whether State Emergency Relief (SER) is available. Will need to develop messaging on this topic, to explain to everyone what it is and what is available.

Lauren (Lorent) of the American Red Cross?: A logistics pipeline plan [is/was/is being] developed.

American Red Cross (Paul Spata): Volunteer Reception Center was opened but not yet publicized, because it's first day was to test its processes to ensure they will be up to speed. About 6 volunteers were processed yesterday. Today, it should be fully open. Ten emergency response vehicles were staged to support the response teams in the field.

Department of Education (Louie Burgess): Receiving calls from federal level regarding things like unlicensed child care centers (residential, for up to 4 kids at a time). Checking into information for those inquiries. A 17-level departmental director is now on the educational planning team. The department is seeking contact with the Flint school district for something... [very unclear]

MDHHS (Brian Wilson): Volunteers remain active in Flint.

State Office on Aging? (Steve Betterley): Sent at least 500 additional names to GIS staff yesterday. The Valley Area Agency on Aging raised a question regarding GCCARD: something about it not being involved in something [I didn't discern the details in any coherent way], and Michelle Kuzera, MSP representative at the local EOC, will follow up with Kathy Bolz (sp?) to resolve the issue. Getting information on Medicaid waiver clients. Teri Simmons (sp?) will represent this office for the 4pm briefing.

MSP Public Safety (Inspector Bolger): MSP is at the local EOC. [Phone-in participants interrupted numerous times with information; I'm not totally sure who said what in the end.] Buses are being used to shuttle residents. 36 MSP volunteers available today for Flint activities. Adequate filters and water are on hand right now (at least 1000). Wrapping up with the southwest side of Flint today, and proceeding to the north and northeast sides starting tomorrow. Discussion about different teams having different sizes, creating confusion over estimates of how many total persons are on them...between 4 and 15 persons per team? (Captain Kelenske directs a standardized number on each team, with accurate summary info presented to him in writing. A 10:30am follow-up call was agreed to.) Obtained trailers were not all adequate for their required purpose, such as being open-top trailers—situation must be resolved.

MDMVA / MING (?): All went well yesterday with the National Guard soldiers posted at the fire stations. More than 30 troops are being used today. 1pm media address occurring today. Tomorrow at 9am, 3 soldiers will be assigned to each fire station.

MDTMB (Jeannette Doll): Getting water moved over to Clio. A water-order program is in process. U-Haul trucks are being ordered to fill the MSP resource transportation needs. Have upgraded now to a $30 million Home Depot contract. Replacement filters are important for long-term recovery.

Local EMHSD Liaison [MSP's Michelle Kuzera?]: Working on planning tasks and processes for the homebound.

MSP SEOC Logistics (Wendy Galbreath): Site visit took place yesterday (with Lauren) to check into new locations. Three locations are now moving toward one large location at Clio Road, which has its own experienced crew for loading and unloading trucks, plus a Red Cross warehouse manager. Daily logistics meetings now occur at 10:30am (brief) and at 7pm (longer). Court Street and GCCARD will have their resources moved to and consolidated at Clio. (MSP's Kriste Davis: Mission-ready packages MRPs. Working toward standardized teams of similar size, plan being pushed up to work on it today. Yesterday's final numbers turned out to be 492 occupied homes visited (total 653, implied to include vacant ones).) About 2 minutes per door – a good rate of field work.

PIO/JIC (Shannon ?): Reviewing fact sheets. Michigan Association of Broadcasters sending radio PSA today. Received a request for door-to-door team credentialing (with official ID). If this is to be used, info will be needed for official distribution. (Capt. Kelenske: Each team has either a sheriff or MSP vehicle, "marked unit car." Someone else: the problem may be when teams cover an entire block, with the 1 vehicle not easily visible to every household.)

MSP Planning (Amanda Bresler): Improving the pod technology thanks to MSP James Tchorzynski's work there. Meeting with agencies to help with ICS 204 forms. 6pm situation reports are due. Next briefing will be at 4pm.

Capt. Kelenske: Senator Arenic(?) was met with and shown the SEOC; appeared impressed.

Mike Sobocinski's notes on January 14, 2015 - 2nd daily SEOC briefing (4:00am):

[NOTE: The initial tactics was much too rapidly paced to take notes on, and its content should be available once the ICS 204 forms are all submitted.]

(Health and Environmental Branch: first several respondents, including Office on Aging)

DHHS (Jennifer ?): Working on nutrition plan and behavioral health work.

MDARD (Brad Deacon): Food guidance went out in today's mail. Now working to prioritize sites in the most at-risk zones (the redder zones on a map) for forthcoming inspections.

MDEQ (Jen Wolf): Only 80 samples are present at Flint, perhaps because the only two collection sites for them are at City Hall and the Water Treatment Plant, and the plant might not be on the bus transit routes. May need to make fire stations into collection points, but indications had been that they didn't want to be responsible. The governor wants 8 teams—staff is needed who have some scientific background. Many bottles are coming in (overseen by American Red Cross?) Lot testing is needed to verify bottle cleanliness after they've been received from the vendor.

MDLARA (Karen Towne): Supplies were received. Pilot project installation to occur Saturday, with testing on Sunday.

MDHHS (Brian Wilson): Volunteers in the field have been receiving a lot of positive feedback from the community. IPad operation was much better today—fewer delays.

American Red Cross (ARC) (Lauren ?): Standardization of water response teams [??Can't be sure this completely represents her statement - it went by too quickly?]

ARC (Paul Spata): Continued to staff the 5 fire stations. Coordinating with MING regarding their staffing over the weekend.

State Office on Aging (Steve Betterley): Coordination of referrals problem was successfully solved by Michelle Kuzera. Still in the process of identifying senior addresses in Flint who may need assistance.

MSP Public Safety: [some 2330 number rattled off along with a bunch of other stuff. Possibly the number is a cumulative number of doors visited to date by field teams??? Way too much info, presented in too fleeting a manner to capture any of it in written notes. @@@@@@@@@@@]

MDMVA/MING (unidentified speaker in SEOC): Hotel rooms confirmed for 35 [something - soldiers??] who will be there. Each pod is to have a government phone (and?) Blackberries. List provided to planners. Providing liaison to local EOC and a PIO to the JIC.

MDTMB (Jeannette Doll ?): Four U-Haul trucks were obtained. Working on resource requests all day.

Local EOC MSP Liaison (Lt. B.J. Roach): Working with churches to coordinate. (Capt. Kelenske: Is a person available to handle that duty and thus free her up for many other tasks?)

MSP Logistics (Wendy Galbreath): Many requests regarding volunteer donations. Penske offered 15 to 20 trucks, Dean transportation has drivers available. Confusion regarding whether to go to EOC or to GCCARD, but that's now cleared up. MSHDA's 24 Flint properties are to get filters installed. "Zero water" [??] news event—to offer match (i.e. donations?) of filters.

MSP SEOC Planning (Amanda Bresler): Logistics resource plan and IAP work today—need info as soon as possible. Situation reports are due by 6pm.

MSP Recovery Team (Kriste Davis): Planning involving the teams and coordination (mostly covered by others).

JIC/PIO (Shannon [redacted]): The email for state employees has been drafted, and is being reviewed. Several media requests received for warehouse events but need to be delayed until the transition is done and the warehouse is operating smoothly (in about 2 days?). Found no major media errors today. Many questions are pending and the list of them is growing in number—need info from the SEOC to answer them—especially needed for rumor control, since the same questions are being asked by activists. Trouble getting in contact with local community PIOs and need help to contact them. (Capt. Kelenske: need documentation of unsuccessful contact efforts, and submission of an actual list of questions; a follow-up call will occur on this topic.)

Capt. Kelenske: Met with TAG ([redacted]) today—General Vadinez (sp?). There's an issue involving used empty water bottles—a recycling system needs to be provided (regardless of whether it actually receives widespread use) so there isn't an issue with empty bottles everywhere. West Virginia has an after-action report which probably has good ideas about handling this. The next briefing will be tomorrow at 9:30am.

Mike Sobocinski's notes on January 15, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning Section (Amanda Bresler): Reads off the battle rhythm for the day. Yesterday's IAP was approved.

MSP SEOC Operations (Gabe Covey): The top priority today is tracking to ensure that adequate staff and resources are in the field. We are setting up the Water Resource Teams for the weekend. The Governor had asked for a declaration of both an emergency and disaster by the federal government yesterday. Working to improve coordination with JIC.

National Weather Service (Jim Askow [sp?]): It will be about 40 degrees F all day today but afternoon rains will cause some slippery conditions. Temperatures drop tonight. It will be very cold Saturday through next week. Standing water will freeze in place tomorrow morning. Sunday's high temperature will be about 15 degrees F. Becoming breezy on later days, through next week, again resulting in circumstances in which exposed skin risks frostbite in 15 to 30 minutes outdoors.

Capt. Kelenske: We have intended to give credit to all who were involved, but some agencies were recently missed when trying to list them all.

(Health and Environmental Branch: next several respondents)

[redacted] (Kathy Wald): The CHECC will be open Saturday, Sunday, and Monday, helping with the county phone banks on those days. Coordinating with GIS regarding those who are dependent upon medical equipment in their homes. Data is being obtained and provided to GIS. Genesee County Health Department requesting 10,000 copies of an EPA document, so MDTMB will arrange (Capt. Kelenske: or EPA itself can provide them).

MDARD (Brad Deacon): Prioritizing food facilities for follow-up next week. Coordinating with DEQ.

LARA ([redacted]): 20% of the 244 health facilities [something... too fast for notetaking]

MDEQ (Jen Wolf): Working on teams for the plan [for? and?] testing water [at schools?]. Logistics of 10,000 water bottles' assembly and distribution.

"Human Services Branch" [MDHHS? (Rich Thelen?)]: Filter and cartridge numbers were stated. Reordering is necessary today. Met with Finance, figuring out stuff with others. (Capt. Kelenske: Yesterday there was a budget meeting with SBO [redacted].)

MI Dept. of Education (Kevin Wolff): Coordinating with private and parochial schools. [something else didn't catch it]

Dept. of Civil Rights (Mark Bishop): The EPA document is available online in multiple languages, has been handed out at schools. Would be good to coordinate with these other agencies and order more copies to meet everyone's needs.

[redacted] (Brian [redacted]): door-to-door [something TOO FAST FOR NOTETAKING!!]

State Office Services to the Aging (Steve Betterly): The Valley Area office (and Kathy Bolz) referral issue has been resolved by MSP Michelle Kuzera. 400 new addresses of "my choice waiver clients" [redacted] were received and forwarded to GIS. Information on independent and assisted living facilities in Flint (non-regulated congregate settings) to overlay onto the existing heat map. Received question on

Legionnaire's Disease—any connection known? (Capt. Kelenske: no known connection. May need to put out a statement from DHHS or the Governor for PIO use.) Question on whether the heat map (by Dr. Mona Hanna-Attisha) is available to the public. (Capt. Kelenske: It is already available, open source.)

American Red Cross (Paul Spata): Many persons are asking about Legionnaire's Disease at the Flint fire stations. (Capt. Kelenske: Again, we will check this morning with the Governor on how to keep these topics disconnected. It's okay for fire stations to refer people to the web site, but there's a problem with providing handouts there and connecting the topics.) Five sites were staffed by ARC yesterday, but the MI National Guard takes over the staffing today. ARC is supporting the Water Response Teams today, and continuing to operate the Volunteer Reception Center. Supporting the distribution of materials, and providing warehouse operations management.

ARC (Lauren Twohig): Describes some sort of coordination. [Too fast for notetaking]

MSP ([? Over phone]): States various numbers of volunteer state employees. 10 teams are in the field, in wards 5 to 7 of the city. The ARC has an additional 5 teams, focusing on Ward 6. The I-Pad issue was partly the result of low temperatures, and partly related to software and operator handling of the software. Working with MDTMB on software to prevent I-Pad problems. (Capt. Kelenske: If there is a way to weatherproof them, let us know how to help.) Could use rain ponchos. (Capt. Kelenske: Will do.) Various sign-ups so far for working on Saturday (24), Sunday (39), and Monday (46). Working with Penske on truck donations.

MI Dept. of Corrections ([?]): Total of 14 vehicles including a handicap-accessible van.

MI National Guard (Lt.-Col. Randall): "O and O" [?] at local EOC. Have been transitioning into pods, which is going well. (Capt. Kelenske: TAG discussions—will provide info separately, soon. No tents are to be used.)

MDTMB (Jeannette Doll): Specialized items are available at the Mundy Township Home Depot, to use in the pilot (such as water bubblers). Volunteer identification badges should be available today. (Capt. Kelenske: We'll discuss re: "Volunteer" on badge design, since not all workers are volunteers.) Something was also said about fuel cards and employee "Survey Monkey" [unclear].

Attorney General (Peter Manning): Will be submitting some legal questions.

MSP SEOC Logistics Section (Wendy Galbreath): Working with Jeannette Doll (MDTMB) on the consolidated warehouse. Today is day 1 of the plan.

MSP SEOC Planning Section (Amanda Bresler): Situation reports due again by 6pm today.

MSP Recovery Branch (Brianna Briggs): Working on the weekend team logistics, and on identifying standardized information to be submitted daily (rather than repeatedly asked for).

PIO/JIC (Nicole Lisabeth): The Governor stopped by at a fire station, unannounced. Positive media regarding the federal declaration request that was made. No known media errors identified lately. A legislative briefing occurs today. There have been a couple requests for the presidential request letter (Capt. Kelenske: Not available publicly yet. Its release is to be discussed first for approval.) Today there are 3 news releases. Potential on Saturday for [something]. Attorney General Schuette: sending out some info on his investigation. Today there is a Time Magazine interview with Dr. Eden Wells. Please notify the JIC of any agency messages that are being sent out. A Governor's statement is being made

today about returning additional powers to the Flint mayor. The Genesee County Health Department is on furlough right now, so people should dial 2-1-1 instead.

MSP Capt. Kelenske: At about 11am, 50,000 phone lines in Flint will receive a message from the Governor. This could cause a spike in calls to 2-1-1 as well as in the demand for supplies. Would like to get a briefing to the Mayor of Flint and to the Governor, summarizing agency actions. Please send bullet points to Gabe Covey (MSP Operations Chief) for him to assemble for this list of specific things being done. More items are better for the list, but each item should be short. SEOC hours will continue to be from 8a to 8p on Saturday, Sunday, and Monday. The #1 focus is on the pods, for distribution of water resources to Flint. If necessary, the field teams will support these pods if there is a need.

(FIO) Requested better coordination w. Gov, etc.

Capt; Op hours 8-8 'til stabilized. Please arrange staffing. Leave contact info if not represented here
JIC: be prepped for legislative call w. Cap + FCO when a response received on request.
Wanna increase MNG from 50 to over 65, but needs approval first. Some groups doing mobile testing.
SEOC briefing on stress + emotions, handouts w. tips. Take a minute to obtain + read.
Lt Gov [redacted] is here
Lt Gov offers thanks + appreciation. Anxiety level in Flint is being reduced. Immediate needs being met - longer term can be focused on. Thx for hi-level of professionalism under trying + difficult circumstances

Amanda sitreps 6pm. Next briefing tomorrow 9am.

January 15, 2016 SECC briefing @ 4pm

MSP Planning (Amanda Bressler): goes over upcoming battle rhythm items.

MSP Operations (Rabe Covey): must ensure adequate supplies, pods + volunteer. Obtain volunteer #s for tomorrow.

H&H + Env. Branch

DPHHS (Kathy Weld): getting addresses for medically-dependent persons. Following up on the list issue from this morning. Offer from SPHSA to activate hot line. (Couple other things too fast)

MPHD (Brad Deacon): training staff to test samples, prep + visit sites.

WWT (Alysha Re-asle): Helping DEQ w school water testing (1st report too fast)

DEQ (Tenbuß): plan coordinator establishing teams for school water testing. Feb. 6 whole program running. Next weekend - 2600 test kits left in the pods for that 2 days. ~1100 test kits coming in today. Ordered another 25K in next couple. More than one test kit per home since event started. Labs staying open on wknd + holiday

Human Svcs Bur (Rich Nelen): procuring filter + replacement cartridges >$30 ea. Requested after-hrs contact person.

MDOE (Kirk Walters): wkg w CIV rights for student + staff counts for all educ instit. to distrib message

DPHHS (?): A few IRad hiccups cleared up fine this afternoon. (Jeanette? 32,000 available thru Home Depot, (something)

AHS (Steve Betterly): send another 80+ addresses over, from local area agency on aging, for mapping. wkg on Recovery Resource Guide

ARC (Paul Spath): 9 Vol. Reception Ctrs putting supplies in field. Coffee provided for volunteers, JIC, etc tomorrow will actually provide meals. 20 volunteers assigned tomorrow (kit assembly. Warehouse + inventory mgt continues,

— end of AM sess

MSP Pub Sfty (Matt Bolger): wkg on distrib mechanism w ARC. Wanna pre-load trucks in night. 50K+ homes visited. 64 vol's. (#s refined Sat)

Corrections (?) Adding 2 24' trucks + drivers. Wkg to add 5 more for next period,

MDMVA (?) 311 soldiers active Jan 16, OIC, 32 across 5 pods.

MDT (Commutative Dell): Rec'd acct of 300+ bridges ready for wkend. 30 add'l Pads, GIS to load software onto Dumpster to Clio Rd. Notify of addl traffic to state lab over wkend.

local EMHSD liaison (? garbled name): wkg to reestablish local fire stations as (dist receiving pts) (Capt: Mayor said samples will not be need there. must have consistent message

MSP Logistics (Wendy): 2 sites still open but moving to 1 at Clio Rd warehouse. Want 9/20 vehicles pre-loaded tonight. Only 4 sec water won't be frozen. Rack parkas on their way - to ARC + EOC locations.

MSP Plg (Amanda): (something...) warehouse data, app #s, something else should be available to analyze

Recovery Bch (Brianne B): Good progress today. Plan in place. Supply pods first, then teams. Preload, then resupply available if needed

ARC (Lauren) wanna increase resource teams + daily volume to 400 households.

PIO (Nicole): Capt K gave legislative briefing. Updated talking pts. Wanna issue news release w. specific #s, personnel + resources distrib. Still need to confirm some #s before release can be made. ARC news rel delay ~2 days. MSU's could still get news release out today. MDHHS has new blood level results, to go online ASAP. Inquiry from Chelsea reg AHS re: donated water + WalMart truck. Prefer coordinate statewide response over individ offices. Nichole at Co office bldg all day due to Gov + Mayor meetings. Still awaiting staffing at PIO at JIC and Wednesday will site info on 211 + other info. Confusion re: FEMA not source of all

Mike Sobocinski's notes on January 15, 2015 - 2nd daily SEOC briefing (4:00am):

MSP SEOC Planning Section (Amanda Bresler): Goes over upcoming battle rhythm items.

MSP SEOC Operations (Gabe Covey): Must ensure adequate supplies at the pods and the warehouse. Obtain volunteer numbers for tomorrow.

(Health and Environmental Branch: includes the next several agencies, including Red Cross)

MDHHS (Kathy Wald): Getting addresses for medically dependent persons. Following up on "the lab issue from this morning." Offer from SAMSA (?) to activate hot line. [A couple other items, too fast to capture in notes.]

MDARD (Brad Deacon): Training staff to be able to test samples, prepare and visit sites.

MDLARA (Alisha Gensler?): Helping DEQ with school water testing. [1st comments to fast to capture in notes.]

MDEQ (Jen Wolf): Plan coordinator is establishing teams for the school water testing. By February 6, the whole program will be running, but by next weekend, (some initial, more urgent parts of it will be implemented?) 2600 test kits left in the pods (?something about 2 days?). About 1100 test kits coming in today. Have ordered another 28,000, to arrive in the next couple of weeks. The total amounts to more than one test kit per Flint home since the declaration started. Labs are staying open on the weekend and the Monday holiday.

"Human Services Branch" (Rich Thelen): Processing filter and replacement cartridges – more than 30,000 each. Requested after-hours contact person [I didn't catch where or with whom].

MDOE (Kevin Walters): Working with Civil Rights for student and staff counts for all educational institutions, to deliver the EPA message.

MDHHS (don't know who?) A few I-Pad "hiccups" were clearing up well this afternoon. (Jeannette Doll, MDTMB: over 30,000 [of something] are available through Home Depot.)

MOSA? "Aging and Adult Services" (Steve Betterly): We've sent more than 80 additional addresses to GIS, from the local area agency on aging, for mapping. Working on the Recovery Resource Guide.

ARC (Paul Spata): Operating the Volunteer Reception Center, putting supplies in the field. Coffee was being provided for volunteers, the JIC, etc., and tomorrow this will expand to actually provide meals. 20 volunteers are assigned tomorrow (for kit assembly?) The warehouse and inventory management activity continues.

MSP Public Safety (Matt Bolger): Working on distribution mechanism with ARC. Want to pre-load trucks during the night. Over 50,000 homes visited [I'd caught this information correctly]. Volunteer staffing numbers were provided for the coming 3-day weekend period.

MDOC (don't know who?): Adding two 24-foot trucks and drivers. Working to add 5 more for the next operational period.

MDMVA (don't know who?): 34 soldiers active—a couple in the Genesee County EOC and the JIC, and the remaining 32 distributed across the 5 pods.

MDTMB (Jeannette Doll): Received notification of more than 300 identification badges ready to be used this weekend. 30 additional I-Pads, which SEOC GIS will load software onto. A dumpster is headed to Clio Road. Notify that additional traffic will be going to the state lab over the weekend.

Local EOC EMHSD liaison (?garbled name over phone?): Working to re-establish local fire stations as (distribution/receiving points?). (Capt. Kelenske: The mayor said that samples will not be received there. We must have a consistent message on this topic.)

MSP SEOC Logistics Section (Wendy Galbreath): Two sites are still open, but are moving to consolidate to one at Clio Road warehouse. We want 4 out of the 20 vehicles to be pre-loaded tonight—only 4, so that water won't be frozen in the outdoor temperatures. Rain parkas are on their way to ARC and EOC locations.

MSP SEOC Planning Section (Amanda Bresler): [something…] warehouse data, app numbers, [something else] numbers should therefore be available here to analyze.

SEOC Recovery Branch (MSP Brianna Briggs): Good progress today. Plan in place. Supply the pods first, then the teams. Pre-load vehicles with potentially everything needed throughout day, with a resupply then available if needed.

ARC (Lauren Twohig): We want to increase resource teams and daily volume, to increase the number of households reached.

PIO (Nicole Lisabeth): Capt. Kelenske gave a legislative briefing. We updated the talking points. We'd like to issue a news release containing specific numbers on personnel and resource distribution, but we still need to confirm some of these numbers before the press release can be made. The ARC news release will probably be delayed a couple of days. The MING could still get a news release out today. MDHHS has new blood level test results, to be placed online as soon as possible. An inquiry was received from Jackson, MI regional HHS regarding donated water plus a Wal Mart truck, but it is best to have a coordinated statewide response over separate individual agency activities. Media were at the Genesee County office building all day today, due to Governor and Mayor meetings. Still awaiting a city PIO at the JIC. Updating web site information on 2-1-1 and other topics. Confusion exists regarding FEMA, which is not actually a source of the water so far. The JIC is getting requests (media and legislative) for the presidential declaration request letter itself. The Governor did release yesterday's letter to Detroit newspapers. (Capt. Kelenske: concerned that information from such a release is not final, and therefore will require clarification.) We're requesting better coordination with Governor's office, etc.

Capt. Kelenske: SEOC operating hours are still 8am to 8pm until the situation stabilizes. Please arrange staffing for your agency. Leave contact information if not directly represented by a person at the SEOC. The JIC should be prepared for an upcoming legislative call with the Captain and FCO, when a response is received on the declaration request. We want to increase MING staff from 50 to over 65, but that will need to be approved first. A group [I didn't note who] is doing some sort of mobile testing in Flint. There was an SEOC briefing on stress and emotions, providing handouts with tips—take a minute to obtain and read those. The Lieutenant-Governor is here.

Lt. Gov. Brian Calley: Offering thanks and appreciation. The anxiety level in Flint is being reduced. As immediate needs are being met, longer-term aspects can be more focused on. Thanks for the high level of professionalism under trying and difficult circumstances.

MSP Amanda Bresler: Situation reports due at 6pm. Next briefing will be tomorrow at 9:30am.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River in 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

NOT FOR DISTRIBUTION

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance – ~~IHP~~, and Public Assistance – ~~Category B~~, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified

allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help

address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts. ,

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Subject: URGENT - Records Request
Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years.** Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an

additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Subject: FW: FOIA Plan Update
Attachments: SEOC FOIA Plan FINAL.docx

Please review the attached plan for FOIA printing. The instructions are for when in the SEOC. Do not change your computer to the printer in the instructions, it is for use in the SEOC. Use the printer your computer is currently connected to for printing from your computer and personal email or use another one in the EMHSD office area. However, there is helpful information for use in any location. Please remember to ensure that your default printer settings are set for single sided printing before you begin.

To: MSP-SEOCOPSC
Subject: FOIA Plan Update

SEOC FOIA Print Plan
Tips for Printing

Print Plan – Thru Friday, February 19

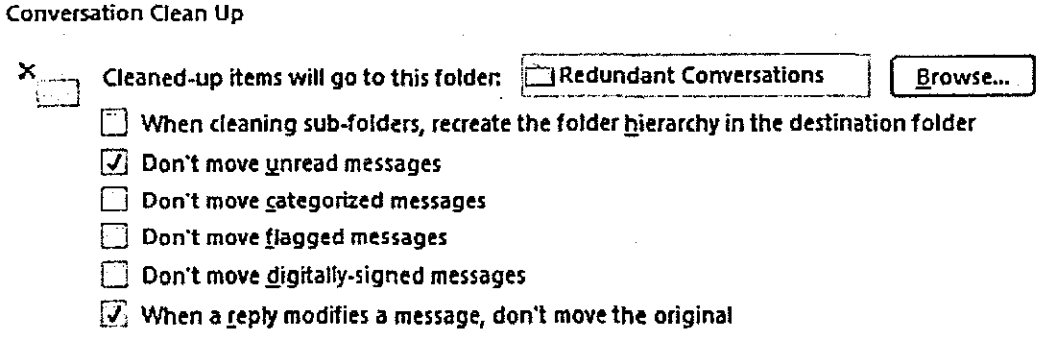
- When printing emails/documents, make sure to **change your default printer** to the following printer:
  - EOC_F1COMM_RI3054 on EOC084M1OAPF502 (located in the Communications Room)
  - *Additional helpful hints for each document type below*
- SEOC IT staff will set up to "Print to Hold" for each PC in the SEOC.
- Be sure to print/copy all documents **Single Sided.**
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else's print job.** The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select *Recover Deleted Items.*
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are identical to the below:



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
    - MSP-FOIAProject@michigan.gov
    - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

Hey Mike, hope you are doing well. I have been wondering has your expertise been mobilized to assist with the Flint water emergency?

Did Flint do a hazard mitigation plan, did they include an infrastructure failure like this in the plan?

Do many communities include plans for this kind of event? I imagine you are considering the implications of this for hazard mitigation planning.

All the best,

Subject: Flint Emergency

Hey Mike, hope you are doing well. I have been wondering has your expertise been mobilized to assist with the Flint water emergency?

Did Flint do a hazard mitigation plan, did they include an infrastructure failure like this in the plan?

Do many communities include plans for this kind of event? I imagine you are considering the implications of this for hazard mitigation planning.

All the best,

Rex L. LaMore

Subject: RE: Flint Emergency

Hello -

The City of Flint was an active participant approved under the Genesee County Hazard Mitigation Plan. Although FEMA only requires a hazard mitigation plan to consider natural hazards, the county plan did include a general section on infrastructure failures. The Michigan Hazard Mitigation Plan had included some information as well, but the most extensive detail is actually found within utility reports for the area. These reports are all viewable through the internet.

A great many of the personnel in my division have coordinated and shared in the activities since the emergency declaration. I have had some involvement so far, and am scheduled to provide more assistance during at least the next couple of weeks.

Thanks,

Mike Sobocinski

Hello -

I received an inquiry (below, at bottom) from an MSU urban planning professor, about hazard mitigation planning for the Flint situation. I'm not sure whether all responses should go through the PIO, but I drafted the following reply and I'm wondering whether it sounds okay to send...
Mike

Subject: RE: weekly activities list

My estimated schedule this week:
Thanks,
Mike

This week, February 16 to 19:
Section updates:
- 3 hours annual leave Tuesday pm, February 16 (Sobocinski)

Key Activities:
- Work in SEOC Planning Section, on the Flint emergency declaration activities: Wednesday PM shift and Friday AM shift (Sobocinski)
- Comply as needed with Flint FOIA requirements (Sobocinski)
- Complete revised MI-CEMKR PowerPoint and send to training section (Sobocinski)
- Coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters/inquiries from FEMA and local programs, as received. (Sobocinski)
- Thursday Feb. 18: 11am RiskMAP conference call, and 12:30pm-2p webinar (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings: (no items)

Next week, February 22 to 26:
Section updates:
- 3 hours annual leave Tuesday PM, February 23 (Sobocinski)

Key Activities:
- Work in SEOC Planning Section, on the Flint emergency declaration activities: Tuesday AM shift (Sobocinski)
- Comply as needed with Flint FOIA requirements (Sobocinski)
- MCCERCC meeting Monday 2pm, including any needed prep/coordination with the presenter whom I had arranged there (Sobocinski)
- Friday 1pm webinar (Sobocinski)
- Coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters/inquiries from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings: (no items)

Subject: RE: number of records

Thanks. I have just finished the following count of relevant materials:

281 physical pages of printouts, handwritten notes, and typed text.

Within my emails, I sent about 72 relevant messages, which included 76 pages within attached documents. (Estimated 1 page average length or less per email, if duplicates from chain replies are not included.) This does not include emails which were about other matters and merely included brief, passing references such as "Going to Flint now" or "sorry for the delay while working on Flint."

Within my emails, I received about 45 relevant personal messages, including 52 pages within attached documents.

If I include mass-emailed messages from the Governor's Office, EMHSD Media Monitoring, and EMHSD news from Oralya Garza, then there are about 39 additional messages adding up to hundreds of additional pages (perhaps an average of more than 10 pages each?)

Please let me know if you have questions. (I'm in the office until noon today but traveling to Detroit, and should be back to check my email by 5pm before I leave.)

Thanks,
Mike

Subject: RE: number of records

HI Mike:

Please do not add notes at this time. The idea under FOIA is to capture the documents as they exist at the time of the request. The goal is the number of pages so if you can estimate the number that would be helpful. I understand many of the emails will include the entire string gut that is fine – we don't want to modify any existing document so please produce them in their current form. Thanks! Lori

Subject: number of records

Hello –

A couple of questions:
With the "number of records" are you more interested in the distinct number of emails/documents, regardless of the length of each, or in the approximate number of pages that they would all fill up when printed.
With regard to page counts or potential printouts, most of my emails include long nested chains of all preceding messages. Rather than constantly re-printing all the content in chains, would it make sense to only count and submit the most recent (or most complete) messages?
Some of my documents are undated, but are recent enough for me to estimate a production date and add it by hand, if that sounds useful and appropriate. Please let me know, as things that were aimed internally would make more sense if a few added dates, titles, explanatory wording is added. I guess it depends upon whether the goal is simply to "capture" all material exactly as it is and to seek further explanation later, as needed, or to most quickly gather the most accurate representation of what information/documents were used (and when, and how), through the use of some added clarifying annotations.

Thanks,

Mike Sobocinski

Sent: Friday, February 12, 2016 10:14 AM
To: MSP-EMHSD-Division
Subject: FOIA REQUEST FOR RECORDS - DEADLINE 2:00 p.m. TODAY

Please remember to send Lori Hinkley **an estimate of the number of records** in your possession pertaining to the Flint water crisis.

"Records" is defined as: e-mails, hand written notes, documents, text messages and anything else pertaining to the Flint water crisis. This includes ALL records you've received or generated, including general govdelivery correspondence, news releases – essentially anything that says "Flint Water."

To recover deleted e-mails in outlook, go to your toolbar and select: Folder - Recover Deleted Items. This will provide you with a list of everything you have deleted within the last 30 days. Please recover all Flint related records and archive them for future reference and include them in your estimate to Lori.

You will need to send this information to Lori Hinkley no later than 2:00 today. Further information regarding the need for printing documents will be provided to you next week. We are only looking for estimates of the number of records right now.

Let me know if you have any questions.

From: *Zarotney, Greg (MSP)*
Sent: Thursday, February 11, 2016 5:01 PM
Subject: URGENT - Records Request

Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016**.

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016**.

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Capt. Greg Zarotney

To: Weber, Thomas (MSP)
Subject: RE: office logistics

Ok. I might just ask them for a brief delay if the request is not urgent and comes while I'm in the middle of something involved (e.g. phone call, imminent appointment, deep-thought, etc.). ☺

From: Weber, Thomas (MSP)
Sent: Thursday, February 11, 2016 8:16 AM
To: Baker, Zachary (MSP); Graham, Mitch (MSP); Pepper, Joel (MSP); Schnepp, Matt (MSP); Sobocinski, Mike (MSP); Weber, Thomas (MSP)
Subject: office logistics

I've just been asked to convey that as long as we're still "settling in" and responding to Flint there will be continued needs/asks for assistance in helping with things around the office. Please provide assistance to Joyce or Jackie or whomever else to the extent possible.

Thanks for your assistance.

To: McCormick, Matthew (MSP)
Subject: RE: Flint Group Quarters

Yep! This GQ info is also available at the tract level, although not at the block group level. I've attached info for Genesee Co tract 1 below (left), next to the overall Flint City info (right)...

RELATIONSHIP		
Total population	2,799	100.0
In households	2,641	94.4
Householder	1,100	39.3
Spouse [6]	244	8.7
Child	846	30.2
Own child under 18 years	496	17.8
Other relatives	319	11.4
Under 18 years	150	5.4
65 years and over	13	0.5
Nonrelatives	132	4.7
Under 18 years	26	0.9
65 years and over	7	0.3
Unmarried partner	59	2.1
In group quarters	158	5.6
Institutionalized population	0	0.0
Male	0	0.0
Female	0	0.0
Noninstitutionalized population	158	5.6
Male	75	2.7
Female	83	3.0

RELATIONSHIP		
Total population	102,434	100.0
In households	99,241	96.9
Householder	40,472	39.5
Spouse [6]	9,359	9.1
Child	32,944	32.2
Own child under 18 years	23,130	22.6
Other relatives	8,801	8.6
Under 18 years	3,788	3.7
65 years and over	610	0.6
Nonrelatives	7,665	7.5
Under 18 years	727	0.7
65 years and over	234	0.2
Unmarried partner	3,747	3.7
In group quarters	3,193	3.1
Institutionalized population	988	1.0
Male	764	0.7
Female	224	0.2
Noninstitutionalized population	2,205	2.2
Male	1,252	1.2
Female	953	0.9

So, although institutional group quarters may already have been coordinated with, we see that tract 1 has 158 persons living in noninstitutional group quarters, who may still have unprovided need.

Mike

From: Sobocinski, Mike (MSP)
Sent: Wednesday, February 10, 2016 1:53 PM
To: McCormick, Matthew (MSP)
Subject: RE: Flint Group Quarters

I finally found some GQ info, under the 2010 Profile of General Population and Housing Characteristics for the city of Flint:

RELATIONSHIP		
Total population	102,434	100.0
In households	99,241	96.9
Householder	40,472	39.5
Spouse [6]	9,359	9.1
Child	32,944	32.2
Own child under 16 years	23,130	22.6
Other relatives	8,801	8.6
Under 18 years	3,766	3.7
65 years and over	610	0.6
Nonrelatives	7,665	7.5
Under 18 years	727	0.7
65 years and over	234	0.2
Unmarried partner	3,747	3.7
In group quarters	3,193	3.1
Institutionalized population	968	1.0
Male	764	0.7
Female	224	0.2
Noninstitutionalized population	2,205	2.2
Male	1,252	1.2
Female	953	0.9

Note that the figures are a little different here, compared with the previous message I'd sent from the 2014 ACS 5-year info.
I will check to see whether this info is also available at tract and then block group level, allowing the locations of group quarters to then be approximated and joined into the dot density household map we just worked out.

From: Sobocinski, Mike (MSP)
Sent: Wednesday, February 10, 2016 1:46 PM
To: McCormick, Matthew (MSP)
Subject: Flint Group Quarters

I did a check of 2014 ACS (5-year) data for the City of Flint, and it reports about 2511 persons living in group quarters. Lower than I'd guessed (fewer dormitories there than metro Lansing has), but still significant, because I believe that these 2511 persons would not be showing up either in the household figures OR in the poverty assessment figures.

They may have discontinued the breakdown by group quarters type. The latest entry I see for that was 2009, and even then it didn't pull up the data when I clicked on it.

By the way, within the next few weeks we might be receiving a stack of 5 plans to review (Clare, Roscommon, Isabella, Gladwin, and Iosco).
I recently reviewed some submitted drafts of the action sections of these plans, which looked great. So the plans are nearly complete and I encouraged them to finally be sent in for review. (Their planning grant expires in 7 months.)

My estimated schedule this week:
Thanks,
Mike

This week, February 8 to 12:
Section updates:
- 3 hours annual leave Tuesday PM, February 9 (Sobocinski)

Key Activities:
- Finish up revised MI-CEMKR PowerPoint presentation and send to Amanda Bresler (Sobocinski)
- Coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters/inquiries from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)
- If needed, work on Flint emergency declaration activities (Sobocinski)

External Meetings:
- Attend Student Michigan Association of Planners conference as professional mentor: Wayne State U, Friday afternoon (Sobocinski)

This week, February 15 to 19:
Section updates:
- 3 hours annual leave Tuesday pm, February 16 (Sobocinski)
- Monday holiday (unless participating in SEOC activation on that day) (Sobocinski)

Key Activities:
- Coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters/inquiries from FEMA and local programs, as received. (Sobocinski)
- Thursday Feb. 18: 11am RiskMAP conference call, 12:30pm-2p webinar
- As time allows, expand presentation on climate change, for official review (Sobocinski)
- If needed, work on Flint emergency declaration activities (Sobocinski)

External Meetings: (no items)

Subject: Additional DCDS Coding - City of Flint
Attachments: Activity Tab DCDS.png

Good Afternoon:

The State Budget Office (SBO) has requested some additional coding in DCDS for staff that work on the City of Flint Water Emergency. We will still be coding all overtime costs to PCA 28670. But at their request, we will also be utilizing the "Activity" code in DCDS.

To enter Activity Code

- Open Employee Data Collection
- Click on **Activity Tab** of DCDS timesheet
- On the Unit Entry tab, under Activity column at left, enter F in drop down box and select **FDWP** when it appears.
- Enter total of "**regular and overtime hours**" related to the Flint Water emergency in cell for each date worked.
- These hours should match the total hours for each day you have entered into your timesheet.
- Save when you have entered your activity hours.

Again, this is only for hours spent working on the City of Flint Emergency and should begin with this current pay period. Please let me know if you have questions.

Thanks,
Penny

Subject: It's Time to Move!
Attachments: GOB Parking and Entrance Map.pdf

It's That Time! It's Time to Move!!!

As you may be aware, the **State Emergency Operation Center (SEOC)** will be relocating from 4000 Collins Road, Lansing to 7150 Harris Drive, Dimondale (known as the General Office Building – GOB) on Friday, January 29, 2016.

All EMHSD staff ASSIGNED to work in the SEOC on Friday, January 29 for the Flint Water Emergency need to report to the new facility at 8 a.m.

Please park in the standard area and enter at the main entrance of the GOB (see attached parking and entrance map). EMHSD staff will be on site by 7:45 a.m. to greet and escort you to the new SEOC.

Please be patient as we all learn our way around, and with new equipment. It may be necessary for us to assign "temporarily" locations of computers in the SEOC; therefore, your position may not be located in its permanent sitting position until early next week.

It has been mentioned to those working within the SEOC, it is important that you secure documents and files you may have stored on the PC's or desktops at Collins Road by saving to a memory stick or you may also talk to the IT support within the SEOC (Rich or Jaclyn) about saving information to the S Drive. You will most likely be working on a different PC, and we want to ensure you have the files you need to continue operations with as little interruption as possible.

Please return your ADT access card for Collins Road, by Thursday night. A container will be placed near the SEOC sign in-sheet for this purpose.

New phone numbers will be established in the SEOC and will be provided as soon as permanent locations are set. Until then, we recommend using your cell if someone needs to contact you.

EMHSD Staff not assigned to an SEOC position on Friday, January 29

By COB Thursday night, our janitorial staff will provide blue recycle bins throughout the building – marked for "trash". Please remove all trash by 10:00 am on Friday and place in these designated bins. She will also leave an extra trash bag in your office. Place this fresh trash bag in your wastepaper basket as this will be used to pack your PC accessories for transport.

Please report to Collins Rd at your normal time on Friday, Jan 29. This will be the final day in this building.

Jeans will be permitted on Friday, Jan 29 and Monday, Feb 1 if you are NOT assigned to the SEOC.

DTMB will begin tearing down computers early Friday morning, thereby making worktime on your PC uncertain. **Please accomplish tasks that need to be completed via your computer by COB Thursday.**

All EMHSD Staff that are remaining at Collins Road please report to the Kitchen at 8 a.m. Friday morning for a briefing. Friday will be used to scan the entire building to ensure all items are packed and ready for transport.

As noted previously, we **MUST** ensure there are no paperclips, staples, etc. left in our areas. All drawers, cabinets, shelves, and floors should be double checked. Refrigerators will need to be cleaned once again; NOTHING CAN BE LEFT BEHIND except for furniture that is not being relocated to Harris Rd.

An area has been designated in the kitchen for surplus....it is hopeful that you will not have much left by now, but if you run across small items that have been missed and are intended for surplus, please put them in this area. If it is a quality, useable item, please pack it for transport.

Please ensure you have updated your voice mail message with your new phone #, noting that it will be effective on Monday, February 1. You will be able to check voicemail from Collins Rd for a very short time once we move.

Please leave your ADT access card at the desk of Pam Strobel before you leave on Friday.

You will report at your normal scheduled time to 7150 Harris Drive, Dimondale, MI on Monday, February 1. **Please DO NOT come in over the weekend as the movers will be unpacking and placing items throughout the weekend.**

Please park in the standard area and enter at the main entrance of the GOB (see attached parking and entrance map). Greeters will be on hand to welcome you to our new work site and find your designated workspace. Assistance will be available throughout the day to help with computers, phones, etc. if needed. A welcome mat will be on your desk indicating key items you need to be aware of. Please take a moment to look it over thoroughly.

This has been a big project for all, and we are confident you will find the new division location a welcoming and efficient area to accomplish all that you do. Be patient as we become acclimated. New phones and new workspace will take time to get accustomed to.

Thanks for all of your patience and hard work. It takes EVERYONE to ensure a smooth move.

If you have any questions, please contact me.

Thank you,

I had heard that claim but there were so many aspects of the event that I didn't have a chance to check it against other sources. I'm not sure what causal mechanism they might have claimed. There are different rusting processes, and clean water causes rust too. http://www.capitalsteel.net/news/blog/why-does-steel-rust-plus-other-steel-rusting-questions-answered
"Steel will rust immediately when being exposed to moisture and air. How quickly steel rusts typically depends on how much steel is exposed to moisture and air, the levels of both moisture and air, and whether or not any protective coatings are present (we'll get to that later)."

Subject: RE: southeast Monroe

Thanks. It might not have to do with the water system itself, but might just be a group of housing units with old unreplaced fixtures, flaking lead paint, or some other issue. But if it does relate to infrastructure, then I'd like to include an item in the hazard mitigation plan recommending that their next master plan update seek funds from CDBG or some other source to upgrade and address the problem.

Subject: RE: urban

The method will vary across jurisdictions and regions... I can provide input on the issue and strongly advise that it be considered. But technically it isn't a named FEMA requirement, although FEMA's request to consider pandemics could be stretched to include all kinds of public health emergencies. Since this is the first declared emergency, but many plans were just recently completed without much consideration of the topic, there would be a period of years for the most populous communities to wait for their next plan update. A lot can happen during that time, and implementation money wouldn't be available through FEMA's hazard mitigation grants. So in the near-term, a schedule of expiring HM plans and a schedule of updates to master plans could be compiled for at-risk communities, and thus form a timeline for outreach to encourage consideration of the issues. It could be a very good task for Mitch to compile info about the deadlines (which would take quite a while) for the areas identified on that map. Then viable funding sources should be identified, and multiple memos could then be distributed to planning areas that seem to have different types of risks – the hazard mitigation planning focus would probably only need to address a certain type and scale of risk, such as those stemming from aging infrastructure systems. Therefore, a rural U.P. memo (if it seems to be appropriate) would be different from a memo that addresses the large historic cities in the southern Lower Peninsula.

The list of places and plan expiration dates (both master plans and hazard mitigation plans) would become a guide to organize the outreach to planners & EMCs, providing recommendations to seek potential funds that seem appropriate.

To: Weber, Thomas (MSP)
Subject: urban

Hello –

I'm not sure whether any use has yet been found for the background text I had provided to you earlier this month, framing the current emergency in the context of long-term historical trends involving our older urban areas, but as part of longer-term planning beyond the current emergency, a broader approach should probably be taken. Our own internal news/media overview emails have pointed to various articles (e.g. below) referring to detected lead problems in other areas. Such problems do not necessarily stem from those urban water systems (i.e. paint, faucets, and pollution effects might be bigger causes in these areas) but it is something that probably needs to be put on a list for consideration, especially since there is such a large population living in the older urban districts where some indications of a problem have been reported, as in the following report summary:
http://bridgemi.com/2015/12/far-from-flint-lead-remains-an-irreversible-scourge/

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

A speaker has been scheduled by MSU next week about the Flint situation.
I'm not sure what the tone will be, although the inability to distinguish between "lead" (Pb) and "led" (past tense) in the description suggests that it might have been thrown together opportunistically.

- Complete EMPG quarterly report work, plus sending the local plan tracking document/map to District coordinators
- Thursday 11am RiskMap kick-off conference call for Allegan County (Sobocinski)
- Evaluate, purge, sort, pack accumulated office materials, in prep for move (Sobocinski)
- As time allows, work on MI-CEMKR revised PowerPoint presentation (Sobocinski)
- As time allows, coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings: (no items)

Next week, January 25 to 29:
Section Updates:
- 3 hours of Annual leave Tuesday, January 26, starting 2pm (Sobocinski)

Key Activities:
- Activities as needed for Flint emergency declaration work (Sobocinski)
- Wednesday AM section meeting (Sobocinski)
- Evaluate, purge, sort, pack accumulated office materials, in prep for move (Sobocinski)
- As time allows, work on MI-CEMKR revised PowerPoint presentation (Sobocinski)
- As time allows, coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings:
- Friday AM Silver Jackets coordination meeting, at USGS Lansing office, 6520 Mercantile Way (Sobocinski)

JOIN THE MSP

Mike Sobocinski's notes on January 15, 2015 - 2nd daily SEOC briefing (4:00am):

MSP SEOC Planning Section (Amanda Bresler): Goes over upcoming battle rhythm items.

MSP SEOC Operations (Gabe Covey): Must ensure adequate supplies at the pods and the warehouse. Obtain volunteer numbers for tomorrow.

(Health and Environmental Branch: includes the next several agencies, including Red Cross)

MDHHS (Kathy Wald): Getting addresses for medically dependent persons. Following up on "the lab issue from this morning." Offer from SAMSA (?) to activate hot line. [A couple other items, too fast to capture in notes]

MDARD (Brad Deacon): Training staff to be able to test samples, prepare and visit sites.

MDLARA (Alisha Gensler?): Helping DEQ with school water testing. [1st comments to fast to capture in notes]

MDEQ (Jen Wolf): Plan coordinator is establishing teams for the school water testing. By February 6, the whole program will be running, but by next weekend, (some initial more urgent parts of it will be implemented?) 2600 test kits left in the pods (?something about 2 days?). About 1100 test kits coming in today. Have ordered another 28,000, to arrive in the next couple of weeks. The total amounts to more than one test kit per Flint home since the declaration started. Labs are staying open on the weekend and the Monday holiday.

"Human Services Branch" (Rich Thelen): Processing filter and replacement cartridges – more than 30,000 each. Requested after-hours contact person [I didn't catch where or with whom].

MDOE (Kevin Walters): Working with Civil Rights for student and staff counts for all educational institutions, to deliver the EPA message.

MDHHS (don't know who?) A few I-Pad "hiccups" were clearing up well this afternoon. (Jeannette Doll, MDTMB: over 30,000 [of something] are available through Home Depot.)

MOSA? "Aging and Adult Services" (Steve Betterly): We've sent more than 80 additional addresses to GIS, from the local area agency on aging, for mapping. Working on the Recovery Resource Guide.

ARC (Paul Spata): Operating the Volunteer Reception Center, putting supplies in the field. Coffee was being provided for volunteers, the JIC, etc., and tomorrow this will expand to actually provide meals. 20 volunteers are assigned tomorrow (for kit assembly?) The warehouse and inventory management activity continues.

MSP Public Safety (Matt Bolger): Working on distribution mechanism with ARC. Want to pre-load trucks during the night. Over 50,000 homes visited [if I caught this information correctly]. Volunteer staffing numbers were provided for the coming 3-day weekend period.

MDOC (don't know who?): Adding two 24-foot trucks and drivers. Working to add 5 more for the next operational period.

MDMVA (don't know who?): 34 soldiers active—a couple in the Genesee County EOC and the JIC, and the remaining 32 distributed across the 5 pods.

MDTMB (Jeannette Doll): Received notification of more than 300 identification badges ready to be used this weekend. 30 additional I-Pads, which SEOC GIS will load software onto. A dumpster is headed to Clio Road. Notify that additional traffic will be going to the state lab over the weekend.

Local EOC EMHSD liaison (?garbled name over phone?): Working to re-establish local fire stations as (distribution/receiving points?). (Capt. Kelenske: The mayor said that samples will not be received there. We must have a consistent message on this topic.)

MSP SEOC Logistics Section (Wendy Galbreath): Two sites are still open, but are moving to consolidate to one at Clio Road warehouse. We want 4 out of the 20 vehicles to be pre-loaded tonight—only 4, so that water won't be frozen in the outdoor temperatures. Rain parkas are on their way to ARC and EOC locations.

MSP SEOC Planning Section (Amanda Bresler): [something…] warehouse data, app numbers, [something else] numbers should therefore be available here to analyze.

SEOC Recovery Branch (MSP Brianna Briggs): Good progress today. Plan in place. Supply the pods first, then the teams. Pre-load vehicles with potentially everything needed throughout day, with a resupply then available if needed.

ARC (Lauren Twohig): We want to increase resource teams and daily volume, to increase the number of households reached.

PIO (Nicole Lisabeth): Capt. Kelenske gave a legislative briefing. We updated the talking points. We'd like to issue a news release containing specific numbers on personnel and resource distribution, but we still need to confirm some of these numbers before the press release can be made. The ARC news release will probably be delayed a couple of days. The MING could still get a news release out today. MDHHS has new blood level test results, to be placed online as soon as possible. An inquiry was received from Jackson, MI regional HHS regarding donated water plus a Wal Mart truck, but it is best to have a coordinated statewide response over separate individual agency activities. Media were at the Genesee County office building all day today, due to Governor and Mayor meetings. Still awaiting a city PIO at the JIC. Updating web site information on 2-1-1 and other topics. Confusion exists regarding FEMA, which is not actually a source of the water so far. The JIC is getting requests (media and legislative) for the presidential declaration request letter itself. The Governor did release yesterday's letter to Detroit newspapers. (Capt. Kelenske: concerned that information from such a release is not final, and therefore will require clarification.) We're requesting better coordination with Governor's office, etc.

Capt. Kelenske: SEOC operating hours are still 8am to 8pm until the situation stabilizes. Please arrange staffing for your agency. Leave contact information if not directly represented by a person at the SEOC. The JIC should be prepared for an upcoming legislative call with the Captain and FCO, when a response is received on the declaration request. We want to increase MING staff from 50 to over 65, but that will need to be approved first. A group [I didn't note who] is doing some sort of mobile testing in Flint. There was an SEOC briefing on stress and emotions, providing handouts with tips—take a minute to obtain and read those. The Lieutenant-Governor is here.

Lt. Gov. Brian Calley: Offering thanks and appreciation. The anxiety level in Flint is being reduced. As immediate needs are being met, longer-term aspects can be more focused on. Thanks for the high level of professionalism under trying and difficult circumstances.

MSP Amanda Bresler: Situation reports due at 6pm. Next briefing will be tomorrow at 9:30am.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 15, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning Section (Amanda Bresler): Reads off the battle rhythm for the day. Yesterday's IAP was approved.

MSP SEOC Operations (Gabe Covey): The top priority today is tracking to ensure that adequate staff and resources are in the field. We are setting up the Water Resource Teams for the weekend. The Governor had asked for a declaration of both an emergency and disaster by the federal government yesterday. Working to improve coordination with JIC.

National Weather Service (Jim Askow sp?): It will be about 40 degrees F all day today but afternoon rains will cause some slippery conditions. Temperatures drop tonight. It will be very cold Saturday through next week. Standing water will freeze in place tomorrow morning. Sunday's high temperature will be about 15 degrees F. Becoming breezy on later days, through next week, again resulting in circumstances in which exposed skin risks frostbite in 15 to 30 minutes outdoors.

Capt. Kelenske: We have intended to give credit to all who were involved, but some agencies were recently missed when trying to list them all.

(Health and Environmental Branch: next several respondents)

? (Kathy Wald): The CHECC will be open Saturday, Sunday, and Monday, helping with the county phone banks on those days. Coordinating with GIS regarding those who are dependent upon medical equipment in their homes. Data is being obtained and provided to GIS. Genesee County Health Department requesting 10,000 copies of an EPA document, so MDTMB will arrange (Capt. Kelenske: or EPA itself can provide them).

MDARD (Brad Deacon): Prioritizing food facilities for follow-up next week. Coordinating with DEQ.

LARA (?): 20% of the 244 health facilities [something - Too fast for notetaking]

MDEQ (Jen Wolf): Working on teams for the plan [for? and?] testing water [at schools?]. Logistics of 10,000 water bottles' assembly and distribution.

"Human Services Branch" [MDHHS? (Rich Thelen?)]: Filter and cartridge numbers were stated. Reordering is necessary today. Met with Finance, figuring out stuff with others. (Capt. Kelenske: Yesterday there was a budget meeting with SBO [?].)

MI Dept. of Education (Kevin Wolff?): Coordinating with private and parochial schools. [something else; didn't catch it]

Dept. of Civil Rights (Mark Bishop): The EPA document is available online in multiple languages, has been handed out at schools. Would be good to coordinate with these other agencies and order more copies to meet everyone's needs.

? (Brian ?): door-to-door [something - TOO FAST FOR NOTETAKING!]

State Office Services to the Aging (Steve Betterly): The Valley Area office (and Kathy Bolz) referral issue has been resolved by MSP Michelle Kuzera. 400 new addresses of "my choice waiver clients" [?] were received and forwarded to GIS. Information on independent and assisted living facilities in Flint (non-regulated congregate settings) to overlay onto the existing heat map. Received question on

Legionnaire's Disease—any connection known? (Capt. Kelenske: no known connection. May need to put out a statement from DHHS or the Governor for PIO use.) Question on whether the heat map (by Dr. Mona Hanna-Attisha) is available to the public. (Capt. Kelenske: It is already available, open source.)

American Red Cross (Paul Spata): Many persons are asking about Legionnaire's Disease at the Flint fire stations. (Capt. Kelenske: Again, we will check this morning with the Governor on how to keep these topics disconnected. It's okay for fire stations to refer people to the web site, but there's a problem with providing handouts there and connecting the topics.) Five sites were staffed by ARC yesterday, but the MI National Guard takes over the staffing today. ARC is supporting the Water Response Teams today, and continuing to operate the Volunteer Reception Center. Supporting the distribution of materials, and providing warehouse operations management.

ARC (Lauren Twohig): Describes some sort of coordination. [Too fast for notetaking.]

MSP (? Over phone): States various numbers of volunteer state employees. teams are in the field, in wards 5 to 7 of the city. The ARC has an additional 5 teams, focusing on Ward 6. The I-Pad issue was partly the result of low temperatures, and partly related to software and operator handling of the software. Working with MDTMB on software to prevent I-Pad problems. (Capt. Kelenske: If there is a way to weatherproof them, let us know how to help.) Could use rain ponchos. (Capt. Kelenske: Will do.) Various sign-ups so far for working on Saturday (24), Sunday (39), and Monday (46). Working with Penske on truck donations.

MI Dept. of Corrections (?): Total of 14 vehicles including a handicap-accessible van.

MI National Guard (Lt.-Col. Randall): "O and O" [?] at local EOC. Have been transitioning into pods, which is going well. (Capt. Kelenske: TAG discussions—will provide info separately, soon. No tents are to be used.)

MDTMB (Jeannette Doll): Specialized items are available at the Mundy Township Home Depot, to use in the pilot (such as water bubblers). Volunteer identification badges should be available today. (Capt. Kelenske: We'll discuss re: "Volunteer" on badge design, since not all workers are volunteers.) Something was also said about fuel cards and employee "Survey Monkey" [unclear].

Attorney General (Peter Manning): Will be submitting some legal questions.

MSP SEOC Logistics Section (Wendy Galbreath): Working with Jeannette Doll (MDTMB) on the *consolidated warehouse. Today is day 1 of the plan.*

MSP SEOC Planning Section (Amanda Bresler): Situation reports due again by 6pm today.

MSP Recovery Branch (Brianna Briggs): Working on the weekend team logistics, and on identifying standardized information to be submitted daily (rather than repeatedly asked for).

PIO/JIC (Nicole Lisabeth): The Governor stopped by at a fire station, unannounced. Positive media regarding the federal declaration request that was made. No known media errors identified lately. A legislative briefing occurs today. There have been a couple requests for the presidential request letter (Capt. Kelenske: Not available publicly yet. Its release is to be discussed first for approval.) Today there are 3 news releases. Potential on Saturday for [something]. Attorney General Schuette: sending out some info on his investigation. Today there is a Time Magazine interview with Dr. Eden Wells. Please notify the JIC of any agency messages that are being sent out. A Governor's statement is being made

today about returning additional powers to the Flint mayor. The Genesee County Health Department is on furlough right now, so people should dial 2-1-1 instead.

MSP Capt. Kelenske: At about 11am, 50,000 phone lines in Flint will receive a message from the Governor. This could cause a spike in calls to 2-1-1 as well as in the demand for supplies. Would like to get a briefing to the Mayor of Flint and to the Governor, summarizing agency actions. Please send bullet points to Gabe Covey (MSP Operations Chief) for him to assemble for this list of specific things being done. More items are better for the list, but each item should be short. SEOC hours will continue to be from 8a to 8p on Saturday, Sunday, and Monday. The #1 focus is on the pods, for distribution of water resources to Flint. If necessary, the field teams will support these pods if there is a need.

Good Morning,

Attached are the guidelines for entering your time in DCDS by coding block for those of you that are working **overtime** for the City of Flint Contamination/Shortage event. Please use **Index 28900 with PCA 28670** for overtime worked for this event. Do not use these codes for your regular hours.

Please contact one of the division timekeepers if you need additional guidance in entering the special codes for recording your overtime worked on this special event. Division timekeepers are Michelle Gilsdorf, Richard Sheaffer, and Nancy Downs.

Thank you,
Nancy

Subject: Coding for City of Flint Water Contamination incident

Good Afternoon:

For any **overtime hours** spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Any non-payroll costs (travel, SEOC meals during activation, etc.) should be coded to:

Index 28900 with PCA 28671.

These codes are not yet active in DCDS but will be by the end of the week. Please let me know if you have any questions.

Thanks,
Penny

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 14, 2015 - 2nd daily SEOC briefing (4:00am):

[NOTE: The initial tactics was much too rapidly paced to take notes on, and its content should be available once the ICS 204 forms are all submitted.]

(Health and Environmental Branch: first several respondents, including Office on Aging)

DHHS (Jennifer ?): Working on nutrition plan and behavioral health work.

MDARD (Brad Deacon): Food guidance went out in today's mail. Now working to prioritize sites in the most at-risk zones (the redder zones on a map) for forthcoming inspections.

MDEQ (Jen Wolf): Only 80 samples are present at Flint, perhaps because the only two collection sites for them are at City Hall and the Water Treatment Plant, and the plant might not be on the bus transit routes. May need to make fire stations into collection points, but indications had been that they didn't want to be responsible. The governor wants 8 teams—staff is needed who have some scientific background. Many bottles are coming in (overseen by American Red Cross?) Lot testing is needed to verify bottle cleanliness after they've been received from the vendor.

MDLARA (Karen Towne): Supplies were received. Pilot project installation to occur Saturday, with testing on Sunday.

MDHHS (Brian Wilson): Volunteers in the field have been receiving a lot of positive feedback from the community. IPad operation was much better today—fewer delays.

American Red Cross (ARC) (Lauren ?): Standardization of water response teams [??Can't be sure this completely represents her statement. It went by too quickly!]

ARC (Paul Spata): Continued to staff the 5 fire stations. Coordinating with MING regarding their staffing over the weekend.

State Office on Aging (Steve Betterley): Coordination of referrals problem was successfully solved by Michelle Kuzera. Still in the process of identifying senior addresses in Flint who may need assistance.

MSP Public Safety: [some 2330 number rattled off along with a bunch of other stuff. Possibly the number is a cumulative number of doors visited to date by field teams??. Way too much info, presented in too fleeting a manner to capture any of it in written notes. ☹☹☹☹☹☹☹☹☹☹☹☹☹]

MDMVA/MING (unidentified speaker in SEOC): Hotel rooms confirmed for 35 [something - soldiers??] who will be there. Each pod is to have a government phone (and?) Blackberries. List provided to planners. Providing liaison to local EOC and a PIO to the JIC.

MDTMB (Jeannette Doll?): Four U-Haul trucks were obtained. Working on resource requests all day.

Local EOC MSP Liaison (Lt. B.J. Roach): Working with churches to coordinate. (Capt. Kelenske: Is a person available to handle that duty and thus free her up for many other tasks?)

MSP Logistics (Wendy Galbreath): Many requests regarding volunteer donations. Penske offered 15 to 20 trucks, Dean transportation has drivers available. Confusion regarding whether to go to EOC or to GCCARD, but that's now cleared up. MSHDA's 24 Flint properties are to get filters installed. "Zero water" [??] news event—to offer match (i.e. donations?) of filters.

MSP SEOC Planning (Amanda Bresler): Logistics resource plan and IAP work today—need info as soon as possible. Situation reports are due by 6pm.

MSP Recovery Team (Kriste Davis): Planning involving the teams and coordination (mostly covered by others).

JIC/PIO (Shannon [illegible]): The email for state employees has been drafted, and is being reviewed. Several media requests received for warehouse events but need to be delayed until the transition is done and the warehouse is operating smoothly (in about 2 days?). Found no major media errors today. Many questions are pending and the list of them is growing in number—need info from the SEOC to answer them—especially needed for rumor control, since the same questions are being asked by activists. Trouble getting in contact with local community PIOs and need help to contact them. (Capt. Kelenske: need documentation of unsuccessful contact efforts, and submission of an actual list of questions; a follow-up call will occur on this topic.)

Capt. Kelenske: Met with TAG ([illegible]) today—General Vadinez ([illegible]). There's an issue involving used empty water bottles—a recycling system needs to be provided (regardless of whether it actually receives widespread use) so there isn't an issue with empty bottles everywhere. West Virginia has an after-action report which probably has good ideas about handling this. The next briefing will be tomorrow at 9:30am.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 14, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning (Amanda Bresler): A 10:30am distribution process meeting has been added to the battle rhythm. Today is a "planning day" [this phrase was still not clearly explained but might refer to the development of a new IAP]. 12:30pm submission deadline for the ICS 204 form. Developing the IAP for the next operational period. (Numerous objectives were read aloud.)

MDEQ (George ?): There's been a question of when the water is to be considered safe. A tentative SEOC answer (*not for public dissemination yet*) – since the question is complex, it will result from a consensus decision of all major partners, including locals. Copper and lead rules: a new 6-month monitoring period has just begun in Flint, involving a June 30 deadline for 60 samples to be tested for Cu, Pb. This routine schedule is of course too long for our current circumstances. Since December 9, phosphate supplements had been added to discourage pipe corrosion, rebuild a protective layer. There's a meeting with the Flint mayor regarding various system access points beyond the Pb and Cu rule's minimum test requirements. Seeking resident volunteers for monthly water test, to start analyzing trends over time. (Capt. Kelenske: It's being asked during the door-to-door visits, and over 60 so far have agreed. This info will be sent to DEQ.)

MSP SEOC Operations Section (Gabe Covey): An additional 80,000 square feet of warehouse space has been secured.

National Weather Service (Jim Askew?): Temperatures go up to the freezing point today. A mixture of snow and drizzle with the potential for icy roads where roads have been left untreated. Tomorrow from about 11am until about 6pm we expect rain showers, with the high temperatures around 40 degrees F. Not too much rain, a little ponding potential. Then from Friday evening, a little snow, as Saturday temperatures would be back down in the teens again and also during next week. Just one brief warm-up over the next day.

(Health and Environmental Branch, next few agencies)

MDHHS (Jennifer ?): Subject matter experts are in the CHECC working on yesterday's question regarding emergency vs. disaster eligibility of a particular program under the Stafford Act. Working on the stress effects of the event upon mental health. Developing educational materials and messaging. Developing short and long-term goals regarding the "food desert situation." [NOTE: Afterward I gave her my contact info to join discussion of definitions and alternatives related transportation access ideas such as providing paid bus passes to improve food access.]

MDARD (Brad Deacon): A revised handout was approved and is being mailed out to food service locations, and web posting. Inspections of these locations will begin.

MDLARA (Karen Towne): Something about a pilot project (involving, or in addition to?) insulation and retesting. There's a question involving licensed in-home child-care facilities (up to 6 kids?) and asking them whether they want to be water testing sites. Will research whether the authority exists to require testing.

MDEQ (Jen Wolf): Ensuring the transport and storage of water test kits. Heard a report of non-residential (e.g. businesses) told that the kits were only for residential units, but this is not true and therefore must be corrected. Test kits, etc. are free to all, not just residential: "No one gets turned away for anything."

MDHHS? (Richard Thelen): A database with more than 17,000 addresses was supplied to the GIS section. 2-1-1 inquiry regarding whether State Emergency Relief (SER) is available. Will need to develop messaging on this topic, to explain to everyone what it is and what is available.

Lauren (Loren?) of the American Red Cross?: A logistics pipeline plan [is/was/is being?] developed.

American Red Cross (Paul Spata): Volunteer Reception Center was opened but not yet publicized, because it's first day was to test its processes to ensure they will be up to speed. About 6 volunteers were processed yesterday. Today, it should be fully open. Ten emergency response vehicles were staged to support the response teams in the field.

Department of Education (Louie Burgess): Receiving calls from federal level regarding things like unlicensed child care centers (residential, for up to 4 kids at a time). Checking into information for those inquiries. A 17-level departmental director is now on the educational planning team. The department is seeking contact with the Flint school district for something... [very unclear]

MDHHS (Brian Wilson): Volunteers remain active in Flint.

State Office on Aging? (Steve Betterley): Sent at least 500 additional names to GIS staff yesterday. The Valley Area Agency on Aging raised a question regarding GCCARD: something about it not being involved in something [I didn't discern the details in any coherent way], and Michelle Kuzera, MSP representative at the local EOC, will follow up with Kathy Bolz (sp?) to resolve the issue. Getting information on Medicaid waiver clients. Teri Simmons (sp?) will represent this office for the 4pm briefing.

MSP Public Safety (Inspector Bolger): MSP is at the local EOC. [Phone-in participants interrupted numerous times with information; I'm not totally sure who said what in the end.] Buses are being used to shuttle residents. 36 MSP volunteers available today for Flint activities. Adequate filters and water are on hand right now (at least 1000). Wrapping up with the southwest side of Flint today, and proceeding to the north and northeast sides starting tomorrow. Discussion about different teams having different sizes, creating confusion over estimates of how many total persons are on them...between 4 and 15 persons per team? (Captain Kelenske directs a standardized number on each team, with accurate summary info presented to him in writing. A 10:30am follow-up call was agreed to.) Obtained trailers were not all adequate for their required purpose, such as being open-top trailers—situation must be resolved.

MDMVA / MING (?): All went well yesterday with the National Guard soldiers posted at the fire stations. More than 30 troops are being used today. 1pm media address occurring today. Tomorrow at 9am, 3 soldiers will be assigned to each fire station.

MDTMB (Jeannette Doll): Getting water moved over to Clio. A water-order program is in process. U-Haul trucks are being ordered to fill the MSP resource transportation needs. Have upgraded now to a $30 million Home Depot contract. Replacement filters are important for long-term recovery.

Local EMHSD Liaison [MSP's Michelle Kuzera?]: Working on planning tasks and processes for the homebound.

MSP SEOC Logistics (Wendy Galbreath): Site visit took place yesterday (with Lauren) to check into new locations. Three locations are now moving toward one large location at Clio Road, which has its own experienced crew for loading and unloading trucks, plus a Red Cross warehouse manager. Daily logistics meetings now occur at 10:30am (brief) and at 7pm (longer). Court Street and GCCARD will have their resources moved to and consolidated at Clio. (MSP's Kriste Davis: Mission-ready packages MRPs. Working toward standardized teams of similar size, plan being pushed up to work on it today. Yesterday's final numbers turned out to be 492 occupied homes visited (total 653, implied to include vacant ones).) About 2 minutes per door – a good rate of field work.

PIO/JIC (Shannon ?): Reviewing fact sheets. Michigan Association of Broadcasters sending radio PSA today. Received a request for door-to-door team credentialing (with official ID). If this is to be used, info will be needed for official distribution. (Capt. Kelenske: Each team has either a sheriff or MSP vehicle, "marked unit car." Someone else: the problem may be when teams cover an entire block, with the 1 vehicle not easily visible to every household.)

MSP Planning (Amanda Bresler): Improving the pod technology thanks to MSP James Tchorzynski's work there. Meeting with agencies to help with ICS 204 forms. 6pm situation reports are due. Next briefing will be at 4pm.

Capt. Kelenske: Senator Arenic(?) was met with and shown the SEOC; appeared impressed.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 13, 2015 - 2nd daily SEOC briefing (4:00pm):

MSP SEOC (Brianna Briggs): leads the meeting: Agency situation reports are due by 6pm. "Tomorrow is a planning day." [No explanation for this statement was provided!] Agencies, be sure to update 204 forms tactics, especially pods, teams, warehouses, etc.

(Health and Environmental Branch, next few agencies) MDHHS Community Health (Kathy Wahl [sp?]): Working on nutritional plan with several other agencies. Lori ([Laura?]) Sempler ([sp?]) will be the lead on that plan. Disaster behavioral health coordination is occurring, with CHECC exploring options, checking with DTAC at SAMSA [references not explained], targeted to Stafford Act qualifications. (Capt. Kelenske: does it qualify under an emergency such as this? This needs to be verified.) Some wording changes were suggested for the fact sheet.

MDARD (Brad Deacon): Mailing out food establishment requirements—about 800 of them.

MDEQ (Jen Wolf): Conversation about bringing more health people into the ([local?]) EOC.

M???: Two of the 5 trucks loaded with water filters are at the GCCARD. 10,700 filters, [two other large numbers were given for other types of resource there, rattled off too quickly for my poor & tired writing hand to keep up with]

American Red Cross (Paul Spata): Staffing fire station points of distribution. Further coordination with MI National Guard (MING) on staffing. Volunteer reception center was up today; numbers to be reported in the sit rep tonight. Fielding a request to feed field response teams.

MDHHS (Brian Wilson): Their volunteers are still in the field. Heard concerns about some IPads not functioning in the cold, then seemed to work better? Awaiting confirmation of replenished stock.

Offices of Services on Aging (Steve Betterly): Valley Area Agency on Aging has been fielding calls. Something fell apart regarding the schedule of water/filter deliveries—need to get in touch with local EOC on this. (Brian Wilson: probably fixed last night.) (Michelle Kuzera?: Local EOC confirms follow-up to occur [She disappears from phone suddenly, not to reappear]).

Capt. Kelenske: Any more personnel needed by the Sheriff's department for deliveries?

[Unknown replacement on phone from local EOC]: Being handled okay by the locals so far.

Capt. Kelenske: Consider replacing sheriff staff with area health and social work specialists, to better match staff with their expertise and free up sheriff personnel for their normal duties. (Services on Aging ([Steve?]): off-duty teams are available to help with phone lines and resource distribution.)

MSP: Working with MDOT for shuttle vans, working with Public Affairs re: state agency volunteers for the weekend.

MI National Guard (Colonel Reynolds): 1 full-time staff at each of the 5 "pods." Friday morning 9am will resume handing out water at the pods. 800 MHz channel. MING needed 33 volunteers, and actually

obtained 48. (Capt. Kelenske: Any feedback on public reaction or questions re: MING soldier presence? A: not known.)

MDTMB (Jeannette Doll): A warehouse has been located at another site. Red Cross and MSP Wendy Galbreath are checking it out as a replacement for the other site that had problems (Court Street school district site). Stuff is to be moved from the old to new site. Based upon truck loads, will be maintaining 8 truck loads per day through Saturday, available on Sunday too, if needed. 117,000 filters coming in, and 139,000 faucet (founts???). Tablets are coming in tonight to the EOC for GIS staff to download an app, then going to Flint in the morning. Information cards sent to Flint. 15 trucks are waiting. (Capt. Kelenske: They must offload somewhere and not wait.) Only 1 loading dock at each facility. Court Street won't work—told that it was vacant and had 80,000 square feet, but it was full. (Someone on phone, Jackie Hampton perhaps?, later announces that the site will be available tonight, after all. Commissioner Curtis had prompted warehouse emptying which is allowing trucks to be moved there now. Equipment and staff available to unload, with warehouse reportedly able to be cleared out tonight. A Dort Highway location is being investigated for suitability.)

Local EOC (unknown person): Information entry and radio [channels?] seem good. Only the issue of supplies waiting on the road (presumably: on trucks or in transport) must be cleared up.

MSP SEOC Logistics (Penny Burger): Working on trailers and vehicles from Department of Corrections, for door-to-door campaign. Coordinating with MSP for Thursday and Friday volunteers. Financial analysis being finished up—to be reviewed first by Captain Kelenske before submission.

MSP SOEC Planning (Zach Baker? Couldn't see across room.): Progress on tracking inventory. Sit reps due at 6pm.

MSP SEOC Recovery Team (Kriste Davis): Some numbers may not be in yet—issue of paper substitute for frozen IPads. 394 homes were visited yesterday, plus 378 more today, possibly more, once additional reports are processed. Even if number appears lower today, there was a smaller number of vacant homes today, so the actual number of inhabited homes is higher today. Working with the Red Cross this weekend for teams. Monday is a holiday. (Capt. Kelenske: Any info on community reaction? A: No info yet.)

JIC/PIO (Shannon Banner?): Media hotline saw a markedly increased number of calls, although it was not overloaded. Some media questions need answers to come from the SEOC. Good collaboration with 2-1-1, county, and state agency PIOs. Could use the local PIO today, though. From 11:30a to 12:30p there was a media briefing at fire station #3—very good media turnout, positive in tone. Waiting for the logo approval (from local and county) for the response team. (Capt. Kelenske: How is 2-1-1 doing—being monitored for success of call handling, good staffing levels, etc.? Nicole Lisabeth [JIC/PIO]: 2-1-1 is going well.

(Phone discussion regarding Legionnaire's disease report—unclear who the participants were.)

Capt. Kelenske: DHHS will handle those Legionnaire's-related questions through separate, normal channels, not through the SEOC or local EOC but through other channels, as a separate matter.

SEOC Planning Brianna Briggs: The next briefing will be tomorrow at 9:30am.

Subject: "food desert"

I collected a bit of data and just did some discussion about the conflicting definitions of "food desert."
I understand the consideration given in recent years to the concept of "food deserts" but so far I do not see much evidence that any part of Flint should probably qualify as having that problem. It's good that people are concerned, but I think their concerns should reflect realistic challenges and mainstream preferences, rather than idealistic ones proffered by a particular subset of researchers.

Some of the main issues include:

1. A homebound person by definition will not be able to readily access a good food grocery source even if it is located right next door to them (this is a disabililty/mobility limitation issue, not a supply or "desert" issue).
2. Unrealistic definitions which place too much emphasis upon middle class preferences for particular types of fresh produce stands, and don't accept the viability of other sources of the same nutrients (e.g. frozen vegetables, satisfying ethnic dishes rather than just traditional American "tossed salad" ingredients).
3. A narrow focus upon particular definitions of "walkability" that often does not take into account the transit system. Too many researchers presume that someone without a car is simply stuck—not considering the use of buses or getting rides from friends and family. Each public bus route in Flint (see map below) provides access to the downtown bus service center, which is near the farmer's market (for those who want/require fresh produce of a certain type). One of our viable response options could be to provide bus passes to those who don't otherwise have decent transportation options in the city. The question should therefore shift to figuring out whether in-need persons live within a certain range of transit stops, or whether they are adequately served by shuttles, meals on wheels, etc, rather than whether there is a qualifying grocer within a walkable radius of every home.
4. A blanket categorical dismissal of certain kinds of food sources as either nutritionally inadequate (e.g. so-called "fast food," as if it's all the same and all unsuitable), or overpriced (i.e. as if *all* restaurants are necessarily a form of luxury spending that would be of no interest to persons of low income).

From my own first-hand experiences living in poverty in Lansing with no car, I find that most persons in Michigan cities who want a nutritionally balanced diet have ways of satisfying it. Ways which many researchers apparently could not think of. One of the real complications in any case (whether walking to a nearby food market or taking a bus to Meijer) concerns crime and people's fear of it, which realistically forms a separate issue.

In my experience, the correct approach to exploring the topic is not to seek to define places as being a "food desert," but to realistically assess what challenges each resident might face when obtaining food for a healthy diet. Those who own and can use their cars will not have much of a problem accessing whatever foods are in the whole urban area. Those who have friends/relatives with cars might not have much of a problem, either. Those who are homebound clearly would need help, but this would be true regardless of whether they're in a "food desert" or not. Those who don't have the use of a car should be assessed as to whether they have viable access to transit. In the city of Flint, there appears to be pretty good bus route coverage. There are also a lot of restaurants and small groceries. Not all groceries are necessarily carry a full array of food types, of course, but their quality should not be pre-judged (by researchers or by formulas) as "bad" merely due to their relatively small size (or by their sales of tobacco and alcohol – after all, huge places like Meijer also have huge alcohol sections). Some restaurants are certainly overpriced, but again not all restaurants should be presumed to be completely unaffordable to the poor. After all, this is why places like McDonald's and Wendy's have "value" or "dollar menus" – these cost more than they would at Meijer, but are frequently used by patrons with very tight budgets. And even though these places do offer a lot of high-fat, high-sodium foods, it doesn't mean that someone who actually seeks a balanced diet can't find any decent food there. McDonald's discount menu,

for example, offers a side salad and a fruit yogurt cup. Plain baked potatoes, chili, etc. are quite affordable at Wendy's. A Subway vegetarian sub is pretty wholesome stuff. Yet, strict researcher definitions have confused overall consumer preferences with the "unavailability" of nutritional food, and many "food desert" studies have dismissed viable nearby food options out-of-hand, categorically, as "fast food" or as not "whole foods" that appeal to particular standards that exceed FDA definitions for a balanced and nutritious diet. A low-calorie tossed salad from a farmer's market is considered "good" even if most people consider it unsatisfying as a meal, while a satisfying vegetable stir-fry from a local Asian restaurant or market is somehow dismissed by researchers because it's cooked into a hot meal instead of served in raw salad form? Many of the academic studies seem not to realize that a low-calorie salad which might satisfy a sedentary professional office worker is generally unsatisfying to someone whose caloric needs (for example as an outdoor manual laborer) are simply higher.

If you hear about anyone actually meeting to plan for or discuss this topic, please let me know. I doubt that the actual issue or realistic solution is to provide more "decent" grocery stores in Flint so much as to instead serve those who actually have difficulties obtaining transportation to get where they need to—those who neither have access to a car nor are able to make use of the city bus system. It's easier to provide bus passes than to set up particular kinds of food outlets in every neighborhood.

The latest full 1-year-average stats, from the Census Bureau's American Community Survey, are as follows:

United States (population age 16+):	7.2%
State of Michigan:	8.3%
Genesee County:	11.9%
City of Flint:	23.9%

Hope you received by other message about BLS not producing its latest monthly data for a single city of Flint's size... So this source provides all 4 levels of interest, and 2014 is the newest currently available.

Subject: unemployment

Mike, where/what time frame did the unemployment rates come from? I don't think the state unemployment rate is nearly that high. I think given the nebulous time frame of the disaster, but assuming it's late September from when the County Health Department began the emergency, we should use unemployment rates from early September.

Subject: Volunteers needed for water resource teams in Flint

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and

water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 13, 2015 SEOC briefing (9:30am):

MSP SEOC Planning chief (Amanda Bresler): leads the meeting: Agency situation reports are due by 6pm. A new IAP is available. Agencies need to update their "204 forms" throughout the day.

National Weather Service (Jim Askill?): Still cautioning about the potential for frostbite in 30 minutes or less (for exposed skin outdoors). Tomorrow's temperatures are expected to rise to about the freezing point (32 degrees F). Possible light rain on Friday could cause icy roads. The weekend will be a little colder, with occasional snow.

MDHHS (?): CHECC is working on a nutritional plan with other agencies. The plan could address education, short-range and long-range goals, and the mitigation of lead vulnerabilities, perhaps working with a farmer's market. Reference to Flint as a "food desert" and to perhaps open a decent grocery store there. A potential lead impact document has been submitted to planning. Currently considering mental health impacts and resources. Following up with local health departments to determine their staff and support needs.

MDARD (Brad Deacon): A document was approved: Requirements for Licensed Food Establishments using City of Flint Water.

MDLARA (?): Coordinating with MDEQ. MIOSHA scientists are to help with residential water testing.

MDEQ (Jen Wolf): Extra staff are in Flint today to help with kits. A field observer is helping to organize and plan for the transport of kits to the lab. Helping with the request for a presidential declaration.

Human Services (DHHS?) (Rich ?): Reports "zero filtration products" at the fire stations as "Good job!" [Unclear to me exactly what and why he is reporting as good.] Regarding trucks, information is needed about the quantities on them, being distributed.

American Red Cross (Paul Spata): Five fire stations are staffed for resource distribution. [something] management team for GCCARD (Genesee County Community Action Resource Department). Began [?? just the start of ARC involvement, does he mean?] assembling water testing kits. Volunteer reception center is active today. "Lauren" [who??] was brought in for logistics planning in the SEOC.

MDHHS (Brian Wilson): Staff volunteers are on site to help with distribution.

[also MDHHS?] (Steve Federly): Valley Aging is "extracting" data on seniors for use by GIS.

Michigan State Police (?): Teams are out now, matched with sheriff personnel. G-event channels were set up on 800 MHz radio: 9 is the primary and 10 is the secondary channel.

Michigan Department of Corrections (Brent Travelbee): Teams are in the area, assisting. A 50' truck was delivered to the food bank. Local shuttle bus will start tomorrow in the area, able to take about 20 persons at a time to obtain resources.

Michigan National Guard (Chad Randall): Some soldiers are to help at distribution points. Just one per location. MING leaders meeting with Flint mayor today.

MDTMB (Jeannette Doll): There is [some sort of unclear] issue with the Court Street warehouse...something which sounded like it involved its seller having a $2 million liability on it. Might need a food-grade warehouse [not sure whether I heard this phrase correctly]. Working on resource requests and replacement cartridges and water.

MSP SEOC Logistics (Penny Burger): Every agency remember to update past assignments and resource requests in MI CIMS. There's been a request for a budget projection of total costs for this year, which would be hard to do more than just guess at right now.

Recovery Team (Brianna Briggs): "Water Resource Teams" are in the field—that is their official name and is to be used. Could place and maintain an extra 15 teams in the field (Friday). Working with Red Cross to assemble real-time data from "pods" at the fire stations.

PIO/JIC (Nicole Lisabeth): Set up [something; could not make it out]. Good media reports at 11pm last night. Monitoring media and clarifying the role of the MI National Guard, who are at resource sites, not going door to door. Red Cross is dealing with distracting media personnel at water distribution sites. Flint's bus system is now including water resource sites on its routes. Arabic-language information card is proceeding ahead, and logo/branding of water resource teams is being worked on. There was some sort of Legionnaire's Disease report in the media today, according to MDHHS.

MSP SEOC Planning section (Amada Bresler): Resource list to integrate with fire stations and local EOC info. The next briefing is at 4pm today.

Subject: BLS unempl

Hello –

I pulled up the Bureau of Labor Statistics site to see what unemployment data was available, and it didn't look like they gave data for just the (central) city of Flint. The Flint MSA rate was 4.8% (not seasonally adjusted) in Nov 2015, compared to a state rate of 5.1%. I didn't check yet to see whether the Flint MSA is more than just Genesee County. BLS seems to offer monthly info for US, States, Counties, and MSAs, but for city-specific data, only the 50 largest are given, and Detroit was #50 on that list (16.7%) which was a 2014 annual average rather than just the latest month. Genesee County 2014 annual average was 7.8% but without a city figure to compare this with, it may seem random.

The main source for 2014 unemployment looks like the US Census' American Community Survey, so I can go back there and get unemployment data for all 4 levels pretty quickly if you like.

Since there are two SEOC briefings, I guess I should start attending both and submitting my notes on each briefing I attend (rather than just the morning one I've been doing)?

Attachments: DCDS Hours Entry by Coding Block.docx

Good Morning,

Attached are the guidelines for entering your time in DCDS by coding block for those of you that are working **overtime** for the City of Flint Contamination/Shortage event. Please use **Index 28900 with PCA 28670** for overtime worked for this event. Do not use these codes for your regular hours.

Please contact one of the division timekeepers if you need additional guidance in entering the special codes for recording your overtime worked on this special event. Division timekeepers are Michelle Gilsdorf, Richard Sheaffer, and Nancy Downs.

Thank you,
Nancy

Subject: Coding for City of Flint Water Contamination incident

Good Afternoon:

For any **overtime hours** spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Any **non-payroll** costs (travel, SEOC meals during activation, etc.) should be coded to:

Index 28900 with PCA 28671.

These codes are not yet active in DCDS but will be by the end of the week. Please let me know if you have any questions.

Thanks,
Penny

DCDS Hours Entry by Coding Block

(Last revised 1/28/14)

To change your default entry to Hours by Coding Block Entry:

1. Log into DCDS.
2. Select Options.
3. Check Hours by CB (Coding Block) Entry to change your default.

To enter **work** Hours by Coding Block (regular, overtime, comp time earned, etc.):

1. Open your time sheet as you normally do.
2. You should see an Hours Entry by Coding Block section above the time entry section. *The blue line is the active line.*
3. Click your cursor in the AY box and enter the last 2 digits of the appropriation (fiscal) year.
4. Tab to Index and enter your Index number.
5. Tab to PCA and enter the PCA associated with work you did for the number of hours worked that you worked on it.
6. Move down to the time entry section and select the appropriate Hours Type.
7. Tab to the appropriate day and enter the number of hours associated with the PCA you entered above.
8. Enter daily comments for each Hours Type.
9. Select Save.
10. At the end of the pay period, select Submit.

To enter hours for holidays, comp time used, annual leave, sick leave, school & community leave, bank leave time used, administrative leave, initial leave, jury duty, Plan A:

1. Check the "std" (standard coding) box under the Hours Entry by Coding Block section.
2. Move down to the time entry section and select the appropriate Hours Type.
3. Tab to the appropriate day and enter the number of hours.
4. Enter the required information for school & community leave. Required information includes all of the following: 1) name of the school or community activity sponsor; 2) name of the event; description of the volunteer services performed; and 4) the time period that the employee performed the volunteer services.
5. Select Save.

6. At the end of the pay period, select Submit.

To view your time sheet:

1. Select Reports.
2. Select Employee Data Collection.
3. Selection Option B - Detail Time (or Option A - Coding Block Detail Time).
4. Enter Department 55.
5. Enter Agency 01.
6. Enter TKU 044. (EMHSD)
7. Select the PP (pay period) End Date.
8. Select OK.

Subject: RE: Flint
Attachments: Flint Request draft MAS 2016.doc

The following revised draft is significantly expanded (but also is now missing most of the extra pages tacked on the end that had been inherited from the 2014 example document).

Hope you find this useful...

Thanks,

Mike Sobocinski

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since May 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to the dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,143	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	444,341	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.2%	52.6%	43.5%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an emergency manager was assigned by the governor (in 2011), providing greater authority to sort through the many challenges and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. Flint falls into the category of city that has been called a "legacy city" (See *Rebuilding America's Legacy Cities*, edited by Alan Mallach in 2012 and published by American Assembly, Columbia University), caught in the problems of transitioning from its historic mid-20th Century manufacturing base into new roles for 21st Century health and success. It has been caught in a long-term trap of an aging infrastructure combined with dwindling municipal revenues. And although there are opportunities available by which the city might successfully make that transition, its current problems must first be overcome. (Mallach xi, 180-183) In order to offset mismatches between a central legacy city and the disproportionate wealth of the surrounding areas it serves, various planners and urban policy experts (e.g. Norman Krumholz, Myron Oldfield, John Rusk) have found that various forms of revenue sharing may be justified, greater integrating the central districts with the overall metropolitan area whose health is mutually intertwined, or finding ways to fund the health of essential central sections and infrastructure within existing political and organizational structures, networks, and capacities. Cities are legally "creatures of the state" and thus subject to the effects of state policy. Where past policies had resulted in an accumulation of fiscal

problems for central cities, new policies have the potential to help solve these same problems in the long-term. But first, the immediate threats to health for nearly 100,000 permanent city residents, plus tens of thousands of non-residents who make daily use of the city's resources, services, and amenities, must be corrected. The importance of the problems of aging city infrastructure has become clear, but the first step is to protect the health of the area's residents, as longer-term solutions continue to be developed with a keener awareness of the relationship between the health of each central city, and the quality of life for each broader metropolitan area and the state as a whole. A successful response to the current emergency will also help to inform the handling of similar challenges that might occur in other legacy cities, with this one crisis potentially providing the urgency and will to address related problems in other locations, lessening the potential for their infrastructure to produce a similar emergency-level situation.

The city's poverty rate is 2.67 times higher than the national poverty rate, and the city's median household income is less than half of that for the nation as a whole. Average unemployment rates within the city were nearly three times the national rates. A disproportionate number of the city's residents have disabilities (functional needs). Although the percentage of elderly residents is slightly below average, the opposite is true for the percentage of young children under age 5, and it is this age category that is most vulnerable to the effects of lead exposure. The percentage of children under 5 is higher in Flint than the respective percentages for Genesee County, the State of Michigan, and the United States as a whole. (Refer to the following table.)

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

Data Sources
U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

NOTE: The general direction I had started with my draft text was to historically frame this situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of *budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Benton* Harbor, Pontiac, etc. where huge population losses occurred primarily within the central city, while overall urban area growth continued and resulted in resource splits. Naturally, these references, deriving from a theoretical urban planning perspective, will need to be reviewed for their political feasibility.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982, also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits."

The following information is furnished on the nature and amount of State and local government *resources that have been or will be used to alleviate the conditions of this emergency:*

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with

Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively."

(Provide the disaster history of the State over the past 12 months... List areas that have sustained damage from this event and other disasters in the previous 12 months, and include any other pertinent factors that would have a bearing upon the State's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.)

(If Individual Assistance is being requested, provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations [children under 5]. Include a comparison of the percentage of the state and local government averages and national averages. Indicate source of data cited.) NOTE: This data is provided in Attachment 1.

(If Public Assistance is being requested, provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include a discussion of significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita. Discuss the level of insurance coverage.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf."

Sincerely,

Rick Snyder
Governor

Subject: RE: Flint

My initial draft had some errors on the subject of bankruptcy. As a mere draft, I was putting down ideas from memory, but got confused between Detroit bankruptcy and EM, and Flint EM. The following is corrected draft text on that subject, which will be in the revised document I'll send you before I leave tonight:

"As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an emergency manager was assigned by the governor (in 2011), providing greater authority to sort through the many challenges and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply."

Attachments: City of Flint Demographics Data.xlsx

By the way, if anyone wonders, the demographic data collected by me and Zach were 5-year 2014 estimates, and those (attached) match up with a slightly different 2014 population estimate for the city than the latest 1-year estimate. The average for the last 5 years is slightly higher (above 100,000), but the most recent year's population value is 98,990. At least one person mentioned the city being below 100,000 in the SEOC, and this is correct for the latest (1-year) estimate, but the slightly higher 5-year average would be the figure that matches up with the data for unemployment, poverty, etc. (attached table).

To: Weber, Thomas (MSP)
Subject: RE: Flint

The general direction I had started with my draft text was to historically frame this situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Saginaw, etc. where huge population losses occurred primarily within the central city, while overall urban area growth continued and resulted in resource splits. Some reference might ultimately be made to equity planning ideas (e.g. Krumholz and later persons), such as regional revenue sharing or "suburban" support for central city infrastructure like we'd seen resulting from the 2014 Detroit flooding. I have a cool new book about "legacy cities" of the type I've just described, and the book probably has lots of action ideas to be found once I get the time to peruse it. Some of these ideas were already presented in the MHMP, such as on pages 524-526 and 531-532. I know these offhand since I'd written them myself. (Some other stuff may also be in there that Doran had initially written.) Also of note might be stuff like p 456-457 – esp public confidence in government and esp potential mismatch between scientific understanding and public perception.

This 4pm deadline seems very sudden to me. When were we given that deadline?

See below for filled-in table.
The original format didn't have a column for children under 5 – I added it because it's of obvious significance for the lead (Pb) problem. Flint has a lower-than-average proportion of seniors, but a higher-than-average proportion of young children (who are most at-risk, healthwise, from lead exposure, according to my understanding). So that significance should be specifically explained in the request letter.

By the way, everything I've checked in Zach's work so far has been top-notch. ☺

See you in a few hours (possibly less).
M

No, this is more long-term stuff. I'll work to fill the Genesee County data needs right now. But will start thinking about uses for more variables, and at multiple levels.
I would soon like to take the scheduled A/L break (after 2pm) for my MSU class which is scheduled for 3 hours, but will return afterward, including availability for early evening duty. (It's the first week of the semester, so the class might even get out early, in which case I'll be back here early.)

Thanks,
Mike

Ok. Additional census variables include other relevant things such as housing units with plumbing, (foreign) language spoken at home, foreign-born population, perhaps even linguistically isolated households. Such things do vary a bit over time but are often available -- of course they are summary level, but allow focus toward specific neighborhoods, and could help guide the language translation patterns in the area (if they haven't already done so), availability of an automobile to each household, poverty status, employment status, ethnic minority status, disability status and general type (i.e. mobility limitation, self-care limitation), etc.

There is probably also a formula (e.g. a certain number or proportion of housing units built before a certain time, within central city utility areas) that could be applied more widespread to other Michigan cities in general.

Mike, that could be useful. If GIS isn't too backed up, that sounds fine to me. But given that the Governor wants this tonight, and the number of customers outside the city proper is fairly small, I'd say let's do it if it's easy, but if it's going to be a challenge to get it by the end of the day or complicate GIS's work today, we can live with just city and county numbers.

I'll let you two have a meeting of the minds and advise!

Subject: RE: Flint

By the way, despite our early impression that the Flint system roughly matched the city limits, there was talk about additional townships being involved.
Rather than individual retrieve each tidbit of info (Genesee county right now, perhaps later followed by Flint Twp, Mundy Twp, etc.), the use of GIS could allow a quick summary or analysis of this info (and more) at any scale – region, county, city, census tract, perhaps even block group and block (down to the scale where confidentiality is no longer guaranteed and data thus becomes unavailable).

Would it be worth my going to our GIS about getting these variables on more local scales? The only catch is that some might need to come from census 2010 rather than ACS 2014, but perhaps not – I wouldn't know until I check. I'm pretty sure they already have ready access to all official 2010 census variables.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 12, 2015 SEOC briefing (9:30am):

MSP Resouce unit (acting planning chief?) Amanda Bresler: Reading IAP objectives. SEOC hours will go until 8pm, so 6pm agency situation reports are due. 2pm tactics meeting scheduled.

National Weather Service (Jim Askill?): Contacted Genesee County EOC and added them to the list of NWS contacts. Today's weather is "sloppy," with "off and on" lake effect snow. Some spots might see snow all day, other spots might not see much. Various bands produce spotty effects locally. Today, snow, low temperatures, and winds produce treacherous travel. Frostbite sets in within 15 to 30 minutes on exposed skin. About 1 to 2 inches of snow accumulation will be seen today, then "off and on" snow tomorrow during both day and night—one inch or less. After the next few days it should warm up a bit (to the freezing point?).

MSP SEOC Operations section (Jackie Hampton): Identified shortages need to be addressed: water filters and test kits. Another warehouse is being opened today. Need equipment at DHHS site (loaders, etc.) to move resources on/off vehicles. 9600 cases of water per day are being handled, so space is needed to stockpile that. GCARD (?) to eventually be used for staging only, when more space has been found.

DHHS (Jennifer ??): Currently at a level 2 activation. Processing the request for a warehouse facility. Must sort through the short and long-term storage needs. Distributing guidelines/message information. Also dealing with volunteer information (and organization – the availability of volunteers).

MDARD (Kay Fritz?): Updated guidance document re: food service establishments, and the document is being approved through the JIC. Animal shelters and related tasks are being worked on. Information is going out to veterinarians in Flint. Coordination occurring with Genesee County Health Department and Genesee County animal control. (She quickly reads off their list of actions.)

MDLARA (unknown person?): Doing work with ?plumbing chief? En route. [Didn't catch information clearly.] A list of home-based day care centers is available.

MDEQ (Jen Wolf): Refers to online links for approved water filters. 10,000 water test bottles are on order. Coordination with American Red Cross. More supplied ordered – another 10,000 water test bottles. Would like to always have at least 2,000 on hand, at the warehouse.

Capt. Kelenske: Make sure that the fire stations have what they need. That's the area that is farther from direct control (i.e. outside of state framework).

MDHHS (unknown speaker?): Logistics of coordinating with American Red Cross, etc. Given 10am ETA on truck with provisions from/to? Home Depot? retail outlets. But it's more useful to be given a current location of the truck, rather than an ETA. About 700 (something – individual bottled water servings, I think?) were obtained and are being delivered.

American Red Cross (Paul Spotter?): Trying to increase staffing. Is it possible to reduce hours (stopping at 7pm) to accommodate the difficulty for volunteers during the cold weather? (Capt. Kelenske: Current

hours are 9am to 9pm, and will remain so.) Some warehouse teams have been established. Tomorrow, a volunteer reception center is opening.

MDHHS (Brian ?): Teams are preparing for distribution activities, but the main current focus is on the procurement of water filters.

MI Dept. Of Civil Rights (Mark ?): About 15,000 Spanish-language and 30,000 English-language palm cards exist. Would like to arrange deliveries to Our Lady of Guadelupe Church and to the Hispanic center. (Capt. Kelenske: Must deliver broadly to all faith based places at once rather than just to one or two specific ones.)

Office of Services on Aging (?): Delivery to 1400 addresses with seniors – meals, care management services. Working with the Genesee and Valley Area agencies on aging. Care management clients information obtainable from various senior agencies. Becoming aware of a citizen distrust of filters alone, with seniors requesting water in addition. State and local ombudsmen checking on nursing homes to verify the use of bottled water there—these facilities are all mapped in GIS, so the info is available. (Capt. Kelenske: Must broaden messaging to build trust in filters. Jackie Hampton: Are be able to test filtered water, to build that confidence? Jen Wolf DEQ: All samples received are being tested, so filtered water samples won't be turned back, but the lab doesn't want to ask for samples of filtered water. Nicole Lisabeth PIO: hadn't heard about testing filtered water – official info should be distributed if it's to be done.)

MSP (officer ? in SEOC): Truck shipments, tracking on map, three or more trucks requested. Comparing deployment with supply.

MDMVA (Chad Randall?): Researching the resources available to fill requests.

MDTMB (Jeannette Doll): Reached out to Meijer, found that they'd already been shifting their filter supply toward their Flint stores. Checking into Amazon as another source. Three trucks with drives are to arrive tomorrow. A 50' trailer is to be procured. (Jackie Hampton: drivers needed 7a to 10p). Emergency can allow extension of the normal 14 hour limit that drivers can be on the road. About 30,000 palm cards being printed.

Capt. Kelenske: All state agency resources are available and can be brought to bear. Any resistance can be overcome through authorities of/in the SEOC. For example, "any" state employee can go door-to-door [i.e. minus those with physical/health limitations]. But logistics do need to be sorted through.

MSP (Staging?) Team (Brianna Briggs): Presented info in Flint and answered questions. Two kits were given out in some cases instead of just one (per household), when concerns were brought up about filtered water quality. Local volunteers are many. If state agencies do need to eventually contribute more staff, they'll be notified.

PIO (Nicole Lisabeth): Currently stressing the use of filters as the most efficient way to secure good drinking water for each household, long-term. Backed by Dr. Eden Wells in this—announced at about 6pm last night. A warehousing and inventory management system (is being used? Is needed?) for an

inventory system. There's a parking issue re: media, but teams are getting out in the field, with instructions not to be delayed/distracted by media inquiries or activities. Teams are not to engage with media, but just to focus squarely upon their assigned tasks. All media are to be referred to the PIOs and the JIC. (Capt. Kelenske: A standard statement to this effect is to be used by workers—not even a "no comment" response, but that all media requests are to go through the PIO/JIC.) The Governor's office is sending daily emails to Flint, advising to use water filters, and that teams are going door-to-door. 2-1-1 is available to call there, a public service announcement (PSA) video has been made, a website is available. Working with Comcast to show the PSA video and to place filter instructions on a public access channel there. Billboards are going up in Flint to inform about the availability of 2-1-1 and of the website. Mailed cards are going out. Working on an Arabic translation for information cards. Getting information on churches to participate—by the weekend? Inquiries obtained regarding any Pb issues in other areas of the state. It's important to have city and county PIOs in the JIC. Some 2-1-1 rumors of lead in bottled water were dismissed/discouraged. Some calls were reported as being made to the FEMA national headquarters, involving concerned agencies such as the NAACP. Questions were also received on how corporations can make donations. (Capt. Kelenske: 2-1-1 is very important. Verify the staffing and system in place there; minimize chance of a shortfall.)

MSP Planning (Amanda Bresler): Updating the 204 form. Working to improve the local tracking sheet for resources at Flint area fire stations.

Local EOC (Mark DuCharm?): Volunteers are needed at both warehouses. Don't refer to the new warehouse as "Diplomat" – because there is an existing business it may be confused with.

Capt. Kelenske: Give that warehouse a generic name, not even "DHHS warehouse." Overall, fine job so far. Focus on what we <u>can</u> do, and remember to take a breath or to step back occasionally so that there aren't problems with stress interfering. The smallest detected slip will be portrayed as a significant news event. The next state agency update will be at 4pm at the latest – might occur sooner.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 11, 2015 SEOC briefing (9:30am):

MSP Planning Section Chief Tom Weber leads the meeting, reads list of objectives from IAP. A state agency briefing is occurring every afternoon now. The SEOC was open on both Saturday and Sunday this past weekend.

MSP EMHSD Jackie Hampton: Agencies need to stay focused on completing form 204 and their critical tasks. Those who are speaking in the SEOC should now stand to present their information into the microphone.

National Weather Service (Jim ?): During the next 48 hours will get challenging. Fairly tame light snow right now, but from 8pm onward there will be more snow coming in with winds. About 2 to 3 inches are expected in the Flint area from 5pm today to 8pm tomorrow evening. The expected temperatures will be in the teens. Blowing snow will mean that it will be hard to keep roads clear, creating hazardous travel conditions. Temperatures will be cold and will result in wind chill factors below 0 degrees F. Frostbite would be expected on skin exposed for times less than ½ hour. From Wednesday to Friday, only occasional light snow is expected, but the cold temperatures will continue.

MDHHS (Jennifer ?): The CHECC has been opened, with a partial activation. Subject matter experts will be brought in as needed.

MDARD (Justin Henderson): He refers to yesterday's update [as if everyone was here yesterday], and no change to that update. [Several other agencies simply reported no significant change, or didn't mention anything that sounded specific and important enough for me to include here. Some phone-in agencies might have been too brief or garbled to be included!]

MDEQ (Jen Wolf): Coordination between their lab and various other agencies (city of Flint, DTMB, MDARD, DHHS, etc.) on test bottles, kits, and instruction sheets. Seeking appropriate dispersion of bottles within Flint, to match actual local needs (rather than too many at locations whose needs are not as great as others').

MDHHS (Richard Thelen): Things are proceeding on track. Setting up for 1pm training at (site?). Getting arrival time estimates on all orders, establishing filter quantities, gave some info to GIS for processing.

American Red Cross: Has staffed distribution sites at 5 fire stations, 9 churches, and helped to organize more (for water and filter distribution). Some larger sites are needed.

Adult Services (Steve ?): Pulling together the list of addresses for Flint seniors who are at higher risk. Exploring the role that could be played by their nutrition network, in response to a "food desert" concern that was raised. The Department of Education feeds children. Better framing is needed for nutritional needs issues. (Jackie: DHHS is working on it.) [My comment: In my experience, the "food desert" concept was completely overblown, applying an exaggerated name and limited definitions that failed to recognize the true variety and accessibility of foods through various transportation options and exaggerating the low quality of food that is readily available locally, fixating upon particular ideas of raw fruits and vegetables while downplaying the substitutability of frozen vegetables, packaged mixes, etc

But this is actually the topic that Kari Day had researched for her master's degree, and so we should make use of her expertise on this, if she's interested. I mentioned this to her as she was leaving for Flint and she did say that she's interested in coordinating and providing her expertise on the topic. My own views are merely rooted in theoretical and methodological skepticism, and my own experiences, but she is the one who's done actual research on the subject in Detroit, and although she might agree with some of my critiques, I might be off-base in others and certainly don't have her experience in researching the topic. There are legends circulating widely on this topic, typically involving a mythical Detroit grocer selling bad apples for $7 each, and I've pointed out at meetings that such a concept doesn't make any economic sense for a store owner, and that it makes no sense to dismiss the availability of cheap but nutritious frozen vegetables and decently fresh ingredients which are available at places like "Subway" - but the sole emphasis upon gardens and raw produce grocers, and the offhand dismissal of everything that certain researchers have labeled as "fast food", has horribly overstated the "problem" in most areas. At some point, these debates could be resolvable through actual data. Much of my own criticism stems from personal experience at finding nutritious foods while living in poverty for a couple of years without a car in the middle of Lansing. Although Lansing is obvious not a worst-case scenario, certain principles still apply elsewhere. If transportation available through bus routes, those who can use the bus usually have access to major grocery stores. For those who don't want to take a bus, various substitutes can be found which aren't considered in the dubious research designs I've seen on the subject. For those who are simply stuck at home, it might not matter if they have a garden and store one block away, since immobility is immobility.]

MSP (Matt Bolger): Tomorrow, there will be a walking tour in Flint. Electronic tablets would be useful for data entry, rather than the traditional paper forms.

MDTMB (Jeannette Doll): Cards have been printed for the Governor's conference this morning. Trucks are going to Flint, with transport arranged for all this week. Parking improvements are being organized.

Recovery Branch (Brianna Briggs): Working through MSP (Amy Dehner?) and going to Flint to provide information, attend training session. Contact lists are being made for teams in Flint. Will coordinate with the JIC and PIO.

SEOC Logistics (? [person didn't stand]): Four new churches will serve as distribution points. People should specifically label new requests as such when entering/sending the info in. Do not use the Resource Tracking Board (in MI CIMS) to send notes to oneself.

SEOC Finance (Penny Burger): A hotel is set up for direct billing in the Flint area – unsure how many are traveling there. Would like lists of staff who might stay in Flint, to ensure that a room is available there. Some have made their own arrangements, which could be okay, but Finance can help with overnight lodging.

PIO (Nicole ?): Flyer was sent to MDTMB. A Spanish version is being completed. 2:30pm County Office Building media briefing will take place in Flint. News release for that is going out today. Governor Snyder, Capt. Kelenske, and the MDEQ director are speaking, plus others. Video public service

announcement being arranged for Comcast Cable (30 seconds long), similar to radio PSAs—MDHHS worked on these, being broadcast soon.

SEOC Planning: 3:30 agency situation reports and summaries submission deadline. 4pm afternoon agency briefing will occur.

Tony Katarsky: Replacement staffing is underway. It's okay to not overwork, to take time off as needed, although the official leave time may feel limited at this time.

Subject: RE: weekly activities list

This week, January 11 to 15:
Section updates:
- 3 hours of Annual leave Tuesday, January 12, starting 2pm (Sobocinski)

Key Activities:
- Work to follow-up on Flint emergency declaration: draft declaration request draft text (Sobocinski, Baker)
- Evaluate, purge, sort, pack accumulated office materials, in prep for move (Sobocinski)
- Thursday NEMA webinar on cyber-attack, 2pm (Sobocinski, Baker)
- As time allows, work on MI-CEMKR revised PowerPoint presentation (Sobocinski)
- As time allows, coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings: (no items)

Next week, January 18 to 22:
Section Updates:
- 3 hours of Annual leave Tuesday, January 19, starting 2pm (Sobocinski)

Key Activities:
- Work to follow-up on Flint emergency declaration: draft declaration request draft text (Sobocinski, Baker)
- Evaluate, purge, sort, pack accumulated office materials, in prep for move (Sobocinski)
- Thursday am Allegan County RiskMap kickoff conference call (Sobocinski)
- As time allows, work on MI-CEMKR revised PowerPoint presentation (Sobocinski)
- As time allows, coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings: (no items)

Subject: ACTION: Review list of deliverables
Attachments: Initial list of Deliverables assigned by Capt to key agencies Jan 8 draft.docx

Hello –

Attached is my draft of an initial short list of deliverables that have been specifically requested by Capt. Kelenske for this response.

Please review the attached list and let me know if you have any additions, changes, or corrections that should be made to it.

Thank you,

Mike Sobocinski

Subject: list of deliverables

I've asked Mike Sobocinski to track Cap's deliverables list that he gives to each of us. Jackie suggested having a "clearinghouse" similar to the status plotter, but for deliverables. So...please contact Mike as Cap gives you a new deliverable (i.e., report, map, plan, etc.), and he'll maintain an aggregated list so nothing is slipping through.

Thanks!

Planning Group Chief, State Emergency Operations Center
Michigan State Police/Emergency Management and Homeland Security
(This email is monitored only when the SEOC is activated)

Initial List of Deliverables Requested by Captain Kelenske from Key Response Agencies
January 8, 2015 Draft:

MSP SEOC Operations:

1. Deliver the following resources to fire stations in Flint: water, water filters, filter replacement cartridges, and water test kits.
2. Send teams into Flint next week for door-to-door delivery of test kits and information (but also equipped to provide filters and replacement cartridges to those who need them).
3. Arrange for and activate a Donations Management team (to be overseen by Jenna Holmes of the MDHHS Michigan Community Service Commission).
4. Arrange for and activate a Volunteer Management team (to be overseen by Chad Veeser of the MDHHS Michigan Community Service Commission).

MSP SEOC GIS:

1. Map the locations of households that have water filters (i.e. the addresses where filter recipients report that they live).
2. Map the locations of distribution points for water filters (e.g. fire departments, DHHS offices, service agencies in Flint).

MSP SEOC Finance Section:

1. Provide cost accounting information to MSP EMHSD staff for use in response activities for this emergency.
2. Provide information to state agencies about (1) the tracking of time and (2) the provision of support documentation for resource requests made as part of this emergency response.
3. Track the SEOC's staffing, and its related costs, to produce Spend Plans.

MSP SEOC Logistics Section:

1. Obtain fire station addresses for the City of Flint, and share that information with partnering agencies.

MSP Planning Section:

1. Produce a daily situation report.
2. Produce a weekly Incident Action Plan.
3. Maintain summaries of (1) GIS products and (2) water distribution statistics and objectives.

MDEQ:

1. Establish a presence in Flint's local EOC. [Response: One is present, 2 more are available Saturday and through next week.]
2. Coordinate with other agencies to fill resource requests.

MDHHS:

(no specific requests described so far)

MDARD:

(no specific requests described so far)

MDLARA:

(no specific requests described so far)

MDTMB:
(no specific requests described so far)

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 8, 2015 SEOC briefing (9:30am):

Tom Weber leads meeting, Captain joining later by phone and in person at the end.

MSP Operations (Jaqueline Hampton): Had conference call with local jurisdictions. Water tests are needed. Only about 600 homes have been tested, out of about 45,000. There's a drop-off test kit – samples to be taken in the morning, after the water has sat for at least 6 hours during the night.

American Red Cross: Contacted by county [and?] sheriff, to assist with the distribution of resources/needs.

State Office on Aging: Requested addresses of Flint seniors who are receiving services—the area office on aging is working on that. The Genesee County health department is a local partner. Flint Township is on the water system? (Tom Weber: GIS will sort through which jurisdictions are involved – probably at least 3 other jurisdictions.)

MDARD: A new regulatory requirement is being worked on which would involve water handling information for relevant agencies and establishments.

MI Dept of Education (Louie Burgess): Everyone with an approved child nutrition program is being contacted to learn where water is obtained from, how it's handled, and whether they've received the relevant information about it.

MDEQ (Jennifer Wolf): More water sampling will occur through collaboration with other agencies. Kits must be dropped off at homes, due to 6 hour requirement [see MSP Operations reference at top]. MDEQ lab capacity involves the handling of up to 400 samples per day, 7 days per week. Only about 670 samples processed so far.

MDHHS (Richard Thelen): Have received many resource requests for filters. Working on orders and delivery arrangements. Also, to assist with food and nutrition, improving the healthfulness of foods that are available in the short-term.

MDTMB (Jeannette Doll): A co-located JIC location has been found within a Flint state office building. A toll-free phone line is to begin operation at noon today, both at the new JIC and in Lansing.

NWS [didn't catch his name]: Anticipating some snowfall, perhaps from 2 to 4 inches, with winds from 15 to 30 miles per hour expected over this weekend. Much of next week, we'll have cold air, with daily high temperatures in the 20s or below.

PIO (Ron Leix): Preparing for the transition to the Flint JIC. At 3pm today there will be a meeting of the key PIOs—the first face-to-face meeting rather than through a conference call. There are 4 major topics for public information: (1) Water filters, (2) Water testing, (3) Blood lead level testing, (4) Bottled water. Explanations of who, how, when, why, where are being provided. The web site is good, but we need to go beyond that to access those who are not online (e.g. seniors). Media coverage: some has been good, some bad. The Rachel Maddox show focused on various issues.

MSP Logistics (Michele Kuzera): Verifying equipment and staff for on-site Flint activity. Two MSP staff are in the local EOC, representing planning and logistics.

Tom Weber: Incident Action Plan objectives can have suggestions submitted to the Planning Group Chief by 1pm. Agency situation reports should be submitted by 3:30pm in MI CIMS and/or to the Planning Section.

MSP Ops (Jackie Hampton): The SEOC will be open tomorrow (Saturday) from 8a to 5p.

Capt. Kelenske: He'll be obtaining an important requested document on the subject of water distribution. Staff must update MI CIMS with an ongoing log of their activities. Sunday operation of the SEOC will be determined in the future.

Hazard Mitigation Planning Specialist
Emergency Management and Homeland Security Division
Michigan State Police
4000 Collins Road
Lansing, MI 48910-5883
TX: 517-336-2053

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Mike Sobocinski's notes on January 7, 2015 SEOC briefing (9:30am):

Tom Weber: situation report #1 was published. ICS202 to be completed shortly (Capt: that document will be for internal use only). Disaster Recovery Unit is being established within Operations Section.

American Red Cross (phone): coordination of some kind [unclear]

DHHS (Richard Thelen): outreach and education to local health care providers. JIC is operational. Web MD Medscape – available [?extra details unclear]. Distribution of filters and replacement cartridges continues. Two local MDHHS offices and two Genesee County Community Action Resource Department (GCCARD) offices are involved in this. [I looked GCCARD up online to find and verify its correct name. Some other local government office was also named, but I didn't catch it.]

MSP GIS section: Coordinating with city and county. Online dissemination of mapped info looks likely soon through a viewer that allows users to browse the information themselves. Currently mapping filter locations. MSU extension socioeconomic data is available for city residents, to represent spatially. Pipelines and service entry points (at homes) are mappable. Lead(ing) service lines to homes are mappable. 44,000 records to be worked on through coordination with University of Michigan Flint campus, to make the information digital (probably contracted by the city to do so). Latency time in pipes correlates with lead concentration in homes, so an analysis could be performed with information on pipe and service line locations/lengths...

Capt. Kelenske: Genesee County Sheriff Department using about 50 persons with trucks to distribute about 5,000 filters (of the "screw-on type") to the high-risk areas of the city.

Tom Weber: Genesee County GIS is coordinating with the area's United Way (and?) Food Bank.

MDARD (Brad Deacon): the local health departments inspect restaurants, while the DARD oversees local pop and ice machines.

MI Dept. of Education (Louis Burgess): Crafting a message to the Genesee Intermediate School District regarding all involved schools, including public, private, charters, academies, which have food centers or food programs. To inquire with all who run these regarding their water sources and use. The text of this message is to be reviewed by the state before its local distribution. The Department of Education PIO is needed in the JIC, and will be called.

MI Dept. of Corrections [person not known]: nothing new; precautions taken since last year, with coolers and jugged water being served. Have messages been sent to state employees who work in Flint, especially a general notification to all state employees so that even those who temporarily go to Flint can be informed regarding water?

MDTMB (Jeannette Doll): notes that bottled water is available at the state offices.

Aging and Adult Services Agency (AASA) (Steve Betterly): Outreach to the (Genesee) Valley Area Office on Aging to find/seek a list of seniors.

MSP Operations section: Establishing a State Recovery Task Force, to be headed by Joel Pepper. Establishing a Recovery Branch, to be headed by Brianna Briggs and to involve MIVOAD, DHHS coordination. Use of available subject matter experts, to include Dr. Eden Wells of DHHS and Dr. Mona Hanna-Attisha.

MSP Logistics section: Tracking quantity of water needed, trucks, etc. Two logistics staff from MSP being deployed to the local EOC.

PIO Ron Leix: JIC fully operational as of yesterday afternoon. JIC News Release #1 completed. An 800 number is to be used, and a top-level web site can be found at www.michigan.gov/flintwater. A 9am meeting is occurring between Governor Snyder and the Flint Mayor [Karen Weaver], with a media session to follow. At 1pm, a media roundtable presentation will occur in the Presentation Room at Collins Road, followed by a tour of the SEOC. Tomorrow, legislative and congressional calls.

Capt K: State agency SEOC physical presence this afternoon from 1pm onward.

[Unknown agency] Jeremy Hedges: coordination with MSHDA, potential to provide planning services? (Tom Weber: MSHDA to be included in the State Recovery Task Force.)

Capt K: FEMA has 2 liaison officers arriving about 3pm. These are not Federal Coordinating Officers (FCOs) but are merely to assist the Captain. MI CIMS activity log entries are needed from the PIO and the GIS section. The daily briefings are to occur at 9:30am until otherwise announced.

Subject: RE: SitRep1 Executive Summary

See below, I implemented most suggestions. For your additional comment regarding the last sentence (water not safe to drink), I just added "not safe to drink, unless specifically filtered" after confirming with MDHHS that the advisory for water filtering is still active for the entire City of Flint, without exceptions.

Thanks again!
Henrik

1. Instead of "introduction of lead into the public water supply, which has caused elevated blood lead levels" I would suggest wording which does not suggest a clear causal effect: "presence of lead in the public water supply, and the detection of elevated blood lead levels" **-IMPLEMENTED**
2. I have an official Flint water report stating May 2014 as the start of Flint River water, not April, so I think that may need to be changed. **–NOT IMPLEMENTED, The MDEQ rep in the briefing this morning referred to April 2014 as the start time for drawing from Flint River. News articles refers to April 25, 2014 as the date for the switch, so I used the specific date for the summary.**
3. In the next sentence, I doubt whether the water should be called "untreated" – one of their solutions for over-chlorination (ferric chloride to offset total trihalomethane levels) seems to have been a partial cause of accelerated corrosion. **-IMPLEMENTED**
4. "Elevated blood lead levels in young children" might be interpreted as "all young children in Flint" unless it is worded more carefully. **–IMPLEMENTED.**
5. My notes from MDEQ this morning had Oct. 15 as the date of returning to Detroit water... I can double-check that with other sources. **–NOT IMPLEMENTED. I had Oct. 16 in my notes from the DEQ brief, and I checked news articles that all referred to that date. Oct. 15 is the date the Governor signed the bill that authorizes the state funding for the switch, so this is where the confusion might come from.**
6. The abbreviation for Detroit water should be DWSD, but the third paragraph says "DSWS" and "DWSW" and these should be corrected. **–IMPLEMENTED.**

Thanks, I will incorporate.
We actually saw the error with the abbreviation for DWSD, and then also found out that it is Detroit Water and Sewerage Department, not ...Sewer Department.

Thanks again,
Henrik

Subject: RE: SitRep1 Executive Summary

Thanks, Henrik
I do actually have some recommendations...

The first involves the nature of the wording of the overall incident.

1. Instead of "introduction of lead into the public water supply, which has caused elevated blood lead levels" I would suggest wording which does not suggest a clear causal effect: "presence of lead in the public water supply, and the detection of elevated blood lead levels"

Studying the rest for factual accuracy, according to my knowledge so far, leads to the following notes:

2. I have an official Flint water report stating May 2014 as the start of Flint River water, not April, so I think that may need to be changed.
3. In the next sentence, I doubt whether the water should be called "untreated" – one of their solutions for over-chlorination (ferric chloride to offset total trihalomethane levels) seems to have been a partial cause of accelerated corrosion.
4. "Elevated blood lead levels in young children" might be interpreted as "all young children in Flint" unless it is worded more carefully.
5. My notes from MDEQ this morning had Oct. 15 as the date of returning to Detroit water... I can double-check that with other sources.
6. The abbreviation for Detroit water should be DWSD, but the third paragraph says "DSWS" and "DWSW" and these should be corrected.

Hope you find this initial input to be of use.
I'll be doing some more study to further assess this information. I have some really useful official documents from Flint with good info to be sorted through and compared...
Thanks!

Subject: SitRep1 Executive Summary

Mike,

Here the first draft for the Executive Summary for the first SitRep.

Thanks,
Henrik

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the introduction of lead into the public water supply, which has caused elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

In April 2014, the City of Flint switched from the Detroit Water and Sewer Department (DWSD) to the Flint River as their primary water source. The untreated corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWS as their primary water source on October 16, 2015. Funding to reconnect to DWSW was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSW system, water in the City of Flint is still not safe to drink.

Subject: SitRep1 Executive Summary

Mike,

Here the first draft for the Executive Summary for the first SitRep.

Thanks,
Henrik

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the

county in response to the introduction of lead into the public water supply, which has caused elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

In April 2014, the City of Flint switched from the Detroit Water and Sewer Department (DWSD) to the Flint River as their primary water source. The untreated corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWS as their primary water source on October 16, 2015. Funding to reconnect to DWSW was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSW system, water in the City of Flint is still not safe to drink.

Subject: SitRep1 Executive Summary

Mike,

Here the first draft for the Executive Summary for the first SitRep.

Thanks,
Henrik

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the introduction of lead into the public water supply, which has caused elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

In April 2014, the City of Flint switched from the Detroit Water and Sewer Department (DWSD) to the Flint River as their primary water source. The untreated corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWS as their primary water source on October 16, 2015. Funding to reconnect to DWSW was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSW system, water in the City of Flint is still not safe to drink.

Attachments: Mike Sobocinski notes from SEOC briefing Jan 6.docx

My draft notes from this morning's 9am SEOC briefing are attached for consideration, correction, consolidation, and discussion.
Hard to catch everything, but between everyone involved we should be able to piece together and sort through a lot, and hopefully avoid any major errors.

PS: Please forward to whoever else is in the SEOC Planning section today (or the upcoming 2pm meeting). If appropriate, I can make printouts of this to provide/discuss at the meeting.

Thanks,

Mike Sobocinski's notes from the SEOC briefing of January 6, 2015:

Capt. Kelenske: This activation is different from many. Overall goals will include assessing the situation, prioritizing actions, and coordinating between agencies, identifying life-safety issues. SEOC activation hours are currently 8a-5p Mon-Fri. MI CIMS event titled 2015-10-1-City of Flint water contamination/shortage. Maintain activity logs in MI CIMS. Battle order set up for today: IC objectives meeting 10am, assign work tasks 11am IC + general staff, 2pm planning meeting, IAP approved 3pm, Unified command initial meeting 4pm. Governor declared state of emergency. Presidential disaster declaration will not apply here, but an emergency is possible to supplement state efforts. Lead pipe replacement program to be checked into – perhaps by Jen [Boyer?] of MDEQ. GIS mapping to cover filter distribution, home locations, distribution/testing gaps, etc. Nutrition distribution program [correct title?]. More of a long-term recovery style of approach. Goal to restore trust in state government. JIC will be set up.

Dr. Wells (DHHS chief medical executive): Pb as neurotoxin, affecting every system in the body, lowering Fe and Ca. Especially problematic in developing children under age 6, esp if not getting enough Ca, Fe. Standards have become increasingly strict over time, with Pb levels formerly 10ug/dl to warrant action, then lowered to 5ug/dl, and today Pb is treated as having no safe exposure level.

[NOTE: she is referring to blood concentration levels of micrograms per deciliter, not to be confused with water concentrations referred to elsewhere in units of micrograms per liter: ug/l. I'm using u to represent the greek letter mu, symbol for the "micro" prefix]

Health problems from lead include gastric problems, ulcers, anemia, etc. including death. Cognitive & developmental delays, attention & behavioral disorders. Pb sources include gasoline and paint (until the 1970s), pipes (esp. pre-1978 home construction), ammunition and firearms, soils & industrial sites, air pollution (especially in summertime). CLPP "clip" Childhood Lead Prevention Program. Screenings at age 1, age 2. Those who test >5ug/dl (national standard) are evaluated for environmental exposures/causes. Critical action level 45ug/dl – immediate medical treatment, chelation treatment to remove Pb, and investigation of Pb sources in environment. Water concentration does vary seasonally, with temperature and Ph changes. Old cities are targeted areas for higher risk. Virginia Tech independent testing of water. [From her limited description, I was unclear in the end of the relationship between these results and other tests.] Elevated Pb levels generally declining, including in Flint, until 3rd quarter of 2014 [fiscal quarter or calendar year???]. Hurley Medical Center deals with the high-risk area in Flint. American Journal of Public Health issue of 2 weeks ago had study published on this topic. Water is not the only source of Pb in the area. An increase was measured in 2 Flint zip codes [485]03 and [485]04 although it didn't reach statistical significance. Need to pin down high-risk areas – Pb levels can and do drop when environmental exposure is reduced. Testing since Oct. 1 [2015], to Dec. 18 [period for specific results, assuming testing still continues after Dec. 18?]. Improper water filter use, or non-use (e.g. after Detroit water restored in Flint), has caused problems. Pb has half-life of less than 30 days. Department [hers or in the city of Flint?] surveillance results: 23 children under 6, 7 children age 6+, 13 adults who had blood levels above 5ug/dl. 12 elevated Pb blood level investigations; now including water testing, but Pb in dust, paint, and soil was also found. 1 hospitalized (level in the high

30s of ug/dl). HUD-funded program at the state level [name?] Coordination with Wayne State University and Flint campus of [she had said MSU, but it is likely that it is instead U-M Flint]. Misinformation exists re: questions like whether it's okay to shower or bathe in the water [she provided no answer for her own example – is it okay?]. Much local support exists. Info sent through schools with the children who attend them. SNAF, WIF [double check?] nutritional programs for young children. Would like to test as many young children (under 6) as possible in the city. See MI.gov or Flint Water for information about filters – Home Depot as a partner. MDEQ includes blood Pb level in their testing reports.

Question asked: Are there other substances of concern besides Pb in water? A: yes, bacteria, Cu (esp. for those with Wilson's disease), and "other chemicals." [MDEQ person later fills in a couple of these: total trihalomethanes TTHM and halo-acetic acids HAA5, which both fall under the category of disinfectant by-products DBPs]

George Christian [correct spelling?] of the MDEQ (Flint action plan coordinator): Flint had used the Flint River as a source before 1967, in 1967 switched to use of Detroit Water and Sewer Department DWSD for its water supply. Jan 2006 discussions began with Karegnondi Water Authority KWA. April 17, 2014 [event? Possibly the end of DWSD supply?]. May 2014 city began using Flint River water. Aug-Sept Boil water notices issued in part of the city of Flint, for E. coli and total coliform violations. [NOTE: spoke too quickly for me to accurately catch all of the dates/events he mentioned. People really should provide their info in writing rather than rely upon verbal briefs under distracting SEOC conditions!] Had the Flint River as a back-up supply all along, which is why the facility there was still maintained [paraphrase; didn't catch exact wording]. Late 2014-early 2015 DBPs: HAA5 and TTHM, with carbon as a treatment to remove these compounds. Sequence of tests: first at 6ppb 90th percentile level [he didn't explain this well at all, but normally this would mean that the 90th percentile value is at or above the bottom 90% out of all ranked values in a list]. 2nd round of tests: up to 11ppb, compared to EPA's action level of 15ppb. Corrosion control treatment [a means of reducing lead concentrations in the water]. There were also issues reported involving the color, odor, and taste of Flint water. Virginia Tech Pb testing Sept 5 [?], 2015, with Pb advisory issued by Flint. Fall 2015 schools testing and actions required. Some fixtures and fountains above 100ppb. 4 samples per sampling point, after different flush times, 10 consecutive 1liter samples, 200-300 samples total per facility [math not exact; must be estimates], Info placed into spreadsheets and reports. Oct. 15 Flint switched back to DWSD water. Dec. 9, 2015 supplemental phosphate [PO_4] addition began. Use of erosion controls do slow but do not stop the leaching process (of lead into the water). Any resident of Flint can obtain a bottle and take water samples in for testing; results posted online. Water filters are available for free. Overall slight downward Pb trend, but some values are well over 100ppb. One child care facility measured at 2500ppb. No historical test results there [in schools?] to compare with, but some historical data exists elsewhere to compare. [No mention of the comparisons themselves!] Not a problem only of Flint's, increasing recognition of problem more broadly. "Low-lead brass fixtures" could still have as much as 8% lead. [not sure whether he said this or Dr. Wells]

Dr. Wells: Excavation and manipulation of lead lines tends to exacerbate particulate levels.\

Capt. K: Everyone review the MEMP to look for relevant information. All info to go out through PIOs (except for internal coordination and calculations).

Richard [Thelen?] of DHHS: allocation to buy water and filters, 2 pick-up locations in Genesee – free filters [locations not specified, are they at DHHS offices?]. Water purchases from South Carolina.

Brad [Deacon?] of MDARD: Food services, processing, and restaurants are also of interest. Lead affects animals as it does humans, so companion animals may be affected.

??? of the Dept of Education? "DEA" or "DoA"? [people were not introduced properly!] said something about school meals.

ARC not yet involved at this point.

LARA helped DEQ with testing. Flint & Genesee oversee their won plumbing but lack inspectors – need assist from state (Capt: or through EMAC use)

Terrace Room to be used as initial JIC, with PIOs there.

Governor's Representative [name?]: pending lawsuit against governor, potential lawsuit under Safe Drinking Water Act. Everyone do your jobs, but take care, remembering litigation potential.

MDOT [Eileen Phifer?]: Many pipes are under roads and so coordination would be good; shared objectives probably exist w MDOT, EPA, etc.

Lt. BJ Roach, MSP: Genesee Co. Public Health Dept, GCARP [??] (public assistance forum) are involved: water distribution, filter distribution, education, Pb testing clinics (coordinated with DHHS), United Way, Flint Health Dept. Over 23K filters and replacement cartridges provided so far. County GIS getting under way – coord w MSP GIS?

Capt K: submit action items to Tom Weber for IAP. Everyone stay until noon and review MEMP, then to decide whether needed after lunch today.

Tony: Required agencies already known to be needed to stay: MDEQ, DHHS, Education, Talent & Economic Growth, MDTMB, MDARD.

Subject: correction in draft

Importance: High

I wanted to mention that the April 2014 date I had placed into the draft text for Flint was just a guess (highlighted in yellow to be double-checked).
I later found a document from their water system which stated that it was actually May 2014 when the transition took place from the Detroit system to the use of Flint River water.
FYI

FYI –

Attached is some draft material I've put together so far. Only look at the front pages – this still contains long sections "inherited" from the sample document (2014) you had sent to me. The text in yellow is worth reviewing, for potential changes. The text in white might be pretty good, as it. The text in green is inherited from the 2014 flood disaster – merely a placeholder until it can be replaced with similar text for this current event.

I will continue to expand this with new/revised information tomorrow.

JOIN THE MSP

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since April 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to a dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,413	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	445,589	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.3%	52.6%	43.4%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an official bankruptcy (declared in 2XXX) appeared to provide one of the clearest means to sort through the many debts and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. A disproportionate number of the city's residents are in poverty. A disproportionate number of the city's residents have disabilities (functional needs).

Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982, also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits.

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this disaster:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor, I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this

request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

(Describe

Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Rick Snyder
Governor

U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

ATTACHMENT 2 TO MAJOR DISASTER REQUEST

Significant State and Local Response and Recovery Actions

Search and Rescue. The rapid and severe flash flooding inundated numerous sections of interstate highways, major state highways, and local roadways in the metropolitan Detroit area in the hours immediately after the heavy rainfall on August 11, trapping hundreds of vehicles and motorists in the rising water. Many of these motorists sought refuge on the tops of their vehicles or on nearby high ground and had to be rescued by Michigan State Police officers, local law enforcement officers, and local fire department personnel. Michigan State Police resources were particularly valuable to the search and rescue efforts. State Police officers provided direct assistance to stranded motorists, checked the status of abandoned vehicles, and assisted local responders in blocking access to flooded roadways. In addition, divers with the Michigan State Police Underwater Recovery Unit checked more than one hundred submerged vehicles for occupants (fortunately, none were found), and the State Police Aviation Unit conducted aerial fly-overs of the impacted areas to search for additional stranded motorists and to take aerial photographic and video footage of the flood scenes. (Some of those photographs are included at Attachment 3 to provide visual documentation of the scope and magnitude of the flooding.)

Critical Facilities and Infrastructure Restoration. A number of critical facility and infrastructure emergency restoration measures were implemented in the affected counties and local communities during the response to the severe flooding. Particularly hard hit were the interstate highways and major state roadways in and around metropolitan Detroit, although roadways in all three counties were heavily impacted by the flooding. Many sections of the affected highways in and around metropolitan Detroit (including interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39) were inundated with flood water, trapping vehicles and motorists who could not make their way through the rapidly-deepening water. This forced the closure of these roadway sections – in some cases for several days – so that crews from the Michigan Department of Transportation, Michigan State Police, and county and local road and law enforcement agencies could oversee the removal of stranded (and generally inoperable) vehicles; assess the physical damage to and conduct safety checks of road, bridge, and related infrastructure; and initiate appropriate facility repair and restoration measures so that the closed sections of roadway could be safely reopened to the motoring public. (Refer to the road closure map found at Attachment 3.)

Repair and restoration measures included but were not limited to: conducting safety checks of and making temporary or permanent repairs to damaged structures; removing water, mud and debris from the roadway, bridges, and rights-of-way; stabilizing banks to prevent further debris flows and physical degradation; repairing signage and electronic signals, where required; repairing pumping equipment and associated facilities to ensure they are operational; and testing the repaired facilities to ensure they will allow for safe travel. In most cases, the dedicated work crews were able to reopen the damaged highway and roadway facilities within 36-48 hours. However, some of the damaged sections of roadway and bridge infrastructure will

require more extensive permanent repairs which will take several weeks to several months to complete once funding is available to finance the repairs.

Uninsured damage to other local public facilities and infrastructure was significant. For example, in the City of Warren in Macomb County, the Police Department and Fire Department incurred nearly $2.8 million in uninsured damage to their police and fire vehicles and associated equipment. This includes 10 fully-equipped Fire Department vehicles and six fully-equipped Police Department vehicles requiring replacement, and another seven fire vehicles and nine police vehicles requiring major repairs. The City of Sterling Heights, also in Macomb County, had nearly $620,000 in insured public utility damage, while in St. Clair Shores, uninsured damage to public buildings and associated equipment totaled $225,000. In the City of Royal Oak in Oakland County, uninsured damage to a local high school and middle school totaled $210,000. Uninsured damage to St. John Providence Hospital in the City of Southfield in Oakland County was $200,000. Uninsured damage to Oakwood Hospital in the City of Dearborn in Wayne County exceeded $1.8 million, while in the City of Highland Park, also in Wayne County, uninsured damage to public utilities, city hall, and the community recreation center totaled in excess of $450,000. In the City of Detroit in Wayne County, uninsured damage to public buildings and equipment was over $930,000, with the majority of that total coming from damage to Police Department facilities. These are just a few instructive examples from the nearly $16.8 million in public damage that occurred in Michigan. Although temporary repair and restoration measures have been put in place in most instances to bring the damaged facilities and infrastructure in the three counties to basic operational status, almost all will still require extensive permanent repairs and restoration to bring them back to their pre-flood condition. That will not occur in a timely or comprehensive manner without federal disaster relief assistance.

Emergency Sheltering and Mass Care. Although the rapid (and unanticipated), heavy rainfall did not allow for preventive evacuations of the public in impacted areas, emergency sheltering and mass care services were required in several instances. For example, on August 11, over 400 stranded motorists had to be temporarily sheltered for the evening in the City of Warren because roadway flooding prohibited further travel and resulted in many areas being inaccessible by vehicle. (Many of these individual's vehicles were deeply submerged in flood water and would not have been able to travel anyway because of the damage to their vehicle.) Along M-10 in Wayne County, approximately 50 motorists were stranded for an extended period from the evening of August 11 through August 13 due to the deep flood water in the walled-in, lower sections of the highway. During this time, the American Red Cross provided these stranded individuals with food, water, and comfort kits until the roadway could be de-watered and reopened for travel. For six days after the flooding occurred, a small number of displaced flood survivors were sheltered and cared for at an American Red Cross shelter in Garden City in Wayne County because their homes were inaccessible and/or incurred sufficient damage to render them unsafe for occupancy. Lastly, the American Red Cross also provided cots and comfort kits to nearly two-dozen displaced residents at two apartment complexes in the cities of Detroit (Wayne County) and Troy (Oakland County) so that the residents could use other (unaffected) vacant units within the respective complexes for shelter, rather than having to be moved elsewhere to a temporary shelter facility.

I must note that these emergency sheltering and mass care figures are somewhat misleading, as we received reports that many more flood survivors were temporarily displaced because of flood damage and/or inaccessibility but sought shelter with nearby family, friends, or in unaffected area hotels and motels. As it is next to impossible to track these "unofficial" evacuations with any accuracy, it is safe to say that the number of temporarily displaced flood survivors is much higher than reported through official channels.

The American Red Cross generally led the organized emergency sheltering and mass care effort, supported by the Michigan Department of Human Services, the Salvation Army, and other community-based relief organizations.

Flood Recovery for Individuals and Families. To assist affected flood survivors in recovering from this devastating disaster, the American Red Cross teamed with the Michigan Department of Human Services, Michigan 2-1-1, the Michigan Community Service Commission, and other community-based relief organizations to establish and operate "Multi-Agency Resource Centers" (MARCs) in 10 different locations over a six-day period in the latter-half of August. (A corresponding map found at Attachment 3 shows the initial locations of these MARCs.) The Multi-Agency Resource Centers, which were visited by several thousand flood survivors, provided a location and means to disseminate information regarding flood recovery and available flood recovery assistance. Through these centers, flood survivors could connect with or be referred to agencies and organizations that could assist them in their recovery – addressing everything from filing insurance claims, to replacing food and clothing, to making repairs to damaged homes. In addition, the Multi-Agency Resource Centers also provided a clearinghouse for the distribution of flood clean-up kits, personal comfort kits, and other recovery supplies to those requiring such items. To date, over 300 referrals for behavioral health assistance have been made through the centers and other involved agencies.

In addition to the Multi-Agency Resource Centers, flood survivors also have the opportunity to request flood recovery information and/or assistance via the Internet or Michigan 2-1-1 telephone system. These options were widely disseminated to the public and the media in various information releases. For the internet options, affected individuals could register directly with the Recovery Coordination Center (discussed in "Management of Emergency Volunteers" below) operated by Michigan Voluntary Organizations Active in Disasters, at www.bit.ly/floodcleanupsemi, or they could register via a specially-designated web page (www.michigan.gov/miflood) at the Michigan State Police Emergency Management and Homeland Security web site, which provides a link to the Recovery Coordination Center registration form. Either option results in a referral for recovery assistance to one of the Michigan Voluntary Organizations Active in Disasters member organizations providing assistance through the Recovery Coordination Center.

(I must note that, although the Multi-Agency Resource Centers, Michigan 2-1-1, and the aforementioned web sites have been tremendously successful to date in identifying and addressing both short- and longer-term recovery needs of the affected flood survivors in this disaster, it is clear that even these collective efforts are not going to be sufficient to identify and address all of the unmet needs of the thousands of flood survivors. This is particularly true with regard to home rebuilding and restoration efforts to ensure safe re-occupancy of damaged

structures. Because over 80-percent of the affected households in the three-county area did not have insurance in place to address the damage incurred in this flash flood, it is very likely that many will be forced to occupy their homes with potentially dangerous and/or unhealthy conditions present due to damaged electrical and mechanical systems and/or the presence of black mold or other contaminants on building materials not properly dried out and restored. Simply put, the long-term unmet needs of the flood survivors far outstrip the combined resources of the involved voluntary organizations, volunteers, and existing human service programs to remedy those needs. Clearly, federal disaster relief assistance is required to enable these flood survivors to fully recover from this devastating flood and allow them to make their dwellings safe and sanitary for re-occupancy.)

Without significant relief assistance from the federal government, these individuals will not have the resources necessary to fully repair and restore their damaged homes and mechanical systems, ensure their homes are free of mold and other health hazards, and replace damaged essential household items such as appliances, clothing, food, medications, and furniture and bedding. Without federal relief assistance, it is an almost certainty that many individuals will continue to struggle to recover and be forced to live in unhealthy conditions due to mold, contact with contaminated materials, and substandard (and likely unsafe) mechanical systems that they could not afford to have properly repaired by licensed professionals.

Management of Emergency Volunteers. To date, hundreds of emergency volunteers have been mobilized through the collective efforts of the American Red Cross, Michigan Voluntary Organizations Active in Disasters, Michigan Community Service Commission, Michigan Department of Human Services, local and state emergency management offices, and community-based organizations, to assist in the recovery from this flood disaster. In fact, volunteers have been and continue to be the lifeblood of the flood recovery effort. The aforementioned agencies and organizations have done a tremendous job in managing these volunteer resources and ensuring their timely and effective use. As I previously indicated, several Multi-Agency Resource Centers have been established and successfully operated in the affected counties to allow for the distribution of clean-up and personal comfort kits, and to facilitate the connection of those in need with the agencies and organizations that can provide recovery and relief information and/or assistance.

Central to the disaster volunteer management effort has been the establishment of a Recovery Coordination Center (RCC) to provide a means to coordinate the efforts of organizations that provide volunteer assistance to flood survivors needing help in repairing and restoring their home. The majority of the volunteers providing assistance are working under the framework of Michigan Voluntary Organizations Active in Disasters, and in coordination with state and local emergency management agencies, Michigan 2-1-1, the American Red Cross, the Michigan Department of Human Services, and other community-based organizations. The Recovery Coordination Center helps identify flood survivors requiring recovery assistance and determines the nature and scope of their recovery needs. The center provides ongoing case management for individual recovery and rebuilding/restoration efforts, ensuring that no one "falls through the cracks" and does not receive the assistance they need. Affected individuals are identified and referred to the Recovery Coordination Center by Michigan 2-1-1, local and state emergency management offices, Michigan Department of Human Services county offices,

the Michigan Community Service Commission, churches and other faith-based organizations, or by involved volunteers themselves. Once a flood victim is registered with the Recovery Coordination Center, their recovery needs are referred to the appropriate agency or volunteer organization for follow-up action. Through the center, voluntary organizations can also track their recovery efforts, thus ensuring an accurate accounting of the volunteer hours spent with each flood victim. Currently, over 4,000 homeowners have requested clean-up and restoration assistance through the Recovery Coordination Center. To date, over 250 homes have been completed using volunteers coordinated through the center.

However, as I indicated earlier, even with these outstanding volunteer efforts in place the collective capabilities of volunteers can only go so far in meeting the more difficult long-term recovery needs aimed at ensuring safe and sanitary conditions in flood-damaged homes. Because of the lack of adequate insurance (less than one in five households was adequately insured) to help pay for potentially-expensive repair and restoration activities required to make home structural elements and mechanical systems safe and functional, and to fully-remove the presence of black mold and other contaminants in flood-damaged building materials, it is essential that federal disaster relief assistance be provided. Absent this assistance, affected flood survivors will, in many cases, be forced to live in potentially-dangerous and/or unsanitary conditions because they do not have the financial resources necessary to fully restore their dwellings to pre-flood condition in a timely manner – or at all.

Debris Removal to Protect Public Health and Safety. Debris management was a critically important recovery issue in the days and weeks immediately following this flood disaster. Throughout the affected counties and communities, extensive and rapid debris operations were required to clear and remove flood-damaged building materials and personal property from curbsides and roadway rights-of-way in residential and commercial areas in order to protect public health and safety and enable the continuing use of adjacent roadways, sidewalks, and fire hydrants. The wet, heavy, contaminated flood debris from tens-of-thousands of flood-damaged homes and businesses, coupled with the hot and humid weather conditions that occurred in the days that immediately followed the flood disaster, set the stage for potentially-dangerous and unsanitary conditions in these densely-populated and heavily-developed urban areas. Because of the very real potential for a public health emergency, it was necessary for the affected local communities to muster all of the private and public debris clearance and removal resources they could to ensure rapid and environmentally-compliant removal and disposal of this debris.

In that regard, the affected local jurisdictions did an exemplary job in rapidly managing this difficult and potentially life-threatening recovery issue. With the assistance of various state agencies working out of the State Emergency Operations Center, the local jurisdictions were able to identify sufficient resources to address their debris removal and disposal needs in a rapid and environmentally-compliant manner. All of the affected local communities effectively worked with the Michigan Department of Environmental Quality to obtain required emergency waivers for temporary debris storage and transfer centers, and for emergency transportation of flood debris to approved landfill facilities. These debris removal efforts, however, came at a collective $7 million cost to the affected local jurisdictions in the three counties – a cost which

these jurisdictions are not in a position to bear without significant cuts to other essential programs and services.

Emergency Public Information. During the first hours and days after the flash flooding occurred, the affected local jurisdictions and several Michigan state agencies undertook a comprehensive emergency public information campaign to warn residents of the health and safety risks posed by the flooding and flood-related damage, and to provide updates on recovery issues and concerns. Of particular concern initially were the health and safety risks associated with structural damage, damaged electrical and mechanical systems, and contaminated flood debris. Later, the public information focus shifted to address longer-term recovery issues such as use of licensed and reputable contractors, price-gouging, scam avoidance, and home restoration best practices. This public information campaign continues today, in both English and appropriate non-English languages, and will so for the foreseeable future until all recovery-related issues and concerns have been effectively dealt with. All appropriate media sources have been utilized in this campaign, including television, radio, print media, and web and social media sites. Although there were two incident-related deaths in the early days after the flooding, since that time this campaign has been largely successful in minimizing flood-related injuries and health and safety problems.

The Michigan United Way 2-1-1 telephone referral system has been a tremendously successful means of disseminating important recovery-related information and making referrals to agencies and organizations that can provide recovery assistance. To date, Michigan 2-1-1 has fielded nearly 10,000 calls from individuals seeking flood recovery information and/or referrals. Michigan 2-1-1 has been instrumental in connecting individuals in need with the appropriate resources to enable them to recover from this flood disaster. Despite its success, Michigan 2-1-1 also had one potential downside, that is, the large number of "abandoned" calls from callers that chose to hang up rather than utilize the call-back option when lines were busy. Telephone logs show that over 3,100 calls were abandoned between mid-August and the first week of September. This is disturbing to me because there is no way to track with certainty whether or not these individuals actually did receive the information and/or assistance they were seeking when they initially called Michigan 2-1-1. My hope is that they did, but I suspect a portion of these callers simply gave up and did not further seek recovery information and/or assistance.

(I must note that my concerns in this regard are not necessarily limited to Michigan 2-1-1. Reports received from state and local staff that participated in the Preliminary Damage Assessment indicate that a potentially large number of affected individuals may not have sought assistance due to a number of reasons, including but not limited to: a general distrust of or frustration with government; language and/or cultural barriers; technology barriers, i.e., do not regularly monitor media reports, the internet, or social media; or a lack of understanding regarding available resources and the means for accessing those resources. If federal disaster relief assistance is granted based on this request, we may find many additional individuals that may seek to apply for federal assistance – over and above those estimates developed in the Preliminary Damage Assessment.)

State Response and Recovery Assistance Efforts. Michigan's state departments and agencies and nongovernmental partner organizations have provided whatever appropriate resources they had at their avail to assist the affected counties and local jurisdictions in responding to and recovering from this flood disaster. Although the following is by no means an all-inclusive accounting of all response and recovery efforts, it does provide brief synopses of some of the more noteworthy efforts:

The **Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD)** began to monitor the incident in the early evening of August 11, after reports of flash flooding were first received from the affected local emergency management officials and the National Weather Service. Immediate communications were established with the local emergency management officials to assess the nature, scope, and magnitude of the incident and to help coordinate the provision of state resources as needed. This monitoring continued through the evening hours of August 11. When reports from the affected local jurisdictions and the Michigan Department of Transportation indicated that metropolitan Detroit interstate highways and major roadways had suffered major flooding, the MSP/EMHSD notified key staff to report to the State Emergency Operations Center (SEOC). The SEOC was in partial activation status for several hours, and then went to full activation status at 10:00 AM on August 12. Numerous departments, agencies, and nongovernmental partners responded and reported to the SEOC for duty.

The MSP/EMHSD coordinated SEOC operations at full activation status for the next 14 days, operating 24 hours a day, 7 days a week, on 12-hour shifts. On August 25, the overnight shift was terminated and the operational hours were changed to 8:00 AM till 8:00 PM. The SEOC remained on that schedule for two days, until August 27, when the hours were changed to 8:00 AM till 5:00 PM to more closely align with the Preliminary Damage Assessment operations ongoing in the three-county impact area. On September 8, the SEOC went to a weekly operational period.

Throughout the SEOC activation, the MSP/EMHSD staffed command, operations, logistics, planning, public information, mapping and technical support positions to keep the SEOC functioning at full capability and to fully support the state department/agency and nongovernmental partner representatives present in the facility. During this period, the MSP/EMHSD coordinated all resource requests received from the affected local jurisdictions, ensuring that each request was appropriately addressed in a timely manner. The MSP/EMHSD also coordinated the collection, compilation, review, analysis, synthesis, and reporting of damage and impact assessment information received from the affected jurisdictions and state departments/agencies. The MSP/EMHSD also conducted several briefings daily for local officials, state departments/agencies and nongovernmental partners, and other interested parties, to keep all stakeholders apprised of ongoing or planned activities and areas of concern. Daily incident management plans were developed by SEOC command staff to focus SEOC activities on planned incident management objectives and to ensure that state resources were being appropriately utilized to address the most pressing issues during the operational period. In addition, the MSP/EMHSD developed numerous daily written situation status reports and public information releases to keep SEOC staff, state government executive and legislative

leadership, local officials, our emergency management partners, and the public informed of ongoing issues, concerns, activities, and opportunities for coordination and/or involvement.

From August 25 to September 9, the MSP/EMHSD worked closely with Federal Emergency Management Agency officials to coordinate and conduct Preliminary Damage Assessments for both Individual Assistance and Public Assistance in the three-county impact area. The MSP/EMHSD was instrumental in the set-up of and conduct of the Preliminary Damage Assessment, handling all administrative and logistical aspects of the operation from the SEOC and an on-site coordination center established at the Double Tree Inn in Dearborn. Lastly, using the assessment information and findings from the Preliminary Damage Assessment, the MSP/EMHSD provided considerable technical assistance to me and my staff in the drafting of this request letter and in compiling the supporting information found in the various Attachments and Enclosures.

In addition to the MSP/EMHSD contributions, the **Michigan State Police (MSP)** also deployed considerable resources during the flood response to assist local officials in controlling access to flooded areas, conducting underwater search and rescue in flooded areas, and assisting with security and traffic control as required. Early in the response, the MSP Aviation Unit also flew aerial reconnaissance and assessment missions over the affected areas to search for additional stranded motorists on flooded highways, to aid local and state officials in determining the scope and magnitude of the flooding, and to take aerial photographs and video footage of flooded areas for damage and impact assessment purposes. (Some of those photographs appear in this letter at Attachment 3.) The MSP Special Operations Division also assisted at the SEOC, and the Michigan Intelligence Operations Center (MIOC) continuously monitored the flooding conditions and sent out situational awareness bulletins on the weather and flooding to all stakeholder partners through the duration of the response and recovery.

The **Michigan Department of Agriculture and Rural Development (MDARD)** made available flood clean-up (to include sewage) guidance to affected food establishments in the three-county impact area. This guidance was provided in English, Spanish, Arabic, and Mandarin languages. In addition, the MDARD and the U.S. Food and Drug Administration (FDA) Detroit District Office coordinated with various food industry associations in Michigan to assess the impact of the flooding on the food and agriculture sector and to determine appropriate follow-up measures necessary to protect public health. (Providing the clean-up guidance to food establishments was one of the necessary measures.) During this outreach process, the MDARD focused on food warehouses and retail establishments while the FDA focused on food processors and other regulated firms (e.g., drug, biologics, medical devices, etc.) within the local jurisdictions most heavily impacted by the flooding. (Those jurisdictions included but were not limited to: Warren, St. Clair Shores, and Clinton Township in Macomb County; Madison Heights, Ferndale, and Royal Oak in Oakland County; and Dearborn, Dearborn Heights, and Detroit in Wayne County.) In addition, the MDARD also reached out to the affected health departments (county and City of Detroit) who license and inspect restaurants, and with major grocery store chains and trade associations. MDARD personnel also inspected a number of gasoline stations in the affected area to determine if any had issues with flood water in their gasoline storage

tanks. (One did, but the issue was satisfactorily resolved by the state inspectors.)

The **Michigan Department of Community Health (MDCH)** coordinated with affected local health departments regarding the provision of disaster behavioral health resources; monitored and coordinated with local hospitals and the Region 2 Health Care Coalition regarding flood-related damage and the resultant impacts on hospital operations; and worked closely with the SEOC Public Information Officer to disseminate appropriate and timely health-related information to flood survivors.

The **Michigan Department of Environmental Quality (MDEQ)** coordinated extensively with local officials involved in debris management operations to ensure compliance with federal and state environmental laws and regulations; issued timely emergency approvals of sites designated for use as temporary debris storage and transfer sites; issued other emergency authorizations and waivers where appropriate; provided technical assistance to local officials and private debris management firms regarding issues pertaining to the collection, storage, transport, and disposal of flood-related debris; assisted in the identification of supplemental debris management resources for local officials in need of such resources; and monitored flood-related impacts on local drinking water treatment plants and operations in the affected area.

The **Michigan Department of Human Services (MDHS)** coordinated with involved voluntary relief organizations, community-based organizations, MDHS County Offices and the Michigan Community Service Commission, Michigan 2-1-1, and other human service providers to identify, assess, and attempt to meet the recovery needs of flood survivors. The MDHS undertook a number of activities during the response and recovery phases of this disaster to meet this broad mission, including but not limited to: coordinating with the American Red Cross, Michigan Voluntary Organizations Active in Disasters, and other voluntary relief organizations to establish and operate two temporary emergency shelters, 10 Multi-Agency Resource Centers, and a Recovery Coordination Center; coordinating the distribution of thousands of clean-up and personal comfort kits; coordinating with the SEOC Public Information Officer and other public information officials regarding the dissemination of appropriate and timely recovery information using all available means (e.g., Michigan 2-1-1, web and social media sites, television, radio, etc.); registering eligible flood survivors for the limited MDHS emergency relief assistance available; coordinating the receipt and use of donated goods for the recovery effort; resolving debris management issues for volunteers providing clean-up and/or repair assistance through the Recovery Coordination Center; assisting with volunteer recruitment through the Michigan Community Service Commission and other means; procuring needed supplies for volunteer repair/clean-up teams; and addressing recovery-related issues for various functional needs populations affected by the flooding.

The **Michigan Department of Licensing and Regulatory Affairs (MDLARA)** monitored incident-related energy disruptions and energy supply issues related to the storms and flooding; monitored the operations of regulated health care facilities affected by the flooding; provided (through the Michigan Occupational Safety and Health Administration – MIOSHA) worker safety information to emergency responders and workers, as appropriate; and provided (through the

Bureau of Construction Codes) information to citizens in the City of Highland Park and other communities on mandated building, mechanical, electrical and plumbing inspections.

The **Michigan Department of Technology, Management and Budget (MDTMB)** monitored the impacts of the flooding on state owned and operated facilities and state government operations in the three-county area; assisted in obtaining needed resources for emergency operations and/or flood recovery through standing vendor contracts and/or the state's emergency procurement process; identified and procured office space and coordinated information technology installation for needed emergency facilities; and assisted in transporting recovery supplies to Multi-Agency Resource Centers and other distribution facilities.

The **Michigan Department of Transportation (MDOT)**, assisted by local public works and law enforcement personnel and the Michigan State Police, managed the closure of several sections of interstate and state highways in and around metropolitan Detroit that were inundated by flood water. This included several sections interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39. The MDOT also monitored and reported on closures of local roads and bridges by local officials; reported on the scope and magnitude of road and bridge damage in the affected counties; coordinated with the Federal Highway Administration (FHWA) regarding implementation of its Emergency Relief Program; and participated in the Public Assistance Preliminary Damage Assessment for road and bridge damage.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

Subject: RE: Water system/water quality

I managed to print 3 sections of the Flint Master Plan (2 - Community Profile, 8 – Infrastructure and Community Facilities, and 10 – Public Safety, Health and Welfare) but was unable to do so with section 4 (Land Use).
The three sections I do have probably contain some useful information, so if you like you can stop by to look through them and mark relevant info.
For at least an hour, I'll be working from some of the books I brought in, to provide a general historical overview... So it will likely be at least a couple of hours before I look at the sections I just printed.

What I've seen so far of them looks great. ☺
I've tried sending stuff to the printer, for more scrutiny during our network shutdown...

Subject: RE: Water system/water quality

Hey Mike,

There should be enough there to answer the questions about the system (at least from what is available online). So after the network outage let me know if these will work. If not we may need to look at other sources as that was all I could find online.

Until then I will be working on other tasks for Tom.

Thanks,
Zach

Thanks! With the recent network disconnect announcement from Jim Porcello, it sounds like these things can be placed on hold for an hour or two. (I'll still be doing editing/writing from my printed sources, but it should be fine if you work on other things until the network comes back up.)

Subject: Water system/water quality

Hey Mike,

This is what I have found in regards to the water system and quality distributed by the city of flint water department. The first link describes the system (very briefly), the two report links (2015 and Oct 15) explain more about the situation and actions taken, the final report explains in detail the actions taken in response to high THM levels last spring after the switch.

Water system facts
https://www.cityofflint.com/wp-content/uploads/Water-System-Facts.pdf

Annual report 2014
https://www.cityofflint.com/wp-content/uploads/CCR-2014.pdf

Quarter water quality report (Oct 15)
https://www.cityofflint.com/wp-content/uploads/Quarterly-Water-Quality-Report_Oct-15.pdf

City of flint operational evaluation report (in response to high TMM levels)
https://www.cityofflint.com/wp-content/uploads/Flint-TTHM-Operational-Evaluation-Report-August-2015.pdf

There are also a couple more documents on the following pages but they are very specific test oriented.
https://www.cityofflint.com/public-works/water-quality-concerns/
https://www.cityofflint.com/public-works/utilitieswater/

Let me know if these will work,

Zach

Subject: RE: City of Flint Demographics Data.xlsx

Thanks very much!

I'm wondering whether you can track down another Flint document online (or set of documents) – those that describe the water supply system for the city, possibly including the transition plans themselves in which the city switched from and back to the Detroit system. Popular news articles have referred to certain details regarding the deposition of lead in the water, but it would be best to have an official source of info on such things rather than rely upon journalistic accounts. Perhaps do up to 30 or 60 minutes of searching online for a while and let me know what you find, if

anything. If you aren't finding much then perhaps some of my existing sources can be scrutinized to produce more clues (or contact might ensue with actual city department/utility representatives).

I say 30 to 60 minutes not because there is any specific rush or time limit on this (so far), but merely to designate what might count as an initial, general web search. Anything beyond that would almost certainly be better to track down using the clues and official sources (which we might end up using anyway, but it might be possible to find the same key documents with a 10 minute casual web search, so I figured you could start with that informal search). ☺

Thanks,
Mike

MEDIA MONITORING REPORT

1/5/2016

Issues:

- No issues to report.

Summary:

- Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."
- A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.
- The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.
- About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.
- Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.
- Nancy Kaffer opines about the state apology and that the resignation over Flint water is the first step.
- The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.
- A former emergency management professional suspects levees are causing the Mississippi River to flood.
- With the country seemingly in a heightened state of alert, Michigan State Police are reminding local residents that they can play a critical role with the newly unveiled "If you see something, say something" campaign.

Analysis:

- Heavy coverage about Genesee County's request for a Governor's declaration.

- Concern about Flint residents obtaining the filters they need.
- Will continue to monitor the situation.

FLINT WATER

Snyder weighs declaring water emergency in Flint

The Detroit News, January 4, 2016

Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.

But Michigan faces hurdles to getting federal relief, including forgiveness for state loans to Flint involving drinking-water infrastructure improvements that are covered by federal rules.

Even before any official declaration can be made, Snyder's office said Monday that state officials "are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2016

Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Emergency declaration for Flint headed to Gov. Snyder's desk

WJRT-TV 12 in Flint, January 4, 2016

An emergency declaration is heading to the Governor's desk.

The Genesee County Board of Commissioners signed off on the order Monday morning to try to secure federal money for Flint's fight on lead.

By declaring a state of emergency, city and county officials hope to secure federal funding to assist with the water emergency. The number they're asking for right now is $45 million from Washington.

Mother concerned, angry over continuing water crisis

WNEM-TV 5, January 4, 2016

Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."

The mother of two daughters is fearful of what the future might bring.

"My girls are 15 and 20 and very close to their next birthday. We have no idea what this means long term for the reproduction," Webber said.

The emotions this family feels on a daily basis is over flowing

It started when experts discovered high levels of lead in the drinking water flowing from the tap at houses throughout this city. Webber said the added insult is paying for that water.

"Not even offended, I am angry. Our water bill last month was $240 for what?" Webber said.

Webber's youngest daughter is 15. Victoria has had extreme complications due to lead poisoning, while her oldest Stephanie, 20, appears lead free. At least for now.

As a mother she wonders what will happen to them in a few years after having consumed lead-laced water?

"I know. There aren't words. We have fought for these kids," Webber said. "We didn't have these kids easy, it took us five years, protected them at every turn and handed them poison in a glass."

Flint water customers with overdue water bills, will now get more notice before a shutoff

WJRT-TV 12 in Flint, January 4, 2016

A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.

Circuit Judge Archie Hayman is NOT blocking the city from issuing them for customers delinquent in paying bills since September.

That's when lower water and sewer rates were put into place after his ruling that deemed a 35-percent increase, illegal.

It's all tied to a class-action lawsuit against the city - involving Flint residents who believe they were wrongly over-charged.

Attorney Val Washington, who is representing them in the case, says the Judge is instead, requiring customers be given MORE notice - 90 days - before the city takes action with stopping service.

Notices began going out again last month.

Flint water filter use is low

WJRT-TV 12 in Flint, January 4, 2016

There's disturbing information that three months after a campaign began to make free water filters available to fight lead in Flint, many homes still do not have them.

The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.

Dr. Mona Hanna-Attisha is the Hurley Medical Center pediatrician who discovered high lead levels in Flint children. She says too many parents are not making the effort to install the filters that can block lead in drinking water.

Hanna-Attisha says last month, all 54 families checked through a health program related to lead said they didn't have water filters in their homes.

We checked with adults picking up students at a Flint elementary school to see if they had filters in their homes.

"We're planning on it today because we just recently got it. The majority of people I know don't have them hooked up. Maybe they're just lazy," said Sameika Clayton.

"Well, I kind of just got mine because everyone was getting theirs in a certain order, or I couldn't really take off from work to go get it, so I just got mine," said Queda Wright.

"I got one just to keep the water pure even though we still drink bottled water," said Lemeer Bell.

Work continues on new Michigan water pipeline

Detroit Free Press, January 5, 2016

OREGON TOWNSHIP, Mich. — About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.

The Flint Journal reports the $285 million Karegnondi Water Authority project is on track.

Crews are burying the 66-inch-diameter pipeline on a path that starts with an intake at Lake Huron. Sections under construction include parts of Sanilac and Lapeer counties. A $71 million water treatment plant is being built in Oregon Township.

Flint switched from Detroit's water system in 2014 to Flint River water in a cost-cutting move ahead of the Karegnondi project's completion. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

Kaffer: State apology, resignation over Flint water first step

Detroit Free Press, January 5, 2016

In the quiet week between Christmas and New Year's Day, Michigan Department of Environmental Quality chief Dan Wyant resigned, followed quickly by department spokesman Brad Wurfel.

And Gov. Rick Snyder — finally — apologized for what happened in Flint.

For 18 months, Flint residents were exposed to lead-contaminated drinking water, after the city — while under state oversight and with MDEQ approval — began to draw its drinking water from the Flint River. Since the switch, an increasing percentage of Flint kids have elevated blood-lead levels. Lead poisoning causes irreversible behavioral and developmental difficulties.

So this apology, and these resignations, represent a sea change. But it's not enough.

For months, Snyder and his MDEQ attempted to dodge the reality that state policy wrought in the City of Flint. As reports, based not only on data compiled or gathered by outside researchers and journalists but on the state's own information, began to explain what was happening, Snyder's spokespeople and MDEQ officials worked to deflect, discredit and deny.

State employees who intentionally distort data could face jail time under a proposed law

Michigan Radio, January 5, 2016

A state lawmaker wants to make it a felony for state employees to manipulate datain official reports.

State Representative Phil Phelps, D-Flushing, says there's no law on the books to punish state employees who intentionally distort data to change the outcome of an official report.

Critics claim that's what happened with state reports that downplayed problems with Flint's drinking water after the 2014 switch to the city's namesake river. If that's what happened, Phelps says that should be against the law.

"If that was proven to be manipulation of data or removing data that changed the outcome, it could be subject to a five year felony," says Phelps.

Video: New calls for federal probe of Snyder admin in Flint water fiasco

MSNBC (Rachel Maddow Show), January 4, 2016

Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.

Data shows even higher lead poisoning in kids in West Michigan than Flint

Fox 17 in Grand Rapids, January 5, 2016

GRAND RAPIDS, Mich. – The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.

The problem in Flint was so bad it forced the head of Michigan's Department of Environmental Quality to quit last week. Yet as this crisis continues, data shows the problem is broader than the Flint area.

In a recent report, The Center for Michigan, a think tank promoting awareness of public policy issues, cited evidence that among five Grand Rapids' zip codes alone, nearly one in 10 kids tested positive for lead poisoning.

"In Grand Rapids, it's collectively between those zip codes, it's 10 percent," said Paul Haan, executive director with the Healthy Homes Coalition of West Michigan. "We're four times the national level of kids with that low to moderate to even high level of lead poison."

Weather spotters serve as eyes and ears for meteorologists

Port Huron Times Herald, January 4, 2016

Stan Arnett has been tracking severe weather for at least three decades.

The 70-year-old Marysville man is one of about 50 trained weather spotters in St. Clair County.

Arnett said it was something he started doing through his love of amateur radio.

"A long time ago I was interested in the magic of communicating around the world or even locally on two-way radios," he said.

Now he uses that hobby to talk to people around the world and help meteorologists determine if severe weather warnings need to be issued.

"Any severe weather ... anything that significantly impacts citizenry," is reported, Arnett said. "It's just something I can do."

Rich Pollman, the warning coordination meteorologist at the National Weather Service White Lake office, said about half of the 5,000 spotters in the 17-county region are ham radio operators.

Levees among possible cause of more frequent flooding

Associated Press, January 5, 2016

The Mississippi River floods more often than it used to, and at higher levels. Richard Knaup thinks he knows why.

The veteran emergency management director for southeast Missouri's Cape Girardeau County is fighting floods again, just as he did last year, and the year before that, and the year before that.

"Prior to levee building, the river was a wild thing and it spread out between the river bluffs," Knaup said Monday. "Now we've tried to tame it. Mother Nature and Old Man River will fight back."

Ex-Macomb County PR rep arrested in child porn case

Detroit Free Press, January 4, 2016

A former spokesman for Macomb County government, the Detroit International Bridge Co. and Cobo Center who is well-known in metro Detroit public relations and media circles has been arrested on child porn charges by the Macomb County Sheriff's Office.

Philip William Frame, 61, of Shelby Township is charged with five counts of possession of child sexually abusive material, a four-year felony; one count of using a computer to commit a crime, a seven-year crime, and a misdemeanor charge for possessing marijuana, the Sheriff's Office said today.

He was arrested and then released Saturday from the Macomb County Jail after posting a $10,000 cash or surety interim bond. He was formally arraigned today, where the same bond was continued. His next court date is Jan. 19.

Police ask citizens to report unusual activity

Soo Evening News, January 5, 2016

With the country seemingly in a heightened state of alert, Michigan State Police are reminding local residents that they can play a critical role with the newly unveiled "If you see something, say something" campaign.

"Homeland security starts with hometown security and our citizens know their neighborhoods, schools and work places better than anyone," said F/Lt. Joe Shier of the St. Ignace Post. "If something appears suspicious or out of place, don't hesitate to report it to law enforcement."

An expert on right-wing terrorism explains the militia movement behind the Oregon takeover

Vox, January 5, 2016

A group of armed activists calling itself Citizens for Constitutional Freedom took over a federal building on the Malheur National Wildlife Refuge near Burns, Oregon, on Saturday, saying they were protesting the tyranny of the federal government.

The militants have called for others throughout the US to come and join their fight. They're tapping into a growing trend: the number of unorganized militias in the US has increased 37 percent in the past year, according to the Southern Poverty Law Center.

Daryl Johnson saw this coming. In 2009, as an analyst at the Department of Homeland Security, Johnson wrote a report arguing that the economic downturn and the election of the first black president could fuel a new wave of anti-government violence from extreme right-wing groups.

His report was later leaked, provoking widespread outrage from conservatives. Johnson left DHS in 2010. But his analysis proved correct. The number of anti-government militias grew ninefold between 2008 and 2011, and after a brief period of decline, is now growing again.

El Nino storms slam drought-parched California

Associated Press, January 5, 2016

A strong storm was forecast for Northern California, prompting officials to issue flash flood watches for several rural areas hit by last year's wildfires.

El Nino storms lined up over the Pacific started soaking California with light rain Monday but a series of stronger systems are expected to arrive starting Tuesday, forecasters said.

The National Weather Service issued a flash-flood watch for Northern California communities affected by several destructive wildfires last summer and fall.

Michigan DNR Marks Busy 2015 With Several Successes

Ammoland, January 5, 2016

When wildfires raged this season in western states – and a Canadian province – the Michigan DNR was quick to put a fireman to work on putting out a hot spot on the Marquette County Road 601 fire. The fireman was among several sent to Manitoba this past summer. respond. This year, 54 individuals traveled to hot zones in Alaska, California, Idaho, Manitoba, Montana, Oregon and Washington, taking on 16 different overhead positions from fire-line leadership to command staff and hand crews. There were a total of 58 dispatches (or assignments), each one lasting roughly two weeks.

"Cooperative efforts are key to protecting people, property and resources statewide as well as nationally," said Paul Kollmeyer, DNR resource protection section manager. "We are proud that our firefighters have the necessary skills to assist with emergency situations in other states."

Kollmeyer said that while DNR firefighters are providing assistance out west or in other locations, Michigan remains adequately staffed to handle any fire incident that might start here at home. When sending staff on out-of-state firefighting assignments, the state of Michigan is fully reimbursed for all costs associated with providing that support.

Clare County Crews Work To Repair Gas Line

9 and 10 News, January 5, 2016

Construction crews in the city of Clare hit a gas line while working near an old car dealership.

Clare County's emergency manager says the crew hit a line at an old Ford dealership at the south end of Clare.

The Admiral Gas Station next to the old car dealership was quickly evacuated.

The street was blocked off between McEwan and Clare streets while crews worked to repair the line, but has since been reopened.

We have a crew heading to Clare and will have the latest updates on the gas leak on air and online.

You have heard the news. Even still, watch this video. Just at least the first three minutes. After you start its hard to stop.

Then ask yourself a few questions.

1. Did I vote in last year's Election that got Rick Snyder re-elected?
2. (If No) Do I feel like a complete idiot for not using my valuable vote to keep this guy from destroying the city of Flint as well as the rest of our state?
3. (If Yes) Who did I vote for again?
4. (If Yes, and you voted Snyder) What makes me so dumb? Is it that my parents raised me to vote biasedly on their own views, and I blindly helped elect a scumbag?
5. (If Yes, and you didn't vote Snyder) How could I have helped keep him from being elected in the first place when there are so many biased idiots who's biased political views come from their parents? Why aren't there more citizens voting?
6. How can I get this guy out of office

Jon Gerster

8 hrs ·

Let me just say that in this new year, 2016, is a Presidential Election year. This issue of Flint's contaminated water supply is a direct result of "you get who you vote for". Gov. Snyder, a republican is where the buck stops. He is the one who appointed the special manger to take over Flint's government from the officials those very people elected. Shame on the republicans! Remember - you get who you vote for!!!
Poor Flint!

MEDIA MONITORING REPORT

1/5/2016

Issues:

- No issues to report.

Summary:

- Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."
- A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.
- The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.
- About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.
- Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.
- Nancy Kaffer opines about the state apology and that the resignation over Flint water is the first step.
- The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.
- A former emergency management professional suspects levees are causing the Mississippi River to flood.
- With the country seemingly in a heightened state of alert, Michigan State Police are reminding local residents that they can play a critical role with the newly unveiled "If you see something, say something" campaign.

Analysis:

- Heavy coverage about Genesee County's request for a Governor's declaration.
- Concern about Flint residents obtaining the filters they need.
- Will continue to monitor the situation.

FLINT WATER

Snyder weighs declaring water emergency in Flint

The Detroit News, January 4, 2016

Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.

But Michigan faces hurdles to getting federal relief, including forgiveness for state loans to Flint involving drinking-water infrastructure improvements that are covered by federal rules.

Even before any official declaration can be made, Snyder's office said Monday that state officials "are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2016

Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Emergency declaration for Flint headed to Gov. Snyder's desk

WJRT-TV 12 in Flint, January 4, 2016

An emergency declaration is heading to the Governor's desk.

The Genesee County Board of Commissioners signed off on the order Monday morning to try to secure federal money for Flint's fight on lead.

By declaring a state of emergency, city and county officials hope to secure federal funding to assist with the water emergency. The number they're asking for right now is $45 million from Washington.

Mother concerned, angry over continuing water crisis

WNEM-TV 5, January 4, 2016

Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."

The mother of two daughters is fearful of what the future might bring.

"My girls are 15 and 20 and very close to their next birthday. We have no idea what this means long term for the reproduction," Webber said.

The emotions this family feels on a daily basis is over flowing

It started when experts discovered high levels of lead in the drinking water flowing from the tap at houses throughout this city. Webber said the added insult is paying for that water.

"Not even offended, I am angry. Our water bill last month was $240 for what?" Webber said.

Webber's youngest daughter is 15. Victoria has had extreme complications due to lead poisoning, while her oldest Stephanie, 20, appears lead free. At least for now.

As a mother she wonders what will happen to them in a few years after having consumed lead-laced water?

"I know. There aren't words. We have fought for these kids," Webber said. "We didn't have these kids easy, it took us five years, protected them at every turn and handed them poison in a glass."

Flint water customers with overdue water bills, will now get more notice before a shutoff

WJRT-TV 12 in Flint, January 4, 2016

A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.

Circuit Judge Archie Hayman is NOT blocking the city from issuing them for customers delinquent in paying bills since September.

That's when lower water and sewer rates were put into place after his ruling that deemed a 35-percent increase, illegal.

It's all tied to a class-action lawsuit against the city - involving Flint residents who believe they were wrongly over-charged.

Attorney Val Washington, who is representing them in the case, says the Judge is instead, requiring customers be given MORE notice - 90 days - before the city takes action with stopping service.

Notices began going out again last month.

Flint water filter use is low

WJRT-TV 12 in Flint, January 4, 2016

There's disturbing information that three months after a campaign began to make free water filters available to fight lead in Flint, many homes still do not have them.

The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.

Dr. Mona Hanna-Attisha is the Hurley Medical Center pediatrician who discovered high lead levels in Flint children. She says too many parents are not making the effort to install the filters that can block lead in drinking water.

Hanna-Attisha says last month, all 54 families checked through a health program related to lead said they didn't have water filters in their homes.

We checked with adults picking up students at a Flint elementary school to see if they had filters in their homes.

"We're planning on it today because we just recently got it. The majority of people I know don't have them hooked up. Maybe they're just lazy," said Sameika Clayton.

"Well, I kind of just got mine because everyone was getting theirs in a certain order, or I couldn't really take off from work to go get it, so I just got mine," said Queda Wright.

"I got one just to keep the water pure even though we still drink bottled water," said Lemeer Bell.

You can pick up free water filters and replacement cartridges at two GCCARD offices in Flint and at the DHS offices in downtown Flint.

Michigan DNR Marks Busy 2015 With Several Successes

Ammoland, January 5, 2016

When wildfires raged this season in western states – and a Canadian province – the Michigan DNR was quick to put a fireman to work on putting out a hot spot on the Marquette County Road 601 fire. The fireman was among several sent to Manitoba this past summer. respond. This year, 54 individuals traveled to hot zones in Alaska, California, Idaho, Manitoba, Montana, Oregon and Washington, taking on 16 different overhead positions from fire-line leadership to command staff and hand crews. There were a total of 58 dispatches (or assignments), each one lasting roughly two weeks.

"Cooperative efforts are key to protecting people, property and resources statewide as well as nationally," said Paul Kollmeyer, DNR resource protection section manager. "We are proud that our firefighters have the necessary skills to assist with emergency situations in other states."

Kollmeyer said that while DNR firefighters are providing assistance out west or in other locations, Michigan remains adequately staffed to handle any fire incident that might start here at home. When sending staff on out-of-state firefighting assignments, the state of Michigan is fully reimbursed for all costs associated with providing that support.

Clare County Crews Work To Repair Gas Line

9 and 10 News, January 5, 2016

Construction crews in the city of Clare hit a gas line while working near an old car dealership.

Clare County's emergency manager says the crew hit a line at an old Ford dealership at the south end of Clare.

The Admiral Gas Station next to the old car dealership was quickly evacuated.

The street was blocked off between McEwan and Clare streets while crews worked to repair the line, but has since been reopened.

We have a crew heading to Clare and will have the latest updates on the gas leak on air and online.

14 hrs ·
Rachel Maddow is back in the hosting seat tonight!
Tonight we'll get the latest as the Flint mayor's declaration of emergency heads to Governor Snyder's office.
In case you missed it over the holidays, the previous update in the Flint water story was that Governor Snyder apologized for the crisis and announced the resignation of the state's environmental chief. http://on.msnbc.com/1PcanXO

Audrey Mitten
10 mins ·
If you were compelled by "Making a Murderer" on Netflix, you'll be fascinated by "Making Flint's Poisoned Water and Looking the Other Way" by the State of Michigan.

A must see/read.
Quite the chain of events, but not yet a Federal emergency.
theguardian.com/us-news/2015/dec/30/michigan-governer-rick-s...

Theo White
4 hrs ·
You have heard the news. Even still, watch this video. Just at least the first three minutes. After you start its hard to stop.
Then ask yourself a few questions.
1. Did I vote in last year's Election that got Rick Snyder re-elected?
2. (If No) Do I feel like a complete idiot for not using my valuable vote to keep this guy from destroying the city of Flint as well as the rest of our state?
3. (If Yes) Who did I vote for again?
4. (If Yes, and you voted Snyder) What makes me so dumb? Is it that my parents raised me to vote biasedly on their own views, and I blindly helped elect a scumbag?
5. (If Yes, and you didn't vote Snyder) How could I have helped keep him from being elected in the first place when there are so many biased idiots who's biased political views come from their parents? Why aren't there more citizens voting?
6. How can I get this guy out of office

Jon Gerster
8 hrs ·
Let me just say that in this new year, 2016, is a Presidential Election year. This issue of Flint's contaminated water supply is a direct result of "you get who you vote for". Gov. Snyder, a republican is where the buck stops. He is the one who appointed the special manger to take over Flint's government from the officials those very people elected. Shame on the republicans! Remember - you get who you vote for!!! Poor Flint!

Subject: Flint request work

Hello –

Take a look at attachment 1 in the document Tom had sent to us. It was a draft used in a 2014 disaster declaration, but the information used there might be re-usable today, if the years are appropriate for the information you're finding. Do you have the impression that the info for the key variables are available for each year through ACS? One of our choices involves which year to use data for. 2010, or something more recent.

I had the same problem until I converted a smaller file into a printable version; then I was able to use the Adobe search feature successfully, but only on one converted section at a time. And when I tried making the entire document printable, there was another crash!
I'll be seeing what's in the city plan, so in the meantime, you can focus on getting info from the census/ACS site...

Thanks,
Mike

I will start looking for this information. In the plan I am only able to search (Ctrl+F) when I only look one section at a time otherwise it crashes my browser.

Zach

Excellent. There is a set of standard census info that we need to start with, by pulling comparative figures on several variables at three scales: (1) the City of Flint, (2) the State of Michigan, and (3) the United States as a whole. I believe the official 2010 population figures would be best in most cases (i.e. no estimates or projections), but several key variables will be part of the social information collected by ACS, which as I recall is in off-years now, such as 2012. So we should ideally also have population figures from that same ACS year/source. The key starting variables are: (1) persons below poverty level, percentage, (2) median household income, (3) percent with disabilities, (4) percent unemployed (might use an alternative source of info for this, but it's worth seeing what ACS has on it).

I haven't been able to search (Ctrl + F) the Flint plan without getting internet errors, for some reason, so I'm wondering whether you are able to do so. Some of this info might already be presented in that plan.

Thanks,

I found a crude way to digitally search the Flint plan. For example, poverty info is in there on page 21. However, since we need to make comparisons from the same source/year, the Flint plan might mainly be useful just to verify some of the info found in census/ACS.

I believe that Flint may have annual ACS info available for most of the needed variables. Larger cities like that are supposed to have annual surveys in ACS. So if you are able to verify this, then we can decide whether to use 2010 or to choose a later year.

Thanks,
Mike

I am 99% sure Flint's system only serves the City. Their "damage assessment" is supposed to identify exactly which pipes are affected. It would be worth looking into getting a map of their water system's service area.

Sounds good.
I'm "pretty good" at putting together census-based descriptions. Have been doing it for at least 20 years...
Since Genesee County has declared an emergency now, do you know if the focus is still specifically and exclusively on the city of Flint? (Were there any adjacent areas that also shared the Flint water system, such as Flint Township?) That would be the first question I'd need answered.

Thanks,
Mike

Glad you asked! While the Governor has not yet made the decision, it is virtually certain we'll be going to the feds with some sort of request for assistance, even if it's not through FEMA. So I think it would be well for us to get started on the demographic component, and it makes as much sense to use our past formats for declaration request letters as anything. Here's a copy of the one used for the SE MI flooding in '14. We can meet on this tomorrow if you'd like. I figured you two could work on this together.

Nothing major this morning at the Monday meeting. The following points came up:

- Keep in mind your contributions to points within the Strategic Plan and report out on them when possible.
- The Flint County Commission met this morning and declared emergency. A request for the Governor to declare emergency was also made.
- The move is on track. Labels were passed out to everyone today. Boxes were also delivered.
- The Terrorism Tabletop was moved to January 22.
- Cap/we will be heavily involved in the response to assist Flint.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

(Date of Request)

The Honorable //// //////
President of the United States
The White House
Washington, D. C.

Through: Regional Administrator [NAME]
FEMA Region _____
City, State, Zip Code

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare a [major disaster or emergency] for the ***(name of the State or Indian tribal government)*** as a result of ***(name type of incident and incident date as identified in the declaration request form).***

[The following information is required for ALL requests. Provide additional information that is not contained in the form. If requested information is included in the form, it is not necessary to repeat in the cover letter.]

Describe deaths and/or injuries associated with the event.

Describe voluntary agency assistance provided to the community in anticipation of or as a result of the event. (including but not limited to activities taken by the American Red Cross (ARC), Salvation Army, Southern Baptists, and Voluntary Organizations Active in Disaster; voluntary agency and/or municipal shelter information, including the number of shelters open, the peak population, total number of overnight stays, and when the shelters closed; number of mental health contacts made by voluntary agencies; number of ARC cases open and closed; number of clean up kits provided; number of meals served; number of fixed and/or mobile feeding sites; level of ARC operation (I-V); and any other type of assistance that was provided by voluntary organizations).

Indicate whether a State of Emergency has been declared, when and to what areas are included in the declaration. Indicate if affected jurisdictions have also declared states of emergency.

Provide a description of damage as a result of the event (such as the impact the event has had on the affected area and population; disruption of normal community functions and services, including damage to any critical facilities that have been rendered non-operational by the event and extended or widespread loss of power or water; emergency conditions that may be present,

health and safety hazards, status of repairs, and estimated completion date(s), if known.

Provide information on PDA findings and how and where they were conducted, including accessibility concerns, if additional space needed from the form.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this disaster:

Describe what has been done to respond to the disaster, including actions pending or taken by the State, local, or Indian tribal governments. Describe any State, local or Indian tribal government Individual Assistance programs.

Provide the disaster history of the State or Indian Tribal government over the past 12 months, including Stafford Act declarations and declarations by the Governor or Tribal Chief Executive and the extent to which the State or Indian tribal government has expended its own funds; list areas that have sustained damage from this event and other disasters in the previous 12 months; and include any other pertinent factors that would have a bearing on the State or Indian tribal government's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.

[The following information is required for requests for Individual Assistance.]

Provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations. Include a comparison of the percentage of the State, local, or Indian tribal government averages and national averages.

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
National Average	%	$	%	%	
State/Tribe Average	%	$	%	%	
List Jurisdictions Requested	%	$	%	%	

* *Indicate source of data cited*

[The following information is required for requests for Public Assistance.]

Provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include in your discussion significant impacts to specific areas. If any local communities have sustained significant damage and

have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita.

Discuss level of insurance coverage.

If applicable, include estimates for emergency dune restoration on non-engineered beaches that may be eligible for the placement of temporary berms in order to eliminate or lesson the threat of additional damage from a five year event. Identify all damage associated with engineered beach projects and indicate whether or not the damage associated with those beaches is included in the PDA information. Note that beach projects under the authority of the United States Army Corps of Engineers, are not eligible for Public Assistance, as they are under the authority of another federal agency, therefore costs associated with such projects should not be included in the PDA information. Such costs should be identified in Enclosure C.

Insert concluding statement.

Sincerely,

//////////
(Governor or Tribal Chief Executive)

September ??, 2014

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of severe flash flooding that struck the counties of Macomb, Oakland, and Wayne, including metropolitan Detroit, on August 11-12, 2014.

The flash flooding was caused by a low pressure storm system that moved across southeast Lower Michigan in the early evening hours of August 11. This storm system produced historically heavy rainfall – four to six inches in less than four hours in parts of Macomb, Oakland, and Wayne counties – resulting in severe flash flooding and widespread sewer back-ups in many communities. Officials from the National Weather Service indicate that existing one-day rainfall totals were broken or nearly broken in several areas. For example, at 4.57 inches of rainfall, metropolitan Detroit experienced its second highest rainfall total ever recorded in a single day, falling just short of the all-time record of 4.74 inches set back on July 31, 1925.

According to the National Weather Service, the City of Dearborn in Wayne County received the highest rainfall total for the storm, 6.31 inches, during a 12-hour period. In the City of Southfield in Oakland County, 6.25 inches of rainfall occurred during a 12-hour period, while in the City of Berkley, also in Oakland County, 6.00 inches of rainfall occurred in a 9-hour period. In the City of Troy in Oakland County, the rainfall total for the storm measured 5.46 inches. In the City of Warren in Macomb County, particularly hard-hit in this flood disaster, 5.20 inches of rainfall was recorded in a 13-hour period. Three other Macomb County communities (i.e., the cities of Fraser and Rochester, and Shelby Township) exceeded four inches of rainfall for the storm. In Wayne County, a total of 14 communities, including the aforementioned City of Dearborn, received four inches or more of rainfall during the storm. The City of Dearborn Heights, immediately adjacent to the City of Dearborn, was also particularly hard-hit, at 4.97 inches of rainfall over a 12-hour period. A summation of the rainfall totals for these and other affected local communities can be found at Attachment 3 at the end of this letter.

Across the area, the heavy rainfall overwhelmed creeks and tributaries, municipal and county storm drains, and pumping stations for area roadways; caused flash flooding and sewer back-ups that flooded thousands of homes and businesses; stranded hundreds of motorists in up to head-deep water; and forced the closure of major sections of area interstate and state highways for several days. The National Weather Service reported that at least three bodies of water in the impacted counties flooded in the hours and days immediately after the August 11 heavy rainfall: the lower Rouge River in the City of Dearborn in Wayne County; Ecorse Creek in

the City of Dearborn Heights, also in Wayne County; and the Clinton River in Clinton Township and the City of Sterling Heights, in Macomb County. In fact, the Clinton River set an all-time record with a crest of 20.8 feet on August 12, eclipsing the previous record crest of 20.0 feet set 67 years ago on April 5, 1947.

Damage to flooded homes and businesses was particularly severe. The damage typically resulted from a few inches to several feet of water in basements, to water above the first finished floor causing significant damage to foundations and other structural elements. In addition, water on the first finished floor damaged interior finishes and personal property. Many basements incurred substantial damage to the foundation walls and footings, to electrical and mechanical systems, to finished living spaces, and to personal property. A significant number of the homes that incurred substantial basement damage had finished essential interior living spaces in the basement, such as an occupied bedroom, a bathroom, or in some cases the home's only kitchen and food storage area.

Any discussion of damage related to this flood disaster must be coupled at this point with a corresponding discussion related to the uniform lack of insurance for flood hazards in the affected area. Our initial assessments, confirmed later by federal damage survey teams, show that more than 80-percent of the affected households do not have flood insurance or sewer back-up insurance policies in place that would have covered the damage most commonly incurred in this disaster, that being: structural damage to walls and foundations; damage to electrical and mechanical systems; damage to home furnishings, wall treatments, and flooring; loss of appliances such as washers and dryers; and loss of televisions, computers, clothing, and other personal belongings. Even if these affected households had full-coverage flood insurance policies in place, the losses they incurred are far greater, on average, than the maximum coverage provided by flood insurance policies under the National Flood Insurance Program.

Additionally, flood damage caused by sewer back-ups into basements is not covered under a standard flood insurance policy. Rather, a separate sewer back-up rider must be purchased (where available) as part of a homeowner's home insurance policy. Unfortunately, damage surveys indicate that more than 80-percent of households in the affected area do not have such coverage and therefore are left to absorb whatever losses they incurred out-of-pocket. For most affected households, sewer back-ups resulting from the historic rainfall caused the majority of the flood damage to their homes. Although some households may potentially be eligible for limited financial compensation for sewer back-up damage under Michigan's Governmental Liability of Negligence Act (1964 Public Act 170, as amended, MCL 691.1401 to 691.1419), the amount received, in most cases, will not begin to cover the entirety of their losses.

Damage surveys indicated that many homes are in areas that have experienced repetitive flooding, and this factor coupled with the age and condition of the dwellings means that many flooded homes may have incurred damage that meets or exceeds federal and state substantial damage criteria. An instructive example of this was found in the City of Dearborn Heights in Wayne County, where a damage survey conducted by a team of Michigan Department of Environmental Quality and Federal Emergency Management Agency flood specialists identified an area of older homes particularly hard-hit by flooding of Ecorse Creek

caused by the unusually heavy rainfall. This team identified at least 84 damaged homes in one neighborhood that exceed federal and state substantial damage criteria for flood-damaged structures, meaning that these homes will likely have to be demolished or entirely rebuilt to meet Michigan Construction Code and floodplain protection provisions. Unfortunately, the percentage of households in this area with flood insurance is low (just slightly over 40-percent), and the area was characterized as lower income where most residents are older and have limited financial resources. Although this was just one neighborhood in one community, this situation is not uncommon throughout the three-county area. Without significant assistance from the federal government, these and other households like them will experience severe financial hardship for years as they attempt to recover from this flood disaster.

Although numerous local jurisdictions in the three-county area were severely impacted by the flooding and over 118,000 homes and businesses were damaged or affected in some significant way, damages were particularly concentrated in the cities of Warren, Sterling Heights, and Centerline, and Clinton Township in Macomb County; the cities of Oak Park, Royal Oak, and Southfield in Oakland County; and the cities of Dearborn, Dearborn Heights, and Detroit in Wayne County. These areas had particularly notable concentrations of public and/or private damage. For example, in the City of Warren in Macomb County, nearly 23,000 homes incurred damage, representing approximately 40-percent of the city's housing stock. In the City of Dearborn, over 7,600 homes incurred damage, representing approximately 20-percent of that city's nearly 38,000 housing units. The City of Detroit suffered damage to 7-percent of its housing stock. Similar concentrations of damage were experienced in the other aforementioned communities.

The concentration of damage within these small geographic areas magnifies the impact of this flood disaster considerably on the affected communities, and on the three counties as a whole. The collective economic toll to these communities and the region is astronomical. Assessments of private damage conducted by county and local assessors estimated that total residential and commercial flood damage exceeded $1.1 billion in the three-county impact area. Unfortunately, as I previously pointed out, these areas of concentrated damage also have some of the highest concentrations of residents who do not have flood insurance or sewer back-up coverage on their homeowner's insurance policy. Across the three-county impact area, damage surveys indicated that less than 20-percent of flood-damaged homes were covered by flood insurance and sewer back-up insurance. In some of the communities, the percentage of coverage is lower than 20-percent.

Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982,

also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits.

By far the most tragic aspect of this flood disaster is that two confirmed deaths have been directly attributed to the flooding conditions, despite the generally-excellent efforts of the affected local jurisdictions and the Michigan State Police in preventing access to flooded areas and in disseminating warnings and emergency public information about the flooding. The warnings and emergency public information were largely followed; however, the rapidly-rising flood waters trapped numerous individuals in their vehicles or home basements, which directly contributed to the two deaths. In addition, flood warnings and emergency public information developed and disseminated by the National Weather Service office in Detroit also contributed positively to this public safety effort, although the historic nature and rapid rise of the flood waters caught even them off-guard.

In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational.

The response by our partner voluntary relief organizations to the severe flooding has been both timely and appropriate. From the outset, the American Red Cross, the Michigan Voluntary Organizations Active in Disasters, and volunteers arranged through the Michigan Community Service Commission have actively provided relief assistance to those in need in the affected areas. Activities undertaken by these organizations during the flood response and early phases of recovery included but were not limited to:

- Providing food and water to emergency responders and flood survivors;

- Establishing and operating emergency shelters for flood survivors left homeless or stranded due to flood conditions;
- Establishing and operating 10 "Multi-Agency Resource Centers" (MARCs) in several communities;
- Distributing personal care items and clean-up kits to flood survivors;
- Providing basic health assessments and first aid services for flood survivors in emergency shelters;
- Providing direct recovery assistance in the form of in-kind materials and/or purchase vouchers for immediate needs items and certain essential household items;
- Providing flood survivors with counseling services and/or referrals to other community-based behavioral health service providers; and
- Assisting elderly and other functional needs individuals in cleaning up their flood-damaged homes, including the removal of flood-soaked building materials, furniture, appliances, and other damaged items.

In some jurisdictions, Community Emergency Response Teams (CERTs) and other community-based volunteer organizations (e.g., local civic/service clubs, church groups, etc.) provided supplemental assistance with response and/or recovery efforts by conducting damage and impact assessments; aiding in debris removal and clearance from public and private property; assisting homeowners in cleaning-up, restoring, and repairing their flood-damaged homes; and helping affected functional needs individuals in coping with their specific individual circumstances and directing them to appropriate resources to help facilitate or aid their recovery.

Despite the valiant efforts of these voluntary organizations and volunteers, they have not been enough to meet all of the recovery needs of all affected individuals and families. As a result, significant unmet needs still exist in the areas of: debris removal on private property; housing repair and restoration; replacement of essential household items; mold and other contaminant abatement; and temporary housing assistance. If this request for federal disaster assistance is granted, these needs could most appropriately be met through several federal Individual Assistance programs, including implementation of the U.S. Small Business Administration disaster loan program. (A separate request for a Small Business Administration Disaster Declaration will be forwarded to their regional office in Atlanta, Georgia, to activate the disaster loan program, in the event my assistance request contained in this letter is not granted.)

The affected local governments also took appropriate action under state law in response to this flood disaster. Pursuant to the Emergency Management Act, No. 390 of the Michigan Public Acts of 1976, as amended, Michigan Compiled Laws (MCL) 30.410 (b), a total of three counties and 19 local political subdivisions declared a "state of emergency" in response to the severe flooding affecting their jurisdiction. Those counties and local political subdivisions included:

- Wayne County on August 12, 2014;
- The City of Berkley on August 12, 2014;
- The City of Ferndale on August 12, 2014;
- The City of Hazel Park on August 12, 2014;
- The City of Huntington Woods on August 12, 2014;
- The City of Madison Heights on August 12, 2014;
- The City of Troy on August 12, 2014;
- The City of Royal Oak on August 12, 2014;
- Royal Oak Township on August 12, 2014;
- The City of Oak Park on August 12, 2014;
- The City of Warren on August 12, 2014
- Oakland County on August 13, 2014;
- Macomb County on August 13, 2014;
- The City of Dearborn on August 13, 2014;
- The City of Center Line on August 13, 2014;
- The City of Roseville on August 13, 2014;
- The City of Highland Park on August 13, 2014;
- The City of Southfield on August 13, 2014;
- Canton Township on August 15, 2014;
- The City of St. Clair Shores on August 15, 2014;
- Clinton Township on August 15, 2014; and
- The City of Dearborn Heights on August 18, 2014.

These jurisdictions implemented the response and recovery elements of their Emergency Operations Plans in a timely manner, in accordance with state law and associated administrative procedure. They also took a number of other appropriate actions to cope with the situation, including but not limited to: marshaling required resources; issuing emergency warnings and public information; taking emergency protective measures to preserve life and/or property; clearing roadways and other public spaces of debris; and limiting access to flooded areas. Generally speaking, the affected local governments took all actions required of them by state law and procedure, and dictated by incident circumstances. Their response was outstanding, given the unusually rapid and severe nature of the flooding and the significant threats to public health and safety created by the tremendous quantities of water-laden and contaminated debris collected from damaged homes and businesses. Refer to Attachment 3, "Significant State and Local Response and Recovery Actions," for more detailed information pertaining to specific response and recovery actions taken by the State and the affected local jurisdictions.

Unfortunately, this flood disaster is just the latest in a string of major incidents that have occurred in Michigan. Over the past 12 months, Michigan has experienced three incidents (including this flood disaster) which resulted in the declaration of a disaster or emergency by me under the Emergency Management Act, No. 390 of the Public Acts of 1976, as amended. The other incidents included an April 17, 2014 declaration of emergency for a widespread underground deep freeze affecting nine counties in Michigan's Upper Peninsula and extreme

northern Lower Peninsula, and an April 17, 2014 declaration of disaster for severe flooding in eight central Lower Michigan counties. Collectively, a total of 20 counties have been included in these declarations over the past 12 months. (Going back four months further, federal disaster 4121-DR-MI, declared in April 2013, involved a total of 16 counties – many of which were also impacted by the two incidents described above.) These incidents have stretched Michigan's relief and recovery resources to their limits. While we were fortunate to receive federal funding for disaster 4121-DR-MI, the other two state-declared incidents above did not qualify for federal relief assistance under the Stafford Act because incident response and recover costs did not meet the established per capita threshold levels required for Public Assistance funding consideration. As a result, the State and the affected local governments have been forced to absorb these costs, reducing our collective ability to fund other essential programs and services in the process.

Although Michigan has a Disaster and Emergency Contingency Fund under 1976 Act No. 390 for counties and local political subdivisions for partial reimbursement of eligible public damage and response costs, it has limited funding which must be replenished every budget cycle by the Michigan Legislature. By state law, these funds can only be provided to eligible public entities and certain volunteer organizations supporting incident response operations. Funds cannot be used to reimburse individual citizens for damages to their home, business, or property, and the state currently does not have another funding mechanism in place dedicated to the provision of post-incident assistance for all individuals and families with unmet needs. Although there are relief programs available through the Michigan Department of Human Services, eligibility is generally limited to low and moderate income individuals or households that incur extraordinary incident-related expenses. To meet the needs of most of our disaster survivors who are not insured or are under-insured against natural hazards such as severe winds or flooding, we must rely upon supplemental relief assistance provided by the federal government and/or voluntary organizations. As I previously indicated, our volunteer relief partners have done an exemplary job in addressing many of the needs stemming from this flood disaster. However, the scope and magnitude of this incident is beyond even their collective capability to provide necessary recovery services. Federal relief assistance is definitely needed to address the unmet needs of those most severely affected by the flooding.

In addition to the aforementioned gubernatorially-declared incidents, the affected local emergency management program jurisdictions have experienced numerous smaller-scale incidents for which they did not seek a gubernatorial declaration or state assistance but which had significant local impacts to residents, businesses, public facilities and infrastructure, and essential services. Individually and collectively, these incidents created significant burdens for the affected local governments, requiring the expenditure of resources (physical and financial) which in many cases had to be diverted from other community programs and services.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all of the affected local jurisdictions that are the subject of this request either have in place, or are actively working toward developing or updating, a current Disaster Mitigation Act of 2000-compliant hazard mitigation plan. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards – particularly flooding hazards – and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA

on April 23, 2014, as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000. If appropriate funding can be secured, this disaster will provide an opportunity to implement hazard mitigation projects identified in these plans, in order to reduce the impact of future disasters of this nature.

On August 22, 2014, I requested a joint federal, state, and local Preliminary Damage Assessment for both Individual Assistance and Public Assistance to survey the affected areas in Macomb, Oakland, and Wayne counties. That survey was conducted in two phases over a two and one-half week period, beginning on August 26 and concluding on September 9, 2014. The Preliminary Damage Assessment was conducted by teams consisting of representatives from the Federal Emergency Management Agency, the Michigan State Police Emergency Management and Homeland Security Division, and the affected local jurisdictions. The U. S. Small Business Administration participated in the Individual Assistance phase of the Preliminary Damage Assessment. In addition, representatives of the Michigan Department of Transportation participated in the Public Assistance phase of the Preliminary Damage Assessment in those jurisdictions in which damage occurred to public roadways and transportation infrastructure.

The Individual Assistance Preliminary Damage Assessment was conducted from August 26 through August 29, 2014, in the three affected counties. Federal Emergency Management Agency representatives met with state and local officials at the Double Tree Inn in Dearborn on the morning of August 26 for the Preliminary Damage Assessment organizational/kick-off meeting. Field evaluations began at the conclusion of that meeting, in the early afternoon of August 26. A total of six teams worked for the next four days to verify locally-reported damage and impact information related to homes and businesses affected by the flooding. The Individual Assistance Preliminary Damage Assessment identified a total of 243 homes that were verified as having been destroyed or that incurred major damage; 991 homes that incurred minor damage and 1,035 that were affected that may be eligible for federal assistance; 498 households that are potentially eligible for temporary housing funding; 1,640 households that are potentially eligible for housing repair assistance; one household that is potentially eligible for housing replacement assistance; and 1,871 households that are potentially eligible for "Other Needs Assistance" funding for essential household items and services.

This joint Preliminary Damage Assessment process confirmed three conditions related to the impacts on communities and individuals that must factor prominently in the analysis of this disaster, namely: the concentration of the most severe flood damage in a few communities; the lack of insurance to help offset the cost of recovering from this disaster; and the distressed economic status of many of the affected communities. (I have discussed each of these conditions in depth earlier in this letter. Supporting data related to those discussions can be found at Attachments 1 and 2.)

The second phase of the Preliminary Damage Assessment, for Public Assistance, consisted of four teams and was conducted from September 3 through September 9, 2014, also out of the Double Tree Inn in Dearborn. Teams consisted of representatives from the Federal Emergency Management Agency, the Michigan State Police Emergency Management and Homeland Security Division, the Michigan Department of Transportation, and the affected local jurisdictions that had reported debris removal, emergency protective measure, and public

facility and infrastructure damage costs (Public Assistance Categories A-G) related to the flooding.

The Public Assistance Preliminary Damage Assessment identified a total of $16,778,074 in eligible public damages and related costs – $7,007,477 in Wayne County, and $5,220,091 and $4,514,429 in Macomb and Oakland counties, respectively. An additional $36,078 in eligible state agency public damage costs was verified by the PDA teams. The vast majority of the public damage was for debris removal ($7,030,709) and damage to public buildings and equipment ($6,834,015), with these two damage categories representing 83-percent of the overall public damage total. Public utility damage and emergency protective measure costs were also significant, at $1,234,314 and $773,933, respectively. Those two categories represent 12-percent of the public damage. At $644,713, damage to roads and bridges constitutes 4-percent of the damage total.

The $16,778,074 statewide public damage figure represents a per capita loss of $1.70, well-exceeding the $1.39 per capita federal statewide threshold impact indicator for Public Assistance consideration. In addition, all three of the surveyed counties had per capita public damage losses that exceed the $3.50 per capita federal county-level threshold impact indicator for Public Assistance consideration. Macomb County's per capita loss, at $6.21, is close to double the federal threshold amount. Wayne County's per capita loss of $3.85 exceeds the federal threshold by 10-percent, while Oakland County's per capita loss of $3.75 exceeds the federal threshold by 7-percent.

Even though these counties have relatively large populations, the fact that their per capita losses exceed federal thresholds is indicative of the severity of the flooding. These jurisdictions do not have the financial resources to fully recover from this this flood disaster in a timely manner, or at all in some cases, without supplemental assistance from the federal government. The State of Michigan is able to provide limited financial assistance, in the form of cost-share participation for Individual Assistance, but does not have the funding to address these public damage losses in whole without supplemental federal assistance available through the Public Assistance program under the Stafford Act. By state law, Michigan's Disaster and Emergency Contingency Fund is capped at $4,500,000 and grants to individual jurisdictions cannot exceed $100,000. In all cases, this will not begin to cover the damages incurred by the affected counties in this flood disaster. More detailed impact and cost information related to the Preliminary Damage Assessment-verified public damages can be found at Enclosure B.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Rick Snyder
Governor

ATTACHMENT 2 TO MAJOR DISASTER REQUEST

Significant State and Local Response and Recovery Actions

Search and Rescue. The rapid and severe flash flooding inundated numerous sections of interstate highways, major state highways, and local roadways in the metropolitan Detroit area in the hours immediately after the heavy rainfall on August 11, trapping hundreds of vehicles and motorists in the rising water. Many of these motorists sought refuge on the tops of their vehicles or on nearby high ground and had to be rescued by Michigan State Police officers, local law enforcement officers, and local fire department personnel. Michigan State Police resources were particularly valuable to the search and rescue efforts. State Police officers provided direct assistance to stranded motorists, checked the status of abandoned vehicles, and assisted local responders in blocking access to flooded roadways. In addition, divers with the Michigan State Police Underwater Recovery Unit checked more than one hundred submerged vehicles for occupants (fortunately, none were found), and the State Police Aviation Unit conducted aerial fly-overs of the impacted areas to search for additional stranded motorists and to take aerial photographic and video footage of the flood scenes. (Some of those photographs are included at Attachment 3 to provide visual documentation of the scope and magnitude of the flooding.)

Critical Facilities and Infrastructure Restoration. A number of critical facility and infrastructure emergency restoration measures were implemented in the affected counties and local communities during the response to the severe flooding. Particularly hard hit were the interstate highways and major state roadways in and around metropolitan Detroit, although roadways in all three counties were heavily impacted by the flooding. Many sections of the affected highways in and around metropolitan Detroit (including interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39) were inundated with flood water, trapping vehicles and motorists who could not make their way through the rapidly-deepening water. This forced the closure of these roadway sections – in some cases for several days – so that crews from the Michigan Department of Transportation, Michigan State Police, and county and local road and law enforcement agencies could oversee the removal of stranded (and generally inoperable) vehicles; assess the physical damage to and conduct safety checks of road, bridge, and related infrastructure; and initiate appropriate facility repair and restoration measures so that the closed sections of roadway could be safely reopened to the motoring public. (Refer to the road closure map found at Attachment 3.)

Repair and restoration measures included but were not limited to: conducting safety checks of and making temporary or permanent repairs to damaged structures; removing water, mud and debris from the roadway, bridges, and rights-of-way; stabilizing banks to prevent further debris flows and physical degradation; repairing signage and electronic signals, where required; repairing pumping equipment and associated facilities to ensure they are operational; and testing the repaired facilities to ensure they will allow for safe travel. In most cases, the dedicated work crews were able to reopen the damaged highway and roadway facilities within 36-48 hours. However, some of the damaged sections of roadway and bridge infrastructure will

require more extensive permanent repairs which will take several weeks to several months to complete once funding is available to finance the repairs.

Uninsured damage to other local public facilities and infrastructure was significant. For example, in the City of Warren in Macomb County, the Police Department and Fire Department incurred nearly $2.8 million in uninsured damage to their police and fire vehicles and associated equipment. This includes 10 fully-equipped Fire Department vehicles and six fully-equipped Police Department vehicles requiring replacement, and another seven fire vehicles and nine police vehicles requiring major repairs. The City of Sterling Heights, also in Macomb County, had nearly $620,000 in insured public utility damage, while in St. Clair Shores, uninsured damage to public buildings and associated equipment totaled $225,000. In the City of Royal Oak in Oakland County, uninsured damage to a local high school and middle school totaled $210,000. Uninsured damage to St. John Providence Hospital in the City of Southfield in Oakland County was $200,000. Uninsured damage to Oakwood Hospital in the City of Dearborn in Wayne County exceeded $1.8 million, while in the City of Highland Park, also in Wayne County, uninsured damage to public utilities, city hall, and the community recreation center totaled in excess of $450,000. In the City of Detroit in Wayne County, uninsured damage to public buildings and equipment was over $930,000, with the majority of that total coming from damage to Police Department facilities. These are just a few instructive examples from the nearly $16.8 million in public damage that occurred in Michigan. Although temporary repair and restoration measures have been put in place in most instances to bring the damaged facilities and infrastructure in the three counties to basic operational status, almost all will still require extensive permanent repairs and restoration to bring them back to their pre-flood condition. That will not occur in a timely or comprehensive manner without federal disaster relief assistance.

Emergency Sheltering and Mass Care. Although the rapid (and unanticipated), heavy rainfall did not allow for preventive evacuations of the public in impacted areas, emergency sheltering and mass care services were required in several instances. For example, on August 11, over 400 stranded motorists had to be temporarily sheltered for the evening in the City of Warren because roadway flooding prohibited further travel and resulted in many areas being inaccessible by vehicle. (Many of these individual's vehicles were deeply submerged in flood water and would not have been able to travel anyway because of the damage to their vehicle.) Along M-10 in Wayne County, approximately 50 motorists were stranded for an extended period from the evening of August 11 through August 13 due to the deep flood water in the walled-in, lower sections of the highway. During this time, the American Red Cross provided these stranded individuals with food, water, and comfort kits until the roadway could be de-watered and reopened for travel. For six days after the flooding occurred, a small number of displaced flood survivors were sheltered and cared for at an American Red Cross shelter in Garden City in Wayne County because their homes were inaccessible and/or incurred sufficient damage to render them unsafe for occupancy. Lastly, the American Red Cross also provided cots and comfort kits to nearly two-dozen displaced residents at two apartment complexes in the cities of Detroit (Wayne County) and Troy (Oakland County) so that the residents could use other (unaffected) vacant units within the respective complexes for shelter, rather than having to be moved elsewhere to a temporary shelter facility.

I must note that these emergency sheltering and mass care figures are somewhat misleading, as we received reports that many more flood survivors were temporarily displaced because of flood damage and/or inaccessibility but sought shelter with nearby family, friends, or in unaffected area hotels and motels. As it is next to impossible to track these "unofficial" evacuations with any accuracy, it is safe to say that the number of temporarily displaced flood survivors is much higher than reported through official channels.

The American Red Cross generally led the organized emergency sheltering and mass care effort, supported by the Michigan Department of Human Services, the Salvation Army, and other community-based relief organizations.

Flood Recovery for Individuals and Families. To assist affected flood survivors in recovering from this devastating disaster, the American Red Cross teamed with the Michigan Department of Human Services, Michigan 2-1-1, the Michigan Community Service Commission, and other community-based relief organizations to establish and operate "Multi-Agency Resource Centers" (MARCs) in 10 different locations over a six-day period in the latter-half of August. (A corresponding map found at Attachment 3 shows the initial locations of these MARCs.) The Multi-Agency Resource Centers, which were visited by several thousand flood survivors, provided a location and means to disseminate information regarding flood recovery and available flood recovery assistance. Through these centers, flood survivors could connect with or be referred to agencies and organizations that could assist them in their recovery – addressing everything from filing insurance claims, to replacing food and clothing, to making repairs to damaged homes. In addition, the Multi-Agency Resource Centers also provided a clearinghouse for the distribution of flood clean-up kits, personal comfort kits, and other recovery supplies to those requiring such items. To date, over 300 referrals for behavioral health assistance have been made through the centers and other involved agencies.

In addition to the Multi-Agency Resource Centers, flood survivors also have the opportunity to request flood recovery information and/or assistance via the Internet or Michigan 2-1-1 telephone system. These options were widely disseminated to the public and the media in various information releases. For the internet options, affected individuals could register directly with the Recovery Coordination Center (discussed in "Management of Emergency Volunteers" below) operated by Michigan Voluntary Organizations Active in Disasters, at www.bit.ly/floodcleanupsemi, or they could register via a specially-designated web page (www.michigan.gov/miflood) at the Michigan State Police Emergency Management and Homeland Security web site, which provides a link to the Recovery Coordination Center registration form. Either option results in a referral for recovery assistance to one of the Michigan Voluntary Organizations Active in Disasters member organizations providing assistance through the Recovery Coordination Center.

(I must note that, although the Multi-Agency Resource Centers, Michigan 2-1-1, and the aforementioned web sites have been tremendously successful to date in identifying and addressing both short- and longer-term recovery needs of the affected flood survivors in this disaster, it is clear that even these collective efforts are not going to be sufficient to identify and address all of the unmet needs of the thousands of flood survivors. This is particularly true with regard to home rebuilding and restoration efforts to ensure safe re-occupancy of damaged

structures. Because over 80-percent of the affected households in the three-county area did not have insurance in place to address the damage incurred in this flash flood, it is very likely that many will be forced to occupy their homes with potentially dangerous and/or unhealthy conditions present due to damaged electrical and mechanical systems and/or the presence of black mold or other contaminants on building materials not properly dried out and restored. Simply put, the long-term unmet needs of the flood survivors far outstrip the combined resources of the involved voluntary organizations, volunteers, and existing human service programs to remedy those needs. Clearly, federal disaster relief assistance is required to enable these flood survivors to fully recover from this devastating flood and allow them to make their dwellings safe and sanitary for re-occupancy.)

Without significant relief assistance from the federal government, these individuals will not have the resources necessary to fully repair and restore their damaged homes and mechanical systems, ensure their homes are free of mold and other health hazards, and replace damaged essential household items such as appliances, clothing, food, medications, and furniture and bedding. Without federal relief assistance, it is an almost certainty that many individuals will continue to struggle to recover and be forced to live in unhealthy conditions due to mold, contact with contaminated materials, and substandard (and likely unsafe) mechanical systems that they could not afford to have properly repaired by licensed professionals.

Management of Emergency Volunteers. To date, hundreds of emergency volunteers have been mobilized through the collective efforts of the American Red Cross, Michigan Voluntary Organizations Active in Disasters, Michigan Community Service Commission, Michigan Department of Human Services, local and state emergency management offices, and community-based organizations, to assist in the recovery from this flood disaster. In fact, volunteers have been and continue to be the lifeblood of the flood recovery effort. The aforementioned agencies and organizations have done a tremendous job in managing these volunteer resources and ensuring their timely and effective use. As I previously indicated, several Multi-Agency Resource Centers have been established and successfully operated in the affected counties to allow for the distribution of clean-up and personal comfort kits, and to facilitate the connection of those in need with the agencies and organizations that can provide recovery and relief information and/or assistance.

Central to the disaster volunteer management effort has been the establishment of a Recovery Coordination Center (RCC) to provide a means to coordinate the efforts of organizations that provide volunteer assistance to flood survivors needing help in repairing and restoring their home. The majority of the volunteers providing assistance are working under the framework of Michigan Voluntary Organizations Active in Disasters, and in coordination with state and local emergency management agencies, Michigan 2-1-1, the American Red Cross, the Michigan Department of Human Services, and other community-based organizations. The Recovery Coordination Center helps identify flood survivors requiring recovery assistance and determines the nature and scope of their recovery needs. The center provides ongoing case management for individual recovery and rebuilding/restoration efforts, ensuring that no one "falls through the cracks" and does not receive the assistance they need. Affected individuals are identified and referred to the Recovery Coordination Center by Michigan 2-1-1, local and state emergency management offices, Michigan Department of Human Services county offices,

the Michigan Community Service Commission, churches and other faith-based organizations, or by involved volunteers themselves. Once a flood victim is registered with the Recovery Coordination Center, their recovery needs are referred to the appropriate agency or volunteer organization for follow-up action. Through the center, voluntary organizations can also track their recovery efforts, thus ensuring an accurate accounting of the volunteer hours spent with each flood victim. Currently, over 4,000 homeowners have requested clean-up and restoration assistance through the Recovery Coordination Center. To date, over 250 homes have been completed using volunteers coordinated through the center.

However, as I indicated earlier, even with these outstanding volunteer efforts in place the collective capabilities of volunteers can only go so far in meeting the more difficult long-term recovery needs aimed at ensuring safe and sanitary conditions in flood-damaged homes. Because of the lack of adequate insurance (less than one in five households was adequately insured) to help pay for potentially-expensive repair and restoration activities required to make home structural elements and mechanical systems safe and functional, and to fully-remove the presence of black mold and other contaminants in flood-damaged building materials, it is essential that federal disaster relief assistance be provided. Absent this assistance, affected flood survivors will, in many cases, be forced to live in potentially-dangerous and/or unsanitary conditions because they do not have the financial resources necessary to fully restore their dwellings to pre-flood condition in a timely manner – or at all.

Debris Removal to Protect Public Health and Safety. Debris management was a critically important recovery issue in the days and weeks immediately following this flood disaster. Throughout the affected counties and communities, extensive and rapid debris operations were required to clear and remove flood-damaged building materials and personal property from curbsides and roadway rights-of-way in residential and commercial areas in order to protect public health and safety and enable the continuing use of adjacent roadways, sidewalks, and fire hydrants. The wet, heavy, contaminated flood debris from tens-of-thousands of flood-damaged homes and businesses, coupled with the hot and humid weather conditions that occurred in the days that immediately followed the flood disaster, set the stage for potentially-dangerous and unsanitary conditions in these densely-populated and heavily-developed urban areas. Because of the very real potential for a public health emergency, it was necessary for the affected local communities to muster all of the private and public debris clearance and removal resources they could to ensure rapid and environmentally-compliant removal and disposal of this debris.

In that regard, the affected local jurisdictions did an exemplary job in rapidly managing this difficult and potentially life-threatening recovery issue. With the assistance of various state agencies working out of the State Emergency Operations Center, the local jurisdictions were able to identify sufficient resources to address their debris removal and disposal needs in a rapid and environmentally-compliant manner. All of the affected local communities effectively worked with the Michigan Department of Environmental Quality to obtain required emergency waivers for temporary debris storage and transfer centers, and for emergency transportation of flood debris to approved landfill facilities. These debris removal efforts, however, came at a collective $7 million cost to the affected local jurisdictions in the three counties – a cost which

these jurisdictions are not in a position to bear without significant cuts to other essential programs and services.

Emergency Public Information. During the first hours and days after the flash flooding occurred, the affected local jurisdictions and several Michigan state agencies undertook a comprehensive emergency public information campaign to warn residents of the health and safety risks posed by the flooding and flood-related damage, and to provide updates on recovery issues and concerns. Of particular concern initially were the health and safety risks associated with structural damage, damaged electrical and mechanical systems, and contaminated flood debris. Later, the public information focus shifted to address longer-term recovery issues such as use of licensed and reputable contractors, price-gouging, scam avoidance, and home restoration best practices. This public information campaign continues today, in both English and appropriate non-English languages, and will so for the foreseeable future until all recovery-related issues and concerns have been effectively dealt with. All appropriate media sources have been utilized in this campaign, including television, radio, print media, and web and social media sites. Although there were two incident-related deaths in the early days after the flooding, since that time this campaign has been largely successful in minimizing flood-related injuries and health and safety problems.

The Michigan United Way 2-1-1 telephone referral system has been a tremendously successful means of disseminating important recovery-related information and making referrals to agencies and organizations that can provide recovery assistance. To date, Michigan 2-1-1 has fielded nearly 10,000 calls from individuals seeking flood recovery information and/or referrals. Michigan 2-1-1 has been instrumental in connecting individuals in need with the appropriate resources to enable them to recover from this flood disaster. Despite its success, Michigan 2-1-1 also had one potential downside, that is, the large number of "abandoned" calls from callers that chose to hang up rather than utilize the call-back option when lines were busy. Telephone logs show that over 3,100 calls were abandoned between mid-August and the first week of September. This is disturbing to me because there is no way to track with certainty whether or not these individuals actually did receive the information and/or assistance they were seeking when they initially called Michigan 2-1-1. My hope is that they did, but I suspect a portion of these callers simply gave up and did not further seek recovery information and/or assistance.

(I must note that my concerns in this regard are not necessarily limited to Michigan 2-1-1. Reports received from state and local staff that participated in the Preliminary Damage Assessment indicate that a potentially large number of affected individuals may not have sought assistance due to a number of reasons, including but not limited to: a general distrust of or frustration with government; language and/or cultural barriers; technology barriers, i.e., do not regularly monitor media reports, the internet, or social media; or a lack of understanding regarding available resources and the means for accessing those resources. If federal disaster relief assistance is granted based on this request, we may find many additional individuals that may seek to apply for federal assistance – over and above those estimates developed in the Preliminary Damage Assessment.)

State Response and Recovery Assistance Efforts. Michigan's state departments and agencies and nongovernmental partner organizations have provided whatever appropriate resources they had at their avail to assist the affected counties and local jurisdictions in responding to and recovering from this flood disaster. Although the following is by no means an all-inclusive accounting of all response and recovery efforts, it does provide brief synopses of some of the more noteworthy efforts:

The **Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD)** began to monitor the incident in the early evening of August 11, after reports of flash flooding were first received from the affected local emergency management officials and the National Weather Service. Immediate communications were established with the local emergency management officials to assess the nature, scope, and magnitude of the incident and to help coordinate the provision of state resources as needed. This monitoring continued through the evening hours of August 11. When reports from the affected local jurisdictions and the Michigan Department of Transportation indicated that metropolitan Detroit interstate highways and major roadways had suffered major flooding, the MSP/EMHSD notified key staff to report to the State Emergency Operations Center (SEOC). The SEOC was in partial activation status for several hours, and then went to full activation status at 10:00 AM on August 12. Numerous departments, agencies, and nongovernmental partners responded and reported to the SEOC for duty.

The MSP/EMHSD coordinated SEOC operations at full activation status for the next 14 days, operating 24 hours a day, 7 days a week, on 12-hour shifts. On August 25, the overnight shift was terminated and the operational hours were changed to 8:00 AM till 8:00 PM. The SEOC remained on that schedule for two days, until August 27, when the hours were changed to 8:00 AM till 5:00 PM to more closely align with the Preliminary Damage Assessment operations ongoing in the three-county impact area. On September 8, the SEOC went to a weekly operational period.

Throughout the SEOC activation, the MSP/EMHSD staffed command, operations, logistics, planning, public information, mapping and technical support positions to keep the SEOC functioning at full capability and to fully support the state department/agency and nongovernmental partner representatives present in the facility. During this period, the MSP/EMHSD coordinated all resource requests received from the affected local jurisdictions, ensuring that each request was appropriately addressed in a timely manner. The MSP/EMHSD also coordinated the collection, compilation, review, analysis, synthesis, and reporting of damage and impact assessment information received from the affected jurisdictions and state departments/agencies. The MSP/EMHSD also conducted several briefings daily for local officials, state departments/agencies and nongovernmental partners, and other interested parties, to keep all stakeholders apprised of ongoing or planned activities and areas of concern. Daily incident management plans were developed by SEOC command staff to focus SEOC activities on planned incident management objectives and to ensure that state resources were being appropriately utilized to address the most pressing issues during the operational period. In addition, the MSP/EMHSD developed numerous daily written situation status reports and public information releases to keep SEOC staff, state government executive and legislative

leadership, local officials, our emergency management partners, and the public informed of ongoing issues, concerns, activities, and opportunities for coordination and/or involvement.

From August 25 to September 9, the MSP/EMHSD worked closely with Federal Emergency Management Agency officials to coordinate and conduct Preliminary Damage Assessments for both Individual Assistance and Public Assistance in the three-county impact area. The MSP/EMHSD was instrumental in the set-up of and conduct of the Preliminary Damage Assessment, handling all administrative and logistical aspects of the operation from the SEOC and an on-site coordination center established at the Double Tree Inn in Dearborn. Lastly, using the assessment information and findings from the Preliminary Damage Assessment, the MSP/EMHSD provided considerable technical assistance to me and my staff in the drafting of this request letter and in compiling the supporting information found in the various Attachments and Enclosures.

In addition to the MSP/EMHSD contributions, the **Michigan State Police (MSP)** also deployed considerable resources during the flood response to assist local officials in controlling access to flooded areas, conducting underwater search and rescue in flooded areas, and assisting with security and traffic control as required. Early in the response, the MSP Aviation Unit also flew aerial reconnaissance and assessment missions over the affected areas to search for additional stranded motorists on flooded highways, to aid local and state officials in determining the scope and magnitude of the flooding, and to take aerial photographs and video footage of flooded areas for damage and impact assessment purposes. (Some of those photographs appear in this letter at Attachment 3.) The MSP Special Operations Division also assisted at the SEOC, and the Michigan Intelligence Operations Center (MIOC) continuously monitored the flooding conditions and sent out situational awareness bulletins on the weather and flooding to all stakeholder partners through the duration of the response and recovery.

The **Michigan Department of Agriculture and Rural Development (MDARD)** made available flood clean-up (to include sewage) guidance to affected food establishments in the three-county impact area. This guidance was provided in English, Spanish, Arabic, and Mandarin languages. In addition, the MDARD and the U.S. Food and Drug Administration (FDA) Detroit District Office coordinated with various food industry associations in Michigan to assess the impact of the flooding on the food and agriculture sector and to determine appropriate follow-up measures necessary to protect public health. (Providing the clean-up guidance to food establishments was one of the necessary measures.) During this outreach process, the MDARD focused on food warehouses and retail establishments while the FDA focused on food processors and other regulated firms (e.g., drug, biologics, medical devices, etc.) within the local jurisdictions most heavily impacted by the flooding. (Those jurisdictions included but were not limited to: Warren, St. Clair Shores, and Clinton Township in Macomb County; Madison Heights, Ferndale, and Royal Oak in Oakland County; and Dearborn, Dearborn Heights, and Detroit in Wayne County.) In addition, the MDARD also reached out to the affected health departments (county and City of Detroit) who license and inspect restaurants, and with major grocery store chains and trade associations. MDARD personnel also inspected a number of gasoline stations in the affected area to determine if any had issues with flood water in their gasoline storage

tanks. (One did, but the issue was satisfactorily resolved by the state inspectors.)

The **Michigan Department of Community Health (MDCH)** coordinated with affected local health departments regarding the provision of disaster behavioral health resources; monitored and coordinated with local hospitals and the Region 2 Health Care Coalition regarding flood-related damage and the resultant impacts on hospital operations; and worked closely with the SEOC Public Information Officer to disseminate appropriate and timely health-related information to flood survivors.

The **Michigan Department of Environmental Quality (MDEQ)** coordinated extensively with local officials involved in debris management operations to ensure compliance with federal and state environmental laws and regulations; issued timely emergency approvals of sites designated for use as temporary debris storage and transfer sites; issued other emergency authorizations and waivers where appropriate; provided technical assistance to local officials and private debris management firms regarding issues pertaining to the collection, storage, transport, and disposal of flood-related debris; assisted in the identification of supplemental debris management resources for local officials in need of such resources; and monitored flood-related impacts on local drinking water treatment plants and operations in the affected area.

The **Michigan Department of Human Services (MDHS)** coordinated with involved voluntary relief organizations, community-based organizations, MDHS County Offices and the Michigan Community Service Commission, Michigan 2-1-1, and other human service providers to identify, assess, and attempt to meet the recovery needs of flood survivors. The MDHS undertook a number of activities during the response and recovery phases of this disaster to meet this broad mission, including but not limited to: coordinating with the American Red Cross, Michigan Voluntary Organizations Active in Disasters, and other voluntary relief organizations to establish and operate two temporary emergency shelters, 10 Multi-Agency Resource Centers, and a Recovery Coordination Center; coordinating the distribution of thousands of clean-up and personal comfort kits; coordinating with the SEOC Public Information Officer and other public information officials regarding the dissemination of appropriate and timely recovery information using all available means (e.g., Michigan 2-1-1, web and social media sites, television, radio, etc.); registering eligible flood survivors for the limited MDHS emergency relief assistance available; coordinating the receipt and use of donated goods for the recovery effort; resolving debris management issues for volunteers providing clean-up and/or repair assistance through the Recovery Coordination Center; assisting with volunteer recruitment through the Michigan Community Service Commission and other means; procuring needed supplies for volunteer repair/clean-up teams; and addressing recovery-related issues for various functional needs populations affected by the flooding.

The **Michigan Department of Licensing and Regulatory Affairs (MDLARA)** monitored incident-related energy disruptions and energy supply issues related to the storms and flooding; monitored the operations of regulated health care facilities affected by the flooding; provided (through the Michigan Occupational Safety and Health Administration – MIOSHA) worker safety information to emergency responders and workers, as appropriate; and provided (through the

Bureau of Construction Codes) information to citizens in the City of Highland Park and other communities on mandated building, mechanical, electrical and plumbing inspections.

The **Michigan Department of Technology, Management and Budget (MDTMB)** monitored the impacts of the flooding on state owned and operated facilities and state government operations in the three-county area; assisted in obtaining needed resources for emergency operations and/or flood recovery through standing vendor contracts and/or the state's emergency procurement process; identified and procured office space and coordinated information technology installation for needed emergency facilities; and assisted in transporting recovery supplies to Multi-Agency Resource Centers and other distribution facilities.

The **Michigan Department of Transportation (MDOT)**, assisted by local public works and law enforcement personnel and the Michigan State Police, managed the closure of several sections of interstate and state highways in and around metropolitan Detroit that were inundated by flood water. This included several sections interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39. The MDOT also monitored and reported on closures of local roads and bridges by local officials; reported on the scope and magnitude of road and bridge damage in the affected counties; coordinated with the Federal Highway Administration (FHWA) regarding implementation of its Emergency Relief Program; and participated in the Public Assistance Preliminary Damage Assessment for road and bridge damage.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

To: Weber, Thomas (MSP)
Subject: RE: Monday meeting notes

Ok. Let me know if there's any sort of document that will need to be compiled for a Flint declaration (e.g. something that includes descriptions of Flint's community need, vulnerable populations, etc.)

From: Weber, Thomas (MSP)
Sent: Monday, January 04, 2016 4:40 PM
To: Covey, Gabriel (MSP); McCarthy, Joyce (MSP); Kuzera, Michelle (MSP); Hollaender, Henrik (MSP); Hardy, Raquel (MSP); Eickholt, Jay (MSP); Mark, Kevin (MSP); McQueen, Nate (MSP); Martinez, Mark (MSP); Roach, Billie Jo (MSP); High, Kenneth (MSP); Russo, Mark (MSP); Decastro, Michael (MSP); Brown, Don (MSP); Baker, Zachary (MSP); Graham, Mitch (MSP); Pepper, Joel (MSP); Schnepp, Matt (MSP); Sobocinski, Mike (MSP); Weber, Thomas (MSP)
Subject: Monday meeting notes

Nothing major this morning at the Monday meeting. The following points came up:

- Keep in mind your contributions to points within the Strategic Plan and report out on them when possible.
- The Flint County Commission met this morning and declared emergency. A request for the Governor to declare emergency was also made.
- The move is on track. Labels were passed out to everyone today. Boxes were also delivered.
- The Terrorism Tabletop was moved to January 22.
- Cap/we will be heavily involved in the response to assist Flint.

MEDIA MONITORING REPORT

1/4/2016

Issues:

- No issues to report.

Summary:

- The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Plans are moving forward to seek more help handling problems with Flint's water system.
- A booming rendition of the spiritual hymn "Wade in the Water" set the tone Sunday morning for what was to come during a service at the Unitarian Universalist Congregation of Flint
- Gov. Rick Snyder of Michigan apologized this week for how the water crisis in Flint has been handled. Residents there were exposed water with high levels of lead for months after the city switched water suppliers. The city has since switched back to the Detroit water system.
- A New Jersey newspaper editorial examines its state government's lack of action due to lead in drinking water.
- Civil rights groups are planning to march and shut down a stretch of Michigan Avenue Monday night to demand justice in the December fatal shooting of an unarmed Detroit man by a Dearborn police officer/
- The Michigan State Police have enacted new rules that require all Multi-Line Telephone Systems (MLTS) or Private Branch Exchange (PBX) phones systems in Michigan to provide accurate locations for phones when a user dials 911.
- Sanilac County could invest nearly $1 million to renovate a 9,840-square-foot building in Sandusky to relocate multiple departments to a space officials say better suits their needs.
- Illinois, Missouri assess damage, cleanup after flooding.
- National Weather Service forecasts: Lake Effect Snow impacting parts of the state.

Analysis:

- Heavy local coverage about Genesee County's local declaration due to the Flint water crisis.
- Lake effect snow is impacting parts of Michigan.
- Will continue to monitor the situation.

FLINT WATER

Flint water crisis emergency declaration heading to Gov. Rick Snyder

MLive, January 4, 2015

The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.

Chairman Jamie Curtis, supported by the county board, signed the declaration today, Jan. 4, during a meeting of the commissioners, clearing the way to send the request for help to Gov. Rick Snyder.

City and county officials said the request will amount to more than $50 million, including money to replace lead service lines and make other infrastructure upgrades but said specifics of the request are still being developed.

"Its a victory, and it's a step in the right direction," said Flint Mayor Karen Weaver, who said she plans to meet with Snyder in iscuss the declaration Thursday, Jan. 7.

Weaver declared that Flint had suffered a man-made disaster because of lead in water last month, the first step in requesting state and federal assistance.

"We're not going to be ignored," Curtis said. "We're going to get the help that these people need."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2015

LANSING -- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Gov. Rick Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Flint switched from Detroit's water system last year to Flint River water in a cost-cutting move. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

Last week, Department of Environmental Quality Director Dan Wyant resigned over the issue, as did his communications director, Brad Wurfel.

"The health and welfare of Flint residents is a top priority, and we're committed to working closely with Mayor Weaver and the Genesee County Commission on a coordinated response to health and infrastructure issues," Murray said Monday in an e-mail to the Free Press.

The Michigan State Police's Emergency Management and Homeland Security Division is working with the Genesee County Emergency Management Coordinator to gather information about the resources needed for a governor's declaration of an emergency, Murray said.

"The State Police have been closely engaged in the situation since the beginning, meeting with both county and city leaders to guide them through state and federal laws regarding the emergency management process," he said.

"Due to the uniqueness of this situation, we have to look at all possible options to help Flint residents. But prior to a formal declaration, we are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Plans move forward to seek more help for Flint water system

Associated Press, January 4, 2015

Plans are moving forward to seek more help handling problems with Flint's water system.

The Flint Journal reports (http://bit.ly/1Pb62V5) Genesee County board Chairman Jamie Curtis, supported by the board, declared a state of emergency Monday in Flint.

It follows an emergency declaration by Flint Mayor Karen Weaver, who says she plans to meet this week with Gov. Rick Snyder.

Specifics of the funding request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Flint switched from Detroit's water system last year to Flint River water in a cost-cutting move. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

County OKs Flint's state of emergency declaration

Michigan Radio, January 4, 2016

Flint's state of emergency declaration is on its way to the governor's office.

The Genesee County Commission approved the declaration for the city of Flint Monday.

The declaration is tied to elevated lead levels in the city's drinking water.

The city's action plan calls for $45 million to replace 15,000 lead transmission lines that connect Flint homes to the city's water system. It also asks for $6 million to help Flint connect to a new pipeline under construction from Lake Huron.

Commission chairman Jamie Curtis says his county's needs will not be ignored.

"This is a state man-made disaster," says Curtis., "And we're going to put together a comprehensive plan and we're going to ask the state to fix their disaster."

In April, 2014, the city switched from Detroit to the Flint River as the source of its tap water. But city and state officials failed to address of the corrosiveness of the river water. Researchers say the river water damaged water pipes, and the pipes eventually leeched high levels of lead into the drinking water. The city switched back to Detroit water last fall.

However, health officials say the threat of lead exposure persists.

"Lead should never be in the body of a child," Dr. Mona Hanna-Attisha told county commissioners today. She recently published a study in a national medical journal showing childrens' blood lead levels in some Flint neighborhoods have tripled.

Health officials fear the lead problem will continue for years to come.

"It's going to be pure hell," is how County Commissioner Brenda Clark describes the effect on Flint schools, when infants who consumed formula made with lead-tainted water start kindergarten in a few years.

But coming up with a specific number for how much is needed to cover the health care costs is problematic.

Mayor Karen Weaver says that's why they've drafted a "fluid" plan to address the issue as more information is gathered.

Weaver is scheduled to sit down with Gov. Snyder on Thursday. It will be up to the governor to decide whether Flint's water problems can be submitted to the Obama administration for a federal disaster declaration.

Weaver plans to travel to Washington later this month to meet with federal officials.

State Rep. Sheldon Neeley calls out, on governor for help over Flint water

MLive, January 3, 2016

FLINT TWP, MI – A booming rendition of the spiritual hymn "Wade in the Water" set the tone Sunday morning for what was to come during a service at the Unitarian Universalist Congregation of Flint.

The service included guest speaker Sheldon Neeley, the 34th District state House Representative from Flint, who took a hard stance against Gov. Rick Snyder and what he felt was the emergency manager's role over the water issue in Flint.

"Governor Snyder provided an apology," said Neeley to around 50 people seated in the audience. "Thank you for those words, Governor, but an apology is worthless unless your actions follow."

Neeley said the water issues stemmed from an emergency manager in place at the city.

County commissioners to take up Flint water action plan

Michigan Radio, January 3, 2016

Flint's plan to recover from its drinking water problems goes to the Genesee County commission Monday morning.

The city's use of the Flint River for its drinking water damaged the city's pipes, and exposed thousands of people to high levels of lead. The city switched back to Detroit water last Fall. But city residents are still being told to use water filters.

Mayor Karen Weaver is asking the county commission to give its OK to Flint's plan to fix the problem.

Open Letter to Gov. Rick Snyder: Too Late to Apologize About Flint's Water Crisis

DailyKos, January 4, 2016

Should Apologies be Accepted When The Act Was Intentional? Should Apologies Present Sense of Instant Relief – Regardless if a Long List of Repeated Cover Ups Are Revealed?

What About Standards?

Should a Governor Who Set His Standards So High He Proudly Signed A Bill Twice Over Ensuring Full Control of Cities, Townships, Villages, Counties and School Districts-- That Fails To Meet His High Standards -- Be Easily Forgiven With an "Apology" for Allowing Flint's Residents to Drink Toxic Water for years on end?

Governor Rick Snyder, the answer is a resounding no. No, Flint Residents should not accept your "apology" nor should they --- as YOU continued structure that allowed for repeated lies about safety of the water.

Lead Poisoning In Michigan Highlights Aging Water Systems Nationwide

WBEZ-FM 91.5 (Chicago), January 4, 2016

Gov. Rick Snyder of Michigan apologized this week for how the water crisis in Flint has been handled. Residents there were exposed water with high levels of lead for months after the city switched water suppliers. The city has since switched back to the Detroit water system.

Snyder also said the state has to learn from Flint, as many other cities in Michigan also have an aging infrastructure.

Robert Puentes, director of the Metropolitan Infrastructure Initiative at the Brookings Institution, tells NPR's Scott Simon that the problem of aging water systems plagues many suburbs and smaller cities in the United States.

Editorial: Poisoned children are an outrage in Michigan -- but not New Jersey?

Star-Ledger (Newark, New Jersey), January 3, 2016

Imagine if thousands of children were being poisoned, in many cases causing permanent brain damage. Parents would be in a state of panic. The headline would be stripped across every news channel.

That's what's happening in Michigan. The mayor of Flint has declared a state of emergency to address lead poisoning in the city's water supply. The proportion of children with elevated lead in their blood has nearly doubled, putting them at risk of irreversible cognitive damage. Two top officials have resigned. Now, the governor is apologizing.

Except that thousands of children are being poisoned in New Jersey, too, and there is no public outcry. Thousands more will fall victim next year, and we'll hear hardly a peep about it. Worst of all, our public officials saw all this coming, and could have saved many of these children. But they didn't, because it wasn't a priority.

Sorry kids, but you're going to have to live with brain damage, because Chris Christie and his predecessors had budget gaps to fill.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

March aims to shut down Michigan Avenue in Dearborn

Detroit Free Press, January 1, 2016

Civil rights groups are planning to march and shut down a stretch of Michigan Avenue Monday night to demand justice in the December fatal shooting of an unarmed Detroit man by a Dearborn police officer.

The march will begin at 6:30 p.m. at Michigan Avenue and Greenfield in the Kroger parking lot in Dearborn and continue a few blocks to the Dearborn Police Department, organizers said. The event is being organized by the National Action Network. Community organizations such as Take On Hate and Black Lives Matter are planning to participate.

Kevin Matthews, a 35-year-old Detroit resident, was shot multiple times Dec. 23 on Detroit's west side by a Dearborn police officer following a foot chase. The shooting is being investigated by Detroit police, who did not immediately return a call for comment Sunday.

New rules to improve emergency response time

Hillsdale Daily News, January 1, 2016

HILLSDALE — The Michigan State Police have enacted new rules that require all Multi-Line Telephone Systems (MLTS) or Private Branch Exchange (PBX) phones systems in Michigan to provide accurate locations for phones when a user dials 911.

The rules went into effect on Dec. 31, 2015.

"(The Michigan State police) have been pushing for that for a long time," Doug Sanford, emergency management director and Hillsdale 911 director, said.

Sanford said that the location of the 911 caller is vital for a quick response.

Sanilac putting $900K into emergency center

Port Huron Time-Herald, January 3, 2106

Sanilac County could invest nearly $1 million to renovate a 9,840-square-foot building in Sandusky to relocate multiple departments to a space officials say better suits their needs.

Administrator Kathy Dorman said departments including buildings and grounds and Central Dispatch have run into space issues, making the move priority for the county.

The exterior of the county-owned building at 95 Dawson St. — that officials have pegged its new Emergency Operations and Training Center — will remain largely as is, but Dorman said its interior will receive "quite extensive" remodeling.

She said that includes removing or rearranging walls and installing a new roof, heating and cooling system and security system.

Illinois, Missouri assess damage, cleanup after flooding

Associated Press, January 4, 2015

KINCAID, Ill. (AP) - Sharon Stivers mustered a smile as a visitor walked into her muddy yard.

"Welcome to my flood sale," Stivers joked, nodding to a tall stack of water-soaked furniture, appliances and belongings pulled from her home and piled high by the road in the flat central Illinois town of Kincaid. "You can have the whole thing for 50 cents."

The Mississippi River and most other waterways in Missouri and Illinois flooded last week after 10-14 inches of rain fell over a wide swath of the two states. The water receded in most places Sunday but continued to rise in a few. Cleanup and damage assessment was only beginning, and could take weeks.

Twenty-five deaths in the two states were blamed on flooding, nearly all of them the result of vehicles driving over flooded roadways. The death toll rose Sunday when the body of a second teenager missing for several days was found near Kincaid, a town of about 1,400 residents along the South Fork Sangamon River near Springfield.

The Mississippi River was receding except in the far southern tip of both states. After that, flooding is expected to worsen in Arkansas, Kentucky, Tennessee and other southern states, though the breadth of the flooding there isn't expected to match what happened in Missouri and Illinois.

Oregon militia standoff: Ranchers due at prison and what else to expect Monday

Oregon Live, January 4, 2015

The two father and son ranchers who triggered a national cry for justice over their convictions for arson were expected today to surrender themselves to federal prison, ending efforts of militants and fellow ranchers to spare them.

A family friend who asked not to be publicly identified told The Oregonian/OregonLive that Dwight Hammond Jr., 73, and Steven Hammond, 46, left Harney County over the weekend to report. He said they were traveling to California.

Their surrender closes one chapter of a controversial case that has spun into a national drama.

They leave behind a community reeling from the occupation of the Malheur National Wildlife Refuge, a sweeping reserve southeast of Burns. Militants, including the three sons of Nevada rancher Cliven Bundy, took over the empty headquarters compound on Saturday, insisting they will stay until federal land is returned to private ownership.

2 hrs ·
Governor Snyder needs to issue this emergency declaration. An Executive branch of government's declaration of an "emergency" sends a strong message. Flint is in a state of emergency, children are suffering and all the resources available must be deployed to insure the immediate and ongoing safety of this community's children. Not declaring an emergency at this point would be a purely political move.

MEDIA MONITORING REPORT

1/4/2016

Issues:

- No issues to report.

Summary:

- The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Plans are moving forward to seek more help handling problems with Flint's water system.
- A booming rendition of the spiritual hymn "Wade in the Water" set the tone Sunday morning for what was to come during a service at the Unitarian Universalist Congregation of Flint

FLINT WATER

Flint water crisis emergency declaration heading to Gov. Rick Snyder

MLive, January 4, 2015

The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.

Chairman Jamie Curtis, supported by the county board, signed the declaration today, Jan. 4, during a meeting of the commissioners, clearing the way to send the request for help to Gov. Rick Snyder.

City and county officials said the request will amount to more than $50 million, including money to replace lead service lines and make other infrastructure upgrades but said specifics of the request are still being developed.

"Its a victory, and it's a step in the right direction," said Flint Mayor Karen Weaver, who said she plans to meet with Snyder in iscuss the declaration Thursday, Jan. 7.

Weaver declared that Flint had suffered a man-made disaster because of lead in water last month, the first step in requesting state and federal assistance.

"We're not going to be ignored," Curtis said. "We're going to get the help that these people need."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2015

LANSING – Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Gov. Rick Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Flint switched from Detroit's water system last year to Flint River water in a cost-cutting move. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

Last week, Department of Environmental Quality Director Dan Wyant resigned over the issue, as did his communications director, Brad Wurfel.

"The health and welfare of Flint residents is a top priority, and we're committed to working closely with Mayor Weaver and the Genesee County Commission on a coordinated response to health and infrastructure issues," Murray said Monday in an e-mail to the Free Press.

The Michigan State Police's Emergency Management and Homeland Security Division is working with the Genesee County Emergency Management Coordinator to gather information about the resources needed for a governor's declaration of an emergency, Murray said.

"The State Police have been closely engaged in the situation since the beginning, meeting with both county and city leaders to guide them through state and federal laws regarding the emergency management process," he said.

"Due to the uniqueness of this situation, we have to look at all possible options to help Flint residents. But prior to a formal declaration, we are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Plans move forward to seek more help for Flint water system

Associated Press, January 4, 2015

Plans are moving forward to seek more help handling problems with Flint's water system.

The Flint Journal reports (http://bit.ly/1Pb62V5) Genesee County board Chairman Jamie Curtis, supported by the board, declared a state of emergency Monday in Flint.

It follows an emergency declaration by Flint Mayor Karen Weaver, who says she plans to meet this week with Gov. Rick Snyder.

Specifics of the funding request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Flint switched from Detroit's water system last year to Flint River water in a cost-cutting move. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

County OKs Flint's state of emergency declaration

Michigan Radio, January 4, 2016

Flint's state of emergency declaration is on its way to the governor's office.

The Genesee County Commission approved the declaration for the city of Flint Monday.

The declaration is tied to elevated lead levels in the city's drinking water.

The city's action plan calls for $45 million to replace 15,000 lead transmission lines that connect Flint homes to the city's water system. It also asks for $6 million to help Flint connect to a new pipeline under construction from Lake Huron.

Commission chairman Jamie Curtis says his county's needs will not be ignored.

"This is a state man-made disaster," says Curtis., "And we're going to put together a comprehensive plan and we're going to ask the state to fix their disaster."

In April, 2014, the city switched from Detroit to the Flint River as the source of its tap water. But city and state officials failed to address of the corrosiveness of the river water. Researchers say the river water damaged water pipes, and the pipes eventually leeched high levels of lead into the drinking water. The city switched back to Detroit water last fall.

However, health officials say the threat of lead exposure persists.

"Lead should never be in the body of a child," Dr. Mona Hanna-Attisha told county commissioners today. She recently published a study in a national medical journal showing childrens' blood lead levels in some Flint neighborhoods have tripled.

Health officials fear the lead problem will continue for years to come.

"It's going to be pure hell," is how County Commissioner Brenda Clark describes the effect on Flint schools, when infants who consumed formula made with lead-tainted water start kindergarten in a few years.

But coming up with a specific number for how much is needed to cover the health care costs is problematic.

Mayor Karen Weaver says that's why they've drafted a "fluid" plan to address the issue as more information is gathered.

Weaver is scheduled to sit down with Gov. Snyder on Thursday. It will be up to the governor to decide whether Flint's water problems can be submitted to the Obama administration for a federal disaster declaration.

Weaver plans to travel to Washington later this month to meet with federal officials.

State Rep. Sheldon Neeley calls out, on governor for help over Flint water

MLive, January 3, 2016

FLINT TWP, MI -- A booming rendition of the spiritual hymn "Wade in the Water" set the tone Sunday morning for what was to come during a service at the Unitarian Universalist Congregation of Flint.

The service included guest speaker Sheldon Neeley, the 34th District state House Representative from Flint, who took a hard stance against Gov. Rick Snyder and what he felt was the emergency manager's role over the water issue in Flint.

"Governor Snyder provided an apology," said Neeley to around 50 people seated in the audience. "Thank you for those words, Governor, but an apology is worthless unless your actions follow."

Neeley said the water issues stemmed from an emergency manager in place at the city.

County commissioners to take up Flint water action plan

Michigan Radio, January 3, 2016

Flint's plan to recover from its drinking water problems goes to the Genesee County commission Monday morning.

The city's use of the Flint River for its drinking water damaged the city's pipes, and exposed thousands of people to high levels of lead. The city switched back to Detroit water last Fall. But city residents are still being told to use water filters.

Mayor Karen Weaver is asking the county commission to give its OK to Flint's plan to fix the problem.

Open Letter to Gov. Rick Snyder: Too Late to Apologize About Flint's Water Crisis

DailyKos, January 4, 2016

Should Apologies be Accepted When The Act Was Intentional? Should Apologies Present Sense of Instant Relief -- Regardless if a Long List of Repeated Cover Ups Are Revealed?

What About Standards?

Should a Governor Who Set His Standards So High He Proudly Signed A Bill Twice Over Ensuring Full Control of Cities, Townships, Villages, Counties and School Districts-- That Fails To Meet His High Standards -- Be Easily Forgiven With an "Apology" for Allowing Flint's Residents to Drink Toxic Water for years on end?

Governor Rick Snyder, the answer is a resounding no. No, Flint Residents should not accept your "apology" nor should they --- as YOU continued structure that allowed for repeated lies about safety of the water.

Lead Poisoning In Michigan Highlights Aging Water Systems Nationwide

WBEZ-FM 91.5 (Chicago), January 4, 2016

Gov. Rick Snyder of Michigan apologized this week for how the water crisis in Flint has been handled. Residents there were exposed water with high levels of lead for months after the city switched water suppliers. The city has since switched back to the Detroit water system.

Snyder also said the state has to learn from Flint, as many other cities in Michigan also have an aging infrastructure.

Robert Puentes, director of the Metropolitan Infrastructure Initiative at the Brookings Institution, tells NPR's Scott Simon that the problem of aging water systems plagues many suburbs and smaller cities in the United States.

Editorial: Poisoned children are an outrage in Michigan – but not New Jersey?

Star-Ledger (Newark, New Jersey), January 3, 2016

Imagine if thousands of children were being poisoned, in many cases causing permanent brain damage. Parents would be in a state of panic. The headline would be stripped across every news channel.

That's what's happening in Michigan. The mayor of Flint has declared a state of emergency to address lead poisoning in the city's water supply. The proportion of children with elevated lead in their blood has nearly doubled, putting them at risk of irreversible cognitive damage. Two top officials have resigned. Now, the governor is apologizing.

Except that thousands of children are being poisoned in New Jersey, too, and there is no public outcry. Thousands more will fall victim next year, and we'll hear hardly a peep about it. Worst of all, our public officials saw all this coming, and could have saved many of these children. But they didn't, because it wasn't a priority.

Sorry kids, but you're going to have to live with brain damage, because Chris Christie and his predecessors had budget gaps to fill.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

March aims to shut down Michigan Avenue in Dearborn

Detroit Free Press, January 1, 2016

Civil rights groups are planning to march and shut down a stretch of Michigan Avenue Monday night to demand justice in the December fatal shooting of an unarmed Detroit man by a Dearborn police officer.

The march will begin at 6:30 p.m. at Michigan Avenue and Greenfield in the Kroger parking lot in Dearborn and continue a few blocks to the Dearborn Police Department, organizers said. The event is being organized by the National Action Network. Community organizations such as Take On Hate and Black Lives Matter are planning to participate.

Kevin Matthews, a 35-year-old Detroit resident, was shot multiple times Dec. 23 on Detroit's west side by a Dearborn police officer following a foot chase. The shooting is being investigated by Detroit police, who did not immediately return a call for comment Sunday.

New rules to improve emergency response time

Hillsdale Daily News, January 1, 2016

HILLSDALE — The Michigan State Police have enacted new rules that require all Multi-Line Telephone Systems (MLTS) or Private Branch Exchange (PBX) phones systems in Michigan to provide accurate locations for phones when a user dials 911.

The rules went into effect on Dec. 31, 2015.

"(The Michigan State police) have been pushing for that for a long time," Doug Sanford, emergency management director and Hillsdale 911 director, said.

Sanford said that the location of the 911 caller is vital for a quick response.

Sanilac putting $900K into emergency center

Port Huron Time-Herald, January 3, 2106

Sanilac County could invest nearly $1 million to renovate a 9,840-square-foot building in Sandusky to relocate multiple departments to a space officials say better suits their needs.

Administrator Kathy Dorman said departments including buildings and grounds and Central Dispatch have run into space issues, making the move priority for the county.

The exterior of the county-owned building at 95 Dawson St. — that officials have pegged its new Emergency Operations and Training Center — will remain largely as is, but Dorman said its interior will receive "quite extensive" remodeling.

She said that includes removing or rearranging walls and installing a new roof, heating and cooling system and security system.

Illinois, Missouri assess damage, cleanup after flooding

Associated Press, January 4, 2015

KINCAID, Ill. (AP) - Sharon Stivers mustered a smile as a visitor walked into her muddy yard.

"Welcome to my flood sale," Stivers joked, nodding to a tall stack of water-soaked furniture, appliances and belongings pulled from her home and piled high by the road in the flat central Illinois town of Kincaid. "You can have the whole thing for 50 cents."

The Mississippi River and most other waterways in Missouri and Illinois flooded last week after 10-14 inches of rain fell over a wide swath of the two states. The water receded in most places Sunday but continued to rise in a few. Cleanup and damage assessment was only beginning, and could take weeks.

Twenty-five deaths in the two states were blamed on flooding, nearly all of them the result of vehicles driving over flooded roadways. The death toll rose Sunday when the body of a second teenager missing for several days was found near Kincaid, a town of about 1,400 residents along the South Fork Sangamon River near Springfield.

The Mississippi River was receding except in the far southern tip of both states. After that, flooding is expected to worsen in Arkansas, Kentucky, Tennessee and other southern states, though the breadth of the flooding there isn't expected to match what happened in Missouri and Illinois.

Oregon militia standoff: Ranchers due at prison and what else to expect Monday

Oregon Live, January 4, 2015

The two father and son ranchers who triggered a national cry for justice over their convictions for arson were expected today to surrender themselves to federal prison, ending efforts of militants and fellow ranchers to spare them.

A family friend who asked not to be publicly identified told The Oregonian/OregonLive that Dwight Hammond Jr., 73, and Steven Hammond, 46, left Harney County over the weekend to report. He said they were traveling to California.

Their surrender closes one chapter of a controversial case that has spun into a national drama.

They leave behind a community reeling from the occupation of the Malheur National Wildlife Refuge, a sweeping reserve southeast of Burns. Militants, including the three sons of Nevada rancher Cliven Bundy, took over the empty headquarters compound on Saturday, insisting they will stay until federal land is returned to private ownership.

Flint water crisis emergency declaration heading to Gov. Snyder

The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.
MLIVE.COM

Erin Brockovich

2 hrs ·

Governor Snyder needs to issue this emergency declaration. An Executive branch of government's declaration of an "emergency" sends a strong message. Flint is in a state of emergency, children are suffering and all the resources available must be deployed to insure the immediate and ongoing safety of this community's children. Not declaring an emergency at this point would be a purely political move.

MEDIA MONITORING REPORT

12/28/2015

Issues:

- No issues to report.

Summary:

- The National Weather Service has issued a winter storm warning for most of Michigan Monday.
- The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton and Ingham Counties.
- High winds and the resulting damage caused a number of scattered power outages in the Lansing area overnight on Dec. 24.
- After a strong wind storm overnight on Dec. 24, Consumers Energy reported 91,000 homes and businesses were without power.
- Crews continued restore power to thousands of homes and businesses in Michigan that lost electricity during severe storms before Christmas.
- Strong winds and freezing rain are expected to hit Michigan Monday afternoon, possibly bringing widespread power outages just days after utility crews restored electricity for tens of thousands of residents left in the dark following a Christmas Eve storm.
- Less than a week after hundreds of thousands of customers were left in the dark following a powerful Christmas Eve windstorm, preparations are underway for another storm expected Monday that could bring high winds and ice with the potential of knocking power out once again for many across the state.
- An EF-1 tornado swept through a portion of Canton Township on Wednesday, the National Weather Service confirmed Thursday.
- The EF-1 tornado in Canton Township is the first December tornado in Michigan history and only the third during the winter season.
- The Michigan State Police and the Emergency Management and Homeland Security Division are encouraging residents and visitors to prepare for a hazardous winter storm.
- Emergency Management officials in western Michigan are warning residents to prepare for a storm that is forecast to bring freezing rain and high winds.
- Michigan Gov. Rick Snyder told a Northern Michigan news station that Flint's water problem is his office's "greatest challenge."
- U.S. Rep. Dan Kildee took to the Rachel Maddow show to continue his call for the state to create a health fund to help Flint's youngest residents potentially affected by the city's water crisis.

- National Weather Service forecast updates.
- TV clips: Confirmed: Tornado hit in Canton Township; Tips to prepare for icy commute.

Analysis:

- Media coverage is neutral.
- Media outlets covering winter storm alerts throughout Michigan as severe winter weather is expected to hit Monday.
- Multiple media outlets reported on Michigan State Police encouraging citizens to prepare for hazardous winter storm Monday.
- The National Weather Service has confirmed an EF-1 tornado touched down in Canton Township on Dec 23.
- Coverage continues on Flint water issues.
- Will continue to monitor the situation.

MICHIGAN WEATHER

Winter weather alerts in effect for Mid-Michigan

WNEM, December 28, 2015

SAGINAW COUNTY, MI (WNEM) - Heading into your workweek, we're expecting a winter storm to move through Mid-Michigan that could have caused some travel headaches, along with power outages. We currently have several winter weather alerts in effect. They are listed below.

WINTER STORM WARNING: Clare, Isabella, Gratiot from 10 AM Monday through 6 AM Tuesday.

WINTER STORM WARNING: Alcona, Arenac, Gladwin, Iosco, Ogemaw and Roscommon from 3 p.m. Monday through 5 a.m. Tuesday.

WINTER STORM WARNING: Bay, Huron, Midland, Saginaw, Sanilac and Tuscola from 2 p.m. Monday through 3 a.m. Tuesday.

WINTER WEATHER ADVISORY: Genesee, Lapeer, Oakland and Shiawassee from noon Monday through 1 a.m. Tuesday.

Winter storm warning for much of West Michigan Monday

Fox 17, December 27, 2015

WEST MICHIGAN — The National Weather Service has issued a winter storm warning for most of West Michigan Monday.

The following counties will be under the winter storm warning from 10 AM Monday till 6 AM Tuesday: Allegan, Barry, Eaton, Ionia, Kent, Mecosta, Montcalm, Muskegon, Oceana, and Ottawa counties.

Calhoun, Kalamazoo, and Van Buren counties will be under a winter weather advisory from 9 AM Monday till 4 AM Tuesday.

Sleet and freezing rain moving in today

WILX, December 28, 2015

The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton and Ingham Counties. The Winter Storm Warning includes the cities of Lansing, St. Johns and Charlotte. A Winter Weather Advisory has been issued through early Tuesday morning for Shiawassee, Livingston, Washtenaw, Lenawee, Calhoun and Jackson Counties. The cities of Jackson and Battle Creek are in the Advisory area. A Freezing Rain Advisory has been issued for Branch and Hillsdale Counties through Monday evening.

A storm system races towards the Great Lakes today. The storm brings strong winds and a lot of moisture. Aloft temperatures will be warm enough for rain, but down at the surface an East wind will pump cold air into Mid-Michigan. This is the perfect set-up for sleet and freezing rain. The freezing rain and sleet will develop from south to north this morning. Computer models are saying ice accumulations could be around in the tenth to quarter inch range in Mid-Michigan. Heavier amounts are possible north and west of Lansing. Lesser amounts are expected south and east of Jackson. Sleet accumulations of around a half inch are possible. The ice teamed up with strong wind gusts near 45 MPH will more than likely cause scattered power outages.

Winter storm warning in effect for northern Michigan

Up North Live, December 28, 2015

A significant winter storm is on the way for Michigan starting this afternoon and ending Tuesday morning. A Winter Storm Warning has been put out that goes into effect at 3pm this afternoon and lasts until Tuesday morning. The main concerns will be dangerous travel due to snow, ice, and sleet accumulations.

A storm system from the Plains will bring a mix of wintry precipitation starting late this afternoon. Ice totals around .10" or less is expected for northern Michigan while greater amounts are expected downstate. Along with the ice, we may see significant snow accumulations in areas up to 10 inches...mainly in the U.P. where the air is colder.

High winds cause mid-Michigan power outages overnight

Lansing State Journal, December 24, 2015

LANSING — High winds and the resulting damage caused a number of scattered power outages in the Lansing area overnight.

Consumers Energy senior communications manager Brian Wheeler said 124 customers in Eaton County were still without power as of 8:45 a.m.

As many as 475 Consumers customers in Eaton County were without power as of 5 a.m., Wheeler said.

Approximately 60 customers in Ingham and Clinton counties were impacted at the peak of the outage.

91,000 without power in Michigan; some won't be back on for Christmas

Fox 17, December 24, 2015

WEST MICHIGAN - Thousands of Michigan residents are without power this Christmas Eve after a strong wind storm overnight.

Winds in some areas topped 60 miles per hour.

More than 300 workers from five different states joined the task of restoring power to area residents.

As of 9:30 p.m., Consumers Energy reported 91,000 homes and businesses are without power. Winds were to subside as the went on, so crews will be out restoring power throughout the week. Due to the damage, some areas may not get power back until Sunday.

Power restoration continues for some after severe storms

Washington Times, December 27, 2015

DETROIT (AP) - Crews continued restore power to thousands of homes and businesses in Michigan that lost electricity during severe storms before Christmas.

About 13,000 of more than 183,000 Consumers Energy customers remained without service Sunday, the utility said.

Thunderstorms followed by winds with gusts topping 60 mph toppled trees, utility poles and power lines across western and northern Michigan on Wednesday and Thursday.

On heels of Christmas Eve storm, Consumers Energy officials brace for outages Monday

MLive, December 27, 2015

Strong winds and freezing rain are expected to hit Michigan Monday afternoon, possibly bringing widespread power outages just days after utility crews restored electricity for tens of thousands of residents left in the dark following a Christmas Eve storm.

A winter storm watch has been issued for much of Michigan starting Monday afternoon and extending into Tuesday morning. Wind gusts of up to 50 mph and a half-inch of ice accumulation are possible, and officials are warning of slick roads, potential power outages and hazardous travel conditions.

"The morning commute is not going to be the worry, because it will still be dry," said Jared Maples, a meteorologist at the NWS in Grand Rapids. "But as we get to the afternoon, it will rapidly deteriorate."

Power crews wrap up restoration, prepare for coming ice storm

Fox 17, December 27, 2015

MICHIGAN — Less than a week after hundreds of thousands of customers were left in the dark following a powerful Christmas Eve windstorm, preparations are underway for another storm expected Monday that could bring high winds and ice with the potential of knocking power out once again for many across the state.

Consumers Energy said while it is wrapping up power restoration in northern Michigan, it is also preparing crews and material for Monday's weather.

"We're getting our crews back to the home headquarters. We're getting them the proper rest that they need and we're literally restocking the trucks with more equipment. We're ready to go so that when mother nature hits, we're gonna hit right back," said Rodger Morgenstern of Consumers Energy.

CANTON TOWNSHIP TORNADO

National Weather Service confirms EF-1 tornado in Canton

MLive, December 24, 2015

An EF-1 tornado swept through a portion of Canton Township on Wednesday, the National Weather Service confirmed Thursday.

The storm damaged buildings at an industrial park on Lilley Road in Canton just before 7 p.m. Dec. 23. Sheet metal and insulation was strewn across the fields and runway at the Canton-Plymouth Mettetal Airport.

National Weather Service officials reached the scene in western Wayne County by 9 a.m. Dec. 24 to make their determination on the tornado.

First December tornado on record for Michigan

Fox 17, December 24, 2015

Canton – A strong storm system moving through the Great Lakes brought the first December tornado on record for Michigan.

The National Weather Service confirms the tornado touched down on Wednesday night in Wayne County at around 6:43 pm and stayed on the ground for about 2 miles.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Michigan State Police warn residents of hazardous winter storm

Up North Live, December 27, 2015

The Michigan State Police and the Emergency Management and Homeland Security Division are encouraging residents and visitors to prepare for a hazardous winter storm.

The storm is expected to affect northern Michigan Monday and Tuesday.

The National Weather Service is forecasting freezing rain which will likely cause widespread power outages and dangerous traveling conditions.

State Police urge preparation ahead of 'hazardous winter storm'

MLive, December 27, 2015

Michigan State Police are urging residents to prepare for a "hazardous winter storm"Monday, saying the weather could lead to "widespread power outages" and "dangerous traveling conditions."

"Now is the time to prepare for this winter storm," said Capt. Chris A. Kelenske, Deputy State Director of Emergency Management and Homeland Security. "Freezing rain has the ability to be very destructive, causing both long-term power outages and hazardous travel conditions. I strongly recommend anyone who may be affected by this storm to ensure they have enough supplies to last three days per person. Travel may not be possible right away."

Emergency Management officials urge western Michigan residents to prepare for winter storm

Daily Journal, December 28, 2015

GRAND RAPIDS, Michigan — Officials in western Michigan are warning residents to prepare for a storm that is forecast to bring freezing rain and high winds.

Kent County emergency management office in Grand Rapids says a winter storm watch has been issued for Monday afternoon through Tuesday morning.

Emergency Management Coordinator Jack Stewart says wind gusts could reach upward of 50 mph and "could take down trees and power lines."

FLINT WATER

Gov. Snyder calls Flint water issue 'greatest challenge' during interview

MLive, December 25, 2015

FLINT, MI – Michigan Gov. Rick Snyder told a Northern Michigan news station that Flint's water problem is his office's "greatest challenge."

During a recent interview with 9&10 News, Snyder said 2015 was a good year for Michigan but troubles with the Vehicle City's water supply show there are still challenges facing the state.

"The greatest challenge we face was Flint with their water situation," Snyder said during the interview. "We've tried to be very proactive in terms of offering free water testing, free water filters, blood testing, follow-up on medical care, changing over water sources. You always want to improve so I always look at ways for continuous improvement."

Congressman calls for state water crisis health fund on Rachel Maddow show

MLive, December 24, 2015

FLINT, MI – U.S. Rep. Dan Kildee took to the Rachel Maddow show to continue his call for the state to create a health fund to help Flint's youngest residents potentially affected by the city's water crisis.

Kildee, D-Flint Township, appeared on the MSNBC pundit's program Wednesday, Dec. 23, and called on Gov. Rick Snyder to provide funding for a program that would provide continued health assistance for Flint children who have been diagnosed with elevated blood lead levels.

"We need more than an apology and an acknowledgement that they failed," Kildee said of state leaders. "We need them to make it right."

Flint water probe may unleash flood of findings on mistakes

MLive, December 27, 2015

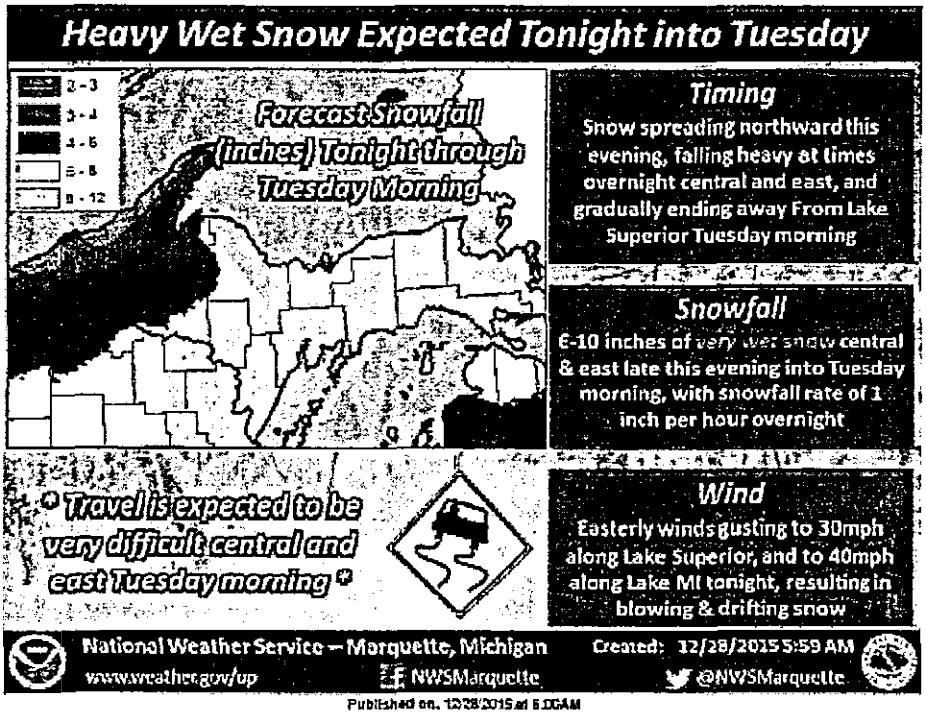
It was very revealing how some readers responded to the post that the first lady thought her husband might die from a blood clot. Instead of reflecting on the gravity of that story, lots of folks wanted to beat up on the governor for allegedly poisoning the kids in Flint with lead.

Make no mistake: The Snyder administration did not experience its finest hour in its handling — critics would say bungling — of the Flint water contamination problem.

Much like the old Watergate hearings, where everyone was asked what they knew and when they knew it, the same penetrating question is being asked about this story.

NATIONAL WEATHER SERVICE FORECASTS

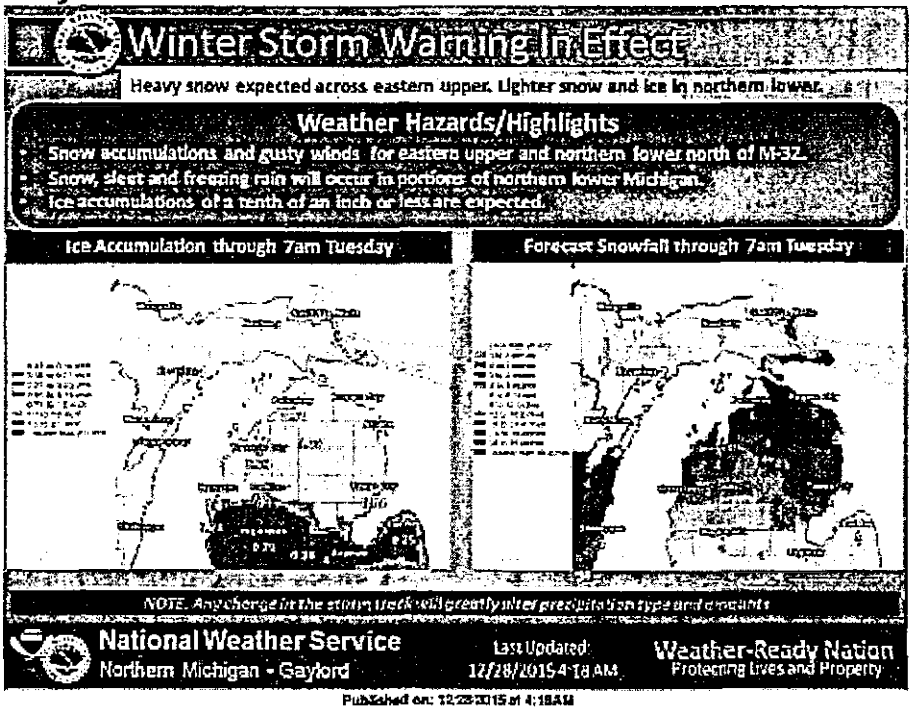
Marquette



Published on: 12/28/2015 at 5:00AM

A strong low pressure system tracking northward from the southern Plains will spread heavy snow across portions of Upper Michigan tonight into Tuesday morning. The snow is expected to be very wet, resulting in treacherous driving conditions late tonight and for the morning commute on Tuesday. In addition, gusty easterly winds will cause widespread blowing snow along the shorelines of Lake Michigan, Green Bay, and Lake Superior.

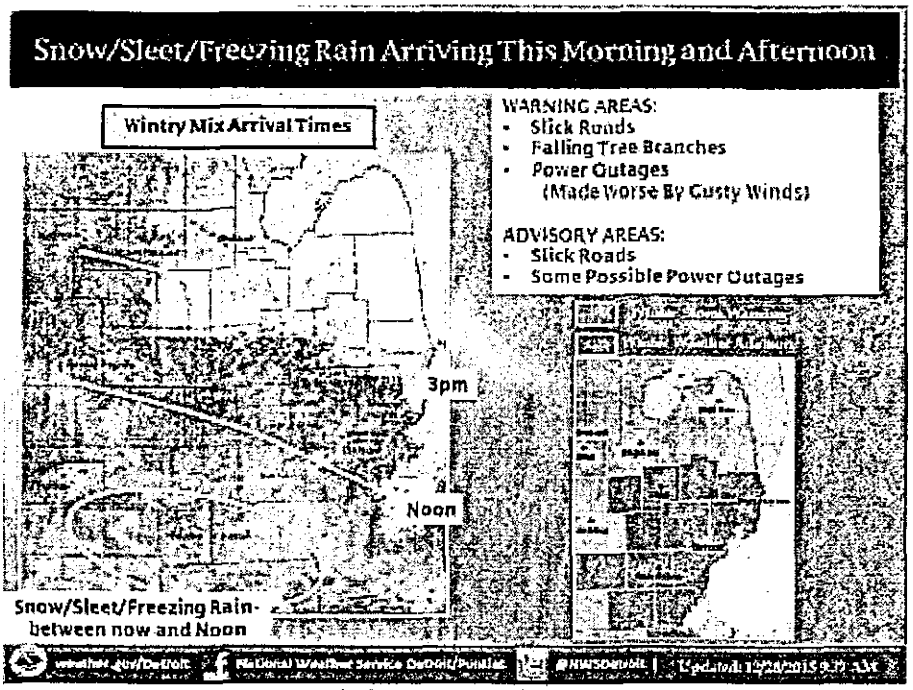
Gaylord



Published on: 12/28/2015 at 4:18AM

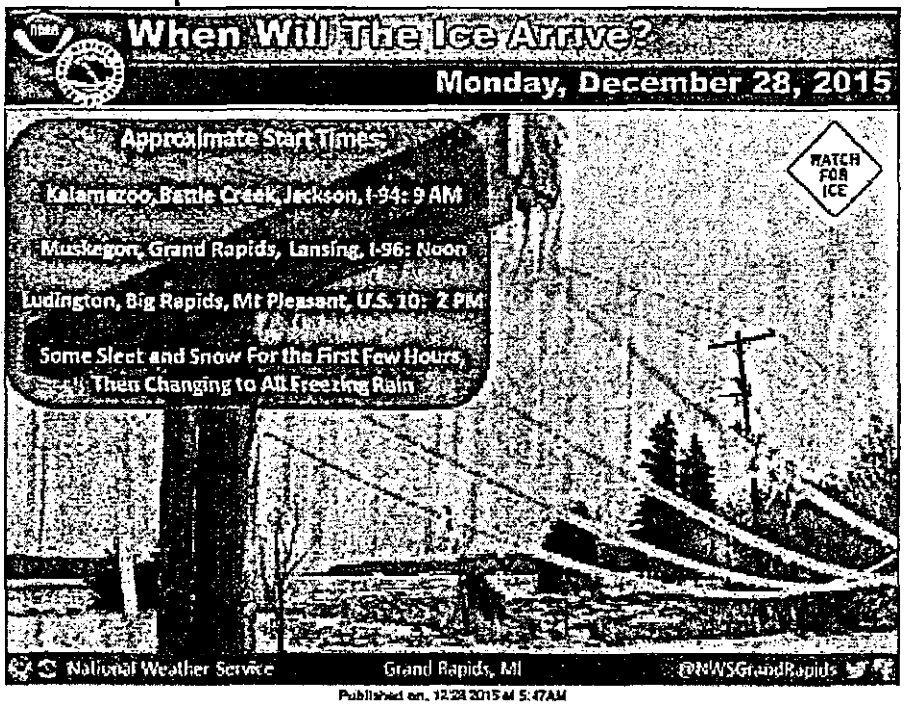
A storm will move out of the Southern Plains and into the Upper Great Lakes by tonight. This will bring a mix of snow, sleet and freezing rain to portions of Northern Michigan, starting late this afternoon and continue overnight. The snow, especially in eastern upper Michigan will have significant accumulations, and with the gusty east wind, blowing and drifting is expected.

Detroit



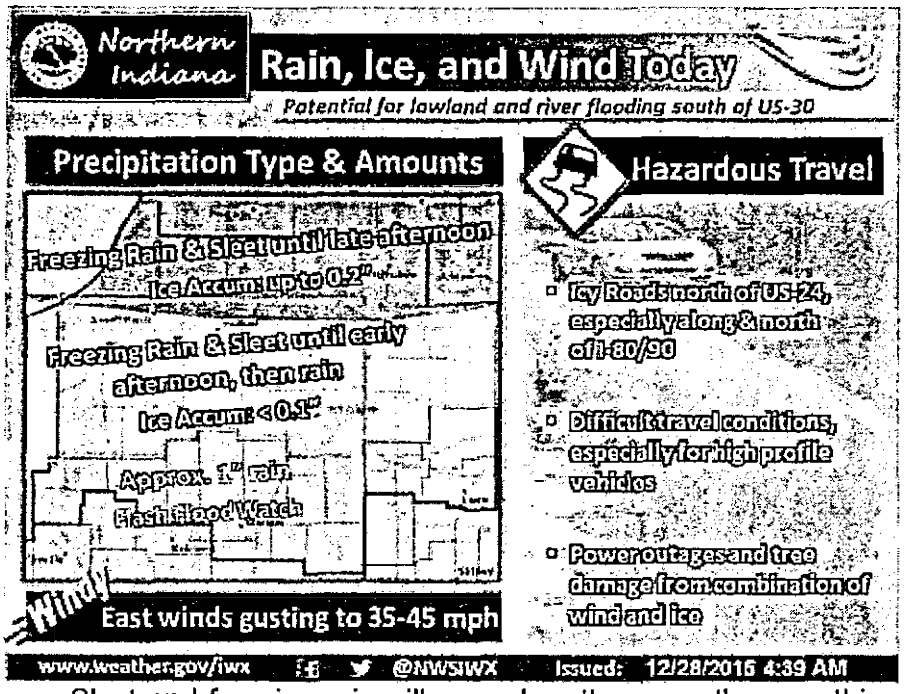
A strong storm system will lift into the Great Lakes tonight. This system will spread warm moist air aloft across the region. Meanwhile...strong high pressure to the north will sustain cold and dry air near the surface. Wintry mix of snow, sleet, and freezing rain will begin in the south through the morning and slowly lift northward through the afternoon. The peak intensity of precipitation will be this afternoon and evening. Warmer air near the surface will lift from south to north this evening into the overnight, slowly transitioning the sleet, snow, and freezing rain over to plain rain.

Grand Rapids



Travel conditions will deteriorate rapidly today as sleet and freezing rain develop.

Northern Indiana



Sleet and freezing rain will spread north across the area this morning and transition to rain from south to north through the day. Any freezing rain will be very brief south of US-24 but icy roads will be possible north of US-24, especially along and north of the toll road where freezing rain will persist through the mid-late afternoon and up to two tenths of accumulation is possible. Strong east winds are also expected this afternoon and evening. East winds gusting to 45 mph could cause tree damage and sporadic power outages, especially in areas that see accumulating ice. Another inch of rain is also expected and this could lead to additional flooding south of US-30 in areas that already saw heavy rain Saturday night.

MEDIA MONITORING REPORT

12/28/2015

Issues:

- No issues to report.

Summary:

- The National Weather Service has issued a winter storm warning for most of Michigan Monday.
- The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton and Ingham Counties.
- High winds and the resulting damage caused a number of scattered power outages in the Lansing area overnight on Dec. 24.
- After a strong wind storm overnight on Dec. 24, Consumers Energy reported 91,000 homes and businesses were without power.
- Crews continued restore power to thousands of homes and businesses in Michigan that lost electricity during severe storms before Christmas.
- Strong winds and freezing rain are expected to hit Michigan Monday afternoon, possibly bringing widespread power outages just days after utility crews restored electricity for tens of thousands of residents left in the dark following a Christmas Eve storm.
- Less than a week after hundreds of thousands of customers were left in the dark following a powerful Christmas Eve windstorm, preparations are underway for another storm expected Monday that could bring high winds and ice with the potential of knocking power out once again for many across the state.
- An EF-1 tornado swept through a portion of Canton Township on Wednesday, the National Weather Service confirmed Thursday.
- The EF-1 tornado in Canton Township is the first December tornado in Michigan history and only the third during the winter season.
- The Michigan State Police and the Emergency Management and Homeland Security Division are encouraging residents and visitors to prepare for a hazardous winter storm.
- Emergency Management officials in western Michigan are warning residents to prepare for a storm that is forecast to bring freezing rain and high winds.
- Michigan Gov. Rick Snyder told a Northern Michigan news station that Flint's water problem is his office's "greatest challenge."
- U.S. Rep. Dan Kildee took to the Rachel Maddow show to continue his call for the state to create a health fund to help Flint's youngest residents potentially affected by the city's water crisis.
- National Weather Service forecast updates.
- TV clips: Confirmed: Tornado hit in Canton Township; Tips to prepare for icy commute.

Analysis:

- Media coverage is neutral.
- Media outlets covering winter storm alerts throughout Michigan as severe winter weather is expected to hit Monday.
- Multiple media outlets reported on Michigan State Police encouraging citizens to prepare for hazardous winter storm Monday.

- The National Weather Service has confirmed an EF-1 tornado touched down in Canton Township on Dec 23.
- Coverage continues on Flint water issues.
- Will continue to monitor the situation.

MICHIGAN WEATHER

Winter weather alerts in effect for Mid-Michigan

WNEM, December 28, 2015

SAGINAW COUNTY, MI (WNEM) - Heading into your workweek, we're expecting a winter storm to move through Mid-Michigan that could have caused some travel headaches, along with power outages. We currently have several winter weather alerts in effect. They are listed below.

WINTER STORM WARNING: Clare, Isabella, Gratiot from 10 AM Monday through 6 AM Tuesday.

WINTER STORM WARNING: Alcona, Arenac, Gladwin, Iosco, Ogemaw and Roscommon from 3 p.m. Monday through 5 a.m. Tuesday.

WINTER STORM WARNING: Bay, Huron, Midland, Saginaw, Sanilac and Tuscola from 2 p.m. Monday through 3 a.m. Tuesday.

WINTER WEATHER ADVISORY: Genesee, Lapeer, Oakland and Shiawassee from noon Monday through 1 a.m. Tuesday.

Winter storm warning for much of West Michigan Monday

Fox 17, December 27, 2015

WEST MICHIGAN — The National Weather Service has issued a winter storm warning for most of West Michigan Monday.

The following counties will be under the winter storm warning from 10 AM Monday till 6 AM Tuesday: Allegan, Barry, Eaton, Ionia, Kent, Mecosta, Montcalm, Muskegon, Oceana, and Ottawa counties.

Calhoun, Kalamazoo, and Van Buren counties will be under a winter weather advisory from 9 AM Monday till 4 AM Tuesday.

Sleet and freezing rain moving in today

WILX, December 28, 2015

The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton and Ingham Counties. The Winter Storm Warning includes the cities of Lansing, St. Johns and Charlotte. A Winter Weather Advisory has been issued through early Tuesday morning for Shiawassee, Livingston, Washtenaw, Lenawee, Calhoun and Jackson Counties. The cities of Jackson and Battle Creek are in the Advisory area. A Freezing Rain Advisory has been issued for Branch and Hillsdale Counties through Monday evening.

A storm system races towards the Great Lakes today. The storm brings strong winds and a lot of moisture. Aloft temperatures will be warm enough for rain, but down at the surface an East wind will pump cold air into Mid-Michigan. This is the perfect set-up for sleet and freezing rain. The freezing rain and sleet will develop from south to north this morning. Computer models are saying ice accumulations could be around in the tenth to quarter inch range in Mid-Michigan. Heavier amounts are possible north and west of Lansing. Lesser amounts are expected south and east of Jackson. Sleet accumulations of around a half inch are possible. The ice teamed up with strong wind gusts near 45 MPH will more than likely cause scattered power outages.

Winter storm warning in effect for northern Michigan

Up North Live, December 28, 2015

A significant winter storm is on the way for Michigan starting this afternoon and ending Tuesday morning. A Winter Storm Warning has been put out that goes into effect at 3pm this afternoon and lasts until Tuesday morning. The main concerns will be dangerous travel due to snow, ice, and sleet accumulations.

A storm system from the Plains will bring a mix of wintry precipitation starting late this afternoon. Ice totals around .10" or less is expected for northern Michigan while greater amounts are expected downstate. Along with the ice, we may see significant snow accumulations in areas up to 10 inches...mainly in the U.P. where the air is colder.

High winds cause mid-Michigan power outages overnight

Lansing State Journal, December 24, 2015

LANSING — High winds and the resulting damage caused a number of scattered power outages in the Lansing area overnight.

Consumers Energy senior communications manager Brian Wheeler said 124 customers in Eaton County were still without power as of 8:45 a.m.

As many as 475 Consumers customers in Eaton County were without power as of 5 a.m., Wheeler said.

Approximately 60 customers in Ingham and Clinton counties were impacted at the peak of the outage.

91,000 without power in Michigan; some won't be back on for Christmas

Fox 17, December 24, 2015

WEST MICHIGAN - Thousands of Michigan residents are without power this Christmas Eve after a strong wind storm overnight.

Winds in some areas topped 60 miles per hour.

More than 300 workers from five different states joined the task of restoring power to area residents.

As of 9:30 p.m., Consumers Energy reported 91,000 homes and businesses are without power. Winds were to subside as the went on, so crews will be out restoring power throughout the week. Due to the damage, some areas may not get power back until Sunday.

Power restoration continues for some after severe storms

Washington Times, December 27, 2015

DETROIT (AP) - Crews continued restore power to thousands of homes and businesses in Michigan that lost electricity during severe storms before Christmas.

About 13,000 of more than 183,000 Consumers Energy customers remained without service Sunday, the utility said.

Thunderstorms followed by winds with gusts topping 60 mph toppled trees, utility poles and power lines across western and northern Michigan on Wednesday and Thursday.

On heels of Christmas Eve storm, Consumers Energy officials brace for outages Monday

MLive, December 27, 2015

Strong winds and freezing rain are expected to hit Michigan Monday afternoon, possibly bringing widespread power outages just days after utility crews restored electricity for tens of thousands of residents left in the dark following a Christmas Eve storm.

A winter storm watch has been issued for much of Michigan starting Monday afternoon and extending into Tuesday morning. Wind gusts of up to 50 mph and a half-inch of ice accumulation are possible, and officials are warning of slick roads, potential power outages and hazardous travel conditions.

"The morning commute is not going to be the worry, because it will still be dry," said Jared Maples, a meteorologist at the NWS in Grand Rapids. "But as we get to the afternoon, it will rapidly deteriorate."

Power crews wrap up restoration, prepare for coming ice storm

Fox 17, December 27, 2015

MICHIGAN — Less than a week after hundreds of thousands of customers were left in the dark following a powerful Christmas Eve windstorm, preparations are underway for another storm expected Monday that could bring high winds and ice with the potential of knocking power out once again for many across the state.

Consumers Energy said while it is wrapping up power restoration in northern Michigan, it is also preparing crews and material for Monday's weather.

"We're getting our crews back to the home headquarters. We're getting them the proper rest that they need and we're literally restocking the trucks with more equipment. We're ready to go so that when mother nature hits, we're gonna hit right back," said Rodger Morgenstern of Consumers Energy.

CANTON TOWNSHIP TORNADO

National Weather Service confirms EF-1 tornado in Canton

MLive, December 24, 2015

An EF-1 tornado swept through a portion of Canton Township on Wednesday, the National Weather Service confirmed Thursday.

The storm damaged buildings at an industrial park on Lilley Road in Canton just before 7 p.m. Dec. 23. Sheet metal and insulation was strewn across the fields and runway at the Canton-Plymouth Mettetal Airport.

National Weather Service officials reached the scene in western Wayne County by 9 a.m. Dec. 24 to make their determination on the tornado.

First December tornado on record for Michigan

Fox 17, December 24, 2015

Canton – A strong storm system moving through the Great Lakes brought the first December tornado on record for Michigan.

The National Weather Service confirms the tornado touched down on Wednesday night in Wayne County at around 6:43 pm and stayed on the ground for about 2 miles.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Michigan State Police warn residents of hazardous winter storm

Up North Live, December 27, 2015

The Michigan State Police and the Emergency Management and Homeland Security Division are encouraging residents and visitors to prepare for a hazardous winter storm.

The storm is expected to affect northern Michigan Monday and Tuesday.

The National Weather Service is forecasting freezing rain which will likely cause widespread power outages and dangerous traveling conditions.

State Police urge preparation ahead of 'hazardous winter storm'

MLive, December 27, 2015

Michigan State Police are urging residents to prepare for a "hazardous winter storm"Monday, saying the weather could lead to "widespread power outages" and "dangerous traveling conditions."

"Now is the time to prepare for this winter storm," said Capt. Chris A. Kelenske, Deputy State Director of Emergency Management and Homeland Security. "Freezing rain has the ability to be very destructive, causing both long-term power outages and hazardous travel conditions. I strongly recommend anyone who may be affected by this storm to ensure they have enough supplies to last three days per person. Travel may not be possible right away."

Emergency Management officials urge western Michigan residents to prepare for winter storm

Daily Journal, December 28, 2015

GRAND RAPIDS, Michigan — Officials in western Michigan are warning residents to prepare for a storm that is forecast to bring freezing rain and high winds.

Kent County emergency management office in Grand Rapids says a winter storm watch has been issued for Monday afternoon through Tuesday morning.

Emergency Management Coordinator Jack Stewart says wind gusts could reach upward of 50 mph and "could take down trees and power lines."

FLINT WATER

Gov. Snyder calls Flint water issue 'greatest challenge' during interview

MLive, December 25, 2015

FLINT, MI – Michigan Gov. Rick Snyder told a Northern Michigan news station that Flint's water problem is his office's "greatest challenge."

During a recent interview with 9&10 News, Snyder said 2015 was a good year for Michigan but troubles with the Vehicle City's water supply show there are still challenges facing the state.

"The greatest challenge we face was Flint with their water situation," Snyder said during the interview. "We've tried to be very proactive in terms of offering free water testing, free water filters, blood testing, follow-up on medical care, changing over water sources. You always want to improve so I always look at ways for continuous improvement."

Congressman calls for state water crisis health fund on Rachel Maddow show

MLive, December 24, 2015

FLINT, MI – U.S. Rep. Dan Kildee took to the Rachel Maddow show to continue his call for the state to create a health fund to help Flint's youngest residents potentially affected by the city's water crisis.

Kildee, D-Flint Township, appeared on the MSNBC pundit's program Wednesday, Dec. 23, and called on Gov. Rick Snyder to provide funding for a program that would provide continued health assistance for Flint children who have been diagnosed with elevated blood lead levels.

"We need more than an apology and an acknowledgement that they failed," Kildee said of state leaders. "We need them to make it right."

Flint water probe may unleash flood of findings on mistakes

MLive, December 27, 2015

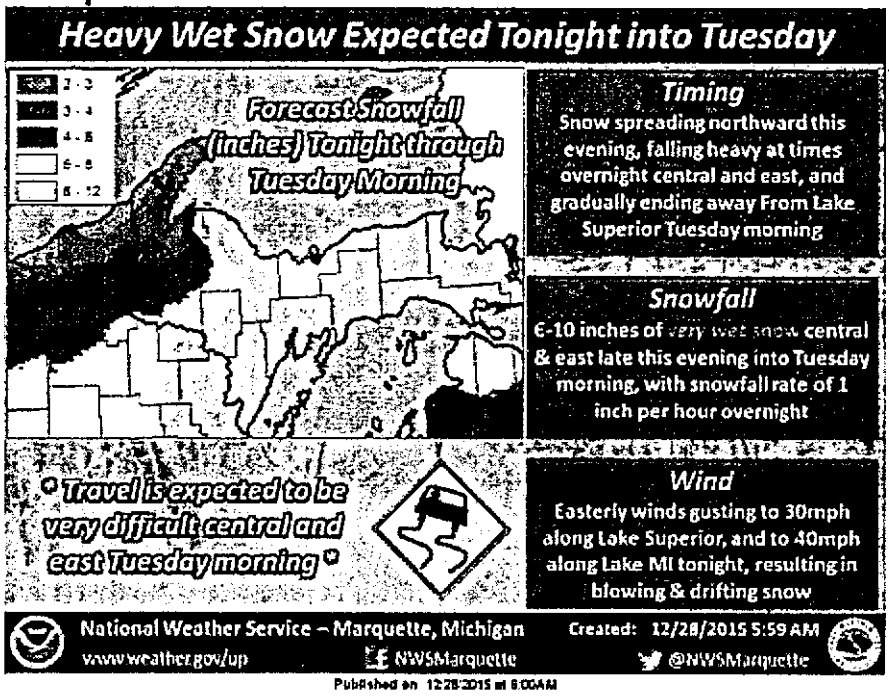
It was very revealing how some readers responded to the post that the first lady thought her husband might die from a blood clot. Instead of reflecting on the gravity of that story, lots of folks wanted to beat up on the governor for allegedly poisoning the kids in Flint with lead.

Make no mistake: The Snyder administration did not experience its finest hour in its handling — critics would say bungling — of the Flint water contamination problem.

Much like the old Watergate hearings, where everyone was asked what they knew and when they knew it, the same penetrating question is being asked about this story.

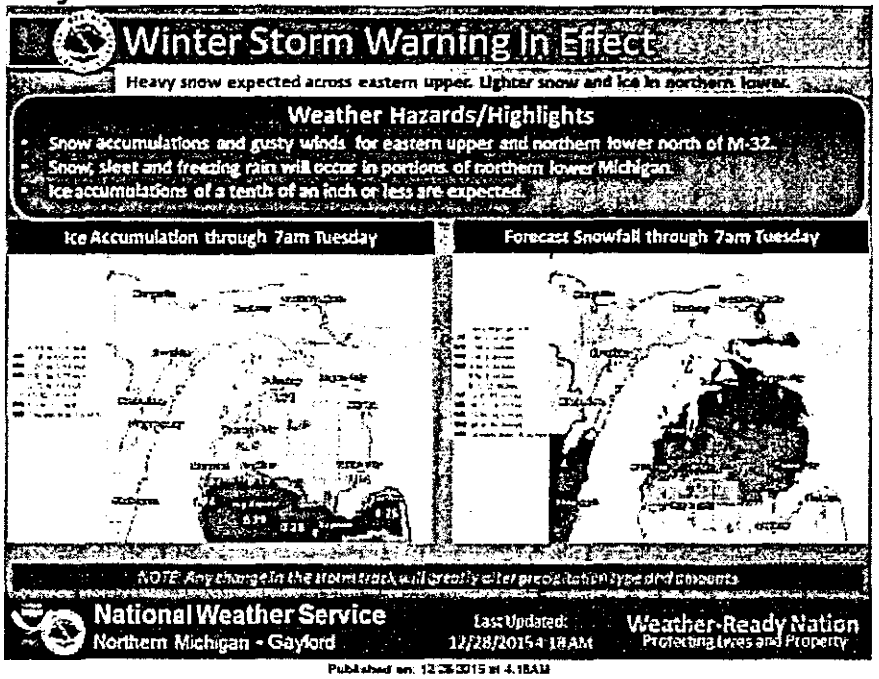
NATIONAL WEATHER SERVICE FORECASTS

Marquette



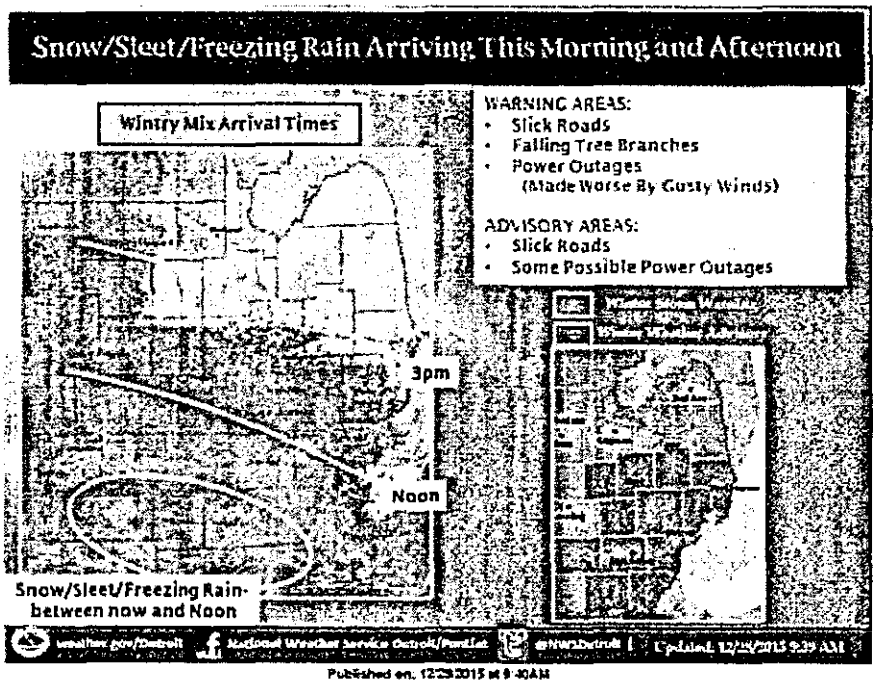
A strong low pressure system tracking northward from the southern Plains will spread heavy snow across portions of Upper Michigan tonight into Tuesday morning. The snow is expected to be very wet, resulting in treacherous driving conditions late tonight and for the morning commute on Tuesday. In addition, gusty easterly winds will cause widespread blowing snow along the shorelines of Lake Michigan, Green Bay, and Lake Superior.

Gaylord



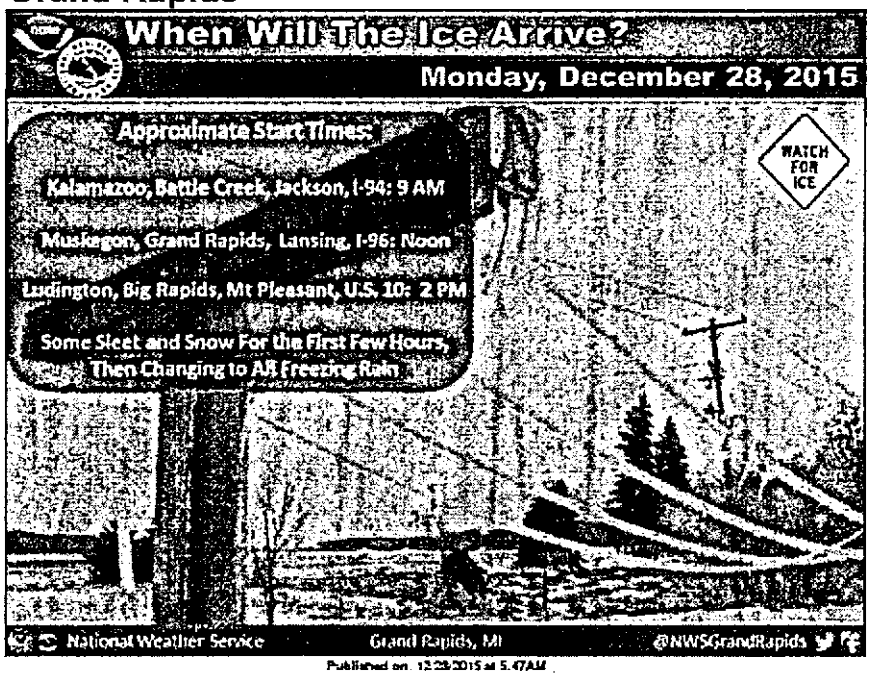
A storm will move out of the Southern Plains and into the Upper Great Lakes by tonight. This will bring a mix of snow, sleet and freezing rain to portions of Northern Michigan, starting late this afternoon and continue overnight. The snow, especially in eastern upper Michigan will have significant accumulations, and with the gusty east wind, blowing and drifting is expected.

Detroit



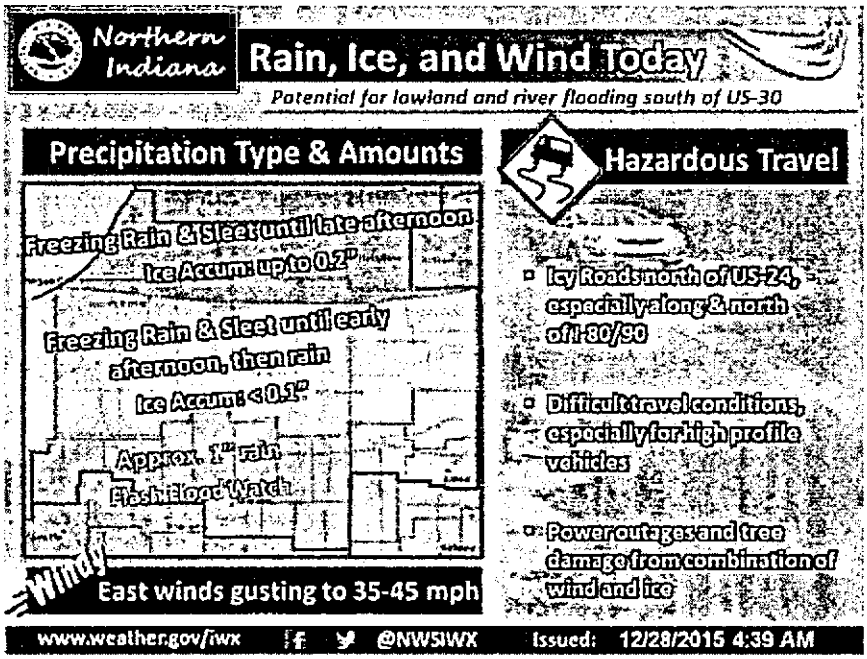
A strong storm system will lift into the Great Lakes tonight. This system will spread warm moist air aloft across the region. Meanwhile...strong high pressure to the north will sustain cold and dry air near the surface. Wintry mix of snow, sleet, and freezing rain will begin in the south through the morning and slowly lift northward through the afternoon. The peak intensity of precipitation will be this afternoon and evening. Warmer air near the surface will lift from south to north this evening into the overnight, slowly transitioning the sleet, snow, and freezing rain over to plain rain.

Grand Rapids



Travel conditions will deteriorate rapidly today as sleet and freezing rain develop.

Northern Indiana



Sleet and freezing rain will spread north across the area this morning and transition to rain from south to north through the day. Any freezing rain will be very brief south of US-24 but icy roads will be possible north of US-24, especially along and north of the toll road where freezing rain will persist through

the mid-late afternoon and up to two tenths of accumulation is possible. Strong east winds are also expected this afternoon and evening. East winds gusting to 45 mph could cause tree damage and sporadic power outages, especially in areas that see accumulating ice. Another inch of rain is also expected and this could lead to additional flooding south of US-30 in areas that already saw heavy rain Saturday night.

Good afternoon all,

From this morning's meeting:

- EMPG supplemental guidance has went out.
- 14s and above need to take a PIO training (MSP or G290) so if you haven't please let me know.
- Flint's water issue continues to get media attention, staff from EMHSD are going over to Flint today to meet with the mayor on this issue.
- The National Terrorism Advisory system has changed. They will include a "bulletin" in an effort to increase awareness and stress vigilance.
- Thanks to all that attended Oralya's sons funeral, gave money or hours. They raised almost a grand and have more hours than they need, so you may see less hours taken from your bank.
- January 19th is still the date that we move, additional emails will be following so please plan accordingly

Thanks,
Gabe

Ok. You have the most relevant pages now. A few extra notes:

- I've included only the material that seemed most specifically relevant. I left out a page on Public Health Emergencies that merely had a couple of generic strategies, rather than things specific to the water problem. I included a sheet of Flint strategies for infrastructure failure, but did not include pages for other communities (e.g. Flushing Township).
- FEMA only requires a local hazard mitigation plan to address natural hazards. This is relevant if anyone asks about the limited material related to infrastructure. Additional details surely exist in local technical documents about their water infrastructure.

If you could take a quick look, that would be great. Given the way the issue has developed, I'd be surprised, but it would be good to know.

Thanks.

I don't know how long that would take, but we are meeting with the City of Flint at an as yet undetermined time Monday, so...if it doesn't take too long, end of day today would be great!

Hello –

Yes, officially, Genesee County is currently covered by a FEMA-approved hazard mitigation plan, and Flint was one of the adopting participants, thus also counted as having FEMA approval.
Mitch had done the review, but would you like me to look through the document to see whether it gave any coverage to the current issues of infrastructure and public health?

MEDIA MONITORING REPORT

11/10/2015

Issues:

- No issues to report.

Summary:

- The state says new testing results reiterate the need for individual Flint homes, businesses, schools and other buildings to be tested for possible lead in drinking water.
- New tests suggest high lead levels in the drinking water at one Flint school may have a simple and inexpensive solution.
- Parents in Flint can get their children tested for lead during an education program hosted by the Flint School District after toxic levels of lead were found at three elementary schools in the district.
- State officials reportedly knew of problems with Flint's water supply long before the city switched to a new system that may have contaminated those who used it with lead poisoning, according to a WDET 101.9 FM article.
- Congressman Dan Kildee says he plans to meet this week with Regional EPA director Susan Hedman to discuss the status of an investigation into Flint's drinking water problems.
- Three teenage boys are charged with conspiring to shoot people at two Michigan schools.
- Another strong storm system will bring high wind gusts, much colder temperatures and probably the first snowflakes to many parts of Michigan.
- Gov. Rick Snyder planned Tuesday to sign legislation calling for a long-term increase in Michigan road repair financing through budget earmarks and increased motorist fees and taxes.
- Karen Weaver became Flint's first woman mayor Monday, Nov. 9, and promised her supporters that she plans to do much more than make history because of her gender.
- Flint's new mayor says she wants her city to return to total local control.
- The Obama administration on Monday announced nearly $20 million in funding for environmental projects in and around Macomb County's Clinton River watershed, including $6.3 million to restore habitat around Partridge Creek Commons, McBride Drain and the Clinton River spillway.
- National Weather Service forecast updates.
- TV clips: Lead exposure in Flint schools revealed; Law enforcement appreciation day.

Analysis:

- Media coverage is neutral.

- Coverage continues on Flint water issues.
- New follow up tests for lead testing at Freeman Elementary in Flint found that the issue for the high levels of lead was not from pipes, but faucets, according to a Michigan Radio article.
- WDET reports that state officials knew of the issues with using Flint's river water supply long before the city switched away from Detroit water.
- Mich. State Rep. Dan Kildee will meet this week with Regional EPA director Susan Hedman to discuss the status of the investigation into Flint's water issues.
- Will continue to monitor the situation.
- The EPA has awarded $20 million in funding for environmental projects in and around Macomb County's Clint River watershed.

FLINT WATER

State urges water tests at Flint homes, businesses, schools

WNEM 5, November 10, 2015

FLINT, Mich. (AP) - The state says new testing results reiterate the need for individual Flint homes, businesses, schools and other buildings to be tested for possible lead in drinking water.

The Michigan Department of Environmental Quality says tests from nearly 400 homes and businesses as well as comprehensive results from Freeman Elementary School indicate problems with lead are localized to individual buildings or even individual faucets.

Source of high lead levels in drinking water at one Flint school identified

Michigan Radio, November 9, 2015

New tests suggest high lead levels in the drinking water at one Flint school may have a simple and inexpensive solution.

Initial test results on drinking water samples taken at Freeman Elementary showed high levels of lead in the water: 101 parts per billion or roughly six times the federal action level for lead in tap water.

Follow up tests were conducted last month on water at four Flint schools that tested at or above the federal action level.

Flint students can be tested for lead after toxic levels found in schools

MLive, November 9, 2015

FLINT, MI – Parents in Flint can get their children tested for lead during an education program hosted by the Flint School District after toxic levels of lead were found at three elementary schools in the district.

The program will be from 3-6 p.m., Thursday, Nov. 12, at Brownell STEM Academy, 6302 Oxley Drive. It will include information from the Genesee County Health Department's medical and sanitation professionals, optional lead testing of children and follow-up support, the district said in a statement.

Report: State Officials aware of problem with Flint River Water

WDET 101.9 FM, November 9, 2015

State officials reportedly knew of problems with Flint's water supply long before the city switched to a new system that may have contaminated those who used it with lead poisoning.

A study commissioned by Flint and delivered to state environmental officials in 2013 reportedly revealed that water drawn from the city's river could put residents at risk unless it was first treated with a certain chemical.

A top EPA official is meeting with top critic of its handling of Flint's water woes

Michigan Radio, November 9, 2015

A meeting this week may help produce an update into a possible federal probe of Flint's water problems.

Congressman Dan Kildee says he plans to meet this week with Regional EPA director Susan Hedman to discuss the status of an investigation into Flint's drinking water problems.

Kildee says the investigation has to look beyond just assessing blame.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

3 teens charged with planning shootings at 2 Michigan schools

WDIV Detroit, November 9, 2015

ARGENTINE TOWNSHIP, Mich. - Three teenage boys are charged with conspiring to shoot people at two Michigan schools.

Argentine Township Police Chief Dan Allen said police intercepted information Oct. 28 about the alleged plot in the Linden district, 20 miles south of Flint.

Allen said Saturday that the group had "specific targets in mind" at Linden High School and Linden Middle School. He said the investigation revealed the threat was "serious and credible," and that he forwarded the information to the FBI.

School resource officer foils threat after seeing it on Instagram

WWMT, November 9, 2015

MICHIGAN (NEWSCHANNEL 3) - Newschannel 3 is learning more about how police were able to prevent tragedy at two mid-Michigan schools after a mass shooting plot was foiled.

Police say a school resource officer spotted the threat on Instagram just days before it was set to happen.

The officer then tracked down the teens behind the post, 18-year-old Ryan Stevens and 15-year-olds Lamar Duks and Cody Brewer.

MICHIGAN WEATHER

50 mph gusts, big temp drop and first flakes coming to many in Michiga

MLive, November 9, 2015

Another strong storm system will bring high wind gusts, much colder temperatures and probably the first snowflakes to many parts of Michigan.

All three of these weather features will hit us Thursday and Friday after a strong cold front blows through Wednesday night.

MICHIGAN POLITICS

Snyder to sign road-spending bills with tax hikes

Detroit News, November 10, 2015

Lansing — Gov. Rick Snyder planned Tuesday to sign legislation calling for a long-term increase in Michigan road repair financing through budget earmarks and increased motorist fees and taxes.

They're intended to meet Snyder's goal of securing at least a $1.2 billion annual increase in road and bridge repairs throughout Michigan but not until the 2021 budget year. A Detroit News analysis indicated the increase could fall short of that, even when fully funded.

Weaver takes oath as Flint's first woman mayor, promises 'real change'

MLive, November 9, 2015

FLINT, MI — Karen Weaver became Flint's first woman mayor Monday, Nov. 9, and promised her supporters that she plans to do much more than make history because of her gender.

"I did not knock on hundreds of doors (and) rise early every morning, doing double duty as a political candidate and a small-business owner," for nothing, Weaver told a standing-room-only crowd during her swearing-in ceremony at City Hall.

Flint's new mayor wants total local control restored

Michigan Radio, November 9, 2015

Flint's new mayor says she wants her city to return to total local control.

Soon after Karen Weaver took her oath of office as Flint mayor, she called on Governor Snyder re-instate total local control in her city.

"I do not embrace the current governance model on a moral or political basis," Weaver told the standing room crowd that packed the city council chambers to watch her take her oath of office.

MICHIGAN ENVIRONMENTAL

EPA awards $20 million for Clinton River watershed work

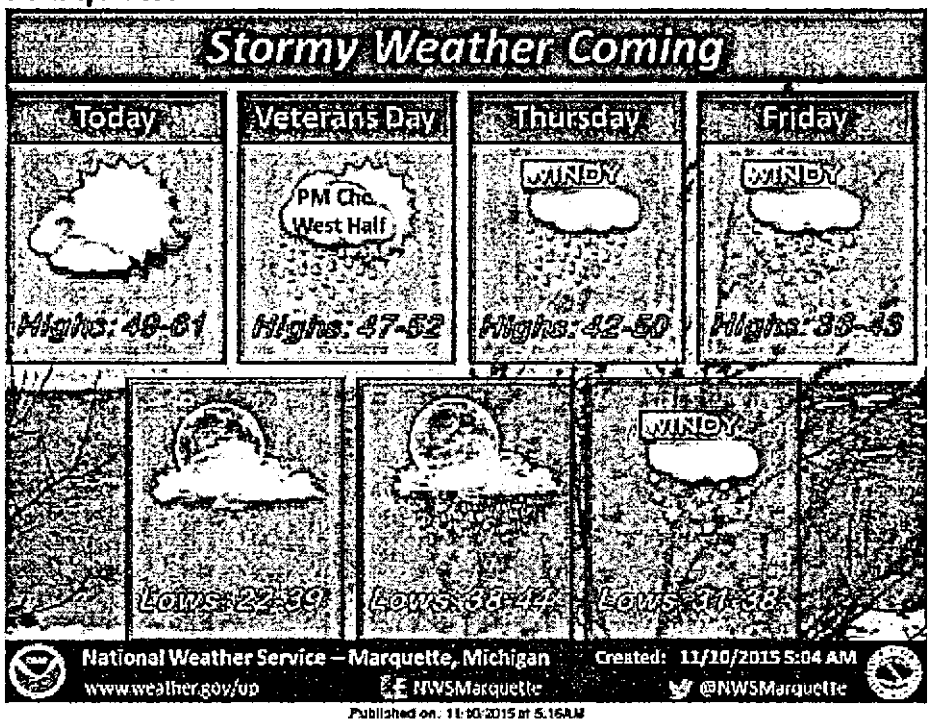
Detroit Free Press, November 9, 2015

WASHINGTON — The Obama administration on Monday announced nearly $20 million in funding for environmental projects in and around Macomb County's Clinton River watershed, including $6.3 million to restore habitat around Partridge Creek Commons, McBride Drain and the Clinton River spillway.

Officials with the U.S. Environmental Protection Agency announced the awards on Monday along with local and federal officials in Harrison Township. The awards, which comes through the federal Great Lakes Restoration Initiative (GLRI), also include $4.5 million to improve habitat and stabilize stream banks along a nine-mile section of the Clinton River in and around Sterling Heights.

NATIONAL WEATHER SERVICE FORECASTS

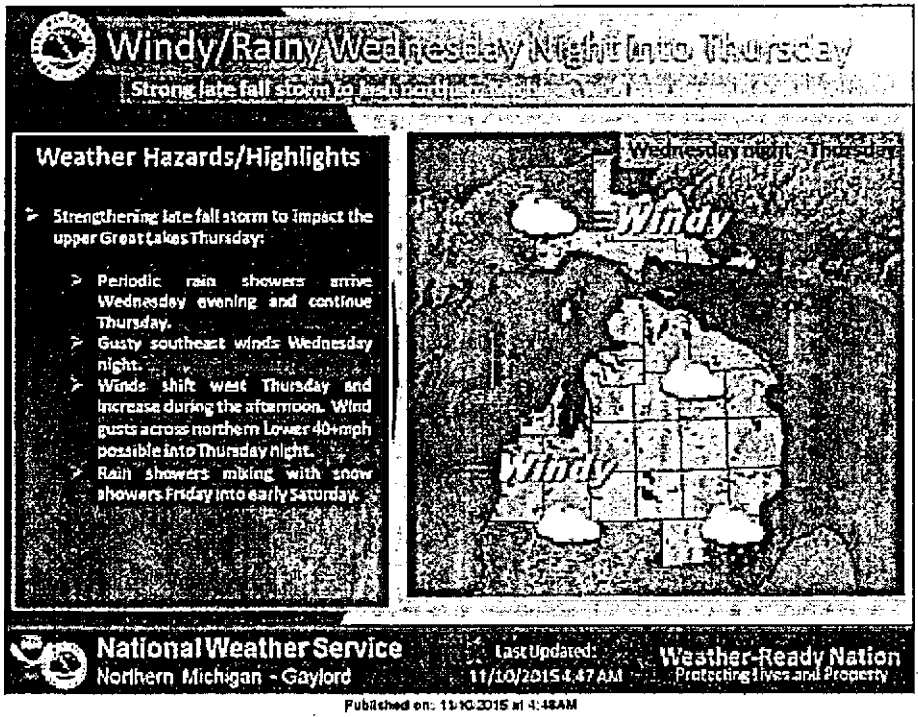
Marquette



Published on: 11/10/2015 at 5:16AM

Persistent high pressure will allow dry and unseasonably warm weather to last for one more day before a deepening storm over the Plains brings rain to the region late Wednesday into Thursday. Colder air moving in behind the system will allow precipitation to transition to mostly snow Thursday night into Friday. Several inches of snow accumulation is possible over the higher terrain of western Upper Michigan Thursday night into Friday.

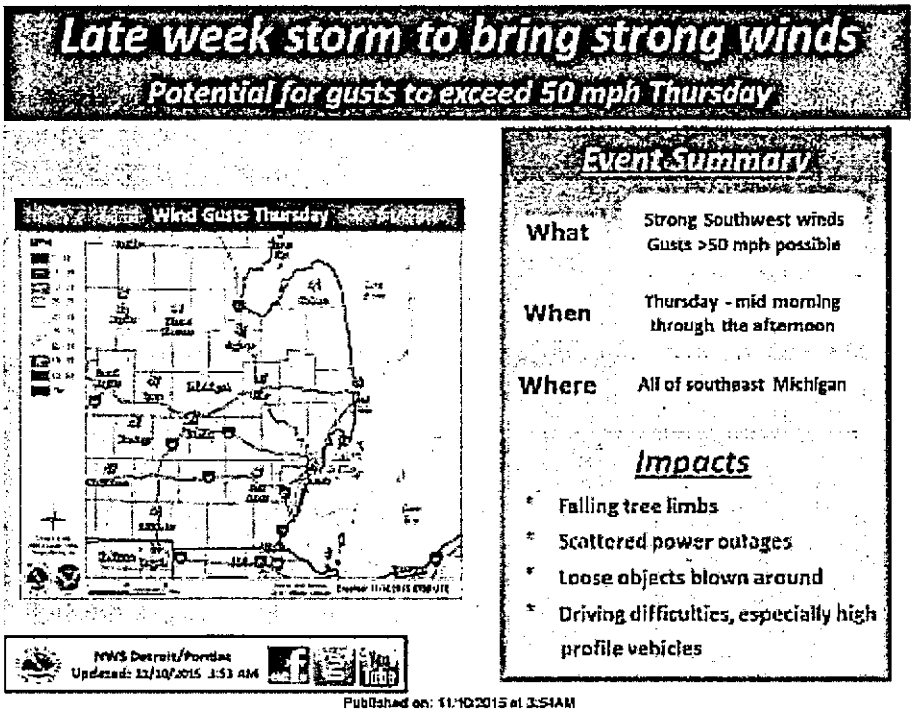
Gaylord



Published on: 11/10/2015 at 4:48AM

A developing storm system will come out of the central Plains Wednesday and track across northern Michigan Thursday. Rain showers with this system will arrive Wednesday evening and continue through the remainder of the week and perhaps mixing with snow Friday and early Saturday. Showers Wednesday night will be accompanied by gusty winds, with more wind expected by Thursday afternoon especially across northern Lower Michigan where wind gusts over 40 mph will be possible.

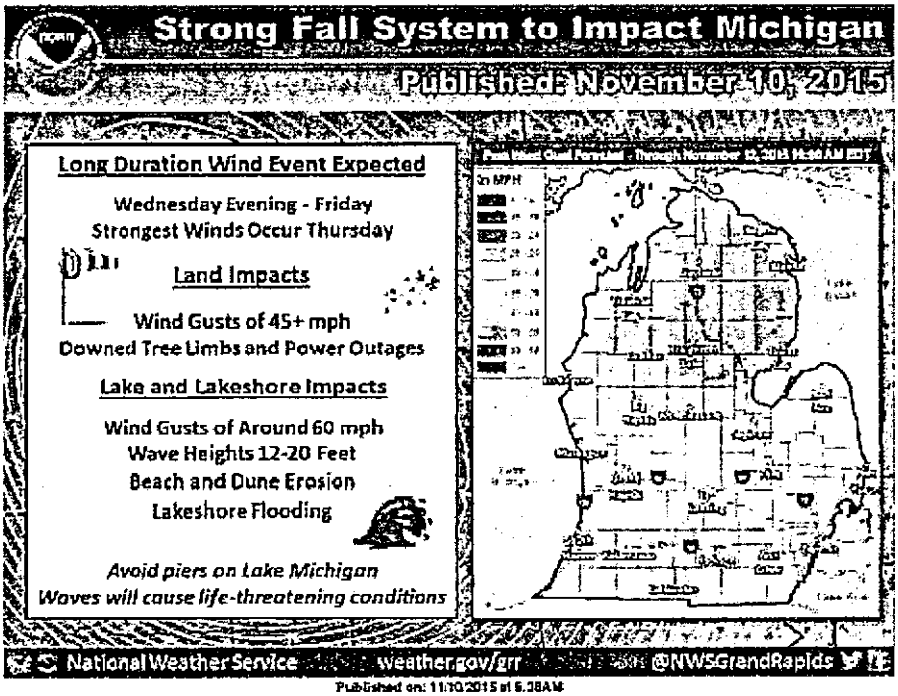
Detroit



Published on: 11/10/2015 at 3:54AM

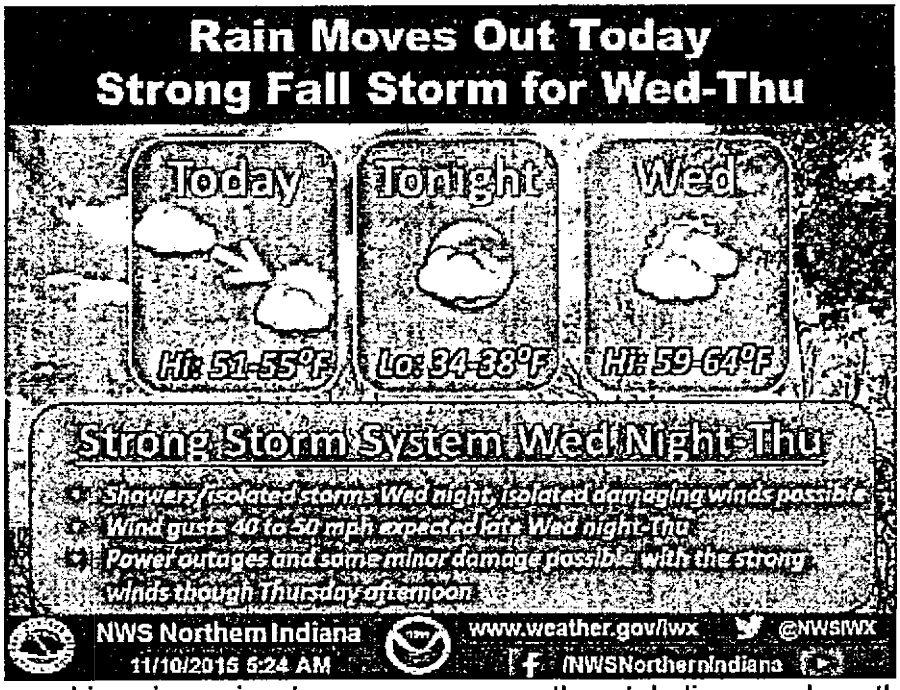
Cloudy and cooler with light rain today. Highs in the upper 40s. Dry conditions on Wednesday in advance of a strong storm system. This storm will bring strong winds to the area on Thursday. Gusts potentially in excess of 50 mph during the day. Gusty conditions will continue through Friday.

Grand Rapids



A strong Fall storm will bring high winds Wednesday evening through Friday. Elevated Lake Michigan water levels and extremely large waves will make piers incredibly dangerous.

Northern Indiana



Lingering rain showers across northeast Indiana and northwest Ohio will depart to the east this morning, with clouds diminishing from west to east this afternoon. High temperatures today will reach into the lower to mid 50's. Quiet weather is in store for tonight, but a strong fall storm system will eject out of the Rockies late Tuesday night, and will approach the region on Wednesday night into Thursday. A cold front associated with this system will bring bands of rain showers and isolated thunderstorms to the area Wednesday night, with the possibility of some strong winds with the showers. Strong winds with gusts to 40 to 50 mph are then expected behind this front for late Wednesday night into Thursday.

Early yesterday morning, two troopers from the Metro Post were in their patrol vehicle when they were struck by another vehicle while on the shoulder of westbound I-696 in Farmington Hills after completing a traffic stop. Thankfully, the troopers only received minor injuries.

This incident is another reminder for all motorists that state law requires you to #MoveOver for stationary emergency vehicles that have their lights activated or slow down and pass with caution if it is not possible to safely change lanes. The law applies to police, fire, rescue, ambulance, wrecker and road service vehicles.

MEDIA MONITORING REPORT

11/9/2015

Issues:

- No issues to report.

Summary:

- Detroit Free Press Columnist Nancy Kaffer writes that state and local officials knew in 2013 that without proper treatment of water drawn from the Flint River, they risked being subjecting residents to lead-contaminated drinking water.
- WXYZ reports that the task force for the Flint water emergency is expected to be done early next year with its investigation.
- The Detroit National Weather Service has confirmed three tornadoes and downburst winds this morning.
- This week another strong low pressure system is expected to develop in the Central Plains and move in to the Great Lakes by mid-week.
- Political Columnist Tim Skubick reports on the status of the GOP road funding plan and how critics say there is not enough money in the plan to fix the roads.
- Michigan ranks last in a national study of state ethics and transparency laws and safeguards, set for release today, partly due to its weak public records law and an absence of laws requiring personal financial disclosures by lawmakers and top state officials.
- Flint's new mayor will be sworn into office at noon Monday.
- A one-man effort to recall Governor Rick Snyder from office faces a big hurdle this week.
- Homeland Security Secretary Jeh Johnson on Friday ordered new security measures aimed at some Middle Eastern airports "out of an abundance of caution" after the suspicious crash of a Russian airliner that President Obama suggested could have been caused by a bomb.
- Three teens have been arrested after Argentine Township Police and the FBI investigated a plot to allegedly carry out a school shooting.
- National Weather Service forecast updates.
- TV clips: Friday tornadoes.

Analysis:

- Media coverage is neutral.
- Coverage continues on Flint water situation.

- Reports from ABC 12 and The Times Herald say the Detroit National Weather Service has confirmed three tornadoes touched down in St. Clair, Sanilac and Huron Counties.
- Flint's new mayor Karen Weaver will be sworn in today at noon.
- Will continue to monitor situation.

FLINT WATER

Year before water change, state knew of risks in Flint

Detroit Free Press, November 7, 2015

State and local officials knew in 2013 that without proper treatment of water drawn from the Flint River, they risked subjecting the people of Flint to lead-contaminated drinking water.

But the next year, the Michigan Department of Environmental Quality OK'd Flint's plan to pump water from the river, and into residents' homes, without adding an important chemical that would prevent contamination from lead in old pipes.

Task force appointed to investigate Flint water emergency expected finish investigation next year

WXYZ, November 6, 2015

FLINT, Mich. (WXYZ) - The evidence is overwhelming - state and federal officials failed to protect something we all take for granted: tap water.

People in Flint have been drinking water that tests have shown is laced with lead and detrimental health effects are already happening.

It could have been prevented.

MICHIGAN WEATHER

Officials: tornadoes touched down in area

The Times Herald, November 6, 2015

Jeff Friedland, director of St. Clair County Emergency Management, said in an email that the National Weather Service has confirmed that tornadoes touched down Friday morning in the Thumb.

"Along the line of showers, a few surges of stronger winds developed, which allowed three brief tornadoes to spin up," Friedland wrote in an email. "Two of the tornadoes that occurred near Bad Axe and Yale were rated EF-0 with peak winds of 85 mph, and one near Applegate was rated EF-1 with peak winds of 90 mph.

Three tornadoes confirmed in Mid-Michigan's thumb region

ABC 12, November 7, 2015

(WJRT) - (11/06/15) - The Detroit National Weather Service has confirmed three tornadoes and downburst winds this morning.

Tornado 1: Bad Axe (Huron Co) EF-0

Touched down just south of M-53 at Barrie Road in Bad Axe, traveled 0.6 miles and lifted near M-53 and Western Ave. The peak wind speeds were 85mph, and the tornado had a max width of 25 yards. It bent over two billboards with I-beams, partially blew off a roof, and caused tree damage.

Tornado 2: Applegate (Sanilac Co) EF-1

Touched down half of a mile east of the Marlette and Loeding Roads intersection, traveled 3.6 miles and lifted just northeast of the Marlette and Tubbs Roads intersection. The peak wind speeds were 90mph, and the max width of the tornado was 150 yards. There was home damage and tree damage, destroyed 3 small barns.

Tornado 3: Yale (St. Clair Co) EF-0

Touched down a quarter of a mile east of the Kilgore and Jeddo Roads intersection, traveled 0.8 miles along Jeddo Rd before lifting just east of the Duce Road intersection. The peak wind speeds were 85mph, and the tornado had a max width of 75 yards. Three barns were destroyed, another had the roof partially off, and there were 5-10 snapped or uprooted trees and 2 snapped power poles.

Strong fall storm takes aim at Michigan

Fox 17, November 8, 2015

WEST MICHIGAN — Perhaps it's a coincidence that we should be writing this story the same week as two major historic storms hit the Great Lakes in years past: the Armistice Storm and the storm that sunk the famous Great Lakes freighter the Edmund Fitzgerald. More on those in a bit.

This week another strong low pressure system is expected to develop in the Central Plains and move in to the Great Lakes by mid-week. We'll begin feeling its effects later Wednesday. While this system will not have the power and impact as those two storms in history, it will produce plenty of wind, rain, and eventually colder temperatures.

MICHIGAN POLITICS

Snyder's road plan Part B – for bonds – gets an F from both sides

MLive, November 9, 2015

It's a good thing the governor doesn't play for his favorite coach, Jim What's-His-Name, because Mr. Snyder would be bounced from the team for aiding and abetting the enemy.

Democrats are on a mission to convince citizens that the recently enacted GOP road fix plan does not get the job done, especially when new revenue from the gas tax hike and registration fee boost won't flow into the state kitty until 2017.

And Gov. Rick Snyder's critics contend by announcing he may sell bonds to raise money to start road repairs in 2016, he's de-facto adding credence to the Democratic story line.

Michigan ranks last in laws on ethics, transparency

Detroit Free Press, November 9, 2015

LANSING — Michigan ranks last in a national study of state ethics and transparency laws and safeguards, set for release today, partly due to its weak public records law and an absence of laws requiring personal financial disclosures by lawmakers and top state officials.

In all, 11 states received failing grades of F in the study, but Michigan's rating was last in the study by the Center for Public Integrity and Global Integrity, two nonprofit organizations that promote government transparency and ethics.

This week, a new mayor takes office in Flint

Michigan Radio, November 8, 2015

Flint's new mayor will be sworn into office at noon Monday.

Karen Weaver started the year as a Flint businesswoman. She'll end it as Flint's mayor.

Weaver defeated incumbent Mayor Dayne Walling in last week's election.

Weaver emerged as the least known of a four person field in the August primary and campaigned hard on the city's water problems.

Recall petition filed to oust Gov. Snyder

Michigan Radio, November 9, 2015

A one-man effort to recall Governor Rick Snyder from office faces a big hurdle this week.

Angelo Brown says Governor Snyder deserves to be recalled because of the role his administration played in the Flint drinking water crisis.

Brown's recall petition accuses the governor of being "culpable" in the decisions that lead to the use of corrosive Flint River water as the city's drinking water source.

Michigan road-fix plan becomes 2016 campaign issue

Detroit News, November 8, 2015

Lansing — No-new-tax Republicans banded together to narrowly pass Michigan's first fuel tax and vehicle registration fee increases in decades, a move Democrats eagerly hope voters will remember in 2016 and after.

Even before the breakthrough road-funding votes were cast Tuesday, Democrats had launched an "accountability" campaign targeting GOP lawmakers in swing districts who are up for re-election a year from

now. They are lambasting the "birthday tax" — license plate renewal fees that come due every year before a driver's birthday and which will rise by 20 percent in 2017, two months after the election.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Russian airline crash prompts new TSA security measures

Washington Examiner, November 6, 2015

Homeland Security Secretary Jeh Johnson on Friday ordered new security measures aimed at some Middle Eastern airports "out of an abundance of caution" after the suspicious crash of a Russian airliner that President Obama suggested could have been caused by a bomb.

A White House spokesman on Friday wouldn't elaborate on what prompted Obama's statement on Thursday that a bomb may have caused the incident, beyond noting that he based it on "what the United States has learned in the last few days" about the investigation into Saturday's crash of the Metrojet flight after it departed Egypt's Sharm el Sheikh airport.

Three teens arrested in alleged school shooting plot at Linden Community Schools

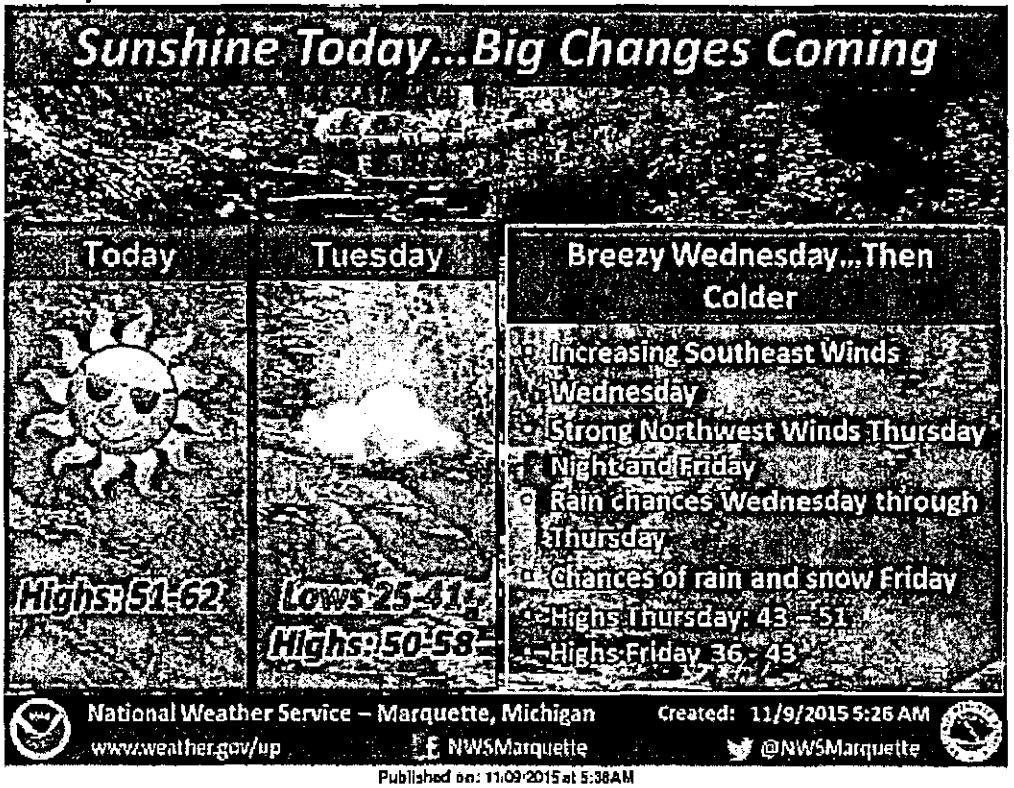
MLive, November 7, 2015

ARGENTINE TWP., MI -- Three teens have been arrested after Argentine Township Police and the FBI investigated a plot to allegedly carry out a school shooting.

Argentine Township Police Chief Daniel Allen said a resource officer at Linden Community Schools was given information on Oct. 28. Allen said the officer filed a 24-page report that he reviewed and turned over to the Federal Bureau of Investigation.

NATIONAL WEATHER SERVICE FORECASTS

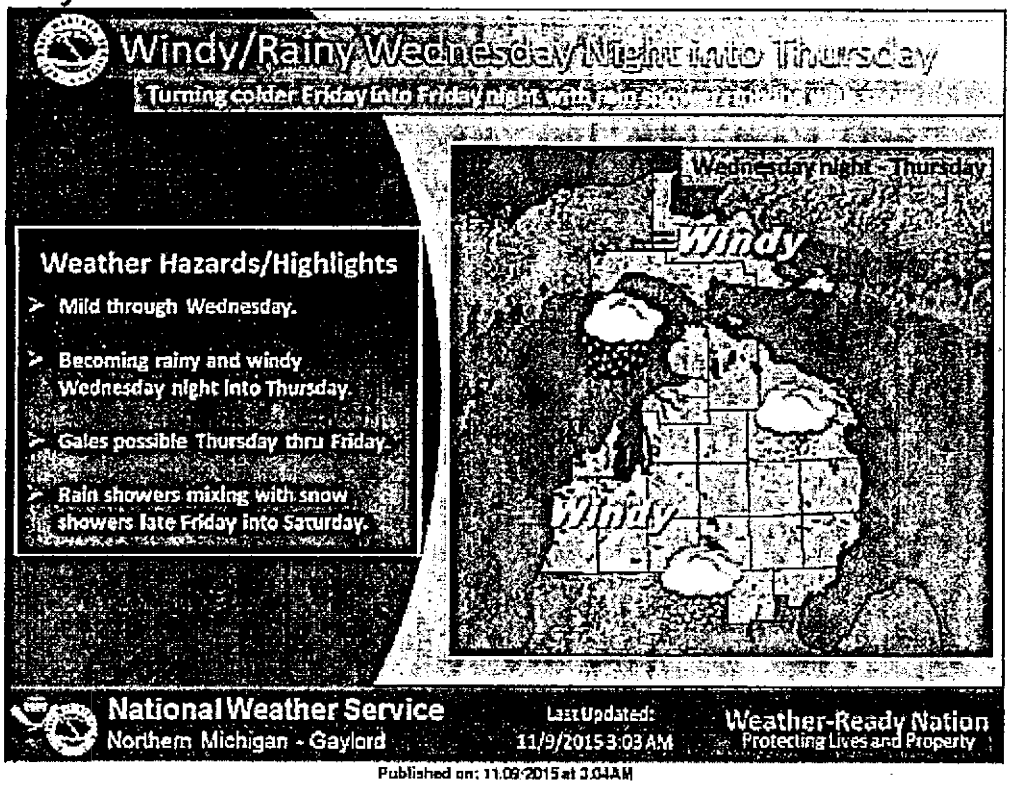
Marquette



Published on: 11/09/2015 at 5:38AM

Upper level high pressure will maintain dry and unseasonably warm conditions into Tuesday. As a deepening storm system approaches from the Central Plains expect breezy conditions with an increasing chance of rain Wednesday into Thursday. Blustery northwest winds behind the system will bring in much colder air resulting in a mix of lake effect rain and snow showers Thursday night into Friday.

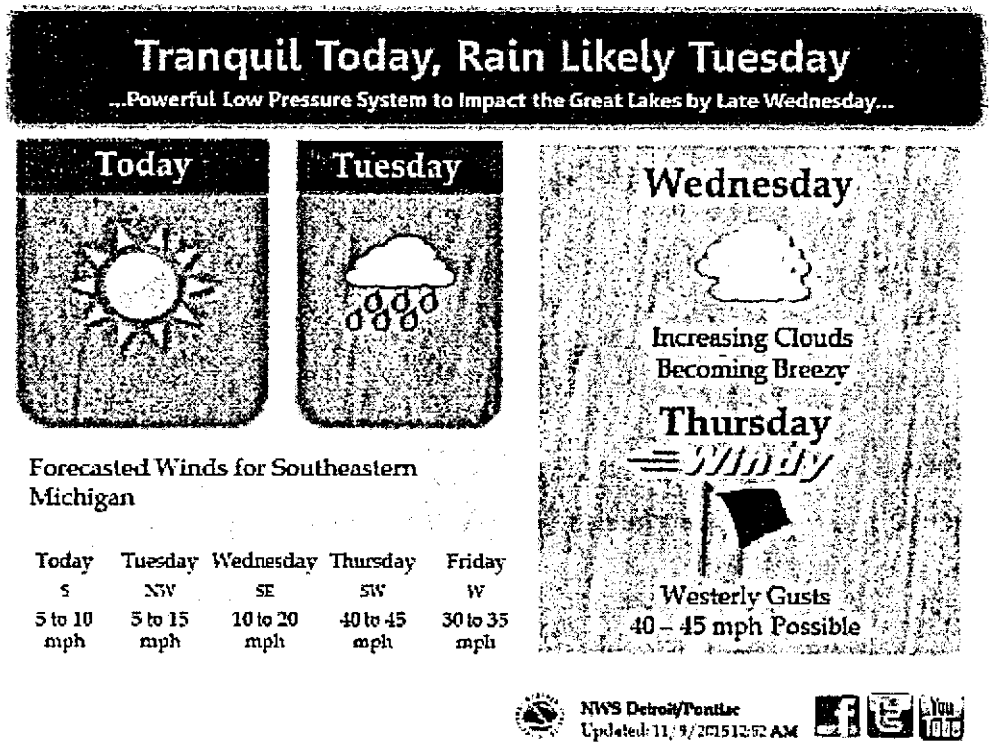
Gaylord



Published on: 11/09/2015 at 3:04AM

Mild weather will continue through Wednesday. A deepening storm system emerging out of the central Plains will bring rain and wind later in the week.

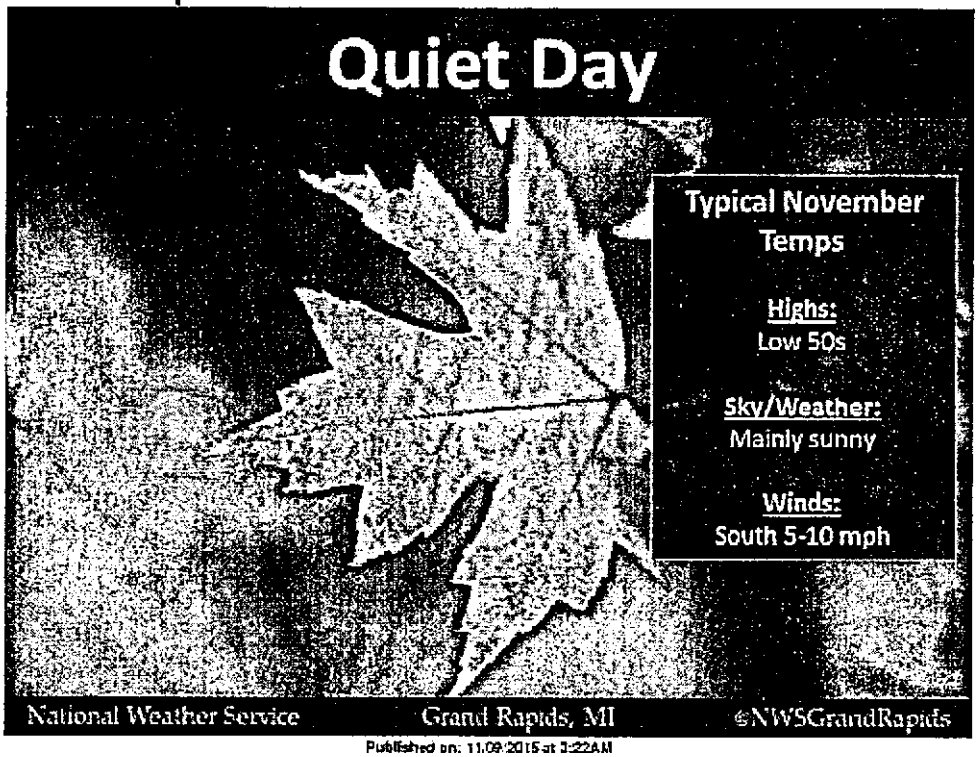
Detroit



Published on: 11/09/2015 at 12:57AM

Weak surface high pressure will gradually breakdown today leading to a continuation of tranquil weather. A disturbance across the southern U.S. will lift northward bringing increased moisture to the state for Tuesday. Light rain is expected to spread across much of the area tonight and linger into Tuesday morning. Breezy conditions will eventually develop on Wednesday in advance of a powerful low pressure system. The low pressure center is forecasted to lift into the western Great Lakes and through the Straits on Thursday.

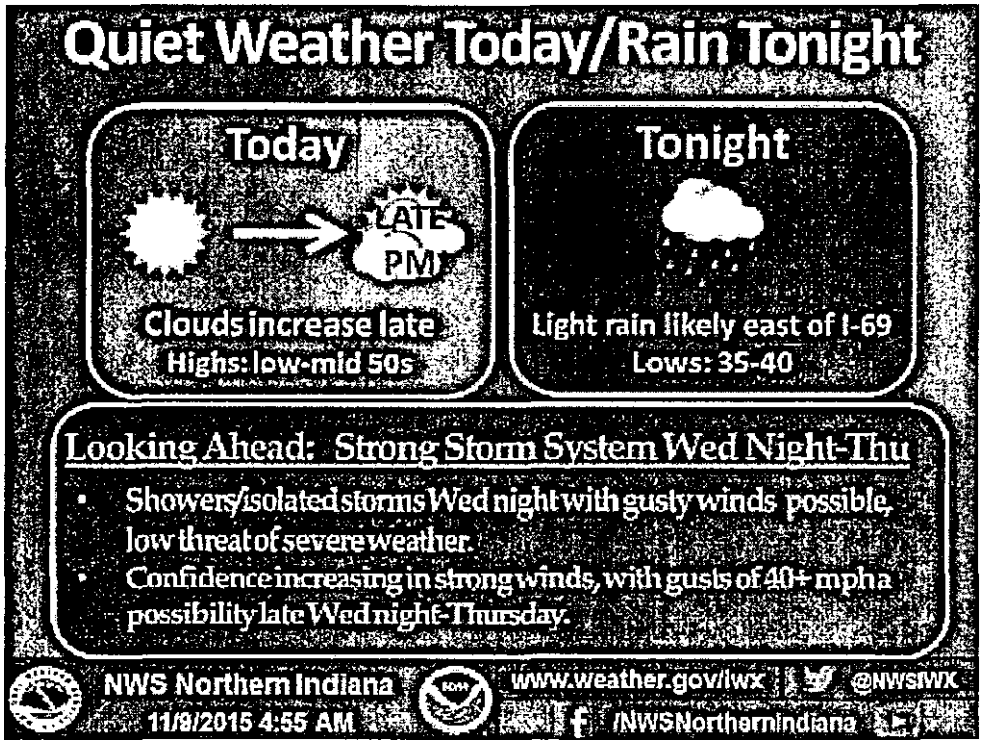
Grand Rapids



Published on: 11/09/2015 at 3:22AM

A nice November day is in store, with typical temperatures in the low 50s. Some showers move in late tonight for areas along and east of I-69.

Northern Indiana



Sunny skies are expected today, but clouds will be on the increase from south to north later this afternoon as an upper level disturbance slowly approaches the region. This system is expected to spread light rain across the area tonight, especially for locations roughly along and east of Interstate 69. Rain will taper early Tuesday morning, with quiet conditions through Tuesday night. Looking ahead, a strong storm system will develop across the central United States Wednesday, and bring a period of rain showers and isolated thunderstorms Wednesday night. There is a low threat of severe weather Wednesday night, but strong winds are expected across the entire region Wednesday night and Thursday as this system strengthens across the Great Lakes.

MEDIA MONITORING REPORT

11/10/2015

Issues:

- No issues to report.

Summary:

- The state says new testing results reiterate the need for individual Flint homes, businesses, schools and other buildings to be tested for possible lead in drinking water.
- New tests suggest high lead levels in the drinking water at one Flint school may have a simple and inexpensive solution.
- Parents in Flint can get their children tested for lead during an education program hosted by the Flint School District after toxic levels of lead were found at three elementary schools in the district.
- State officials reportedly knew of problems with Flint's water supply long before the city switched to a new system that may have contaminated those who used it with lead poisoning, according to a WDET 101.9 FM article.
- Congressman Dan Kildee says he plans to meet this week with Regional EPA director Susan Hedman to discuss the status of an investigation into Flint's drinking water problems.
- Three teenage boys are charged with conspiring to shoot people at two Michigan schools.
- Another strong storm system will bring high wind gusts, much colder temperatures and probably the first snowflakes to many parts of Michigan.
- Gov. Rick Snyder planned Tuesday to sign legislation calling for a long-term increase in Michigan road repair financing through budget earmarks and increased motorist fees and taxes.
- Karen Weaver became Flint's first woman mayor Monday, Nov. 9, and promised her supporters that she plans to do much more than make history because of her gender.
- Flint's new mayor says she wants her city to return to total local control.
- The Obama administration on Monday announced nearly $20 million in funding for environmental projects in and around Macomb County's Clinton River watershed, including $6.3 million to restore habitat around Partridge Creek Commons, McBride Drain and the Clinton River spillway.
- National Weather Service forecast updates.
- TV clips: Lead exposure in Flint schools revealed; Law enforcement appreciation day.

Analysis:

- Media coverage is neutral.
- Coverage continues on Flint water issues.
- New follow up tests for lead testing at Freeman Elementary in Flint found that the issue for the high levels of lead was not from pipes, but faucets, according to a Michigan Radio article.
- WDET reports that state officials knew of the issues with using Flint's river water supply long before the city switched away from Detroit water.
- Mich. State Rep. Dan Kildee will meet this week with Regional EPA director Susan Hedman to discuss the status of the investigation into Flint's water issues.
- Will continue to monitor the situation.
- The EPA has awarded $20 million in funding for environmental projects in and around Macomb County's Clint River watershed.

FLINT WATER

State urges water tests at Flint homes, businesses, schools

WNEM 5, November 10, 2015

FLINT, Mich. (AP) - The state says new testing results reiterate the need for individual Flint homes, businesses, schools and other buildings to be tested for possible lead in drinking water.

The Michigan Department of Environmental Quality says tests from nearly 400 homes and businesses as well as comprehensive results from Freeman Elementary School indicate problems with lead are localized to individual buildings or even individual faucets.

Source of high lead levels in drinking water at one Flint school identified

Michigan Radio, November 9, 2015

New tests suggest high lead levels in the drinking water at one Flint school may have a simple and inexpensive solution.

Initial test results on drinking water samples taken at Freeman Elementary showed high levels of lead in the water: 101 parts per billion or roughly six times the federal action level for lead in tap water.

Follow up tests were conducted last month on water at four Flint schools that tested at or above the federal action level.

Flint students can be tested for lead after toxic levels found in schools

MLive, November 9, 2015

FLINT, MI – Parents in Flint can get their children tested for lead during an education program hosted by the Flint School District after toxic levels of lead were found at three elementary schools in the district.

The program will be from 3-6 p.m., Thursday, Nov. 12, at Brownell STEM Academy, 6302 Oxley Drive. It will include information from the Genesee County Health Department's medical and sanitation professionals, optional lead testing of children and follow-up support, the district said in a statement.

Report: State Officials aware of problem with Flint River Water

WDET 101.9 FM, November 9, 2015

State officials reportedly knew of problems with Flint's water supply long before the city switched to a new system that may have contaminated those who used it with lead poisoning.

A study commissioned by Flint and delivered to state environmental officials in 2013 reportedly revealed that water drawn from the city's river could put residents at risk unless it was first treated with a certain chemical.

A top EPA official is meeting with top critic of its handling of Flint's water woes

Michigan Radio, November 9, 2015

A meeting this week may help produce an update into a possible federal probe of Flint's water problems.

Congressman Dan Kildee says he plans to meet this week with Regional EPA director Susan Hedman to discuss the status of an investigation into Flint's drinking water problems.

Kildee says the investigation has to look beyond just assessing blame.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

3 teens charged with planning shootings at 2 Michigan schools

WDIV Detroit, November 9, 2015

ARGENTINE TOWNSHIP, Mich. - Three teenage boys are charged with conspiring to shoot people at two Michigan schools.

Argentine Township Police Chief Dan Allen said police intercepted information Oct. 28 about the alleged plot in the Linden district, 20 miles south of Flint.

Allen said Saturday that the group had "specific targets in mind" at Linden High School and Linden Middle School. He said the investigation revealed the threat was "serious and credible," and that he forwarded the information to the FBI.

School resource officer foils threat after seeing it on Instagram

WWMT, November 9, 2015

MICHIGAN (NEWSCHANNEL 3) - Newschannel 3 is learning more about how police were able to prevent tragedy at two mid-Michigan schools after a mass shooting plot was foiled.

Police say a school resource officer spotted the threat on Instagram just days before it was set to happen.

The officer then tracked down the teens behind the post, 18-year-old Ryan Stevens and 15-year-olds Lamar Duks and Cody Brewer.

MICHIGAN WEATHER

50 mph gusts, big temp drop and first flakes coming to many in Michiga

MLive, November 9, 2015

Another strong storm system will bring high wind gusts, much colder temperatures and probably the first snowflakes to many parts of Michigan.

All three of these weather features will hit us Thursday and Friday after a strong cold front blows through Wednesday night.

MICHIGAN POLITICS

Snyder to sign road-spending bills with tax hikes

Detroit News, November 10, 2015

Lansing — Gov. Rick Snyder planned Tuesday to sign legislation calling for a long-term increase in Michigan road repair financing through budget earmarks and increased motorist fees and taxes.

They're intended to meet Snyder's goal of securing at least a $1.2 billion annual increase in road and bridge repairs throughout Michigan but not until the 2021 budget year. A Detroit News analysis indicated the increase could fall short of that, even when fully funded.

Weaver takes oath as Flint's first woman mayor, promises 'real change'

MLive, November 9, 2015

FLINT, MI — Karen Weaver became Flint's first woman mayor Monday, Nov. 9, and promised her supporters that she plans to do much more than make history because of her gender.

"I did not knock on hundreds of doors (and) rise early every morning, doing double duty as a political candidate and a small-business owner," for nothing, Weaver told a standing-room-only crowd during her swearing-in ceremony at City Hall.

Flint's new mayor wants total local control restored

Michigan Radio, November 9, 2015

Flint's new mayor says she wants her city to return to total local control.

Soon after Karen Weaver took her oath of office as Flint mayor, she called on Governor Snyder re-instate total local control in her city.

"I do not embrace the current governance model on a moral or political basis," Weaver told the standing room crowd that packed the city council chambers to watch her take her oath of office.

MICHIGAN ENVIRONMENTAL

EPA awards $20 million for Clinton River watershed work

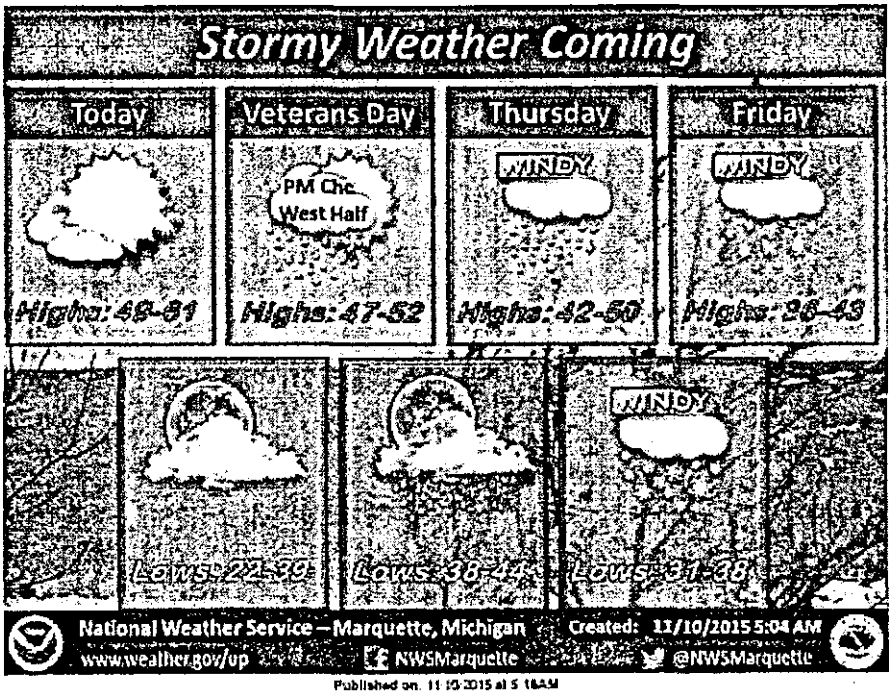
Detroit Free Press, November 9, 2015

WASHINGTON — The Obama administration on Monday announced nearly $20 million in funding for environmental projects in and around Macomb County's Clinton River watershed, including $6.3 million to restore habitat around Partridge Creek Commons, McBride Drain and the Clinton River spillway.

Officials with the U.S. Environmental Protection Agency announced the awards on Monday along with local and federal officials in Harrison Township. The awards, which comes through the federal Great Lakes Restoration Initiative (GLRI), also include $4.5 million to improve habitat and stabilize stream banks along a nine-mile section of the Clinton River in and around Sterling Heights.

NATIONAL WEATHER SERVICE FORECASTS

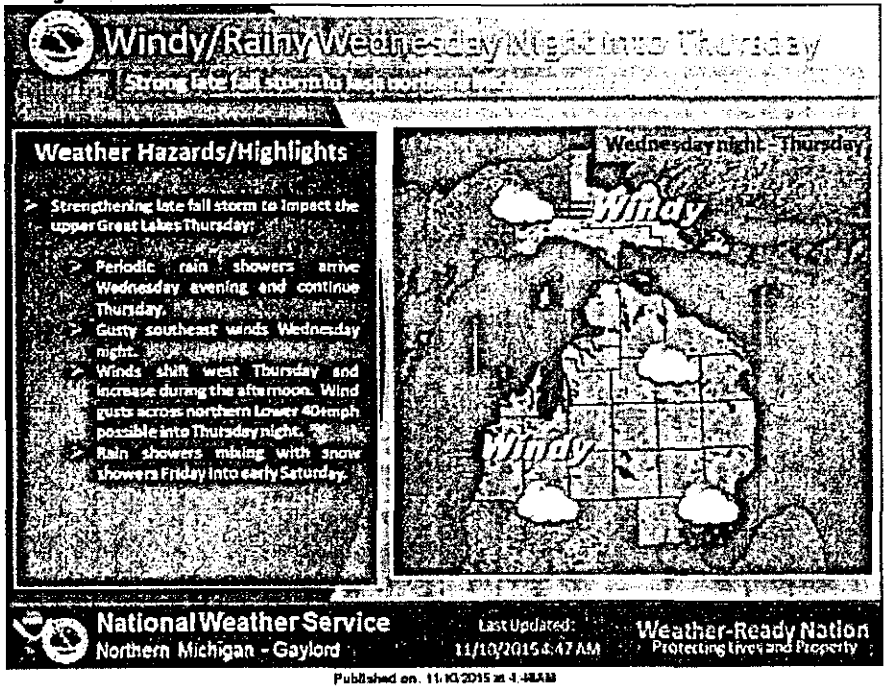
Marquette



Published on: 11/10/2015 at 5:18AM

Persistent high pressure will allow dry and unseasonably warm weather to last for one more day before a deepening storm over the Plains brings rain to the region late Wednesday into Thursday. Colder air moving in behind the system will allow precipitation to transition to mostly snow Thursday night into Friday. Several inches of snow accumulation is possible over the higher terrain of western Upper Michigan Thursday night into Friday.

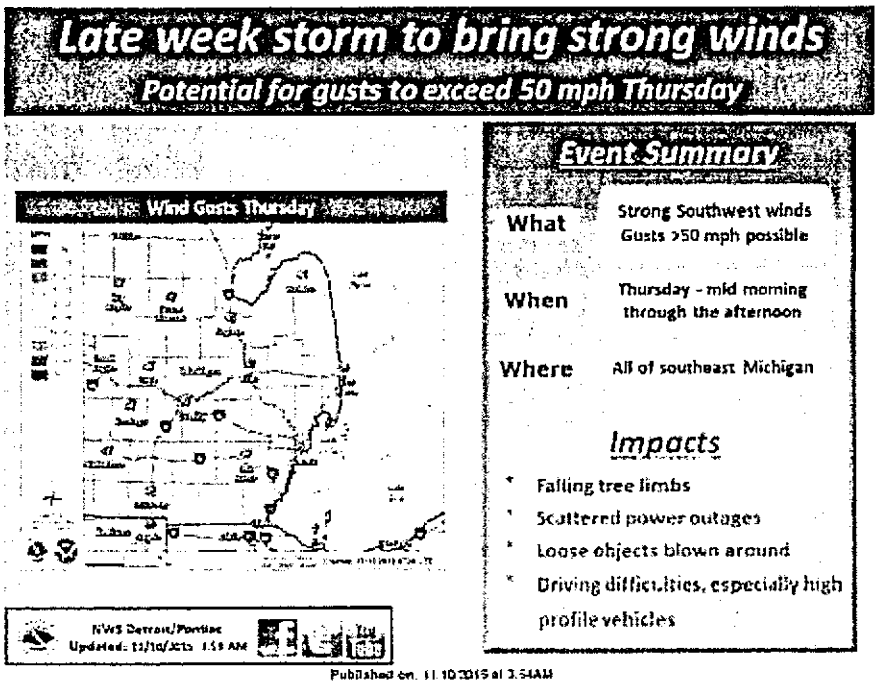
Gaylord



Published on: 11/10/2015 at 4:48AM

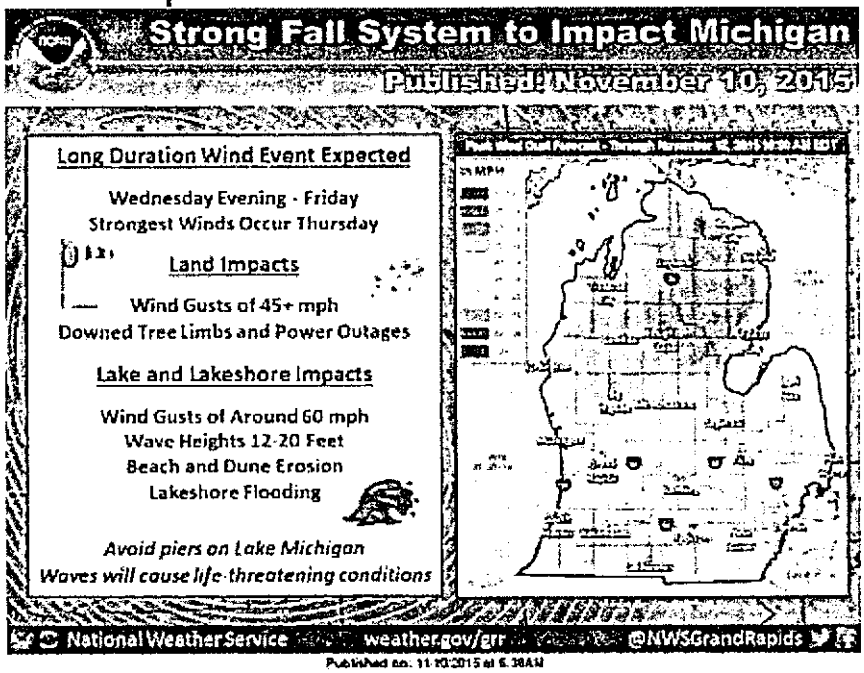
A developing storm system will come out of the central Plains Wednesday and track across northern Michigan Thursday. Rain showers with this system will arrive Wednesday evening and continue through the remainder of the week and perhaps mixing with snow Friday and early Saturday. Showers Wednesday night will be accompanied by gusty winds, with more wind expected by Thursday afternoon especially across northern Lower Michigan where wind gusts over 40 mph will be possible.

Detroit



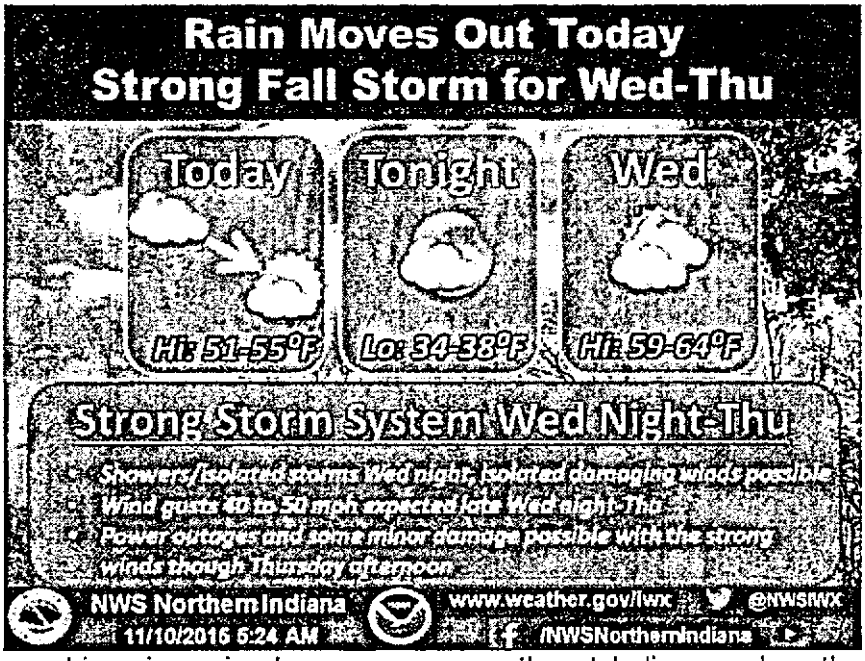
Cloudy and cooler with light rain today. Highs in the upper 40s. Dry conditions on Wednesday in advance of a strong storm system. This storm will bring strong winds to the area on Thursday. Gusts potentially in excess of 50 mph during the day. Gusty conditions will continue through Friday.

Grand Rapids



A strong Fall storm will bring high winds Wednesday evening through Friday. Elevated Lake Michigan water levels and extremely large waves will make piers incredibly dangerous.

Northern Indiana



Lingering rain showers across northeast Indiana and northwest Ohio will depart to the east this morning, with clouds diminishing from west to east this afternoon. High temperatures today will reach into the lower to mid 50's. Quiet weather is in store for tonight, but a strong fall storm system will eject out of the Rockies late Tuesday night, and will approach the region on Wednesday night into Thursday. A cold front associated with this system will bring bands of rain showers and isolated thunderstorms to the area Wednesday night, with the possibility of some strong winds with the showers. Strong winds with gusts to 40 to 50 mph are then expected behind this front for late Wednesday night into Thursday.

MEDIA MONITORING REPORT

11/9/2015

Issues:

- No issues to report.

Summary:

- Detroit Free Press Columnist Nancy Kaffer writes that state and local officials knew in 2013 that without proper treatment of water drawn from the Flint River, they risked being subjecting residents to lead-contaminated drinking water.
- WXYZ reports that the task force for the Flint water emergency is expected to be done early next year with its investigation.
- The Detroit National Weather Service has confirmed three tornadoes and downburst winds this morning.
- This week another strong low pressure system is expected to develop in the Central Plains and move in to the Great Lakes by mid-week.
- Political Columnist Tim Skubick reports on the status of the GOP road funding plan and how critics say there is not enough money in the plan to fix the roads.
- Michigan ranks last in a national study of state ethics and transparency laws and safeguards, set for release today, partly due to its weak public records law and an absence of laws requiring personal financial disclosures by lawmakers and top state officials.
- Flint's new mayor will be sworn into office at noon Monday.
- A one-man effort to recall Governor Rick Snyder from office faces a big hurdle this week.
- Homeland Security Secretary Jeh Johnson on Friday ordered new security measures aimed at some Middle Eastern airports "out of an abundance of caution" after the suspicious crash of a Russian airliner that President Obama suggested could have been caused by a bomb.
- Three teens have been arrested after Argentine Township Police and the FBI investigated a plot to allegedly carry out a school shooting.
- National Weather Service forecast updates.
- TV clips: Friday tornadoes.

Analysis:

- Media coverage is neutral.
- Coverage continues on Flint water situation.
- Reports from ABC 12 and The Times Herald say the Detroit National Weather Service has confirmed three tornadoes touched down in St. Clair, Sanilac and Huron Counties.
- Flint's new mayor Karen Weaver will be sworn in today at noon.
- Will continue to monitor situation.

FLINT WATER

Year before water change, state knew of risks in Flint

Detroit Free Press, November 7, 2015

State and local officials knew in 2013 that without proper treatment of water drawn from the Flint River, they risked subjecting the people of Flint to lead-contaminated drinking water.

But the next year, the Michigan Department of Environmental Quality OK'd Flint's plan to pump water from the river, and into residents' homes, without adding an important chemical that would prevent contamination from lead in old pipes.

Task force appointed to investigate Flint water emergency expected finish investigation next year

WXYZ, November 6, 2015

FLINT, Mich. (WXYZ) - The evidence is overwhelming - state and federal officials failed to protect something we all take for granted: tap water.

People in Flint have been drinking water that tests have shown is laced with lead and detrimental health effects are already happening.

It could have been prevented.

MICHIGAN WEATHER

Officials: tornadoes touched down in area

The Times Herald, November 6, 2015

Jeff Friedland, director of St. Clair County Emergency Management, said in an email that the National Weather Service has confirmed that tornadoes touched down Friday morning in the Thumb.

"Along the line of showers, a few surges of stronger winds developed, which allowed three brief tornadoes to spin up," Friedland wrote in an email. "Two of the tornadoes that occurred near Bad Axe and Yale were rated EF-0 with peak winds of 85 mph, and one near Applegate was rated EF-1 with peak winds of 90 mph.

Three tornadoes confirmed in Mid-Michigan's thumb region

ABC 12, November 7, 2015

(WJRT) - (11/06/15) - The Detroit National Weather Service has confirmed three tornadoes and downburst winds this morning.

Tornado 1: Bad Axe (Huron Co) EF-0

Touched down just south of M-53 at Barrie Road in Bad Axe, traveled 0.6 miles and lifted near M-53 and Western Ave. The peak wind speeds were 85mph, and the tornado had a max width of 25 yards. It bent over two billboards with I-beams, partially blew off a roof, and caused tree damage.

Tornado 2: Applegate (Sanilac Co) EF-1

Touched down half of a mile east of the Marlette and Loeding Roads intersection, traveled 3.6 miles and lifted just northeast of the Marlette and Tubbs Roads intersection. The peak wind speeds were 90mph, and the max width of the tornado was 150 yards. There was home damage and tree damage, destroyed 3 small barns.

Tornado 3: Yale (St. Clair Co) EF-0

Touched down a quarter of a mile east of the Kilgore and Jeddo Roads intersection, traveled 0.8 miles along Jeddo Rd before lifting just east of the Duce Road intersection. The peak wind speeds were 85mph, and the tornado had a max width of 75 yards. Three barns were destroyed, another had the roof partially off, and there were 5-10 snapped or uprooted trees and 2 snapped power poles.

Strong fall storm takes aim at Michigan

Fox 17, November 8, 2015

WEST MICHIGAN — Perhaps it's a coincidence that we should be writing this story the same week as two major historic storms hit the Great Lakes in years past: the Armistice Storm and the storm that sunk the famous Great Lakes freighter the Edmund Fitzgerald. More on those in a bit.

This week another strong low pressure system is expected to develop in the Central Plains and move in to the Great Lakes by mid-week. We'll begin feeling its effects later Wednesday. While this system will not have the power and impact as those two storms in history, it will produce plenty of wind, rain, and eventually colder temperatures.

MICHIGAN POLITICS

Snyder's road plan Part B – for bonds – gets an F from both sides

MLive, November 9, 2015

It's a good thing the governor doesn't play for his favorite coach, Jim What's-His-Name, because Mr. Snyder would be bounced from the team for aiding and abetting the enemy.

Democrats are on a mission to convince citizens that the recently enacted GOP road fix plan does not get the job done, especially when new revenue from the gas tax hike and registration fee boost won't flow into the state kitty until 2017.

And Gov. Rick Snyder's critics contend by announcing he may sell bonds to raise money to start road repairs in 2016, he's de-facto adding credence to the Democratic story line.

Michigan ranks last in laws on ethics, transparency

Detroit Free Press, November 9, 2015

LANSING — Michigan ranks last in a national study of state ethics and transparency laws and safeguards, set for release today, partly due to its weak public records law and an absence of laws requiring personal financial disclosures by lawmakers and top state officials.

In all, 11 states received failing grades of F in the study, but Michigan's rating was last in the study by the Center for Public Integrity and Global Integrity, two nonprofit organizations that promote government transparency and ethics.

This week, a new mayor takes office in Flint

Michigan Radio, November 8, 2015

Flint's new mayor will be sworn into office at noon Monday.

Karen Weaver started the year as a Flint businesswoman. She'll end it as Flint's mayor.

Weaver defeated incumbent Mayor Dayne Walling in last week's election.

Weaver emerged as the least known of a four person field in the August primary and campaigned hard on the city's water problems.

Recall petition filed to oust Gov. Snyder

Michigan Radio, November 9, 2015

A one-man effort to recall Governor Rick Snyder from office faces a big hurdle this week.

Angelo Brown says Governor Snyder deserves to be recalled because of the role his administration played in the Flint drinking water crisis.

Brown's recall petition accuses the governor of being "culpable" in the decisions that lead to the use of corrosive Flint River water as the city's drinking water source.

Michigan road-fix plan becomes 2016 campaign issue

Detroit News, November 8, 2015

Lansing — No-new-tax Republicans banded together to narrowly pass Michigan's first fuel tax and vehicle registration fee increases in decades, a move Democrats eagerly hope voters will remember in 2016 and after.

Even before the breakthrough road-funding votes were cast Tuesday, Democrats had launched an "accountability" campaign targeting GOP lawmakers in swing districts who are up for re-election a year from now. They are lambasting the "birthday tax" — license plate renewal fees that come due every year before a driver's birthday and which will rise by 20 percent in 2017, two months after the election.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Russian airline crash prompts new TSA security measures

Washington Examiner, November 6, 2015

Homeland Security Secretary Jeh Johnson on Friday ordered new security measures aimed at some Middle Eastern airports "out of an abundance of caution" after the suspicious crash of a Russian airliner that President Obama suggested could have been caused by a bomb.

A White House spokesman on Friday wouldn't elaborate on what prompted Obama's statement on Thursday that a bomb may have caused the incident, beyond noting that he based it on "what the United States has learned in the last few days" about the investigation into Saturday's crash of the Metrojet flight after it departed Egypt's Sharm el Sheikh airport.

Three teens arrested in alleged school shooting plot at Linden Community Schools

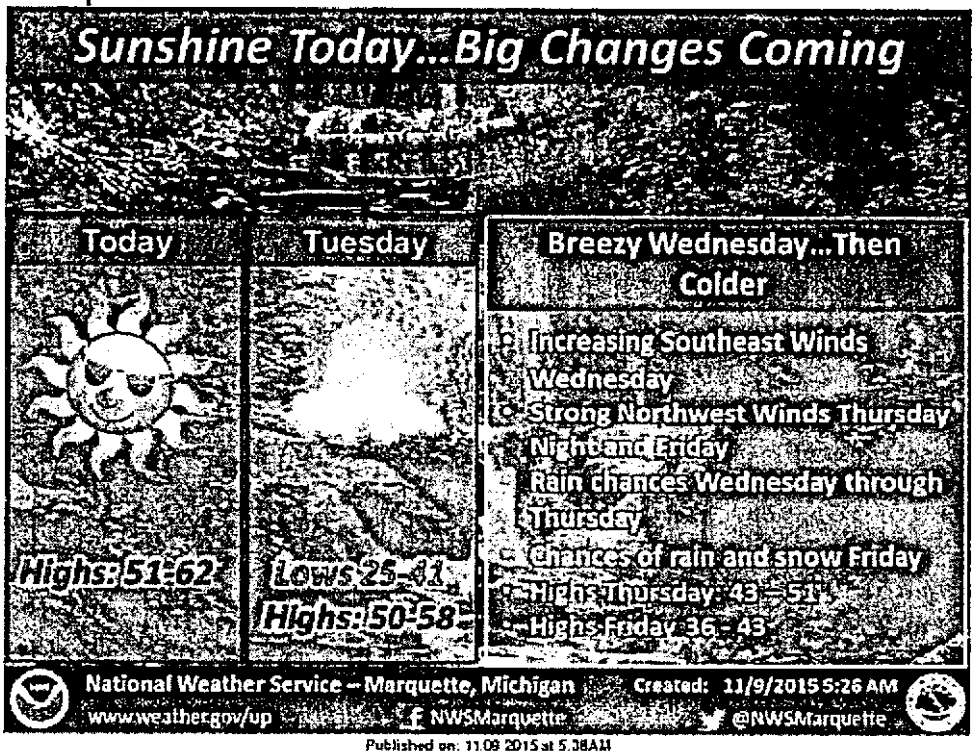
MLive, November 7, 2015

ARGENTINE TWP., MI -- Three teens have been arrested after Argentine Township Police and the FBI investigated a plot to allegedly carry out a school shooting.

Argentine Township Police Chief Daniel Allen said a resource officer at Linden Community Schools was given information on Oct. 28. Allen said the officer filed a 24-page report that he reviewed and turned over to the Federal Bureau of Investigation.

NATIONAL WEATHER SERVICE FORECASTS

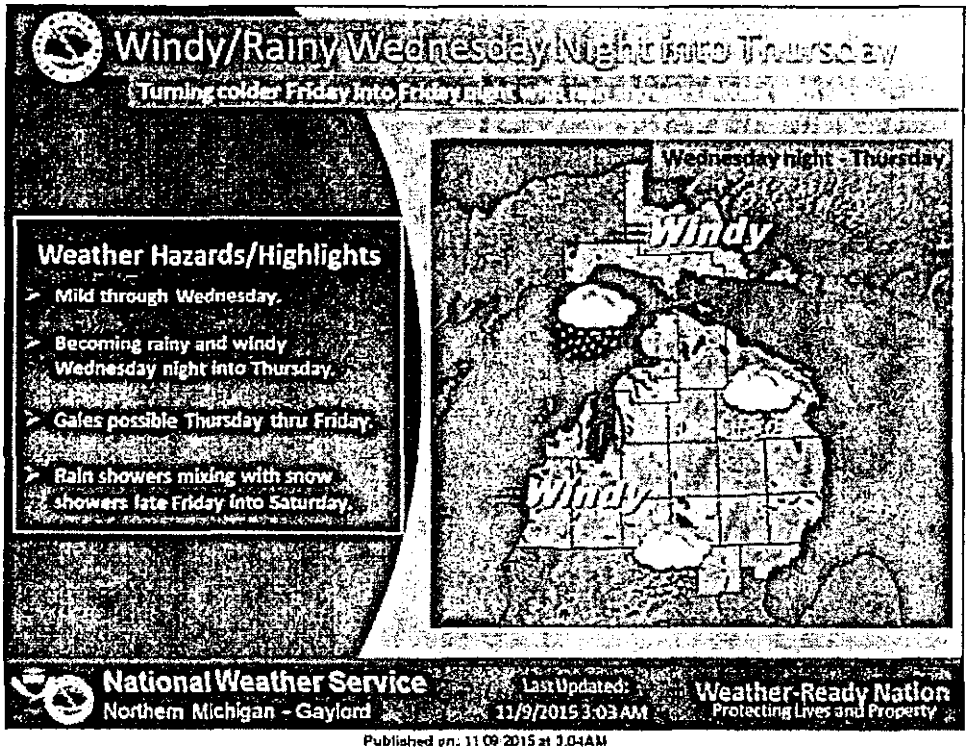
Marquette



Published on: 11/09/2015 at 5:38AM

Upper level high pressure will maintain dry and unseasonably warm conditions into Tuesday. As a deepening storm system approaches from the Central Plains expect breezy conditions with an increasing chance of rain Wednesday into Thursday. Blustery northwest winds behind the system will bring in much colder air resulting in a mix of lake effect rain and snow showers Thursday night into Friday.

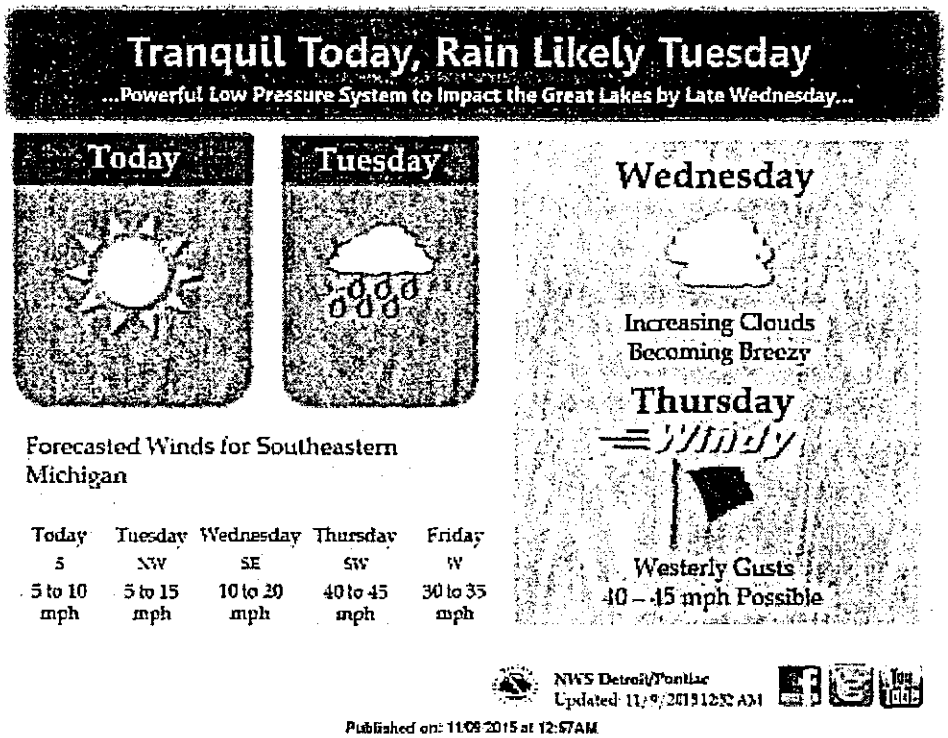
Gaylord



Published on: 11/09/2015 at 3:04AM

Mild weather will continue through Wednesday. A deepening storm system emerging out of the central Plains will bring rain and wind later in the week.

Detroit

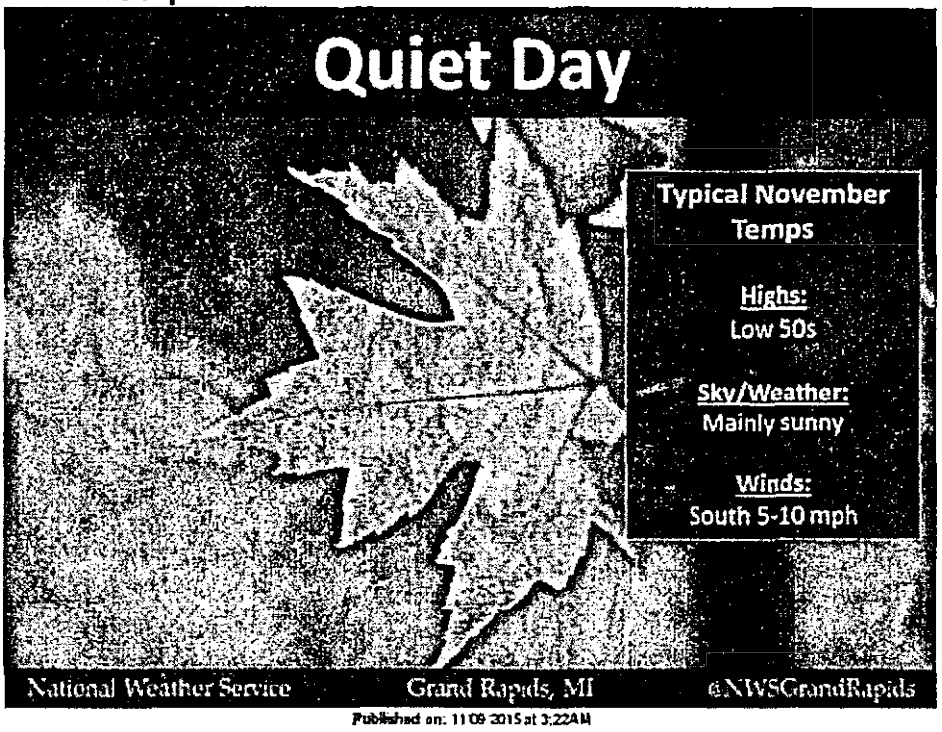


Published on: 11/09/2015 at 12:57AM

Weak surface high pressure will gradually breakdown today leading to a continuation of tranquil weather. A disturbance across the southern U.S. will lift northward bringing increased moisture to the state for Tuesday. Light rain is expected to spread across much of the area tonight and linger into Tuesday morning. Breezy conditions will eventually develop on Wednesday in advance of a powerful low

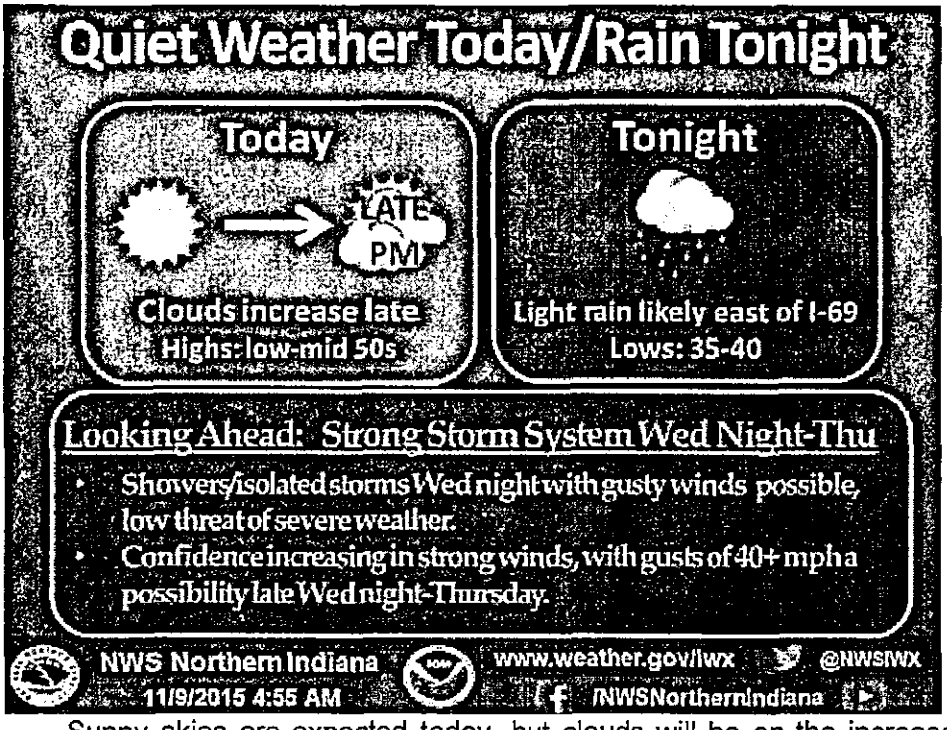
pressure system. The low pressure center is forecasted to lift into the western Great Lakes and through the Straits on Thursday.

Grand Rapids



A nice November day is in store, with typical temperatures in the low 50s. Some showers move in late tonight for areas along and east of I-69.

Northern Indiana



Sunny skies are expected today, but clouds will be on the increase from south to north later this afternoon as an upper level disturbance slowly approaches the region. This system is expected to spread light rain across the area tonight, especially for locations roughly along and east of Interstate 69. Rain will

taper early Tuesday morning, with quiet conditions through Tuesday night. Looking ahead, a strong storm system will develop across the central United States Wednesday, and bring a period of rain showers and isolated thunderstorms Wednesday night. There is a low threat of severe weather Wednesday night, but strong winds are expected across the entire region Wednesday night and Thursday as this system strengthens across the Great Lakes.

FLINT WATER

EPA report warns of more potential Flint water problems

The Oakland Press, November 5, 2015

FLINT (AP) >> Flint residents should be warned of the potential risk of increased lead in drinking water when crews do underground work that could affect pipes, according to a report from the U.S. Environmental Protection Agency.

The recommendation was included in an EPA report released Wednesday about high lead levels in drinking water at three homes. The EPA said the report is being sent to the National Drinking Water Advisory Council for discussion next month, The Flint Journal reported.

Experts: Water health dangers don't subside in Fling

Detroit News, November 5, 2015

Local health officials and the federal government are warning Flint residents that the danger from their tap water has not subsided even though the city has reconnected to Detroit's water system.

Dr. Mona Hanna-Attisha, the Hurley Medical Center pediatrician who uncovered lead exposure in city children two months ago, wants residents to continue their use of bottled water. This comes three weeks after Flint began receiving its drinking water from the Detroit Water and Sewerage Department.

How did the Flint water crisis begin and what will it mean for families who drank the water?

WXYZ, November 5, 2015

(WXYZ) - The evidence is overwhelming - state and federal officials failed to protect something we all take for granted: tap water.

People in Flint have been drinking water that tests have shown is laced with lead snd detrimental health effects are already happening.

It could have been prevented.

How flint's water crisis pushed road funding plan ahead

Michigan Radio, November 6, 2015

I heard from several puzzled people yesterday, after Governor Rick Snyder proclaimed he would sign the road fund package the legislature narrowly passed on election night.

"I don't get it," one man said. "I thought the governor said that cutting the general fund by $600 million a year was too much." Well, yes, he did say that.

A similar road funding approach fell apart barely two months ago, because the governor said he couldn't support cuts that deep. Snyder's press secretary, Sara Wurfel, said he was worried about "jeopardizing the state's financial stability and comeback."

County agencies prepare to distribute water filter replacement cartridges in Flint

MLive, November 5, 2015

FLINT, MI — Genesee County agencies are set to give Flint residents replacement cartridges for filters distributed in the city to prevent lead from getting into drinking water.

The Genesee County Health Department issued a news release reminding city residents water filters will need to be changed soon.

Flint lawmaker wants hearings on water controversy

Detroit Free Press, November 5, 2015

LANSING — There are already at least three investigations into the Flint water crisis — one by a task force appointed by Gov. Rick Snyder, another by the U.S. Environmental Protection Agency and a third by the state's auditor general.

But Senate Minority Leader Jim Ananich, D-Flint, would like a another investigation into the crisis that began when the City of Flint switched its water source from the Detroit water and sewerage system to water from the Flint River.

Experts says Michigan officials changed a Flint lead report to avoid federal action

Michigan Radio, November 5, 2015

The Environmental Protection Agency says it's conducting a full review of what happened in Flint.

For more than a year, state officials assured city residents their water was safe. Those assurances turned out to be wrong.

And it wasn't until some residents got outside experts involved -- who not only found elevated lead levels in the drinking water, but that blood lead levels were also rising in Flint kids – that the state admitted there was a problem.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

State of Michigan retains National Emergency Management accreditation

WNMU FM, November 5, 2015

LANSING, MI - Governor Rick Snyder has announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program or EMAP. The national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.

To achieve reaccreditation, Michigan was required to document how the state's emergency preparedness and response system meets 64 national standards.

Still time to prepare for winter hazards

Boyne City Gazette, November 6, 2015

It won't take anything as extreme as a zombie apocalypse or asteroid slamming into Earth to create havoc with your daily life.

Facts are that a simple power outage in wintertime can suddenly leave you and your family without heat, light, water and other life-sustaining necessities.

With winter weather rapidly approaching, the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) is encouraging Michiganders to make winter emergency preparedness a priority.

MICHIGAN POLITICS

What it may cost you for better Michigan roads

WZZM 13, November 4, 2015

LANSING, Mich. (AP) - Republicans call it a monumental plan that will finally patch deteriorating roads and make transportation funding a long-term budget priority after years of neglect.

Democrats say the legislation that Gov. Rick Snyder will sign is a sham that puts at risk other government services and, despite raising taxes and fees, does not pump enough money into infrastructure for five years.

Mich. lawmakers want Canada nuke waste facility blocked

Detroit News, November 5, 2015

Washington — Twelve members of Michigan's congressional delegation have written to the new Canadian prime minister urging him to block plans for an underground storage facility for nuclear waste near Lake Huron in Ontario.

The majority of Michigan's 16 congressional members want Prime Minister Justin Trudeau, who was sworn in Wednesday, not to issue construction permits for the project by Ontario Power Generation to

construct a deep geologic repository near Kincardine, three-quarters of a mile from the shore of the lake. The facility would hold low- to intermediate-level nuclear waste for hundreds of years.

Snyder signs Michigan teacher evaluation overhaul into law

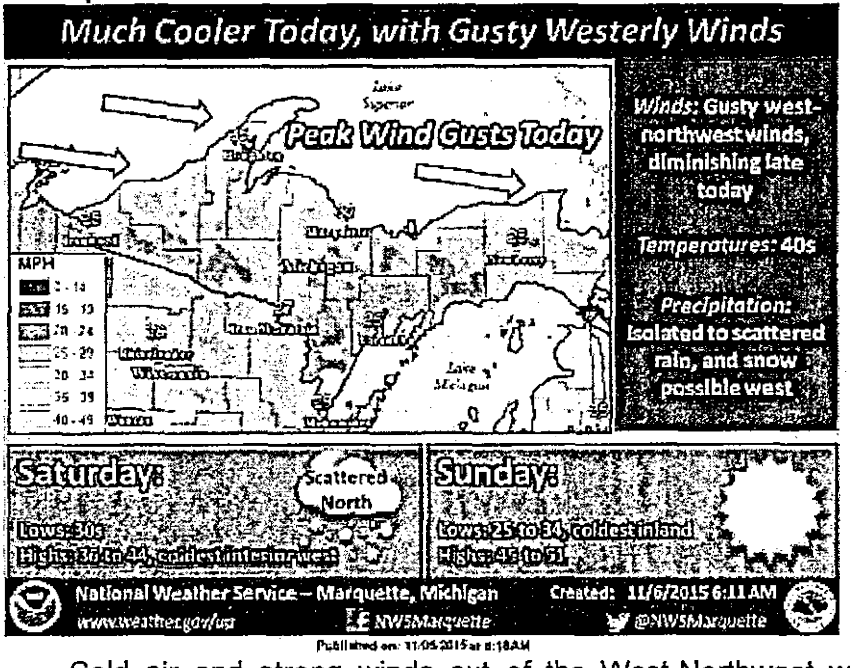
MLive, November 5, 2015

LANSING, MI — Michigan school districts will have new rules for evaluating teacher performance under a new law signed Thursday by Gov. Rick Snyder.

The law modifies teacher evaluation requirements that had been scheduled to take effect this school year, de-emphasizing student test scores and allowing districts more flexibility to choose their own evaluation tools.

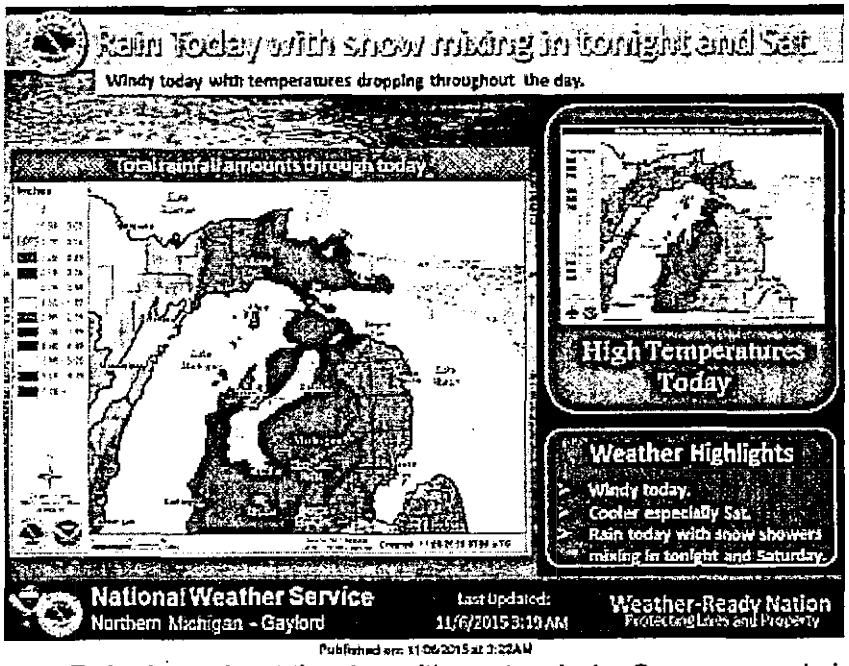
NATIONAL WEATHER SERVICE FORECASTS

Marquette



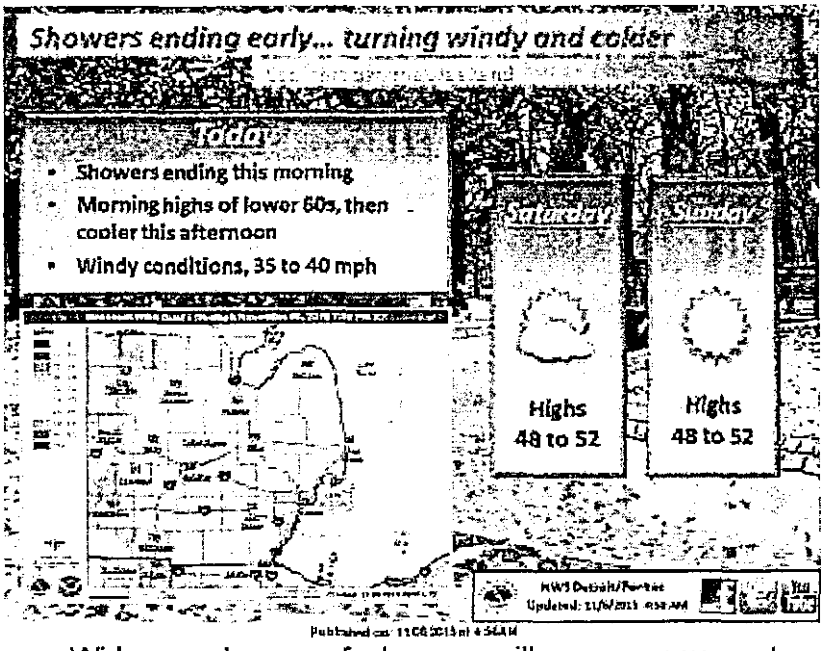
Cold air and strong winds out of the West-Northwest will be the theme today, behind exiting low pressure across James Bay and Northern Quebec. Temperatures will hover mainly in the 40s today, which believe it or not is more typical for early November. While winds will slowly diminish later today, the potential for rain or even snow will be on the increase tonight across the West-Northwest wind favored snowbelts (basically from Ontonagon up through the Keweenaw Peninsula, and again along Lake Superior east of Munising). Look for a cool day Saturday, with temperatures topping out in the mid 30s to mid 40s and lingering snow showers along Lake Superior. High pressure will slowly build into the region to close out the weekend, resulting in temperatures rebounding back into the 40s to around 50 degrees Sunday.

Gaylord



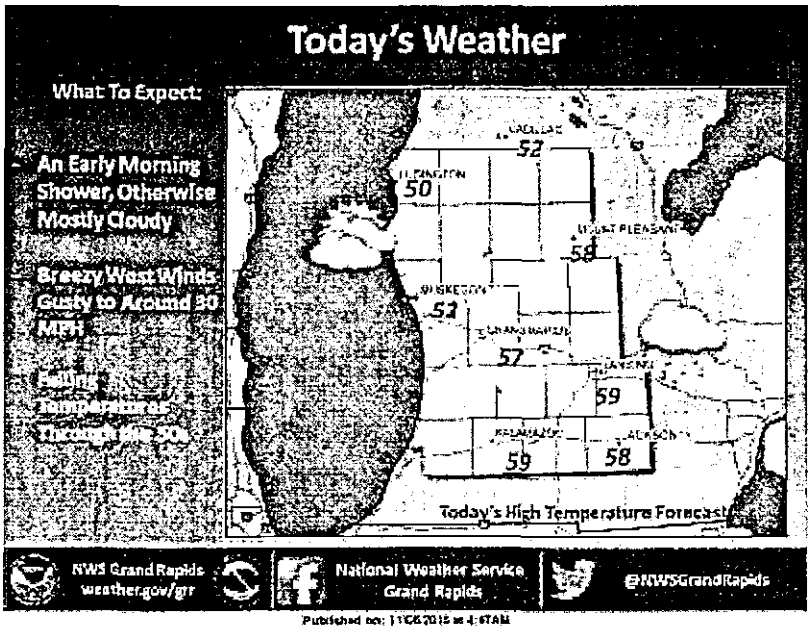
Rain throughout the day with gusty winds. Snow may mix in late tonight and Saturday.

Detroit



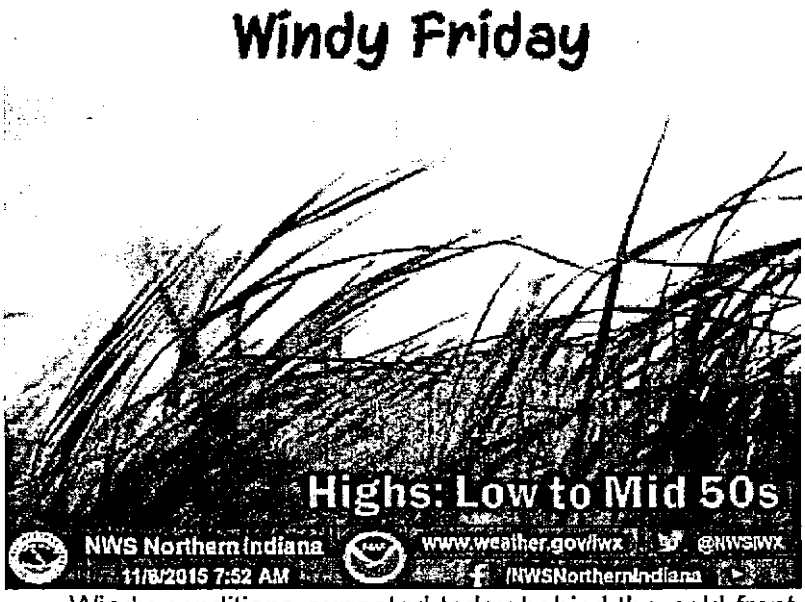
Widespread area of showers will accompany a strong cold front across southeast Michigan this morning. Morning temperatures in the 60s, before falling during the afternoon as colder air works in. Turning windy, with gusts of 35 to 40 mph. Cooler weather for the upcoming weekend.

Grand Rapids



After early morning showers, it will be windy, mostly cloudy and cooler the rest of the day.

Northern Indiana



Windy conditions expected today behind the cold front which moved through overnight. Some clearing is anticipated throughout the day with highs in the low to mid 50s.

Governor Rick Snyder
November 3 at 8:15pm ·

BREAKING: Gov. Rick Snyder issued the following statement after the state House and Senate approved a comprehensive plan to address Michigan's infrastructure challenges.

"The state House and Senate today approved a fiscally responsible, comprehensive transportation plan that provides a long-term solution with new revenue that also provides long-term tax relief. This is the largest investment in Michigan roads and bridges in more than half a century, making them safer for Mich...iganders long into the future.

"I commend my partners in the Legislature for their resolve and their willingness to compromise. These are difficult decisions. If left unaddressed, our infrastructure problems would have grown more expensive to fix, there would have been greater damage to our vehicles and, more importantly, more drivers left to face unsafe conditions.

"The plan approved today includes new revenue generated by people and businesses using the roads -- including non-residents. It helps with public transportation that is vital for many to get to work and school. And it's good for our economy, strengthening the network of local, state and federal roads that is vital for

all of our job-creators. It also allows us to continue investing in our core priorities that help Michiganders and fuel our state's comeback.

"This plan also shows people around the country and around the world that Michiganders face our toughest problems and solve them. Preserving our roads and bridges has been a priority, and is another important step we've taken to make our state a better place to live and work."

The solution to improve Michigan's roads and bridges
Governor Snyder has announced a sustainable, long-term solution to improve Michigan's roads and bridges, making them safer for Michigan's families.

Grand Traverse County Emergency Management
23 hrs ·

In preparation for the winter weather that will come in the months ahead, the Michigan Committee for Severe Weather Awareness advises you to take the time now to prepare your household for the unexpected.

Winter storms often cause power outages and loss of heat for periods of hours, or even days. Impassable roads and the loss of telephone service can further isolate your family.

Ensure you have a well stocked home emergency kit. Items you should have on hand to cope with such... crises are high energy food, such as dried fruit, nuts or other high protein snacks, and food requiring no cooling or refrigeration. Extra medicine and baby items should also be stocked, along with first aid supplies. You would also want bottled water. Do not forget extra batteries for flashlights and portable radios. Your information sources should include a NOAA All-Hazards Weather Radio, for receipt of warning and advisory information in addition to continuous broadcast of current conditions and forecasts.

Home emergency kit

An emergency heating source, such as a fireplace, wood stove, space heater, or a generator can be a lifesaver, but can also turn deadly. These must be used with adequate ventilation, and all precautions should be taken to prevent fires or carbon monoxide poisoning. Smoke detectors, fire extinguishers, and carbon monoxide detectors are valuable equipment that can prevent tragedy. When the temperatures drop, limit the potential for frozen pipes by trickling warm water through faucets of an outside wall and open cabinet doors.

For more information on safety kits and home preparedness, please visit the Michigan Weather Preparedness Page.

MEDIA MONITORING REPORT

11/06/2015

Issues:

- No issues to report.

Summary:

- Flint residents should be warned of the potential risk of increased lead in drinking water when crews do underground work that could affect pipes, according to a report from the U.S. Environmental Protection Agency.
- Local health officials and the federal government are warning Flint residents that the danger from their tap water has not subsided even though the city has reconnected to Detroit's water system.
- People in Flint have been drinking water that tests have shown is laced with lead and detrimental health effects are already happening, WXYZ reports.
- Michigan Radio posted an article on how Flint's water crisis helped passed the road funding plan.
- Genesee County agencies are set to give Flint residents replacement cartridges for filters distributed in the city to prevent lead from getting into drinking water.
- Senate Minority Leader Jim Ananich, D-Flint, would like an investigation into the crisis that began when the City of Flint switched its water source from the Detroit water and sewerage system to water from the Flint River.
- Michigan Radio reports that MDEQ knowingly dropped lead test samples to avoid exceeding a federal drinking water standard.
- Governor Rick Snyder has announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program or EMAP.
- The Michigan State Police, Emergency Management and Homeland Security Division is encouraging Michiganders to make winter emergency preparedness a priority.
- WZZM reports on what it the new road funding bill may cost Michigan citizens.
- Twelve members of Michigan's congressional delegation have written to the new Canadian prime minister urging him to block plans for an underground storage facility for nuclear waste near Lake Huron in Ontario.
- Michigan school districts will have new rules for evaluating teacher performance under a new law signed Thursday by Gov. Rick Snyder.
- National Weather Service forecast updates.
- TV clips: Tracing dangerous decisions in the Flint water emergency.

Analysis:

- Media coverage is neutral and negative.
- The EPA's report on the Flint water situation was released Wednesday, warning Flint residents that there are still potential health risks still after switching back to Detroit water.
- Michigan Senate Minority Leader Jim Ananich continues to call for an investigation in to the Flint water situation.
- Michigan Radio reported that the Michigan Dept. of Environmental Quality knowingly dropped lead test samples to avoid exceeding a federal drinking water standard.
- Will continue to monitor the situation.

- WNMU FM reported that Governor Rick Snyder has announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program.

FLINT WATER

EPA report warns of more potential Flint water problems

The Oakland Press, November 5, 2015

FLINT (AP) >> Flint residents should be warned of the potential risk of increased lead in drinking water when crews do underground work that could affect pipes, according to a report from the U.S. Environmental Protection Agency.

The recommendation was included in an EPA report released Wednesday about high lead levels in drinking water at three homes. The EPA said the report is being sent to the National Drinking Water Advisory Council for discussion next month, The Flint Journal reported.

Experts: Water health dangers don't subside in Fling

Detroit News, November 5, 2015

Local health officials and the federal government are warning Flint residents that the danger from their tap water has not subsided even though the city has reconnected to Detroit's water system.

Dr. Mona Hanna-Attisha, the Hurley Medical Center pediatrician who uncovered lead exposure in city children two months ago, wants residents to continue their use of bottled water. This comes three weeks after Flint began receiving its drinking water from the Detroit Water and Sewerage Department.

How did the Flint water crisis begin and what will it mean for families who drank the water?

WXYZ, November 5, 2015

(WXYZ) - The evidence is overwhelming - state and federal officials failed to protect something we all take for granted: tap water.

People in Flint have been drinking water that tests have shown is laced with lead snd detrimental health effects are already happening.

It could have been prevented.

How flint's water crisis pushed road funding plan ahead

Michigan Radio, November 6, 2015

I heard from several puzzled people yesterday, after Governor Rick Snyder proclaimed he would sign the road fund package the legislature narrowly passed on election night.

"I don't get it," one man said. "I thought the governor said that cutting the general fund by $600 million a year was too much." Well, yes, he did say that.

A similar road funding approach fell apart barely two months ago, because the governor said he couldn't support cuts that deep. Snyder's press secretary, Sara Wurfel, said he was worried about "jeopardizing the state's financial stability and comeback."

County agencies prepare to distribute water filter replacement cartridges in Flint

MLive, November 5, 2015

FLINT, MI — Genesee County agencies are set to give Flint residents replacement cartridges for filters distributed in the city to preventlead from getting into drinking water.

The Genesee County Health Department issued a news release reminding city residents water filters will need to be changed soon.

Flint lawmaker wants hearings on water controversy

Detroit Free Press, November 5, 2015

LANSING — There are already at least three investigations into the Flint water crisis — one by a task force appointed by Gov. Rick Snyder, another by the U.S. Environmental Protection Agency and a third by the state's auditor general.

But Senate Minority Leader Jim Ananich, D-Flint, would like a another investigation into the crisis that began when the City of Flint switched its water source from the Detroit water and sewerage system to water from the Flint River.

Experts says Michigan officials changed a Flint lead report to avoid federal action

Michigan Radio, November 5, 2015

The Environmental Protection Agency says it's conducting a full review of what happened in Flint.

For more than a year, state officials assured city residents their water was safe. Those assurances turned out to be wrong.

And it wasn't until some residents got outside experts involved -- who not only found elevated lead levels in the drinking water, but that blood lead levels were also rising in Flint kids – that the state admitted there was a problem.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

State of Michigan retains National Emergency Management accreditation

WNMU FM, November 5, 2015

LANSING, MI - Governor Rick Snyder has announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program or EMAP. The national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.

To achieve reaccreditation, Michigan was required to document how the state's emergency preparedness and response system meets 64 national standards.

Still time to prepare for winter hazards

Boyne City Gazette, November 6, 2015

It won't take anything as extreme as a zombie apocalypse or asteroid slamming into Earth to create havoc with your daily life.

Facts are that a simple power outage in wintertime can suddenly leave you and your family without heat, light, water and other life-sustaining necessities.

With winter weather rapidly approaching, the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) is encouraging Michiganders to make winter emergency preparedness a priority.

MICHIGAN POLITICS

What it may cost you for better Michigan roads

WZZM 13, November 4, 2015

LANSING, Mich. (AP) - Republicans call it a monumental plan that will finally patch deteriorating roads and make transportation funding a long-term budget priority after years of neglect.

Democrats say the legislation that Gov. Rick Snyder will sign is a sham that puts at risk other government services and, despite raising taxes and fees, does not pump enough money into infrastructure for five years.

Mich. lawmakers want Canada nuke waste facility blocked

Detroit News, November 5, 2015

Washington — Twelve members of Michigan's congressional delegation have written to the new Canadian prime minister urging him to block plans for an underground storage facility for nuclear waste near Lake Huron in Ontario.

The majority of Michigan's 16 congressional members want Prime Minister Justin Trudeau, who was sworn in Wednesday, not to issue construction permits for the project by Ontario Power Generation to construct a deep geologic repository near Kincardine, three-quarters of a mile from the shore of the lake. The facility would hold low- to intermediate-level nuclear waste for hundreds of years.

Snyder signs Michigan teacher evaluation overhaul into law

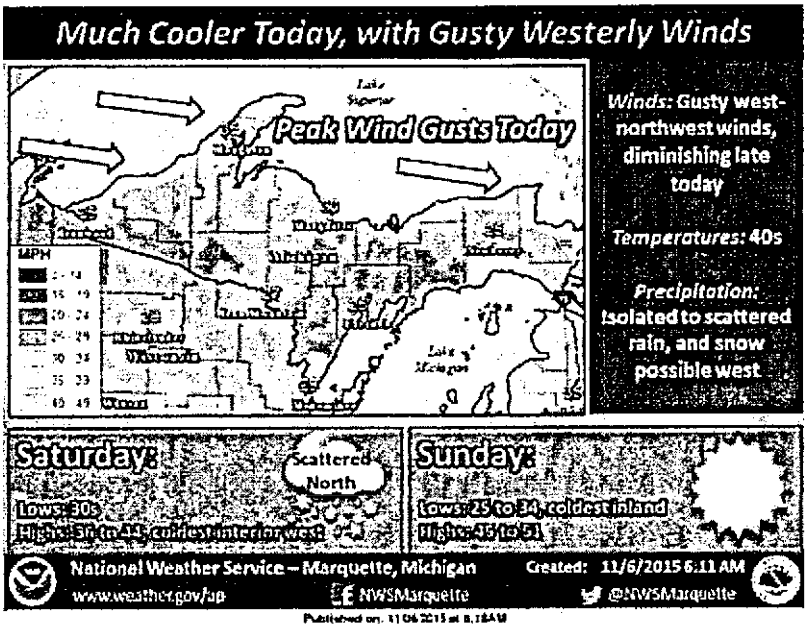
MLive, November 5, 2015

LANSING, MI — Michigan school districts will have new rules for evaluating teacher performance under a new law signed Thursday by Gov. Rick Snyder.

The law modifies teacher evaluation requirements that had been scheduled to take effect this school year, de-emphasizing student test scores and allowing districts more flexibility to choose their own evaluation tools.

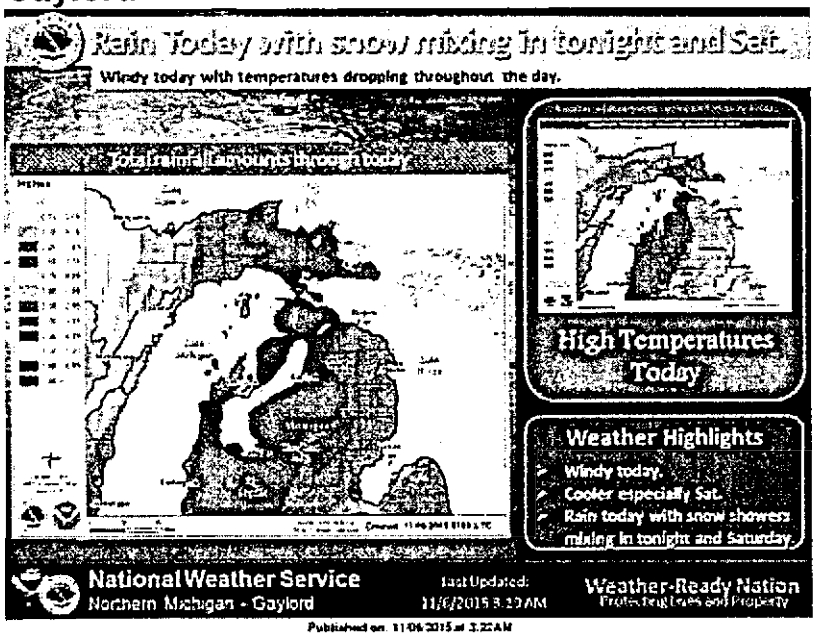
NATIONAL WEATHER SERVICE FORECASTS

Marquette



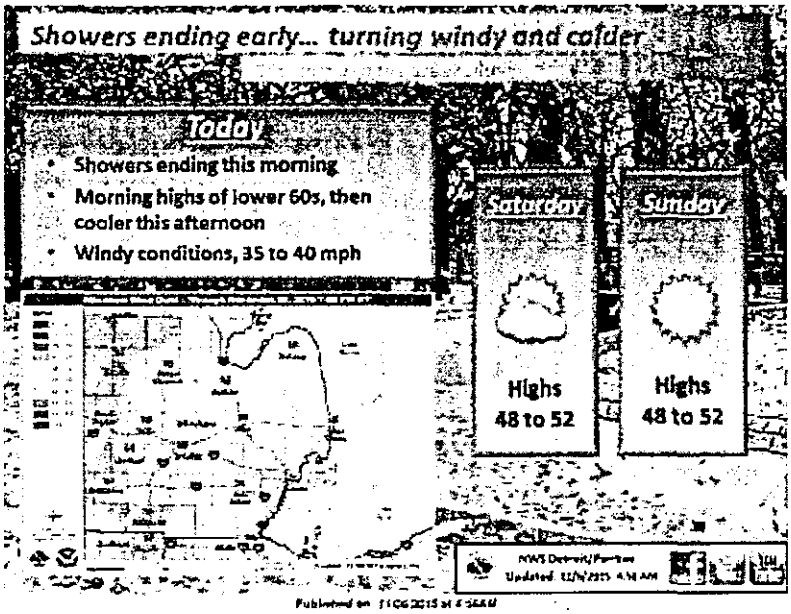
Cold air and strong winds out of the West-Northwest will be the theme today, behind exiting low pressure across James Bay and Northern Quebec. Temperatures will hover mainly in the 40s today, which believe it or not is more typical for early November. While winds will slowly diminish later today, the potential for rain or even snow will be on the increase tonight across the West-Northwest wind favored snowbelts (basically from Ontonagon up through the Keweenaw Peninsula, and again along Lake Superior east of Munising). Look for a cool day Saturday, with temperatures topping out in the mid 30s to mid 40s and lingering snow showers along Lake Superior. High pressure will slowly build into the region to close out the weekend, resulting in temperatures rebounding back into the 40s to around 50 degrees Sunday.

Gaylord



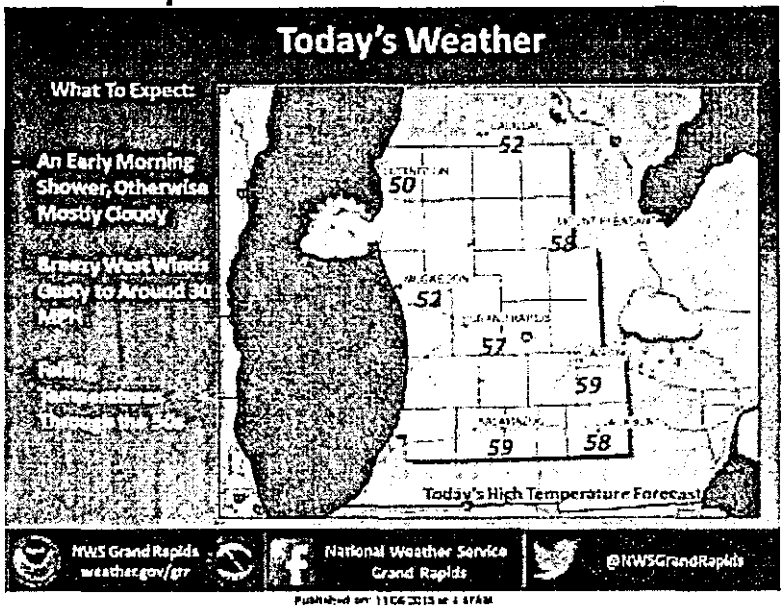
Rain throughout the day with gusty winds. Snow may mix in late tonight and Saturday.

Detroit



Widespread area of showers will accompany a strong cold front across southeast Michigan this morning. Morning temperatures in the 60s, before falling during the afternoon as colder air works in. Turning windy, with gusts of 35 to 40 mph. Cooler weather for the upcoming weekend.

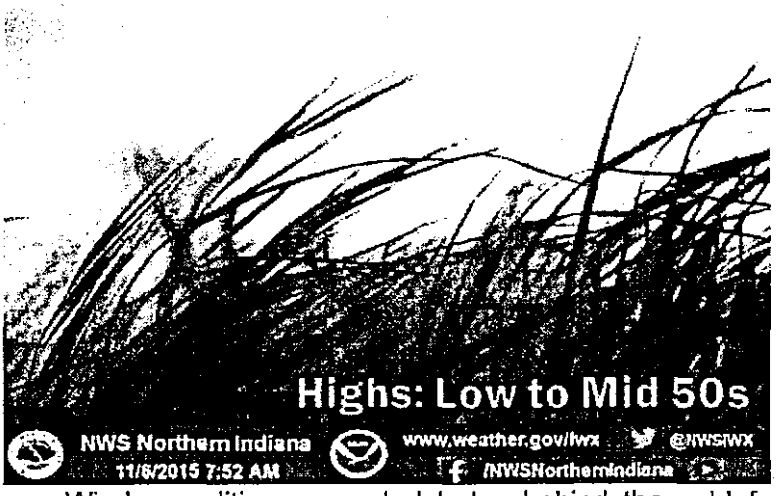
Grand Rapids



After early morning showers, it will be windy, mostly cloudy and cooler the rest of the day.

Northern Indiana

Windy Friday



Windy conditions expected today behind the cold front which moved through overnight. Some clearing is anticipated throughout the day with highs in the low to mid 50s.

FLINT WATER

Federal agency conducting review of Flint water supply

Detroit News, November 4, 2015

Flint — The U.S. Environmental Protection Agency is expected to release results of its review of the troubled municipal water supply in Flint by the end of this week.

Regional administrator Susan Hedman of the Environmental Protection Agency said in a letter Tuesday to U.S. Rep Dan Kildee of Flint that she was asked by the head of the federal agency to carry out the review that the lawmaker requested last month. The Flint Journal reports that Kildee asked for a review of the agency's oversight of state programs assuring safe drinking water in Flint.

U.S. EPA will conduct 'full review' of Flint Water crisis

MLive, November 3, 2015

FLINT, MI – Flint's water crisis is getting a review by the U.S. Environmental Protection Agency, and the results are expected to be known by the end of this week.

EPA Regional Administrator Susan Hedman said in a letter today, Nov. 3, to U.S. Rep Dan Kildee, D-Flint, that she has been asked by the head of the EPA to carry out the review that the congressman requested last month.

Voters outs Flint Mayor amid City's water problems

ABC News, November 3, 2015

Voters have ousted the mayor of Flint, Michigan, amid a fallout over the city's drinking water problems.

Newcomer Karen Weaver beat incumbent Dayne Walling in Tuesday's election. Walling led the city amid the public health emergency.

Flint switched from nearby Detroit's system to water from the Flint River last year in a cost-cutting move. Officials recently confirmed elevated blood-lead levels were found in children.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Michigan State Police prep residents with weather hazard tips

The News Herald, November 4, 2015

Kicking off Winter Hazards Awareness Week from Nov. 1 to 7, the Michigan State Police and Downriver emergency management teams are encouraging residents to take extra precautions to ensure safety as temperatures begin to drop.

All residents are advised to "winterize" their vehicles in the fall by having an automotive professional check the equipment to make sure it is all running properly, in addition to checking tire treads and filling up on windshield washing solution.

New act requires Michigan State Police to notify public about suspects who injure or kill police

MI News 26, November 3, 2015

A statewide initiative aimed at making it easier for police to notify the public about suspects who injure or kill law enforcement officers has been signed into law by Governor Snyder.

Called the Michigan Blue Alert Act, it tasks the Michigan State Police with creating and maintaining a system for rapidly broadcasting information regarding a suspect who is believed to have harmed or killed a law enforcement officer.

This act was authored by state Senator Tonya Schuitmaker and is based on a federal program with a similar goal called the National Blue Alert Act, which was signed into law by President Obama earlier this year.

The Michigan Blue Alert Act is now Public Act 167 of 2015.

California Agencies warn homeless riverbed dwellers to seek shelter ahead of El Nino

Emergency Management, November 3, 2015

(TNS) - The nine homeless men living inside a concrete storm drain in Orange County, Calif., believe they are ready for the floods likely to come raging through if El Niño brings the deluges forecasted to arrive about a month from now.

"I ain't afraid of El Niño — I think I can whip it!" said Bill "Tattoo" LeBlanc, 74, who has lived in the tunnel for 20 years.

LeBlanc and his homeless friends are among hundreds of people living in or near storm channels across Southern California who believe they can handle whatever nature throws at them this winter.

36 lawmakers request $16.1 million to fund earthquake early warning system

Emergency Management, October 30, 2015

(TNS) — WASHINGTON — Thirty-six members of Congress from Western states asked President Barack Obama on Wednesday for $16.1 million to complete an earthquake early-warning system being developed by scientists in Southern California and along the West Coast.

Reps. Adam Schiff, D-Calif., and Derek Kilmer, D-Wash., led the members in a letter to Obama asking him to include the funding in the U.S. Geological Survey's fiscal 2017 budget.

"Bottom line is, we want to get this done before we have a major quake. We don't want to be kicking ourselves afterward because we could have saved lives and a lot of property if we had been able to get people some advance notice of the earthquake," Schiff said.

MICHIGAN POLITICS

Karen Weaver unseats Dayne Walling to win Flint mayor

MLive, November 4, 2015

FLINT, MI -- Challenger Karen Weaver has knocked off incumbent Dayne Walling to become the first woman elected as mayor of Flint.

With only one precinct left to report results, Weaver -- a clinical psychologist and small business owner -- had 7,699 votes compared to Walling's 5,919, according to unofficial results from the Genesee County Clerk's Office.

State police retirees from decades ago to get financial help

9 and 10 News, November 3, 2015

LANSING, Mich. (AP) - Gov. Rick Snyder has a signed a law to ensure that certain Michigan State Police retirees get at least $16,000 a year.

The bill affects about 100 people, or their beneficiaries, who retired from the state police before October 1986 and collect less than $16,000.

Michigan Republicans forced out of state legislature over extramarital affair lose GOP primary races

Raw Story, November 4, 2015

Two former Michigan representatives forced out of the state legislature for their extramarital affair and its subsequent cover-up lost their respective bids to regain their seats in a special Republican primary on Tuesday, results showed.

Cindy Gamrat, who was removed from her Allegan County seat, and Todd Courser, who resigned from his seat in Lapeer County to avoid being expelled, both filed their candidacies a week after their seats were vacated in September.

Road funding bills pass Michigan House, Senate finally

Detroit Free Press, November 4, 2015

LANSING — Michigan motorists would typically pay about $20 more for their vehicle registration fees and spend about $1.17 more for a 15-gallon fill-up under fee and tax increases passed by the Michigan Senate and House of Representatives Tuesday, as part of a $1.2-billion road-funding plan.

Gov. Rick Snyder is expected to sign the bills into law.

"If you look back in history, this is the largest investment in transportation over the last 50 years in terms of revenues coming in for roads. This will lead to safer and better roads in our state and it does it in a fiscally responsible way," Snyder said. "There is some time that it takes to review all bills but I'm ready, So as soon as they're prepared, I'm ready to sign them."

Michigan road funding bill: How we got to a bad deal

Detroit Free Press, November 4, 2015

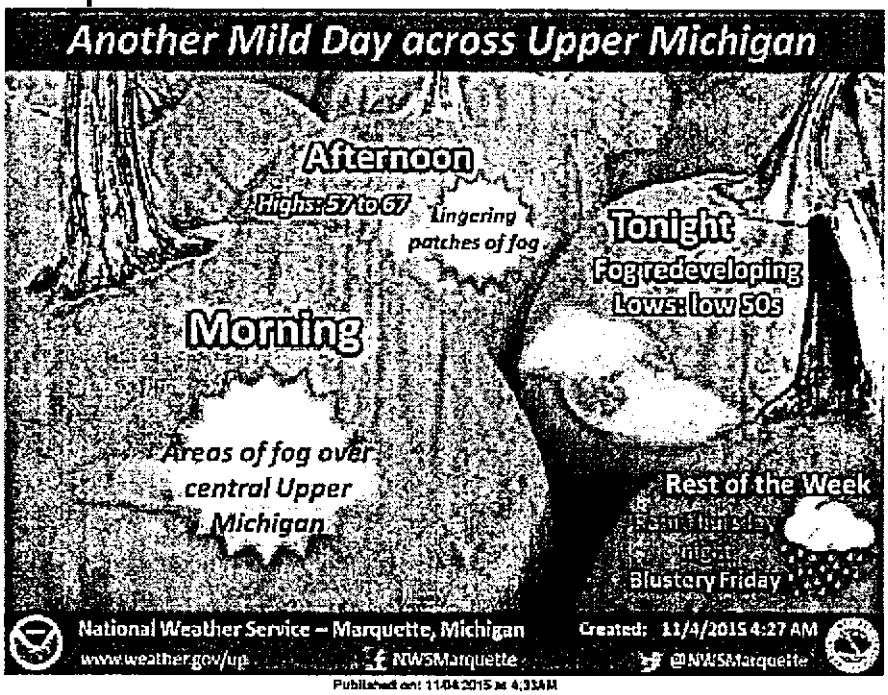
"When we elect politicians who hate the government we end up with a government that we hate."

A friend shared that pithy one-liner with me a few weeks ago and it sums up pretty well what's happening in Lansing. Tuesday night we got a prime example of the kind of chicanery posing as policymaking that drives people crazy. The Republicans forced through by the narrowest of margins a road-funding package that fails to invest adequately in transportation but somehow manages to jeopardize large chunks of the rest of state and local government, while offering windfall tax cuts to the wealthy.

The package provides less than a half of the $1 billion per year that the MDOT director says he needs just to fix the state's trunkline roads. Even worse, the plan waits five years to achieve even that anemic level of investment.

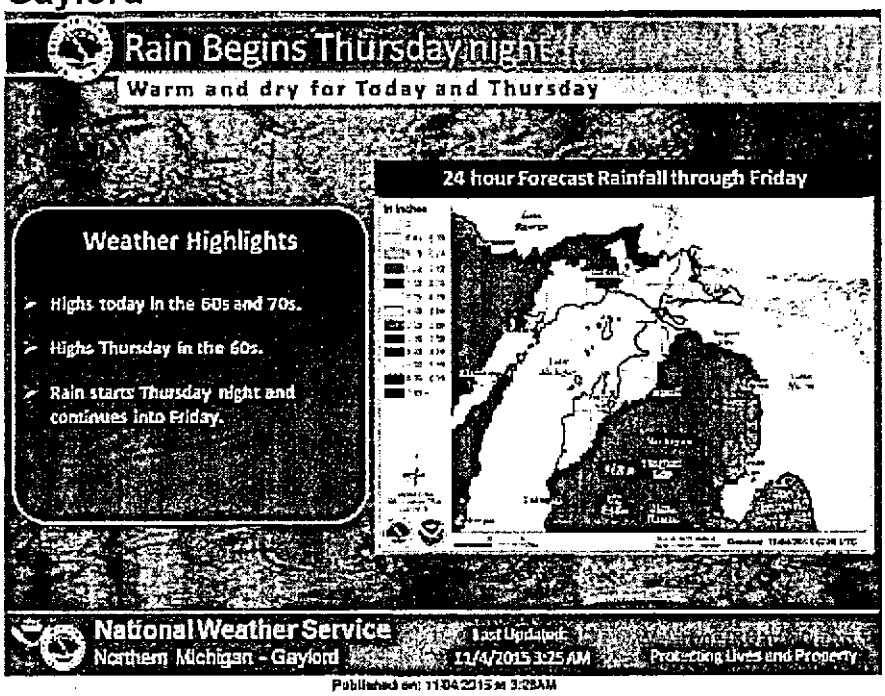
NATIONAL WEATHER SERVICE FORECASTS

Marquette



Expect another mild day across Upper Michigan, with lingering fog over mainly central Upper Michigan. Thursday will be our day of change as we transition back to a wetter and more seasonal temperature pattern. Rain showers and drizzle will arrive Thursday afternoon as low pressure exits from Minnesota to central Ontario. Steady rain, and possibly even a rumble of thunder, will be the rule Thursday night. Look for blustery west winds Friday as temperatures top out back in the 40s to near 50 degrees.

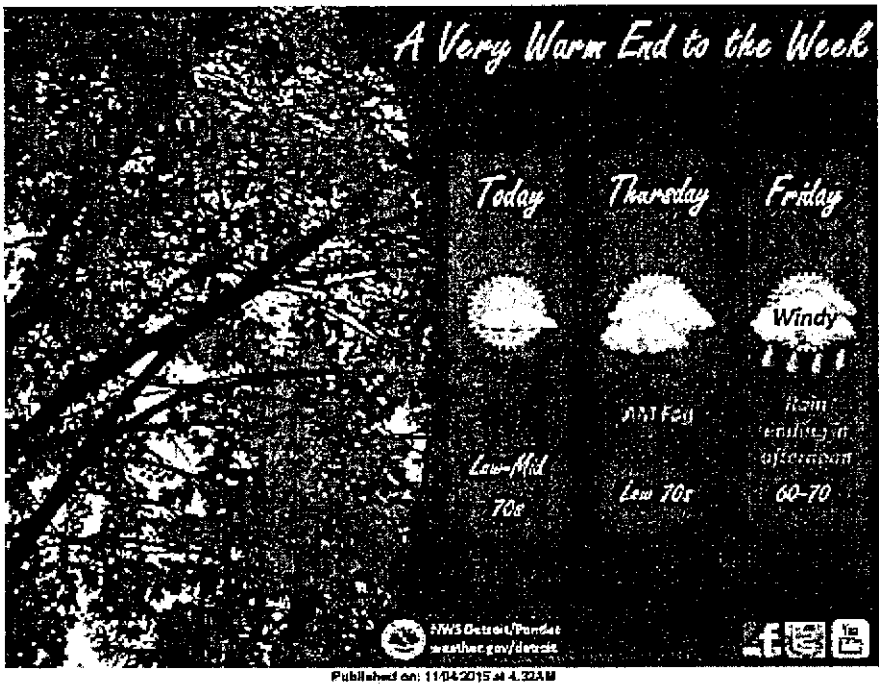
Gaylord



Published on: 11/04/2015 at 3:28AM

It will be warm today and Thursday, before the rain moves in Thursday night. The rain will continue into Friday.

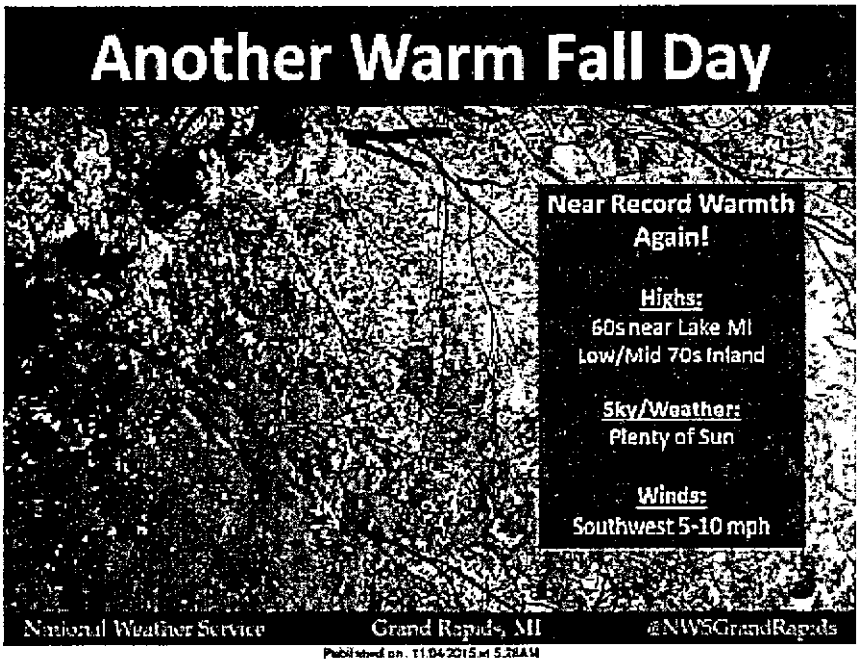
Detroit



Published on: 11/04/2015 at 4:32AM

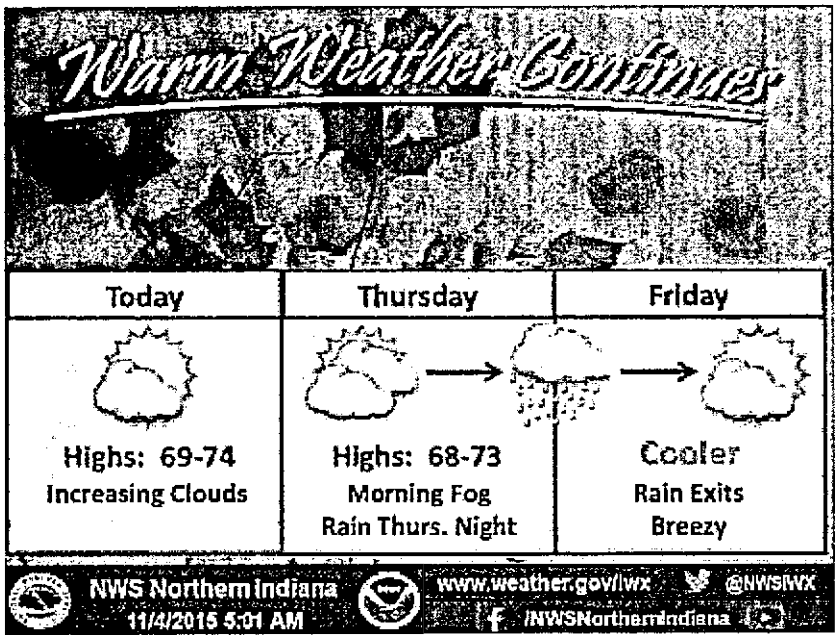
High pressure over the Eastern Great Lakes will keep quiet weather and unseasonably warm temperatures over the area through Thursday. An area of low pressure will track through Michigan late Thursday night and Friday, bringing rain and gusty winds to the area.

Grand Rapids



We are expecting another warm one today with plenty of sunshine. High temperatures should range from the mid to upper 60s along Lake Michigan to the low to mid 70s inland. There is some concern that we could see some low clouds move in today, but the forecast at this point is calling for plenty of sunshine.

Northern Indiana



Unusually warm weather will persist through tomorrow before a cold front brings cooler temperatures late Friday and into the weekend. This front will also bring widespread rain Thursday night and gusty winds Friday morning. Until then, expect increasing clouds and possibly some fog Thursday morning.

Governor Rick Snyder
9 hrs ·

BREAKING: Gov. Rick Snyder issued the following statement after the state House and Senate approved a comprehensive plan to address Michigan's infrastructure challenges.

"The state House and Senate today approved a fiscally responsible, comprehensive transportation plan that provides a long-term solution with new revenue that also provides long-term tax relief. This is the largest investment in Michigan roads and bridges in more than half a century, making them safer for Mich...iganders long into the future.

"I commend my partners in the Legislature for their resolve and their willingness to compromise. These are difficult decisions. If left unaddressed, our infrastructure problems would have grown more expensive to fix, there would have been greater damage to our vehicles and, more importantly, more drivers left to face unsafe conditions.

"The plan approved today includes new revenue generated by people and businesses using the roads -- including non-residents. It helps with public transportation that is vital for many to get to work and school. And it's good for our economy, strengthening the network of local, state and federal roads that is vital for all of our job-creators. It also allows us to continue investing in our core priorities that help Michiganders and fuel our state's comeback.

"This plan also shows people around the country and around the world that Michiganders face our toughest problems and solve them. Preserving our roads and bridges has been a priority, and is another important step we've taken to make our state a better place to live and work."

The solution to improve Michigan's roads and bridges
Governor Snyder has announced a sustainable, long-term solution to improve Michigan's roads and bridges, making them safer for Michigan's families.

MEDIA MONITORING REPORT

11/3/2015

Issues:

- No issues to report.

Summary:

- Former Flint Emergency Manager Darnell Earley is receiving criticism for his actions with the Flint water situation now as the EM for Detroit Public Schools, while he is seeking legislative support for what critics call a bailout for DPS, according to a MLive report.
- Health officials say they have new guidelines for Flint families dealing with the emergency with the city's water supply.
- Voters are selecting a mayor for Flint, which has been dealing with fallout from drinking water problems.
- The Federal Emergency Management Agency awarded $250 million in disaster assistance to more than 29,000 superstorm Sandy victims who may have received duplicate payouts from private insurance in violation of federal law.
- Emergency Management Magazine posted an article on how mobile devices are an ideal way to disseminate fully customizable information regarding emergencies at K-12 school districts or on university campuses.
- Emergency Management Magazine posted an article questioning on if the Stafford Act, FEMA, the Incident Command System (ICS) can be adjusted to perform at higher standards.
- Michigan Radio covers Election Day and what is going to be on Michigan ballots.
- Michigan lawmakers want to pass HB 4867 which would prohibit the flying of an unmanned aerial vehicle within 1,500 feet of Michigan prisons.
- Michigan Gov. Rick Snyder is optimistic that the Republican-led Legislature will settle on a "common sense" road funding plan, perhaps as soon as this week.
- The Michigan Legislature may not have been able to get a package of bills passed yet to fix the roads, but in the last four months, they've passed more than 70 bills that were signed into law by Gov. Rick Snyder.
- National Weather Service forecast updates.
- TV clips: It's Election Day.

Analysis:

- Media coverage is neutral.

- Coverage continues on Flint water issues.
- WDIV reports that the Genesee County Health Department and the Michigan Department of Health and Human Services plan to send letters to parents this week with information regarding lead testing and how to reduce lead exposure after elevated blood lead levels were found in some Flint children.
- Multiple outlets are reporting on Election Day in Michigan.
- Will continue to monitor the situation.

FLINT WATER

Flint water crisis spills over to Detroit schools plan

MLive, November 3, 2015

Rarely in the rough-and-tumble world of politics do you have one person call the other a liar. Usually they will say, "he was stretching the truth," or "the statement was not quite accurate." Call it honor among thieves, but that's the drill.

So when somebody does it, ears in town perk up.

The former emergency manager in Flint showed up the other day and was immediately grilled on his role in the lead-in-the-water contamination crisis in that city. Darnell Earley offered he had nothing to do with it when the city switched from Detroit to Flint River water.

Flint families to receive new guidelines on reducing lead exposure

9 & 10 News, November 2, 2015

Health officials say they have new guidelines for Flint families dealing with the emergency with the city's water supply.

The Genesee County Health Department and Michigan Department of Health and Human Services will be sending out letters this week on how to reduce lead exposure.

The response comes after elevated blood lead levels were found in some children in Flint.

Voters pick mayor for Flint amid city's water problems

WTOL 11, November 3, 2015

FLINT, Mich. (AP) - Voters are selecting a mayor for Flint, which has been dealing with fallout from drinking water problems.

In Tuesday's election incumbent Dayne Walling, who led Flint amid the public health emergency, faces challenger Karen Weaver, who is seeking her first elected office.

Flint switched from Detroit's system to water drawn from the Flint River last year in a cost-cutting move. Officials recently confirmed that elevated blood-lead levels were found in children. The city reconnected in hopes of resolving the health emergency.

Health officials to issue guidelines on lead exposure to families in Flint

WDIV, November 2, 2015

Flint, Mich. - Health officials have established guidelines for families on how they should respond to ongoing problems with the municipal water supply in Flint.

The Genesee County Health Department and the Michigan Department of Health and Human Services plan to send letters to parents this week with information regarding lead testing and how to reduce lead exposure after elevated blood lead levels were found in some Flint children.

Children can be exposed to lead from drinking water in lead pipes, old lead paint, soil, pottery, cosmetics, toys, some home remedies and adult jobs or hobbies, including auto repair, stained glass and jewelry making.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

FEMA says thousands of Superstorm Sandy victims may have received duplicate payouts

Emergency Management, October 29, 2015

(TNS) - The Federal Emergency Management Agency awarded $250 million in disaster assistance to more than 29,000 superstorm Sandy victims who may have received duplicate payouts from private insurance in violation of federal law.

Many of the cases included payouts for damaged vehicles where both FEMA and car insurers paid claims, according to a report released this month by the inspector general for the Department of Homeland Security, which oversees the agency.

"FEMA needs to solve this insurance verification problem as soon as possible," Inspector General John Roth said in a news release. "Until it does, federal funds invested in disaster relief will continue to be at risk of widespread fraud, waste and abuse."

Apps can play a major role in school emergency response plans

Emergency Management, October 29, 2015

Mobile devices are an ideal way to disseminate fully customizable information regarding emergencies at K-12 school districts or on university campuses. From first aid guides to fire drill and evacuation procedures, mobile apps can present school officials, parents and students with step-by-step instructions, fast reporting capabilities and comprehensive information for maintaining safe schools.

IDC Research reports that 77 percent of smartphone users have their phones on them 22 hours a day. As this number continues to increase, administrators must integrate mobile with their emergency response plans to give greater access to faculty, staff and, in some cases, students.

While a mobile safety platform is critical for accessing crisis response plans and procedures during well-publicized life or death emergencies, ranging from a bomb threat to a hurricane to an active shooter, mobile resources can also be supportive for more common school scenarios. Here are a few examples.

Is 'pretty good' enough?

Emergency Management, October 28, 2015

The question on the table today is whether "pretty good" is good enough when it comes to emergency management. Because some things are pretty good, after all. The Stafford Act, FEMA, the Incident Command System (ICS): They get the job done.

But is that sufficient? There is grumbling throughout much of the emergency management community that each of these pillars of the profession can and should be improved upon.

They're poorly structured, top heavy, fiscally irrational, inflexible — pick your poison. Changes must be made.

Despite the flaws, some say, the system runs as well as one might hope, and why tinker with (moderate) success? So what should and can be changed? How can Stafford, FEMA and ICS be made to perform to higher standards?

MICHIGAN POLITICS

Election Day is tomorrow. Here's what's happening around Michigan.

Michigan Radio, November 2, 2015

There's not much on the ballot in Michigan tomorrow, but what is there is sparking controversy.

There are primaries for three state house seats.

The vacancies came as a result of a retirement, a resignation, and an expulsion.

A sex scandal forced two state lawmakers out of office. Cindy Gamrat and Todd Courser admitted roles in an effort to cover-up their extra-marital affair.

Banning drones from flying near Michigan prisons

Michigan Radio, November 2, 2015

Drones have many uses. But Michigan lawmakers want to discourage one in particular: delivering contraband to state prison inmates.

Across the country in recent months, people trying to smuggle all kinds of things into prisons have turned to drones.

Last week, a drone carrying hacksaw blades, cigars and drugs got tangled up in a razor wire fence at an Oklahoma prison.

Snyder seeks 'fiscally responsible' road funding deal as Michigan senate tries again this week

MLive, November 3, 2015

LANSING, MI — Michigan Gov. Rick Snyder is optimistic that the Republican-led Legislature will settle on a "common sense" road funding plan, perhaps as soon as this week.

The Senate is expected to resume road funding talks on Tuesday. The tentative session agenda does not include key bills, but there's a very real possibility of action.

No roads fix, but more than 70 bills are now Mich. law

Lansing State Journal, November 1, 2015

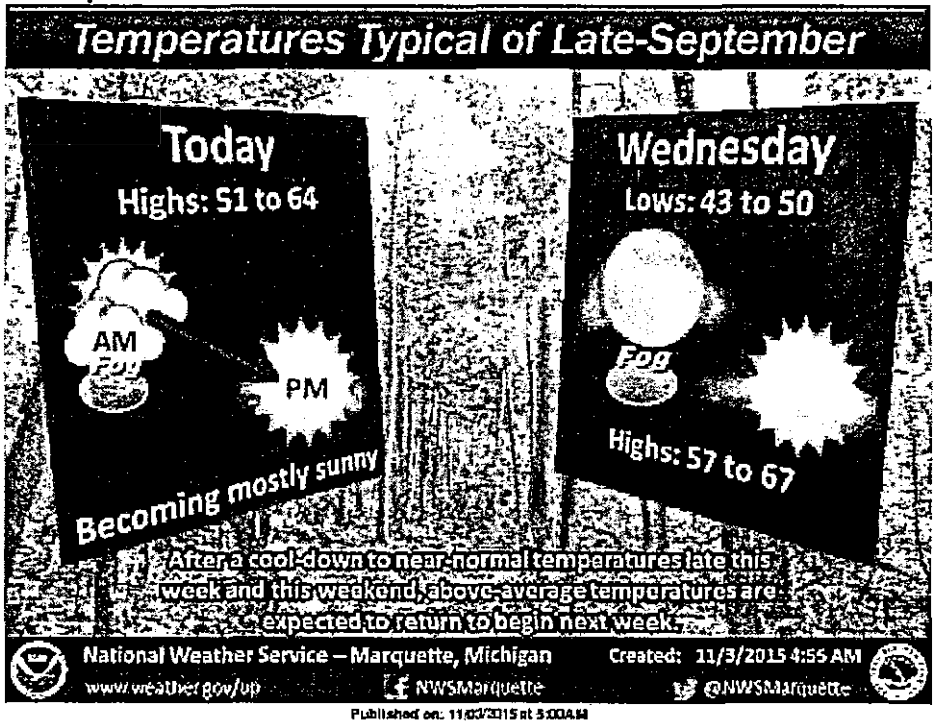
LANSING -- The Michigan Legislature may not have been able to get a package of bills passed yet to fix the roads, but in the last four months, they've passed more than 70 bills that were signed into law by Gov. Rick Snyder.

Some of the most controversial issues that passed the House of Representatives and Senate includedprohibiting communities from passing ordinancesthat would set wages or benefits for employers in their towns.

The Legislature also passed a package of bills that reforms the laws that allow law enforcement to forfeit property of people even if they haven't been charged with a crime.

NATIONAL WEATHER SERVICE FORECASTS

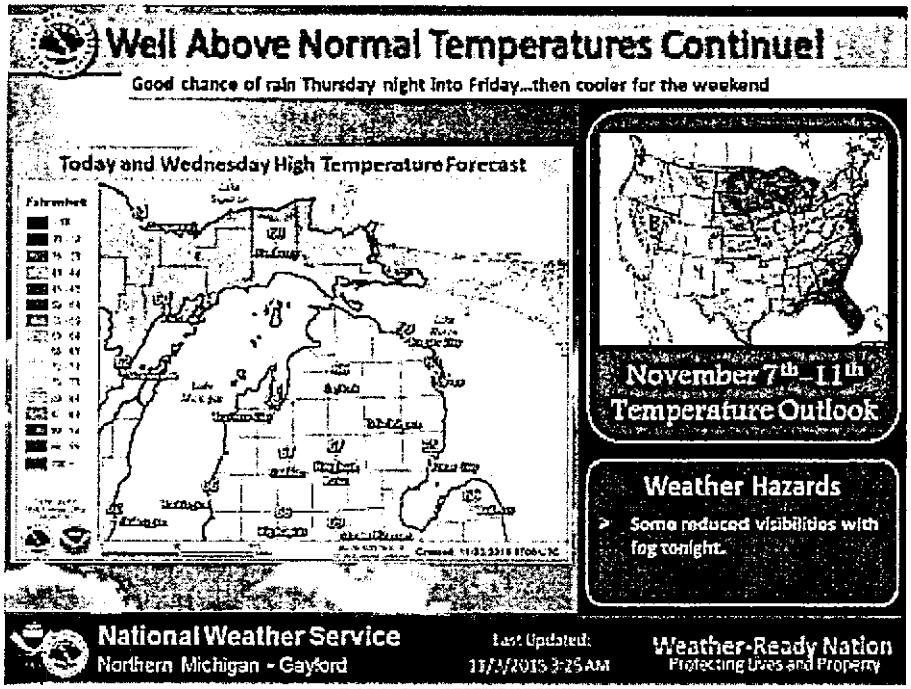
Marquette



Published on: 11/03/2015 at 5:00AM

Some locally dense fog, mainly over the east half of Upper Michigan, will burn off this morning and give way to a mostly sunny and mild afternoon. More fog may develop tonight, once again mainly over the east half. Expect another mostly sunny and unseasonably warm afternoon on Wednesday, with temperatures at some locations across the west surging well into the 60s.

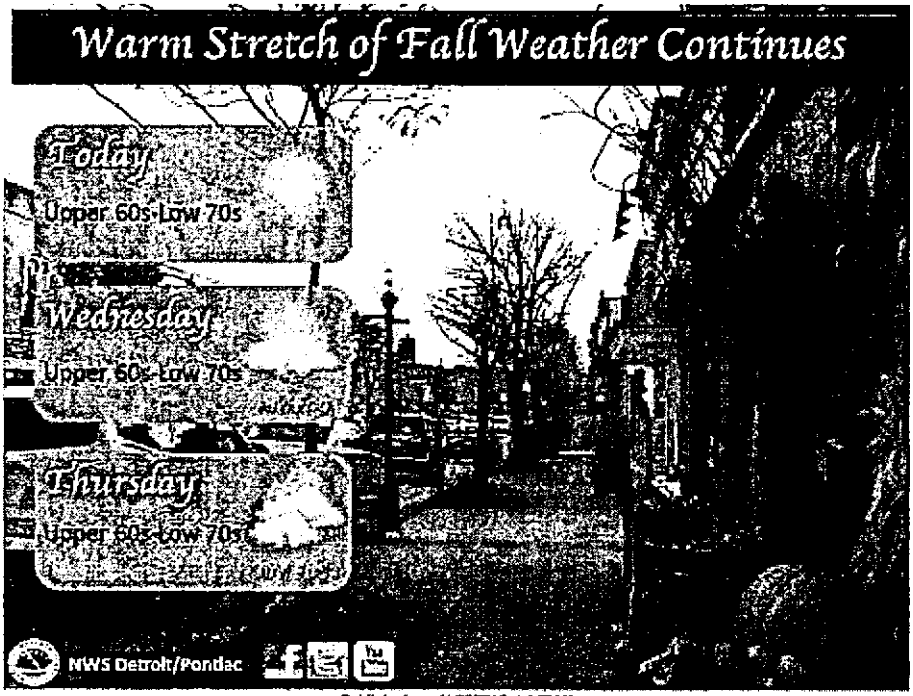
Gaylord



Published on: 11/03/2015 at 3:25AM

Continued well above normal temperatures through Thursday. Rain arrives Thursday night into Friday. Cooler for the weekend.

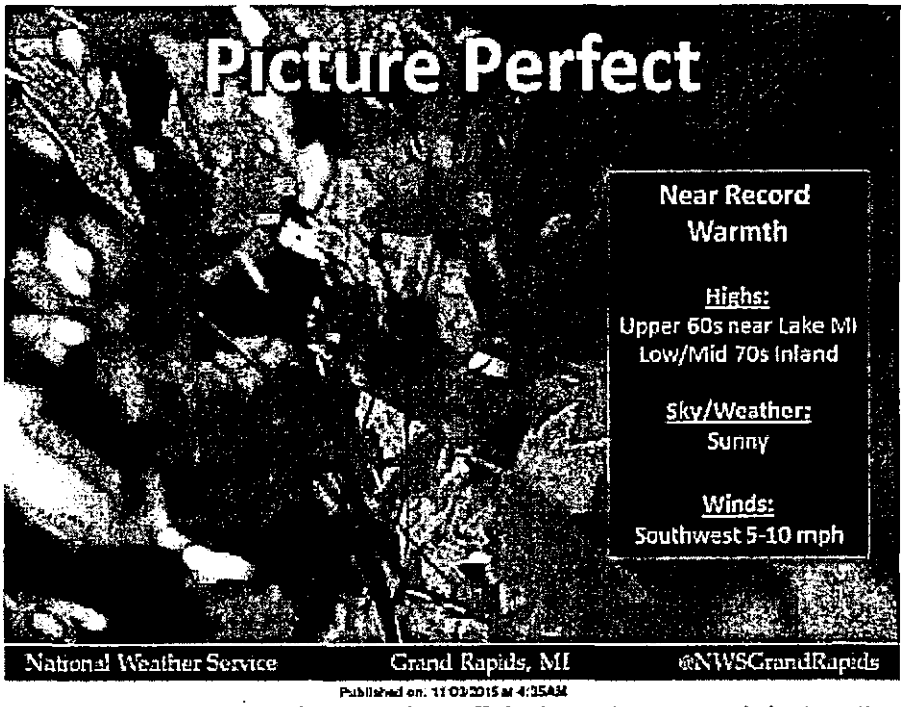
Detroit



Published on: 11/03/2015 at 4:28AM

High pressure over the Central and Eastern Great Lakes will keep quiet weather and unseasonably warm temperatures over the area through Thursday. An area of low pressure will then track through Michigan, bringing rain and gusty winds late Thursday Night into Friday.

Grand Rapids



If you happen to have today off, it doesn't get much better than this for November in Southwest Lower Michigan. A great day for fall clean up yard work with loads of sunshine and high temperatures pushing into the lower to mid 70s in many areas. Highs today will be close to 20 degrees above normal. In fact, we will see near record warmth.

Northern Indiana

Today will be sunny and warm with high temperatures in the lower 70s...about 15 degrees above normal. Tonight will be mostly clear with lows around 50. There is a chance for some fog development late tonight.

Michigan State Police added 8 new photos to the album: Sault Ste. Marie Post Open House & Halloween Drop-in.
30 mins ·

In what has become an annual tradition, the MSP Sault Ste. Marie Post held a Halloween drop-in and open house on October 31, 2015. This year, over 750 people stopped by refreshments and activities, including demonstrations by the MSP Underwater Recovery Unit, Emergency Support Team, Canine Unit and the Bomb Squad. MSP recruiters were at the event to answer questions about careers with the MSP, and troopers were available to inspect children's candy after Trick-or-Treating.

Michigan State Police added 8 new photos to the album: 20th Motor Carrier Officer Recruit School - Week 3.
19 hrs ·

Eighteen recruits reported to the MSP Training Academy to begin Week 3 of the 20th Motor Carrier Officer Recruit School.

The recruits are beginning to experience the rigorous academic and physical demands of recruit school. This week, the recruits began receiving extensive legal instruction from the MSP Legislative and Legal Resources Section personnel. Recruits received specific training on constitutional law, court functions, civil law, laws of arrest and warrantless sear...ch and seizure. Recruits are required to learn, understand and apply a large amount of legal information and will be tested on all subjects.

The recruits are also experiencing what it means to manage their time effectively. They must work as a team and perform duties not specifically assigned to them in order to accomplish goals.

Recruits continued to receive training in first aid, firearms, defensive tactics, patrol techniques and report writing. During firearms training, each recruit had the opportunity to fire their primary firearm for the first time.

In addition, recruits received training on completing traffic stops and effective searches of vehicles and suspects. These systematic procedures will take continuous repetition and attention to detail for the recruits to master. The staff will ensure each recruit maintains the highest level of officer safety when performing all duties.

Week 3 ended with 18 recruits released for weekend furlough.

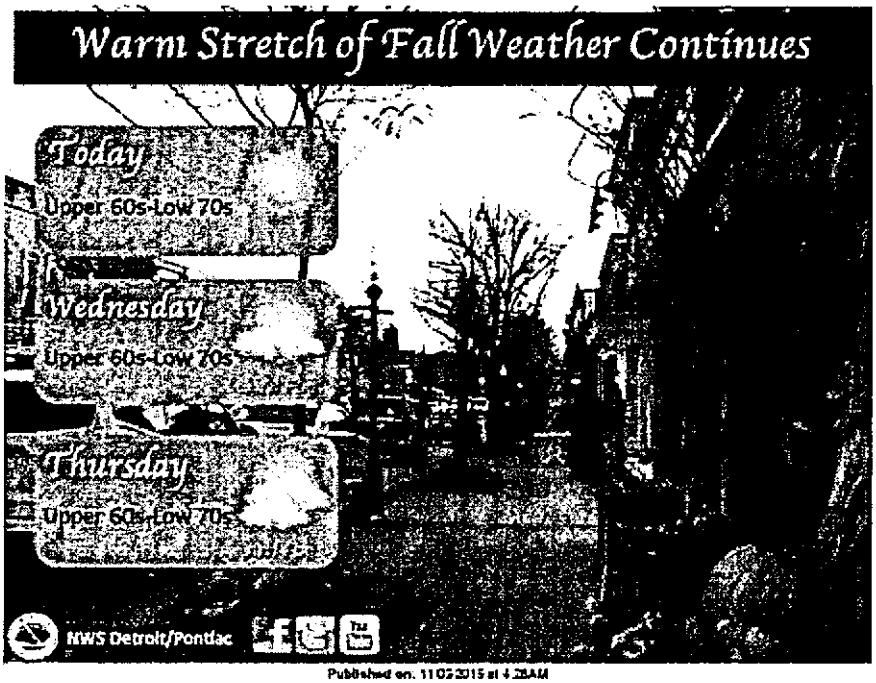
Continued well above normal temperatures through Thursday. Rain arrives Thursday night into Friday. Cooler for the weekend.

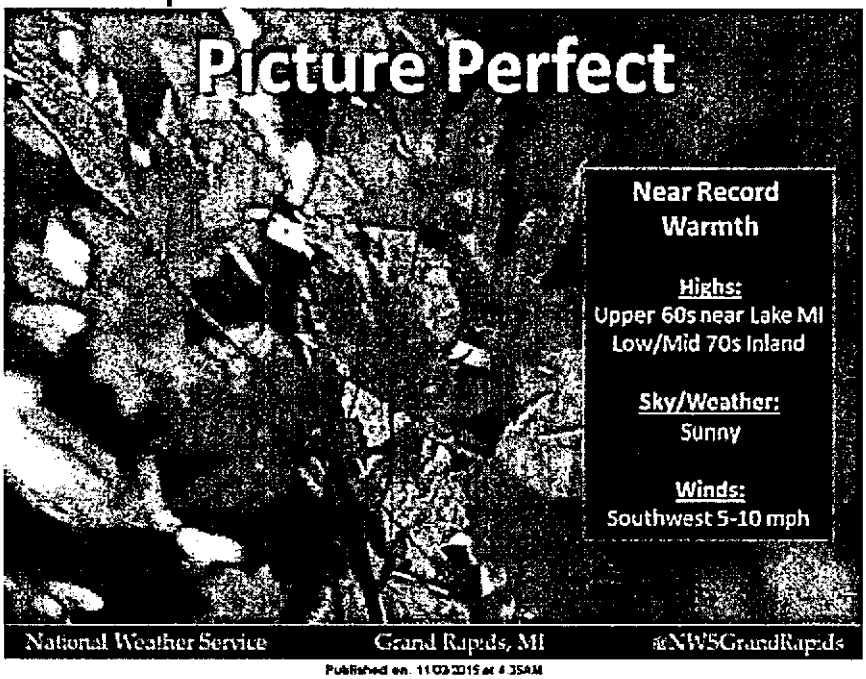
Detroit



Published on: 11/02/2015 at 4:28AM

High pressure over the Central and Eastern Great Lakes will keep quiet weather and unseasonably warm temperatures over the area through Thursday. An area of low pressure will then track through Michigan, bringing rain and gusty winds late Thursday Night into Friday.

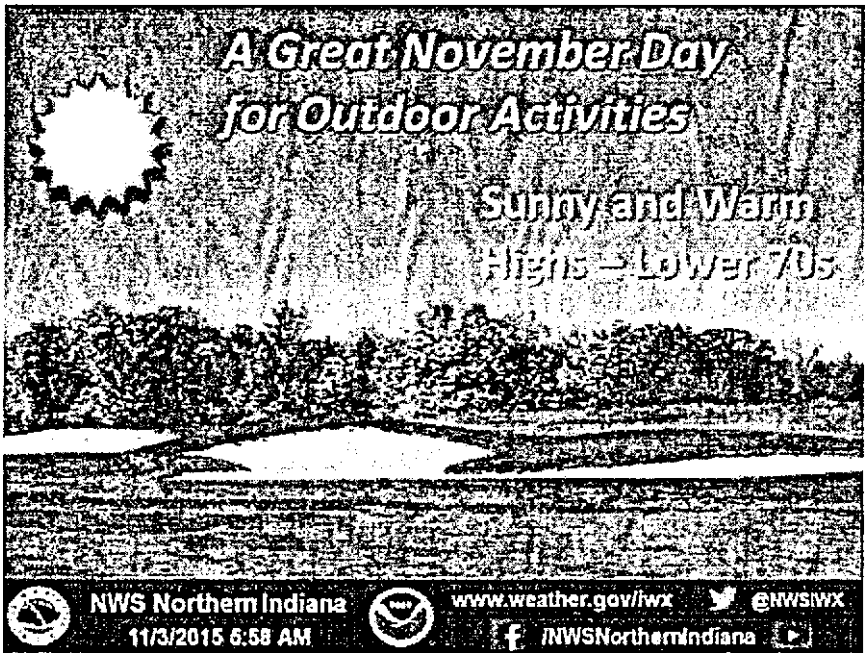
Grand Rapids



Published on: 11/02/2015 at 4:35AM

If you happen to have today off, it doesn't get much better than this for November in Southwest Lower Michigan. A great day for fall clean up yard work with loads of sunshine and high temperatures pushing into the lower to mid 70s in many areas. Highs today will be close to 20 degrees above normal. In fact, we will see near record warmth.

Northern Indiana



Today will be sunny and warm with high temperatures in the lower 70s...about 15 degrees above normal. Tonight will be mostly clear with lows around 50. There is a chance for some fog development late tonight.

MEDIA MONITORING REPORT

11/02/2015

Issues:

- No issues to report.

Summary:

- In a joint effort to inform the community about lead exposure, the Genesee County Health Department and Michigan Department of Health and Human Services will be sending letters to parents.
- Nearly 20 community members met Sunday, Nov. 1 for a local forum providing history on Flint's water crisis and a question and answer session with Michigan Senate Minority Leader Jim Ananich at Unitarian Universalist Congregation of Flint.
- More than 4,000 people joined in a Telephone Town Hall to talk about Flint's water emergency Wednesday, Oct. 29, asking questions of U.S. Rep. Dan Kildee, D-Flint, a Hurley Medical Center doctor and a professor from Virginia Tech University.
- The Flint City Council wants its own attorney to advise it on issues related to Flint's water emergency, but it's unclear whether it will be able to pay any bill.
- The driver of a semi suffered injuries to his arm and the gasoline tanker he was hauling lost about 4,000 gallons of fuel in an Oct. 31 collision on US-23 in Whitney Township.
- An explosion in Redford Township tonight leveled a house and sent a man to Botsford Hospital in Farmington Hills.
- The Michigan State Police, Emergency Management and Homeland Security Division is encouraging Michiganders to make winter emergency preparedness a priority.
- Curtis Parsons of Lenawee County is receiving recognition after being named the 2015 Michigan Professional Emergency Manager of the Year.
- The Michigan Legislature may be inching toward a roads funding package.
- Lansing State Journal reports that when voters in Allegan and Lapeer County go to the polls on Tuesday to select their favorite candidate to fill two vacant seats in the state House of Representatives, they'll also be on the hook for a hefty, and unexpected, bill — likely well into the six figures.
- Michigan State Police have wrapped up an investigation into a side story of the sex scandal and cover-up that prompted former state Rep. Todd Courser, R-Lapeer, to resign from the House of Representatives last month.

- The investigation into the alleged blackmail plot of former state representative Todd Courser is now in the hands of the prosecutor.
- National Weather Service forecast updates.
- TV clips: Informational town hall meeting – Flint Water Emergency

Analysis:

- Media coverage is neutral and positive.
- Coverage continues on Flint water situation.
- Genesee County Health Dept. and Michigan Dept. of Health and Human Services will be sending informational letters to parents regarding lead testing and how to reduce lead exposure.
- MLive reports that the Flint City Council has voted to hire its own attorney to advise it on issues related to Flint's water emergency.
- MLive reports that Flint community members met Sunday, Nov. 1 for a local forum providing history on Flint's water crisis and a question and answer session with Michigan Senate Minority Leader Jim Ananich.
- Multiple news outlets posted articles with The Michigan State Police offering tips for winter emergency preparedness.
- Will continue to monitor situation.

FLINT WATER

Letters to be sent to Flint parents with information on lead testing

MLive, October 31, 2015

FLINT, MI – In a joint effort to inform the community about lead exposure, the Genesee County Health Department and Michigan Department of Health and Human Services will be sending letters to parents.

The letters to be sent out next week will provide parents with information regarding lead testing, how to reduce lead exposure, where lead comes from, as well as other useful information. Children cane be exposed to lead from drinking water in lead pipes, old lead paint, soil, pottery, cosmetics, toys, and some household remedies, according to a joint news release from the GCHD and MDHHHS.

Senator Ananich says water woes will have lasting impact on Flint community

MLive, November 1, 2015

FLINT, MI – Nearly 20 community members met Sunday, Nov. 1 for a local forum providing history on Flint's water crisis and a question and answer session with Michigan Senate Minority Leader Jim Ananich at Unitarian Universalist Congregation of Flint.

The forum is part of an annual series hosted by the church. Church officials say they are looking to focus on community issues throughout their 2015-16 fiscal year.

Seven key takeaways from a town hall meeting on Flint's water crisis

MLive, October 29, 2015

FLINT, MI -- More than 4,000 people joined in a Telephone Town Hall to talk about Flint's water emergency Wednesday, Oct. 29, asking questions of U.S. Rep. Dan Kildee, D-Flint, a Hurley Medical Center doctor and a professor from Virginia Tech university.

Government messed up in Flint water crisis, what next?

Detroit Free Press, October 29, 2015

We know what happened in Flint:

The city's water treatment plant, with the state's blessing, didn't add the right chemicals to drinking water pumped from the Flint River. And that failure allowed the more-corrosive river water to leach lead from the city's aging pipes and through faucets throughout the city. Tens of thousands of people were exposed to lead poisoning, which will have irreversible effects on the city's children.

Government agencies are supposed to insist on proper water treatment to prevent this kind of thing — so what on earth happened in Flint?

Special meeting on Flint water woes is a bust

Michigan Radio, October 29, 2015

Flint city staff snubbed city council members who wanted to hold a special meeting tonight on the city's drinking water problems.

No city staffer showed up at the special meeting. City Administrator Natasha Henderson had objections to elements of the planned meeting.

Councilman Eric Mays has been pushing for an "investigative" meeting on Flint's water issues from months. He says the city staff snub was "disrespectful."

Flint City Council votes to hire outside legal help on water issue

MLive, October 30, 2015

FLINT, MI -- The City Council wants its own attorney to advise it on issues related to Flint's water emergency, but it's unclear whether it will be able to pay any bill.

The council voted 4-1 at a special meeting Thursday, Oct. 29, to hire an attorney to help it deal with water issues, but council's actions require approval by the city's Receivership Transition Advisory Board.

City council president: Emergency Manager set Flint on path to river water

MLive, October 29, 2015

Let's not blame the victims for the errors of the state.

The facts are clear: At no time have the elected leaders of the city of Flint voted to use the Flint River as our primary drinking source. The documented facts show the decision to move to the Flint River was made solely by emergency managers sent to run the city on behalf of the state of Michigan.

The idea of using the river as our primary drinking source was firmly rejected in favor of joining the Karegnondi Water Authority (KWA).

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Around 4,000 gallons of gasoline spilled in crash

Arenac Independent, October 31, 2015

WHITNEY TWP. — The driver of a semi suffered injuries to his arm and the gasoline tanker he was hauling lost about 4,000 gallons of fuel in an Oct. 31 collision on US-23 in Whitney Township.

Au Gres-Sims-Whitney Fire Chief Kurt Humerickhouse said the fire department was paged out to the crash around 10:03 a.m. He said the fuel tanker was being hauled northbound on US-23 and the attached collided with a flatbed trailer that was loaded with trusses being delivered to a property north of Turner Road.

The driver who parked the flatbed trailer was not in the semi used to haul it during the incident, Humerickhouse said. The trailer was parked on the side of the road on the northbound shoulder, he said.

Arenac County Emergency Management Coordinator Ed Rohn said the trailer with the lumber was partially in the roadway, which is what is believed to have caused the crash. Rohn said Northern A-1 Environmental Services of Kalkaska was contacted to clean up the spilled fuel. Rohn said the East Tawas Fire Department was also contacted to shut down US-23 east of the scene, with traffic being rerouted down a detour route. US-23 was also shut down at Turner Road.

House explosion in Redford Twp. Sends 1 to hospital

Detroit Free Press, November 1, 2015

An explosion in Redford Township tonight leveled a house and sent a man to Botsford Hospital in Farmington Hills.

The explosion shortly after 6 p.m. on Gaylord, near 7 Mile, between Inkster and Beech Daly, was heard and felt by residents as far as 3 miles away, according to comments on the township's Facebook page. A photographer on the scene reported to the Free Press that windows of neighboring homes were blown out by the blast.

State Police give tips for winter emergency preparedness

Publication, Date

LANSING — With winter weather rapidly approaching, the Michigan State Police, Emergency Management and Homeland Security Division is encouraging Michiganders to make winter emergency preparedness a priority.

"Some Michigan citizens have already experienced their first snow of the season, reminding us that winter is coming," said Capt. Chris A. Kelenske, Deputy State Director of Emergency Management and Homeland Security and commander of the MSP/EMHSD. "If you haven't done so already, don't wait to take a few extra steps to ensure you and your family are ready for winter."

Severe winter weather poses health and safety concerns with extremely cold temperatures, freezing pipes, potential propane shortages and power outages. The Michigan State Police advise that residents should take the following actions to be prepared for the upcoming winter months.

To prepare your home for winter:

-Weatherproof your home by installing weather-stripping and caulking and insulating walls, doors and windows.

-Insulate any water lines that run along exterior walls so pipes are less likely to freeze.

-Lock in a propane rate now and have a backup heating plan, such as a generator, wood stove or fireplace.

-Have gas or oil furnaces inspected by a qualified professional and change the air filter.

-Have your fireplace and chimney cleaned and inspected. Contact your local fire department for a referral or look for a local inspector online.
-Install battery-operated carbon monoxide (CO) detectors near every sleeping area. CO poisoning is most prevalent when furnaces are turned on to fight cold winter temperatures, but commonly occurs after winter storms and accompanying power outages, when people tend to rely on portable generators for electricity.
-Clean gutters to prevent ice dams from forming. Roof ice dams can cause water to build-up, leading to interior damage.
-Clear storm drains along the curb to enable water to drain. If plugged, water has the potential to go into low-lying areas and flood basements.
-Have an emergency preparedness kit stored safely in your house that includes: water, non-perishable food, a first aid kit, extra batteries, a battery or hand-crank powered radio, emergency lighting or flashlights, extra blankets and warm clothing.

To prepare your vehicle for winter:
-Have your radiator system serviced before winter and make sure to replace windshield wipers and wiper fluid with a wintertime mixture that will not freeze.
-Replace any worn tires and check air pressure regularly.
-Have your brakes, brake fluid, oil, car battery, heater and exhaust checked to make sure everything is running efficiently.
-Keep an emergency preparedness kit in your vehicle stocked with batteries, battery powered or hand-crank radio, flashlight, windshield scraper, jumper cables, mobile phone charger, shovel, blankets, first aid kit, non-perishable food and bottled water in the event you get stranded or stuck.

In support of statewide winter preparedness efforts, Gov. Rick Snyder has proclaimed November 1 through November 7 as Winter Hazards Awareness Week. For more tips, go to their website.

Michigan State Police prep residents with winter weather hazard tips

The News Herald, November 2, 2015

Kicking off Winter Hazards Awareness Week from Nov. 1 to 7, the Michigan State Police and Downriver emergency management teams are encouraging residents to take extra precautions to ensure safety as temperatures begin to drop.

All residents are advised to "winterize" their vehicles in the fall by having an automotive professional check the equipment to make sure it is all running properly, in addition to checking tire treads and filling up on windshield washing solution.

Governor Snyder proclaims November 1-7 as Winter Hazards Awareness Week

MI News 26, October 30, 2015

We've already seen our first snow in Northern Michigan reminding us all that the winter season is on its way.

The Michigan State Police Emergency Management and Homeland Security Division is reminding people to make preparations for potential winter emergencies.

Severe winter weather poses health and safety concerns with extremely cold temperatures, freezing pipes, and power outages.

Hero of the week: Curtis Parsons

Fox 17 Online, October 31, 2015

LANSING, Mich – Each week, West Michigan's Most Wanted recognizes a member or members of law enforcement who've gone above and beyond the call of duty to help the community they serve.

This week, Curtis Parsons of Lenawee County is receiving recognition after being named the 2015 Michigan Professional Emergency Manager of the Year.

Parsons received an award during a special ceremony in Boyne City on October 8.

MICHIGAN POLITICS

Dayne Walling our choice for mayor of Flint

MLive, October 29, 2015

FLINT, MI – As terrible as the Flint water situation has been – and it has been utterly appalling – the election of Flint's next mayor is about more than a single issue.

The contest between incumbent Dayne Walling and challenger Karen Weaver has been overshadowed by the lead crisis, but we must not forget that Flint also faces a host of other large-scale, urban problems: crime, blight, population loss, shrinking revenue and unemployment.

The choice for mayor is not one we take lightly.

Time for flint voters to send Snyder a message and take back the city

MLive, October 30, 2015

There is a notion in some parts that the outcome of Tuesday's election won't really matter in Flint.

That regardless of who wins the mayor's office, it won't really matter because a state-appointed board will still have ultimate veto power.

And that's true.

But ...

Flint voters have a chance to tell Gov. Rick Snyder that they want their democracy back.

Are we there yet? The Senate says no

Michigan Radio, October 29, 2015

The Michigan Legislature may be inching toward a roads funding package. The roughly $1 billion plan would take $600 million from the state's general fund and could include a rollback in the state income tax rate. It would also increase vehicle registration fees by 40%. While the House has passed the plan, the Michigan Senate scheduled and then delayed a vote on the plan.

I spoke with Susan Demas, publisher of Inside Michigan Politics, and Ken Sikkema, former Senate Majority Leader and Senior Policy Fellow at Public Sector Consultants, about how close we are to seeing a final roads funding plan.

TODD COURSER AND CINDY GAMRAT

Courser-Gamrat special elections to cost thousands

Lansing State Journal, October 31, 2015

When voters in Allegan and Lapeer County go to the polls on Tuesday to select their favorite candidate to fill two vacant seats in the state House of Representatives, they'll also be on the hook for a hefty, and unexpected, bill — likely well into the six figures.

The resignation of former state Rep. Todd Courser, R-Lapeer, and expulsion of Rep. Cindy Gamrat, R-Plainwell, on Sept. 11 set up a special election that local officials had not counted on.

There were regular elections already set in the cities in the two counties and ballots had been printed for those races. But there were no elections scheduled for the 18 townships in Lapeer and 21 townships in Allegan County.

State Police wrap up investigation into Courser texts

Lansing State Journal, October 29, 2015

Michigan State Police have wrapped up an investigation into a side story of the sex scandal and cover-up that prompted former state Rep. Todd Courser, R-Lapeer, to resign from the House of Representatives last month.

Courser claimed he was being blackmailed by an anonymous person who was using a burner phone to text messages to him telling him to resign or the details of his extramarital affair with former state Rep. Cindy Gamrat, R-Plainwell would be publicly revealed. Gamrat was expelled by her fellow House members on Sept. 11.

Michigan State Police turn investigation into Courser blackmail over to prosecutor's office

WXYZ, October 29, 2015

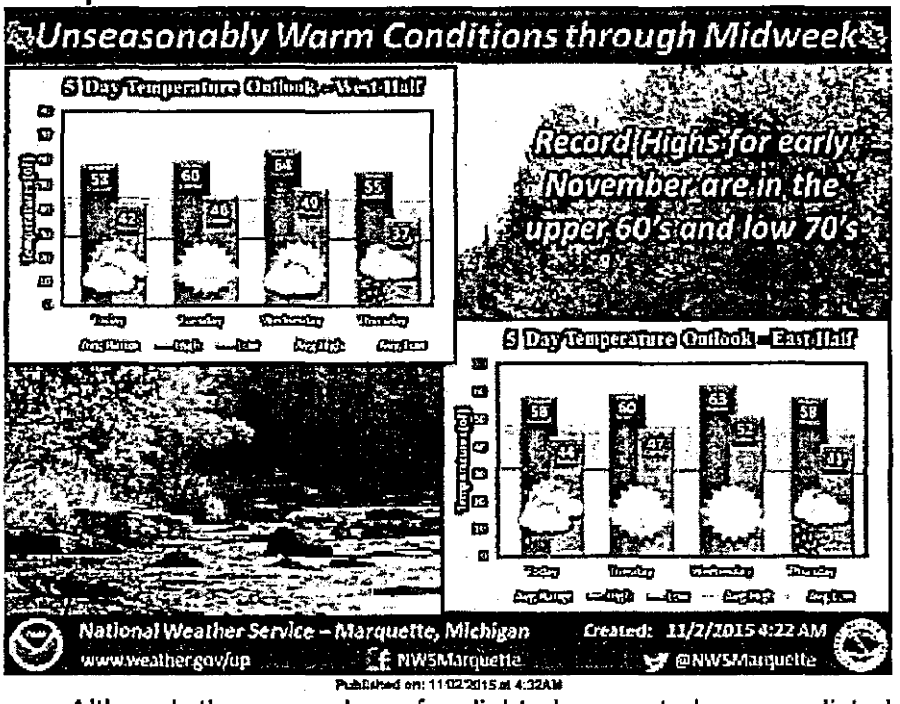
(WXYZ) - The investigation into the alleged blackmail plot of former state representative Todd Courser is now in the hands of the prosecutor.

This comes as Courser's wife is endorsing the husband who publicly admitted that he cheated on her.

The Lapeer County Prosecutor will decide in the next week or so about whether or not anyone will be charged in this alleged blackmail plot.

NATIONAL WEATHER SERVICE FORECASTS

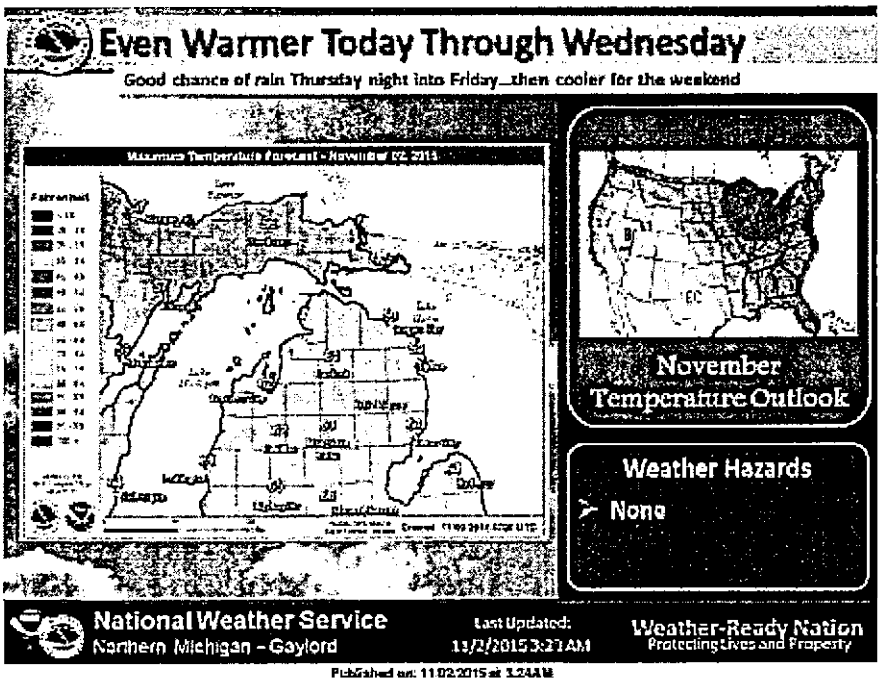
Marquette



Published on: 11/02/2015 at 4:32AM

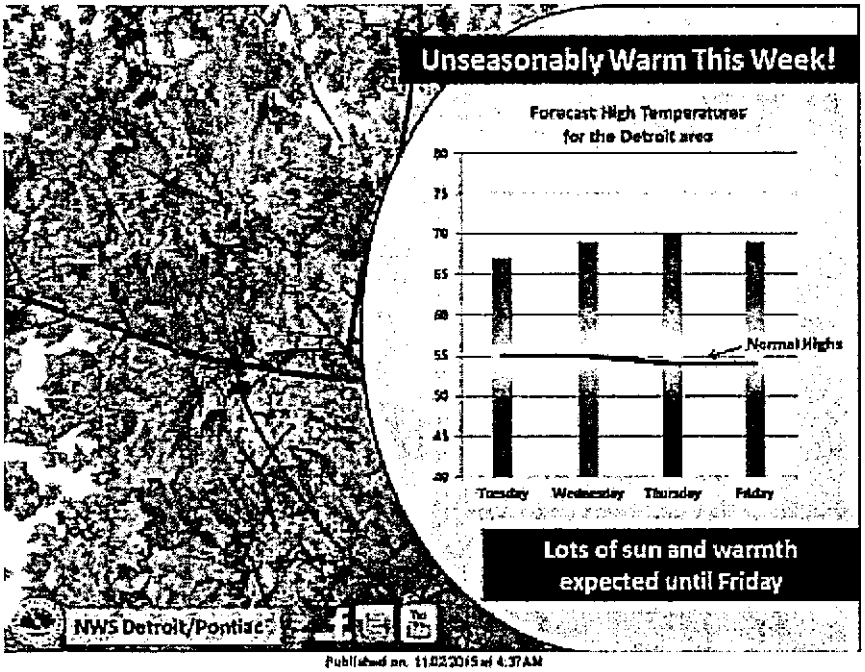
Although there may be a few light showers today as a disturbance crosses the Upper Great Lakes, a building ridge will result in generally dry and mild weather through mid-week. In fact, temperatures at many places will top out in the 60s on Tuesday and especially Wednesday, when some locations over the west may see the thermometer approach 70. The next best chance of rain will arrive on Thursday ahead of low pressure moving into the Great Lakes.

Gaylord



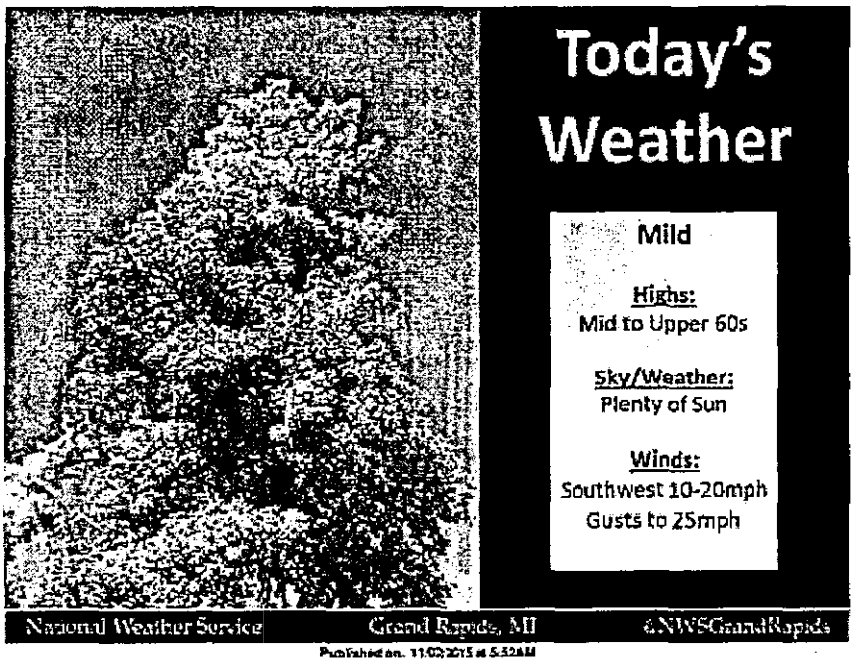
Continued well above normal temperatures through Thursday. Isolated light showers or sprinkles today...next chance for good rain arrives Thursday night into Friday.

Detroit



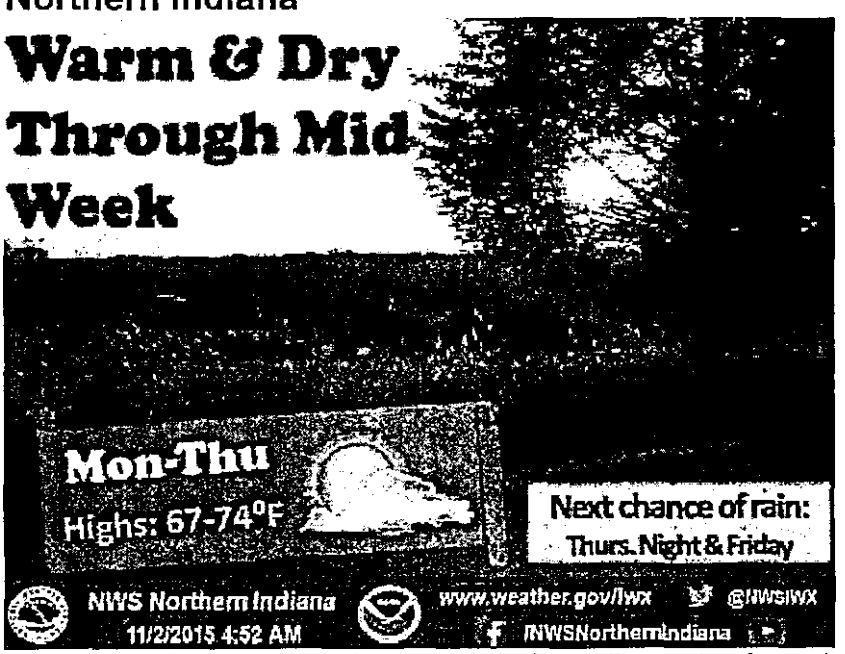
High pressure will bring a prolonged stretch of dry and quiet weather through Thursday. Warmer air will arrive today and remain over the area until then, with high temperatures forecast to run well above normal each day. A low pressure system will then spread rain into the area on Friday.

Grand Rapids



We are expecting quiet and mild weather today. Skies will be mainly sunny. Highs will reach the middle to upper 60s, which will be 10-15 degrees above normal for the date. It will turn breezy this afternoon with southwest winds of 10 to 20 mph gusting at times towards 25 mph.

Northern Indiana



Dry and unseasonably warm weather will persist through Thursday. Highs will be in the upper 60s to lower 70s. Sunny skies expected today and tomorrow but clouds will increase for Wednesday and Thursday. Rain arrives Thursday night with cooler weather for the weekend.

> The Commission is tasked with supporting the volunteer management and donations management for the state. My Director of Communications Jessi Adler is the one who found the article.
>
> I would like to recommend that a heads up be given to the Fire Stations and that they should accept the donations. They can then instruct the people that the community has set up donation sites for water and then ask if they could get the word out as to those locations. I am attaching the donations management plan and you can determine the best way to provide this communication.
>
> In addition, I was wondering if you thought it would be good for one of you to contact the reporter and so he does not continue to provide the wrong locations.

I have copied Jessi Adler, my Communications Director. She is the one who found the article. She can assist you if that would help.

I am the Executive Director of the MCSC and we are the lead agency for volunteerism for the state and in times of disaster are called in to assist with the efforts. We have a Governor appointed Commission and work closely with the MSP to support efforts. I have three staff who are in Flint that are helping with the effort.

I will be sending you the donations management plan and volunteer plan but for this issue the following is the information that we have worked out with the local partners. THere is one change in time that I will send you as soon as I get it. I was alerted that one of the sites is 10 am to 7 pm. But I wanted to get you the information and so you were aware.

Let us know what you think is the best way to handle this and Michelle will get the word out to the fire stations.

Thank you for your assistance.

Ginna

Donations Management Plan - for Materials

II. Material and In-Kind Donations

When donation arrangements have been made, Wendy and Pam will be sent and email alert by Janet.

A. Donation List

- Materials: Water – individual bottles, gallon jugs, and larger.
- In-Kind: Labor to install filters, trucks to deliver materials
  Donors should be directed to Janet Hunter HunterJ8@michigan.gov
  Internal Phone to provide to donors not for publication: cell 989-763-9421

B. Publicize Items to Donate

- The donation list will be sent to partners to post with their networks and post on state, county, and city sites and social media
- Donation items and drop off locations will be listed in a press release.
- Press releases will inform public of donation opportunities
- Government organizations and community partners will be asked to post on their web-sites and social media
- 211 will have all information to share with those who contact them
- Additional information requests for donating can be directed to the Michigan Community Service Commission, Janet Hunter HunterJ8@michigan.gov

B. Warehouse Location – Drop off Location for Large Donations of Water

- A warehouse location to store surplus of donations is located at: 4315 Clio Rd, Flint, MI
  Refer interested donors that have more than one semi truck of water to Janet Hunter HunterJ8@michigan.gov (Internal Phone, not for publication: cell 989-763-9421)

C. Public Drop off locations of Water

- Donations will be tracked at the sites.
- Inventory and burn rates will be tracked to identify need for donations.
- Small Water Donations: – cases and pallets 100 cases or less deliver to:

  Monday - Friday 9:00 am - 4:00 pm Catholic Charities Center for Hope 517 E. Fifth Ave

  Saturday -Sunday 9:00 am – 4:00 pm Red Cross 1401 Grand Traverse

- Large Water Donations – 100 cases or more, one Semi Truck

  Monday - Friday 8:00 am - 4:30 pm Food Bank of Eastern Michigan 2300 Lapeer Rd

  810-239-4441 If Food Bank receives donations offers of more than one semi truck or if they are full, they will refer donor to Janet Hunter to make arrangements to donate to the warehouse.

Hi Nicole,

I spoke with Ginna Holmes a few minutes ago about a news article that the Lansing State Journal printed. Ginna sits on the governor's Michigan Community Service Commission. She's going to forward that information to you.

Subject: Re: Media Information

Thank you Michelle for the introduction.

Nicole,
I wanted to alert you to an article that was in the Lansing State Journal. It said that people were heading to flint this weekend to drop off water at the fire stations and other locations.

The Commission is tasked with supporting the volunteer management and donations management for the state. My Director of Communications Jessi Adler is the one who found the article.

I would like to recommend that a heads up be given to the Fire Stations and that they should accept the donations. They can then instruct the people that the community has set up donation sites for water and then ask if they could get the word out as to those locations. I am attaching the donations management plan and you can determine the best way to provide this communication.

In addition, I was wondering if you thought it would be good for one of you to contact the reporter and so he does not continue to provide the wrong locations.

I have copied Jessi Adler, my Communications Director. She is the one who found the article. She can assist you if that would help.

I am the Executive Director of the MCSC and we are the lead agency for volunteerism for the state and in times of disaster are called in to assist with the efforts. We have a Governor appointed Commission and work closely with the MSP to support efforts. I have three staff who are in Flint that are helping with the effort.

I will be sending you the donations management plan and volunteer plan but for this issue the following is the information that we have worked out with the local partners. THere is one change in time that I will send you as soon as I get it. I was alerted that one of the sites is 10 am to 7 pm. But I wanted to get you the information and so you were aware.

Let us know what you think is the best way to handle this and Michelle will get the word out to the fire stations.

Thank you for your assistance.

Ginna

Donations Management Plan - for Materials

II. Material and In-Kind Donations

When donation arrangements have been made, Wendy and Pam will be sent and email alert by Janet.

A. Donation List
- Materials: Water – individual bottles, gallon jugs, and larger.
- In-Kind: Labor to install filters, trucks to deliver materials
  Donors should be directed to Janet Hunter HunterJ8@michigan.gov
  Internal Phone to provide to donors not for publication: cell 989-763-9421

B. Publicize Items to Donate

- The donation list will be sent to partners to post with their networks and post on state, county, and city sites and social media
- Donation items and drop off locations will be listed in a press release.
- Press releases will inform public of donation opportunities
- Government organizations and community partners will be asked to post on their web-sites and social media
- 211 will have all information to share with those who contact them
- Additional information requests for donating can be directed to the Michigan Community Service Commission, Janet Hunter HunterJ8@michigan.gov

B. Warehouse Location – Drop off Location for Large Donations of Water
- A warehouse location to store surplus of donations is located at: 4315 Clio Rd, Flint, MI
  Refer interested donors that have more than one semi truck of water to Janet Hunter HunterJ8@michigan.gov (Internal Phone, not for publication: cell 989-763-9421)

C. Public Drop off locations of Water
- Donations will be tracked at the sites.
- Inventory and burn rates will be tracked to identify need for donations.
- Small Water Donations: – cases and pallets 100 cases or less deliver to:

  Monday - Friday 9:00 am - 4:00 pm Catholic Charities Center for Hope 517 E. Fifth Ave

  Saturday -Sunday 9:00 am – 4:00 pm Red Cross 1401 Grand Traverse

- Large Water Donations – 100 cases or more, one Semi Truck

  Monday - Friday 8:00 am - 4:30 pm Food Bank of Eastern Michigan 2300 Lapeer Rd

  810-239-4441 If Food Bank receives donations offers of more than one semi truck or if they are full, they will refer donor to Janet Hunter to make arrangements to donate to the warehouse.

Response Efforts Increased to Distribute Water Resources to Flint Residents

Thousands of water resources have been distributed due to collaborative effort

FOR IMMEDIATE RELEASE
January 15, 2016
Release #: 5
For more information contact: Joint Information Center: 888-EMD-TODAY (888-363-8632)

LANSING, Mich. – Beginning on Saturday, January 16, water distribution efforts will expand with more than 20 water response teams going door to door to distribute safe water resources to the homes of Flint residents. These teams will consist of state personnel and American Red Cross volunteers, including approximately 250 State of Michigan employees and their family members who will volunteer Saturday through Monday.

Since January 12, the water resource teams have provided nearly 7,500 Flint homes with bottled water, filters, replacement cartridges and water testing kits.

All members of the water response teams will be wearing official credentialed badges with a State of Michigan seal hologram so they can be easily identified.

"With more teams going door to door, we are confident we will double our efforts to ensure residents receive these much needed resources as soon as possible," said Capt. Chris Kelenske, Deputy State Director of Emergency Management and Homeland Security and commander of the Michigan State Police Emergency Management and Homeland Security Division.

Since January 9, the following resources have been distributed to residents, both at the

water resource sites and by the water response teams:

- More than 18,500 cases of water
- Nearly 46,000 filters
- More than 3,200 water testing kits

In addition to donated supplies, the State of Michigan has purchased the following resources, since January 5, which will continue to be delivered to Flint over the coming days:

- Nearly 45,000 cases of water
- Nearly 79,000 filters
- Nearly 19,000 water testing kits

Flint residents can continue to visit the water resource sites to receive free bottled water, filters, replacement cartridges and water testing kits. The sites are open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Road
Flint, MI 48506

Fire Station #6
716 West Pierson Road
Flint, MI 48505

Fire Station #8
202 East Atherton Road
Flint, MI 48507

The state of Michigan continues to coordinate response efforts in partnership with the city of Flint, Genesee County and local community organizations.

Additional information is available at www.michigan.gov/flintwater or by calling 211.

FYI, attached is the release we sent out tonight at 10:50p with the numbers. Hopefully this process goes smoother now that we have this established.

Thanks for coming to the JIC today. I know your schedule is very busy and I appreciate you taking the time to experience the JIC and see how it works. Having you there today was very helpful, especially with the issue of releasing the Presidential request letter and the staff member who showed up.

Hope your cough goes away! Have a good weekend.

Subject: Feedback from Genesee County

I received the following from Lt Roach in the Genesee County EOC...

> "Hi Wendy, just FYI there is some angst over News Release #5 due to the fact the Sheriff's Ofc was not mentioned again. They are and have been a partner in this process. Thought you may know how to tactfully route this. Can you please have someone let me know the thought process on this so I know how to handle it here?? I really hope we can start including all integral partners."

I know Genesee County is not in the JIC, but is there a way to generically reference their efforts in this type of release?

Subject: Resource Information

FYI...The attached document provides good background on resources available under Presidential Emergency and Disaster declarations.

FEMA Fact Sheet

Stafford Act Declaration Process

This fact sheet is intended to provide general information regarding the Stafford Act declaration process. All emergency and major disaster declarations are made solely at the discretion of the President of the United States.

The Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (the Stafford Act) §401 states in part that: "All requests for a declaration by the President that a major disaster exists shall be made by the Governor of the affected State." A State also includes the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. The Republic of Marshall Islands and the Federated States of Micronesia are also eligible to request a declaration and receive assistance through the Compacts of Free Association.

As a result of the Sandy Recovery Improvement Act, federally recognized Indian tribal governments now have the option of pursuing a declaration directly from the President. While this fact sheet may be informative for Indian tribal governments, FEMA is developing Tribal Declarations Pilot Guidance, which will provide more detailed and specific guidance for Tribal requests.

FEMA has codified the declaration process at 44 C.F.R. Part 206, Subpart B.

Preliminary Damage Assessment

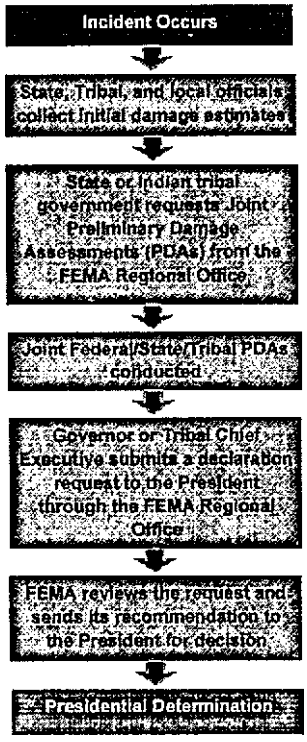
If it is apparent that a Presidential disaster declaration may be necessary to assist in the recovery of the impacted area, the State or Indian tribal government should contact their FEMA Regional Office and request a joint Federal, State/Tribal Preliminary Damage Assessment (PDA). Local government representatives should be included, if possible. Together, the team will conduct a thorough assessment of the impacted area to determine the extent of the disaster, its impact on individuals and public facilities, and the types of federal assistance that may be needed. This information is included in the Governor or Tribal Chief Executive's request to show that the disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments or Indian tribal government and that supplemental federal assistance is necessary.

State or Indian Tribal Government Resources Overwhelmed

Once the PDA is complete and the State or Indian tribal government determines that the damage exceeds their resources, the Governor or Tribal Chief Executive may submit a declaration request to the President through their FEMA Regional Office. As part of the request, the Governor or Tribal Chief Executive must take appropriate action under State or Tribal law and direct the execution of the State or Tribal emergency plan. The Governor or Tribal Chief Executive shall furnish information on the nature and amount of State and local or Indian tribal government resources that have been or will be committed to alleviating the results of the disaster, provide an estimate of the amount and severity of damage and the impact on the private and public sectors, and provide an estimate of the type and amount of assistance needed under the Stafford Act. In addition, the

Governor or Tribal Chief Executive must certify that, for the current disaster, State and local governments or Indian tribal government obligations and expenditures will comply with all applicable cost-sharing requirements.

Declaration Process



Generally, the PDA is completed prior to the submission of the Governor or Tribal Chief Executive's request for a major disaster declaration. However, when an obviously severe or catastrophic event occurs, the Governor or Tribal Chief Executive's request may be submitted prior to completion of the PDA.[1] In such circumstances the major disaster will generally be limited to Public Assistance Categories A and/or B (which may be further limited to Direct Federal Assistance (DFA)) and Hazard Mitigation Assistance. For high-impact events where the level of damage to residences is empirically overwhelming, the declaration may also include Individual Assistance. Additional forms of assistance may be added at a later date, pending the completion of PDAs.

Declaration Types

There are two types of disaster declarations provided for in the Stafford Act: emergency declarations and major disaster declarations.[2] Both declaration types authorize the President to provide supplemental federal disaster assistance. However, the events related to the two different types of declaration and scope and amount of assistance differ.

---

[1] 44 C.F.R. §206.33(d)

[2] FEMA has established a third type of declaration, Fire Management Assistance Grant (FMAG) declarations, through regulation. That process differs significantly from the emergency and major disaster processes. More information regarding the FMAG program can be found here: http://www.fema.gov/fire-management-assistance-grant-program

Emergency Declarations: The President can declare an emergency for any occasion or instance when the President determines federal assistance is needed. Emergency declarations supplement State and local or Indian tribal government efforts in providing emergency services, such as the protection of lives, property, public health, and safety, or to lessen or avert the threat of a catastrophe in any part of the United States. The total amount of assistance provided for a single emergency may not exceed $5 million. The President shall report to Congress if this amount is exceeded.

Requirements[3]: The Governor of the affected State or Tribal Chief Executive of the affected Tribe must submit a request to the President, through the appropriate Regional Administrator, within 30 days of the occurrence of the incident. The request must be based upon a finding that the situation is beyond the capability of the State and affected local governments or Indian tribal government and that supplemental federal emergency assistance is necessary to save lives and protect property, public health and safety, or to lessen or avert the threat of a disaster. In addition, the request must include:

- Confirmation that the Governor or Tribal Chief Executive has taken appropriate action under State or Tribal law and directed the execution of the State or Tribal emergency plan;
- A description of the State and local or Indian tribal government efforts and resources utilized to alleviate the emergency;
- A description of other federal agency efforts and resources utilized in response to the emergency; and
- A description of the type and extent of additional federal assistance required.

Assistance Available Under Emergency Declarations:

- Public Assistance (PA) – Only Categories A (debris removal) and B (emergency protective measures) may be authorized under an emergency declaration. Categories C-G (permanent work) are not available under an emergency declaration. Emergency declarations often include only Category B and will typically be limited to DFA, absent damage assessments showing significant need for financial assistance. This assistance is generally provided on a 75% federal, 25% non-federal cost sharing basis.
- Individual Assistance (IA) – The Individuals and Households Program (IHP) is the only form of IA that may be authorized under an emergency declaration. Authorization of IHP under an emergency is rare. Housing Assistance under IHP is provided at a 100% federal share, while Other Needs Assistance under IHP requires a 25% non-federal cost share.
- The Hazard Mitigation Grant Program (HMGP) is not available for emergency declarations.

[3] 44 C.F.R. §206.35

Pre-Disaster Emergency Declarations[4]: A Governor or Tribal Chief Executive may request an emergency declaration in advance or anticipation of the imminent impact of an incident that threatens such destruction as could result in a major disaster. Such requests must meet all of the statutory and regulatory requirements for an emergency declaration request. Requests must demonstrate the existence of critical emergency protective measure needs prior to impact are beyond the capability of the State and affected local governments or Indian tribal government and identify specific unmet emergency needs that can be met through DFA. Such DFA may include, but is not limited to, personnel, equipment, supplies, and evacuation assistance. Pre-positioning of assets generally does not require a declaration. Assistance made available under a pre-disaster emergency declaration will typically be Category B (emergency protective measures), limited to DFA. FEMA may require damage assessments and/or verified cost estimates if additional types of assistance are requested.

Emergency Declarations with Federal Primary Responsibility: When an emergency exists for which the primary responsibility rests with the Federal government, the President may declare an emergency without a request from the Governor of the affected State or the Tribal Chief Executive of the affected Tribe. Such an emergency declaration does not prevent the Governor or Tribal Chief Executive from subsequently requesting a major disaster declaration for other unmet needs caused by the event.

Major Disaster Declarations: The President can declare a major disaster for any natural event, including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought, or, regardless of cause, fire, flood, or explosion, that the President determines has caused damage of such severity that it is beyond the combined capabilities of state and local governments to respond. A major disaster declaration provides a wide range of federal assistance programs for individuals and public infrastructure, including funds for both emergency and permanent work.

Requirements[5]**:** The Governor of the affected State or Tribal Chief Executive of the affected Tribe must submit the request to the President through the appropriate Regional Administrator within 30 days of the occurrence of the incident. The request must based upon a finding that the situation is beyond the capability of the State and affected local governments or Indian tribal government and that supplemental federal assistance is necessary. In addition the request must include:

- Confirmation that the Governor or Tribal Chief Executive has taken appropriate action under State or Tribal law and directed execution of the State or Tribal emergency plan;

[4] This section provides guidance regarding the circumstances under which pre-disaster emergency declarations may be considered and the types of assistance which may be made available, as required by Stafford Act Section 502(c) (42 U.S.C. § 5192(c)).
[5] 44 C.F.R. §206.36

- An estimate of the amount and severity of damage to the public and private sector;
- A description of the State and local or Indian tribal government efforts and resources utilized to alleviate the disaster;
- Preliminary estimates of the type and amount of Stafford Act assistance needed; and
- Certification by the Governor or Tribal Chief Executive that the State and local governments or Indian tribal government will comply with all applicable cost sharing requirements.

Assistance Available Under Major Disaster Declarations: Not all programs, however, are activated for every disaster. The determination of which programs are authorized is based on the types of assistance specified in the Governor or Tribal Chief Executive's request and the needs identified during the joint PDA and subsequent PDAs. FEMA disaster assistance programs are as follows:

- **Individual Assistance** - Assistance to individuals and households, which may include:
  - Individuals and Households Program;
  - Crisis Counseling Program
  - Disaster Case Management
  - Disaster Unemployment Assistance
  - Disaster Legal Services
  - Disaster Supplemental Nutrition Assistance Program

- **Public Assistance** - Assistance to State, Tribal, and local governments and certain private nonprofit organizations for emergency work and the repair or replacement of disaster-damaged facilities, which may include the following Categories:
  - A - Debris removal
  - B - Emergency protective measures
  - C – Roads and bridges
  - D – Water control facilities
  - E – Buildings and equipment
  - F – Utilities
  - G – Parks, recreational and other facilities

- **Hazard Mitigation Assistance** – Assistance to State, Tribal, and local governments and certain private nonprofit organizations for actions taken to prevent or reduce long term risk to life and property from natural hazards.

Factors: When evaluating requests for major disasters and making recommendations to the President, FEMA considers the following factors[6]:

(a) Public Assistance Program

[6] 44 CFR 206.48. The regulation includes a chart titled "Average Amount of Assistance per Disaster." This chart it out of date and is no longer relevant to the declarations process.

1) Estimated cost of the assistance
2) Localized impacts
3) Insurance coverage in force
4) Hazard Mitigation
5) Recent multiple disasters
6) Other federal agency assistance programs

(b) Individual Assistance Program
1) Concentration of damage
2) Trauma
3) Special populations
4) Voluntary agency assistance
5) Insurance
6) Damaged residences – severity and number.

Appeals: The Governor or Tribal Chief Executive can appeal the denial of a major disaster or emergency declaration request. The appeal must be submitted within 30 days of the date of the denial letter and should include additional information justifying the need for supplemental federal assistance.

Post Declaration Actions

Add-ons: The Governor, the Governor's Authorized Representative (GAR), or Tribal Chief Executive can request designation of additional counties and programs within 30 days of the declaration or the end of the incident period, whichever is later. The Governor, GAR, or Tribal Chief Executive may submit an extension request within the 30-day period, providing a valid reason supporting an extension.

Cost Share Adjustments: The authority to adjust the Public Assistance cost share resides with the President. FEMA will recommend an increase in the federal share to not more than 90% for Public Assistance when a disaster is so extraordinary that actual federal obligations under the Stafford Act, excluding administrative cost, meet or exceed a qualifying threshold.[7]

Appeals: Post declaration determinations are generally subject to a one-time appeal. Such appeals must be submitted within 30 days of the denial letter. This deadline may be extended by FEMA, upon request of the State or Indian tribal government. Extension requests must be submitted within the 30 day deadline.

###

"FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards."

JAN 16 2016

The Honorable Rick Snyder
Governor of Michigan
111 South Capitol Avenue
Lansing, Michigan 48909

Dear Governor Snyder:

This is in response to your January 14, 2016, request for an expedited major disaster declaration for the State of Michigan as a result of water contamination described in your request as beginning on April 25, 2014, and continuing. You specifically requested Individual Assistance and Public Assistance, including direct federal assistance for Genesee County and Hazard Mitigation statewide.

Based on our review of all of the information available, a major disaster declaration under the Stafford Act is not appropriate. The request does not meet the legal definition of a "major disaster" under 42 U.S.C. § 5122, as implemented at 44 C.F.R. §§ 206.2(17). The incident was not a result of a natural catastrophe, nor was it caused by a fire, flood, or explosion.

This denial may be appealed within 30 days after the date of this letter. Any appeal pursuant to 44 CFR § 206.46, along with additional information justifying the appeal, should be submitted to the President through Andrew Velasquez III, Regional Administrator, FEMA Region V, located at 536 South Clark Street, Chicago, Illinois 60605.

Sincerely,

W. Craig Fugate
Administrator

DECLARED JANUARY 16, 2016

SUMMARY

STATE: Michigan

NUMBER: FEMA-3375-EM

INCIDENT: Contaminated Water

INCIDENT PERIOD: April 25, 2014, and continuing

DATE REQUESTED BY GOVERNOR: January 14, 2016

FEDERAL COORDINATING OFFICER: David G. Samaniego
National FCO Program

DESIGNATIONS AND TYPES OF ASSISTANCE:

The Department of Homeland Security, Federal Emergency Management Agency (FEMA), is authorized to provide appropriate assistance for required emergency measures, authorized under Title V of the Stafford Act, to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in the designated area. Specifically, FEMA is authorized to provide emergency protective measures (Category B), limited to direct federal assistance, under the Public Assistance program at 75 percent federal funding.

This emergency assistance is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

OTHER: Additional designations may be made at a later date if requested by the state and warranted by the results of further evaluation.

Note: This is an emergency declaration.

> > >
> > > LANSING, Mich. - President Barack Obama today declared a federal emergency in Flint, based on Gov. Rick Snyder's request made on Thursday,

January 14, providing resources to help provide residents access to safe, clean water.

Obama denied an additional request for a major disaster declaration.

"I appreciate the President approving my federal emergency request and supporting Flint during this critical situation," Snyder said. "I have pledged to use all state resources possible to help heal Flint, and **these additional resources** will greatly assist in efforts underway to ensure every resident has access to clean water resources."

Snyder received notice from FEMA this afternoon that emergency relief has been approved in the form of water, water filters, filter replacements and water test kits. The period of assistance is up to 90 days. Under the Stafford Act, resources totaling $5 million can be used for federal emergencies, and the state is required to match 25 percent. If the $5 million is exhausted, Congress has the option to approve additional funding.

The governor had also requested a major disaster declaration, which was denied based on the legal requirement that **under the Stafford Act disaster** relief is available only for natural events, fires, floods, or explosions. The state is now actively reviewing the process for appealing the disaster declaration denial.

Subject: NEWS UPDATE--Obama Grants Emergency Declaration For Flint

Saturday, January 16, 2016, 04:12 PM

Obama Grants Emergency Declaration For Flint

Flint's water crisis has been declared a federal emergency.

President Barack Obama on Saturday granted the request from Governor Rick Snyder to declare an emergency in the city as state and local officials, along with private citizens, have worked to provide safe drinking water to city residents.

The president did not grant a second request from Mr Snyder, however, to declare the city and Genesee County a major disaster area.

In a statement, Mr. Snyder, who made the request for the federal emergency declaration late Thursday night, said he appreciated Mr. Obama approving the request "during this critical situation. I have pledged to use all state resources possible to help heal Flint and these additional resources will greatly assist in efforts underway to ensure every resident has access to clean water resources."

The federal declaration means that up to $5 million in U.S. monies can go to help provide water, water filters, filter replacements and water test kits. The financial assistance is for 90 days.

The state must match 25 percent of the federal assistance, under requirements in federal law. Such a match could be included in a supplemental appropriation the state will seek from the Legislature to assist Flint.

Should the $5 million be exhausted, Congress can authorize additional funds for Flint.

The declaration comes as state and national outrage over the crisis, which resulted in Flint children suffering elevated lead levels after the corrosive water from the Flint River caused lead to leech from older plumbing systems, continues to grow.

The city had switched to using water from the Flint River, after it discontinued using the Detroit Water System, as Flint prepared to be part of a new water system that would draw water from Lake Huron. A decision to make that switch was made by the city's emergency manager at the time.

Subject: Saturday Jan. 16 update from the Flint Water Response Team

Categories: Policy

This daily update is being issued in order to provide the latest information regarding actions and available resources.

GOV. SNYDER'S REQUEST FOR FEDERAL EMERGENCY DECLARATION APPROVED
Today, President Obama declared a federal emergency in Flint, based on Governor Snyder's request made on Thursday, January 14th, but denied the request for a major disaster declaration.

Governor Snyder received notice from FEMA this afternoon that emergency relief has been approved in the form of water, water filters, filter replacements and water test kits. The period of assistance is up to 90 days. Under the Stafford Act, resources totaling $5 million can be used for federal emergencies, and the state is required to match 25 percent. If the $5 million is exhausted, Congress has the option to approve additional funding.

The governor had also requested a major disaster declaration, which was denied based on the legal requirement that disaster relief is available only for natural events, fires, floods, or explosions. The state is now actively reviewing the process for appealing the disaster declaration denial.

WATER RESOURCES
Water distribution efforts were expanded today with more than 20 water response teams going door to door to distribute safe water resources to the homes of Flint residents. These teams consist of state personnel and American Red Cross volunteers, including approximately 250 State of Michigan employees and their family members who will volunteer through Monday.

Since January 9, the following resources have been distributed to residents, both at the water resource sites and by the water response teams:

- More than 18,500 cases of water
- Nearly 46,000 filters
- More than 3,200 water testing kits

In addition to the water resource distribution sites, the water resource delivery teams have provided nearly 7,500 Flint homes with bottled water, filters, replacement cartridges and water testing kits since January 12. All members of the water response teams will be wearing official credentialed badges with a State of Michigan seal hologram for easy identification.

In addition to donated supplies, the State of Michigan has purchased the following resources, since

January 5:

- Nearly 45,000 cases of water
- Nearly 79,000 filters
- Nearly 19,000 water testing kitsReminders:

REMINDERS

- For Flint water assistance, donation, or volunteer information: Dial 211 or visit www.mi.gov/FlintWater
- Residents should install filters to their taps to ensure they have immediate and ongoing access to safe water.

WATER RESOURCE LOCATIONS
These sites are open seven days a week from 9 a.m. to 9 p.m. with the following resources:

- Bottled water
- Water filters
- Replacement cartridges
- Water testing kits

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Rd.
Flint, MI 48506

Fire Station #6
716 West Pierson Rd.
Flint, MI 48505

Fire Station #8
202 East Atherton Rd.
Flint, MI 48507

We will continue to work to improve the water situation in Flint. Community members and local officials are working together to make sure we hear and respond to concerns. Governor Snyder will continue to keep you updated on the latest news and information. **If you don't find the resources you need by dialing 211 please call the Governor's office directly at 517-335-7858.**

- Over 100 MSP volunteers have reported and worked on the Flint Water Response teams.
- 25 MSP lieutenants and troopers have been coordinating all operational efforts for the Flint Water Response teams in cooperation with state, county, and local partners.
- MSP is also coordinating with the Red Cross Water Response Teams.

MDOC

- The Michigan Department of Corrections has 26 staff and 14 vehicles dedicated (on site) to the Flint Water Crisis response, additionally three MDOC staff are assigned to the SEOC location.
- The resources requested/dedicated currently is as follows:
- (26) MDOC Employees
- (6) Large Box trucks
- (5) 15 passenger vans
- (2) Pick-up trucks
- (2) enclosed transport trailers
- (1)Handicap Accessible Van
- (1)20 passenger Shuttle Bus
- (1) 53' Refrigerated Semi-trailer
- (4) Pallet Jacks for unloading at storage facility

Michigan National Guard

- The request for Guard support is generated by the executive order issued by Governor Snyder on 12 JAN 16. The Michigan State Police are responsible for coordinating all state efforts, including the Michigan National Guard, to assist the City of Flint and Genesee County.
- Members of the Guard will be staged at the 5 water resource sites at fire stations assisting with operations; there are no plans to go door to door.
- The first group of Michigan Guard arrived Wednesday morning to conduct assessment and get acclimated; the full contingent of approximately 30 Soldiers is due to arrive Friday morning.
- The assistance provided by the Michigan Guard allows other agencies to expand their operations and provide even more support to the citizens of Flint.

Human Services

- Provided procurement, acquisition, delivery, and working on disbursement, of hundreds of thousands of water filtration devices.
- MDHHS have provided staff for Flint Water Response Teams 1/12/16 through 1/15/16.
- Continue to provide two locations as points of distribution sites for water filtration devices.
- Michigan Community Service Commission continues to participate heavily in donation management and volunteer coordination efforts at the local level.
- Continue to provide two dedicated PIOs to the event.
- Have four staff dedicated to this event in the SEOC.
- *Local MDHHS staff remains active in human service coordination at the local EOC.*
- CHEEC remains active in support to the SEOC and Local Health Dept. regarding this event.

American Red Cross

- Convened meetings of local NGOs
- Provided volunteers for the sheriff's distribution effort
- Provided volunteers to operate PODs at 5 fire Stations
- Stood up a formal Disaster Relief Operation and established headquarters in Flint
- Provided volunteers to operate PODs at 9 churches
- Provided volunteers to manage warehouse and inventory operations
- Established operation to assemble water test kits

- Provided volunteers to assemble water test kits
- Operating a Volunteer Reception Center
- Providing volunteers for the Water Response Teams
- Providing a logistics-planning consultant
- Coordinating and providing meals for the staff and volunteers assigned to the emergency response.

Adult & Aging Services

- Coordinate with Valley Area Agency on Aging (VAAA) who are continuing to take calls from seniors and caregivers needing water or filters. They are providing this information to the local EOC each afternoon for follow-up.

- Provided over 2,000 addresses of homebound, frail, or otherwise at-risk seniors living in Flint. AASA has in turn forward these addresses to MSP-GIS to overlay their heat map and for local follow-up.

- VAAA local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

DTMB updates

- Leased warehouse space for supply distribution
- Credentialing badges for volunteers
- Located JIC in Flint State Office Building with equipment
- SMART devices for water response teams (30 to-date additional quantities requested)
- Procurement of trucks, water, water filters, cartridges and plumbing supplies for pilot water program
- *Printing and delivery of water analysis test forms and informational palm cards*
- Seven drivers with trucks transporting supplies throughout the city
- Temporary fuel cards

Michigan Department of Environmental Quality

- Facilitate supply of water test kits to all Flint Water Treatment Plant customers in collaboration with City and County personnel
- Laboratory services to process samples for lead and copper analysis
- Staffing of SEOC during all operation hours to coordinate agency services, capabilities, activities and respond to resource and information requests
- Staff support at the Joint Information Center
- Coordination and cooperation with various state agencies for sampling plans and implementation strategies for all state regulated facilities to include the provision of resources
- Staffing at the local level to assist with resource and response management
- Verify NSF/ANSI 53 certifications of products delivered to citizens
- Production of a water test sampling video for public guidance

MDARD

- Updated requirements for food establishments using City of Flint water; mailed on 1/14 and includes offer to collect samples for free.
- Visiting food businesses to ensure they understand requirements.
- Will be visiting restaurants, in coordination with Genesee County Health Department
- Reached out to veterinary clinics and coordinated with the Genesee County Animal Control to contact animal related businesses to see what water system they're on and ensured that they were familiar with the Flint water situation.
- Reached out to Flint Food Works / Food Hub and the Food Bank of Eastern Michigan and offered additional assistance.

MDHHS – Health

- Activated the Community Health Emergency Coordination Center (CHECC)
- Staffing a hotline to field calls that were to be sent to the Local Health Department while the LHD is closed for furlough, weekends, and holidays
- Developing a nutritional plan for education and messaging
- Gathering information in preparation for disaster behavioral health response, if a presidential declaration is approved.
- Epidemiology branch continues to assist work with local health department on blood lead testing and case management
- Communicating to healthcare providers through WebMD Medscape.
- Coordinating health information messaging with the JIC.

MDLARA

- Ongoing effort to reached out to all licensed Healthcare facilities in the affected area to gather information and access any needs they may have, to include: Child Care facilities, Adult Foster Care, and others.
- LARA and it's Bureau of Construction Codes - Plumbing Division will complete the "Freeman School Faucet Replacement Pilot." This weekend to include:
    - On-site assessment plumbing to identify plumbing components of concern and prioritize sample sites.
    - Identify and replace faucets, lines, connectors with lead free components.
- Re-collect water samples to test and analyze.
- Offered to assist with lab testing, utilizing the MIOSHA Lab and Scientists as appropriate in coordination with DEQ.
- Provided MDHHS with a list of licensed healthcare facilities to coordinate the distribute nutritional information.
- Worked with the Office of New Americans to assist with translation of messaging

MDEQ

- Facilitating supply of water test kits to all Flint Water Treatment Plant customers in collaboration with City and County personnel.
- Laboratory services are processing samples for lead and copper analysis.
- Providing staff at SEOC during all operational hours to coordinate agency services, capabilities, activities and response to resource and information requests.
- Providing staff support at the Joint Information Center.

- Coordination and cooperation with various state agencies for sampling plans and implementation strategies for all state regulated facilities to include the provision of resources.
- Staffing at the local level to assist with resource and response management
- Verified NSF/ANSI 53 certifications of products delivered to citizens
- Produced a video of a water test sampling video for public guidance

STATE OF MICHIGAN

FEDERAL EMERGENCY DECLARATION FACT SHEET

JANUARY 16, 2016

STATE: Michigan

NUMBER: FEMA-3375-EM

INCIDENT: Contaminated Water

INCIDENT PERIOD: April 25, 2014, and continuing

FEDERAL COORDINATING OFFICER: David G. Samaniego
National FCO Program

DESIGNATIONS AND TYPES OF ASSISTANCE:

The Department of Homeland Security, Federal Emergency Management Agency (FEMA), is authorized to provide appropriate assistance for required emergency measures, authorized under Title V of the Stafford Act, to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in the designated area. Specifically, FEMA is authorized to provide emergency protective measures (Category B), limited to direct federal assistance, under the Public Assistance program at 75 percent federal funding.

This emergency assistance is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

OTHER: Additional designations may be made at a later date if requested by the state and warranted by the results of further evaluation.

Note: This is an Emergency Declaration.

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R., §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. *Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).*
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 C

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 C

6. Declaration Request For: ☒ Major Disaster (Stafford Act Sec. 401) ☐ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date Apr 25, 2014 End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide
☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds
☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm
☒ Other (please specify) Contamination and Damage to Public Water System

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

On April 25, 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under age 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting elevated blood lead levels. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed Requested _____ Start _____ End _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)
Expedited Major Disaster Declaration Request

☐ Public Assistance Dates Performed Requested _____ Start _____ End _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)
Expedited Major Disaster Declaration Request

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☒ Crisis Counseling Program ☒ Disaster Unemployment Assistance

☒ All ☒ Disaster Case Management ☒ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint; County of Genesee

We request all available programs. The Individual Assistance programs will be needed to assist residents/water service customers with an estimated cost as much as $54,619,500 to repair damaged lead service lines on private property. The damage estimate is based on damage assessments conducted by the City of Flint with the Genesee County Equalization Department.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☒ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☒ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs which could be in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, cartridges, and water test kits. Damage assessments conducted by the City of Flint with the Genesee County Equalization Department concluded that the total potential damages to the City of Flint water distribution infrastructure is estimated at $712,800,000.

For States, Identify Federally-recognized Tribes included in the requested counties (if applicable).
N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☐ I do not anticipate the need for debris removal.

☒ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:
Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).
N/A

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☒ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see Enclosure C; Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

Governor's or Tribal Chief Executive's Signature

Jan 14, 2016
Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

Hi Nicole,

Dan and I are on the way to Lansing tonight.

I believe you've already spoken to Dan, but I wanted to check in--if there are any immediate needs from me--media monitoring, messaging, etc., let me know. We'll start out in Lansing, but if it's more beneficial for me/us to be in Flint, I think we can make that work.

Talk to you soon,
Cassie

I have just been advised thru Ms. Jeanette Doll (DTMB-Office of Infrastructure Protection) at the SOEC that there is a current Distribution Denial of Service (DDOS) attack on the State of Michigan Web Site. This is apparently connected to the Flint Water Supply event. DTMB is aware and working on the situation at this time.

I will send out as soon as possible if more information becomes available and notification is warranted.

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 (

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date Apr 25, 2014 End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Contamination and Damage to Public Water System

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

On April 25, 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under age 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting elevated blood lead levels. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)
N/A

☐ Public Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)
N/A

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated cost as much as $54,619,500 over a period of 1 year to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee

We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs which could be in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, filter cartridges, and water test kits.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

Governor's or Tribal Chief Executive's Signature

Jan 14, 2016
Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

DECLARED JANUARY 16, 2016

SUMMARY

STATE: Michigan

NUMBER: FEMA-3375-EM

INCIDENT: Contaminated Water

INCIDENT PERIOD: April 25, 2014, and continuing

DATE REQUESTED BY GOVERNOR: January 14, 2016

FEDERAL COORDINATING OFFICER: David G. Samaniego
National FCO Program

DESIGNATIONS AND TYPES OF ASSISTANCE:

The Department of Homeland Security, Federal Emergency Management Agency (FEMA), is authorized to provide appropriate assistance for required emergency measures, authorized under Title V of the Stafford Act, to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in the designated area. Specifically, FEMA is authorized to provide emergency protective measures (Category B), limited to direct federal assistance, under the Public Assistance program at 75 percent federal funding.

This emergency assistance is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

OTHER: Additional designations may be made at a later date if requested by the state and warranted by the results of further evaluation.

Note: This is an emergency declaration.

1. 11,324 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
    a. Number of cases of water 20,876
    b. Filters 47,935
    c. Filter cartridges 167,401
    d. Test kits 3,322

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 57,456 (additional 12,884 donated)
    b. Filters 108,520
    c. Filter cartridges 239,081
    d. Test kits 28,901

5. Teams going out tomorrow:
    a. 10 State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
    b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Subject: RE: Notification of an Emergency Declaration for the State of Michigan (FEMA-3375-EM-MI)

Good morning Bentley.

There isn't anything you'll need to do on the money side. If we reach the $5m limit, FEMA will send a notification letter to Congress addressed to the House and Senate leadership and leadership of the Authorizing and Appropriations Committees, and no action is required from Congress.

Dan Shulman

INCIDENT PERIOD: April 25, 2014, and continuing

FEDERAL COORDINATING OFFICER: David G. Samaniego
National FCO Program

DESIGNATIONS AND TYPES OF ASSISTANCE:

The Department of Homeland Security, Federal Emergency Management Agency (FEMA), is authorized to provide appropriate assistance for required emergency measures, authorized under Title V of the Stafford Act, to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in the designated area. Specifically, FEMA is authorized to provide emergency protective measures (Category B), limited to direct federal assistance, under the Public Assistance program at 75 percent federal funding.

This emergency assistance is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

OTHER: Additional designations may be made at a later date if requested by the State and warranted by the results of further evaluation.

NOTE: This is an Emergency Declaration.

Attachments: LeadInWaterInfoSheet.pdf

Hi Nicole are you in the JIC today? Have you seen these requested changes? I'm not sure I agree with them. I think the request about adding in lead in other parts of the country is not of concern to this particular event and undermines what we are doing specifically for Flint. The flyer is labeled with the Flint Water Response Team logo, I don't think we need to worry about other areas outside of Flint.

I'd also keep from moving the healthy diet section because it stands out anyway. It's a unique message compared to the other parts of this flyer.

I also worry that this thing is going to be edited to death.

Cc: Wells, Eden (DHHS) <WellsE3@michigan.gov>
Subject: Re: FAQ/Fact Sheet

I would switch out the "Other sources of lead in your home" with the "Healthy diet" section. This makes the healthy diet section bigger. I would also change the header of "Other sources of lead" to something like "Lead info" and open with something like "The Flint water response team is focused on the lead in water crisis. There are other sources of lead scientists encourage people in all parts of the country to be aware of".

See how that looks and then we can chat again.

FLINT WATER RESPONSE TEAM

www.michigan.gov/flintwater

LEAD IN FLINT WATER

GENERAL INFORMATION

- Lead is hard to avoid completely. It can be found in water pipes and brass water faucets, old paint, in dirt, at some job sites, and in metal used for some hobbies.
- The amount of lead found in some Flint homes' drinking water could affect kids' health.
  - o Even small amounts of lead can harm kids' health because they are still growing.
  - o Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using a National Sanitation Foundation (NSF)-approved filter.
  - o You can receive a free a NSF-approved filter if you use City of Flint water.
  - o Call 2-1-1 to find out where you can pick up a free water filter.
- Some filters can remove up to 99 percent of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
  - o Run only cold water through the filter.
  - o Change the filter cartridge as often as the instructions say.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop.

There are a number of steps you can take to keep yourself and your family healthy. Use the tips below to learn more about how to stay healthy:

LEAD IN WATER

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- You can't see, smell, or taste lead in water.
- Lead won't change the color of your water.
- The only way to know what your home's lead levels are is by having your water tested.

LEAD IN BLOOD

- If your children live in Flint or go to school or childcare in the City of Flint, they should be tested for high blood-lead levels.
- You should contact your doctor about testing.
- Testing is available for free at the Genesee County Health Department. Call 2-1-1 if you need help getting there.
- If you are pregnant or nursing, and you have tested negative for high blood-lead levels, it is safe to breastfeed.
- If you are pregnant or nursing and have tested positive for high blood-lead levels, talk to your doctor about the safety of breastfeeding.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

WATER FILTERS

- Get your water tested. It's free. Call 2-1-1.
- Use a water filter. Call 2-1-1 for a free filter.
- If you do not have a water filter, use bottled water for drinking and mixing formula.
- Use cold, filtered water for cooking.
- Wash fruits and vegetables with filtered water.
- If you must use unfiltered water, run the water for at least five minutes before you use it. To save time and water in the future, it's a good idea to fill up as many containers as you can once you've run your water for five minutes.

CLEANING

- Wash dishes, bottles and toys with unfiltered soapy water and dry before use.
- Use door mats. Take your shoes off when indoors.
- It is safe to use unfiltered tap water to mop floors and wipe down countertops.
- Vacuuming carpets may pull more lead dust to the surface. Use a non-motorized sweeper to clean carpets.
- Clean windowsills and play areas often with paper towels and soapy water.
- It is safe to wash clothes in your washer and dryer.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

IN THE BATHROOM

- Use filtered tap water to brush your kids' teeth.
- Adults can use unfiltered tap water to brush their teeth.
- You can use unfiltered tap water to shower or bathe, but don't let kids drink the water when they play in the tub.
- Studies done by the Centers for Disease Control and Prevention show that parents can continue bathing their children in the tub but bath time should be used for bathing only, rather than allowing children to play in the water for a long time.
- Lead will not cause rashes or other skin problems. However, if levels of chlorine or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

CARING FOR PETS

- Use filtered tap water for your family pets' water bowls.
- You can use unfiltered tap water to bathe your pets.
- If you notice your pet acting differently than normal, contact your vet.

OTHER SOURCES OF LEAD IN YOUR HOME

LEAD PAINT

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

DIRT

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.

DUST

- The dust in your home can have tiny amounts of lead from paint and dirt.

HOBBIES AND JOBS

- Solder, fishing sinkers, bullets, and stained glass framing materials are some items that may contain lead. You could also track home lead dust from your job site.

HEALTHY DIET

- Eat foods high in iron, calcium and vitamin C.
- Wash hands with soap and warm water before eating.
- If you need fresh and healthy food, call the WIC office at 810-237-4537, or for SNAP food assistance apply at www.michigan.gov/mibridges or visit your local Michigan Department of Health and Human Services office.

GOOD SOURCES OF IRON INCLUDE:

- Lean red meats, fish, and chicken
- Cereals with added iron
- Dried fruits (raisins, prunes)

GOOD SOURCES OF CALCIUM INCLUDE:

- Milk
- Yogurt
- Cheese
- Green leafy vegetables (spinach, kale, collard greens)

GOOD SOURCES OF VITAMIN C INCLUDE:

- Oranges, orange juice
- Grapefruit, grapefruit juice
- Tomatoes, tomato juice
- Green peppers

HAVE QUESTIONS?

- For more information about protecting yourself and your family from lead, visit www.michigan.gov/flintwater.
- To find out where you can get a free water filter, call 2-1-1.
- For a free water test, call 2-1-1.
- For more information about lead in your home and what you can do, call the Michigan Department of Health and Human Services at 1-800-648-6942.

Lisabeth, Nicole (MSP)

From: Governor's Office <governorsoffice@govsubscriptions.michigan.gov>
Sent: Sunday, January 17, 2016 3:09 PM
To: Lisabeth, Nicole (MSP)
Subject: Sunday Jan. 17 update from the Flint Water Response Team

This daily update is being issued in order to provide the latest information regarding actions and available resources.

WATER RESOURCES DISTRIBUTION
To date, more than 11,300 homes have been visited by the water response teams, comprised of local and state personnel, the American Red Cross and volunteers. Over the course of the holiday weekend, Flint residents and approximately 300 state employees and their family members are volunteering to help increase door to door efforts.

The following resources were distributed from Jan. 9 - Jan. 16 through door to door efforts and at water resource centers:

- 20,876 Cases of bottled water
- 47,935 Water filters
- 167,401 Water filter replacement cartridges
- 3,322 Water testing kits

To help enhance the water testing process, Flint residents can drop-off water samples to the five water resource sites. Samples will only be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

REMINDERS

- For Flint water assistance, donation, or volunteer information: Dial 211 or visit www.mi.gov/FlintWater
- Residents should install filters to their taps to ensure they have immediate and ongoing access to safe water. Only run cold water through the water filter and use filtered water for drinking and cooking.

WATER RESOURCE LOCATIONS
These sites are open seven days a week from 9 a.m. to 9 p.m. with the following resources:

- Bottled water
- Water filters
- Replacement cartridges for water filters
- Water testing kits pick-up
- Drop-off location for water testing kits

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Rd.
Flint, MI 48506

Fire Station #6
716 West Pierson Rd.
Flint, MI 48505

Fire Station #8
202 East Atherton Rd.
Flint, MI 48507

We will continue to work to improve the water situation in Flint. Community members and local officials are working together to make sure we hear and respond to concerns. Governor Snyder will continue to keep you updated on the latest news and information. **If you don't find the resources you need by dialing 211 please call the Governor's office directly at 517-335-7858.**

Flint Water Emergency Response
General Talking Points

NOT INTENDED TO BE DISSEMINATED TO THE MEDIA OR PUBLIC IN THIS FORMAT

Background

- On January 16, President Obama approved Governor Snyder's request for a federal emergency in Flint. This action will provide emergency relief in the form of bottled water, water filters, filter replacements, and water test kits. The period of assistance is up to 90 days.
    - Governor Snyder had also requested a major disaster declaration, which the President denied based on the legal requirement that under the Stafford Act disaster relief is available only for natural events, fires, floods, or explosions. The state is reviewing the process for appealing the disaster declaration denial.
- The State Emergency Operations Center in Lansing has been activated since January 5 and continues to be staffed seven days a week by members of state agencies and other partners to coordinate the state's response.

Current Status/Update

- The state continues to bring all state resources to bear to protect public health and safety. One of our most important messages and priorities continues to be making sure residents are aware of the information and free resources available to them, which include bottled water, water filters, replacement cartridges, water test kits.
- The one-stop shop for finding all these resources is by visiting www.michigan.gov/FlintWater or calling 2-1-1.
- Including today's anticipated activity, water response teams, who are going door-to-door, have distributed resources to nearly 7,000 Flint homes providing residents with free bottled water, filters, replacement cartridges, and water testing kits.

- More than 12,000 homes have been visited by the water response teams, which are a collaborative effort comprised of local and state personnel, American Red Cross personnel, and volunteers.

- The Michigan National Guard has been activated to assist with distribution efforts at the five water resource sites at fire stations in the city. Starting tomorrow, the number of National Guard members will be further increased to approximately 70 National Guard members handing out resources at the fire stations in the city.

- From January 9 - 16, the following resources have been distributed to residents, both at the water resource sites and by the water response teams:

    - Nearly 20,900 cases of water
    - Nearly 48,000 water filters
    - More than 3,300 water testing kits

- To help enhance the water testing process, Flint residents can now drop-off water samples to the five water resource sites at fire stations. Samples will only be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

- Water resource sites are open daily from 9 a.m. to 9 p.m. and are located at:

    Fire Station #1
    310 East 5th St.
    Flint, MI 48502

    Fire Station #3
    1525 Martin Luther King Ave.
    Flint, MI 48503

    Fire Station #5
    3402 Western Road
    Flint, MI 48506

    Fire Station #6
    716 West Pierson Road
    Flint, MI 48505

    Fire Station #8
    202 East Atherton Road
    Flint, MI 48507

Filters

- When used properly water filters remove 99% of lead in water. Residents are urged to use filtered water for drinking, food preparation, brushing teeth, and watering pets. Unfiltered water may be used for bathing and cleaning.

- One filter and one replacement cartridge are being provided per household initially. Each filter is good for approximately 100 gallons of water. The filter has an indicator on it that will turn from green to red when it needs to be replaced.

- The filters do have a five-year, non-replaceable battery that operates the indicator light.

- There is a detailed video posted on www.michigan.gov/flintwater that explains how to properly install a water filter cartridge.

Resources for homebound individuals

- 2-1-1 is collecting a list of individuals needing home delivery of water resources and is providing that information to the Genesee County Sheriff's Department, who is making these deliveries.

- The Plumbers and Pipefitters Union has agreed to provide free water filter installation to homebound residents needing assistance. This is being coordinated through 2-1-1.

Outside Support Efforts – Volunteers and Donations

- There has been great cooperation on the ground in Flint by many local agencies, from the city and county to churches and public, private, and non-profit groups to help with this effort.

- The American Red Cross, United Way, 2-1-1, and many other organizations have assisted with water resource distribution efforts and the donations management process.

- Volunteers and donations are being coordinated through 2-1-1, in cooperation with the American Red Cross. Persons/organizations wishing to donate 100 cases of water or less can be taken to the American Red Cross located at 1401 S. Grand Traverse in Flint.

- Volunteers can also report to the American Red Cross for processing.

FLINT WATER RESPONSE TEAM

www.michigan.gov/flintwater

LEAD IN FLINT WATER

GENERAL INFORMATION

- Lead is hard to avoid completely. It can be found in water pipes and brass water faucets, old paint, in dirt, at some job sites, and in metal used for some hobbies.
- The amount of lead found in some Flint homes' drinking water could affect kids' health.
  - Even small amounts of lead can harm kids' health because they are still growing.
  - Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using a National Sanitation Foundation (NSF)-approved filter.
  - You can receive a free a NSF-approved filter if you use City of Flint water.
  - Call 2-1-1 to find out where you can pick up a free water filter.
- Some filters can remove up to 99 percent of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
  - Run only cold water through the filter.
  - Change the filter cartridge as often as the instructions say.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop.

There are a number of steps you can take to keep yourself and your family healthy. Use the tips below to learn more about how to stay healthy:

LEAD IN WATER

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- You can't see, smell, or taste lead in water.
- *Lead won't change the color of your water.*
- The only way to know what your home's lead levels are is by having your water tested.

LEAD IN BLOOD

- If your children live in Flint or go to school or childcare in the City of Flint, they should be tested for high blood-lead levels.
- You should contact your doctor about testing.
- Testing is available for free at the Genesee County Health Department. Call 2-1-1 if you need help getting there.
- If you are pregnant or nursing, and you have tested negative for high blood-lead levels, it is safe to breastfeed.
- If you are pregnant or nursing and have tested positive for high blood-lead levels, talk to your doctor about the safety of breastfeeding.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

WATER FILTERS

- Get your water tested. It's free. Call 2-1-1.
- Use a water filter. Call 2-1-1 for a free filter.
- If you do not have a water filter, use bottled water for drinking and mixing formula.
- Use cold, filtered water for cooking.
- Wash fruits and vegetables with filtered water.
- If you must use unfiltered water, run the water for at least five minutes before you use it. To save time and water in the future, it's a good idea to fill up as many containers as you can once you've run your water for five minutes.

CLEANING

- Wash dishes, bottles and toys with unfiltered soapy water and dry before use.
- Use door mats. Take your shoes off when indoors.
- It is safe to use unfiltered tap water to mop floors and wipe down countertops.
- Vacuuming carpets may pull more lead dust to the surface. Use a non-motorized sweeper to clean carpets.
- Clean windowsills and play areas often with paper towels and soapy water.
- *It is safe to wash clothes in your washer and dryer.*

FLINT WATER RESPONSE TEAM

www.michigan.gov/flintwater

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

IN THE BATHROOM

- *Use filtered tap water to brush your kids' teeth.*
- Adults can use unfiltered tap water to brush their teeth.
- You can use unfiltered tap water to shower or bathe, but don't let kids drink the water when they play in the tub.
- Studies done by the Centers for Disease Control and Prevention show that parents can continue bathing their children in the tub but bath time should be used for bathing only, rather than allowing children to play in the water for a long time.
- Lead will not cause rashes or other skin problems. However, if levels of chlorine or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

CARING FOR PETS

- *Use filtered tap water for your family pets' water bowls.*
- You can use unfiltered tap water to bathe your pets.
- If you notice your pet acting differently than normal, contact your vet.

OTHER SOURCES OF LEAD IN YOUR HOME

LEAD PAINT

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

DIRT

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.

DUST

- The dust in your home can have tiny amounts of lead from paint and dirt.

HOBBIES AND JOBS

- Solder, fishing sinkers, bullets, and stained glass framing materials are some items that may contain lead. You could also track home lead dust from your job site.

HEALTHY DIET

- Eat foods high in iron, calcium and vitamin C.
- Wash hands with soap and warm water before eating.
- If you need fresh and healthy food, call the WIC office at 810-237-4537, or for SNAP food assistance apply at www.michigan.gov/mibridges or visit your local Michigan Department of Health and Human Services office.

GOOD SOURCES OF IRON INCLUDE:

- Lean red meats, fish, and chicken
- Cereals with added iron
- Dried fruits (raisins, prunes)

GOOD SOURCES OF CALCIUM INCLUDE:

- Milk
- Yogurt
- Cheese
- Green leafy vegetables (spinach, kale, collard greens)

GOOD SOURCES OF VITAMIN C INCLUDE:

- Oranges, orange juice
- Grapefruit, grapefruit juice
- Tomatoes, tomato juice
- Green peppers

HAVE QUESTIONS?

- For more information about protecting yourself and your family from lead, visit www.michigan.gov/flintwater.
- To find out where you can get a free water filter, call 2-1-1.
- For a free water test, call 2-1-1.
- For more information about lead in your home and what you can do, call the Michigan Department of Health and Human Services at 1-800-648-6942.

Subject: RE: FAQ/Fact Sheet

I'll do whatever is decided. It doesn't matter to me one bit. I just wanted to make sure that this aligns with everything we've put out. I haven't seen anything else referring to sources of lead across the country.

As far as the nutrition section, I'm also just giving design recommendations. Whatever you guys want.

> Hi Nicole are you in the JIC today? Have you seen these requested changes? I'm not sure I agree with them. I think the request about adding in lead in other parts of the country is not of concern to this particular event and undermines what we are doing specifically for Flint. The flyer is labeled with the Flint Water Response Team logo, I don't think we need to worry about other areas outside of Flint.

Subject: SEOC Update 1/17/16 - Flint Water - Limited Distribution

Update 1/17/16 – 13th Day (12th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs), PODs
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work to bring FEMA IMAT personnel up to date following the Presidential Emergency declaration.

Attached Documents:

- SitRep 12

Status on Governor's request letter to the President:

- Emergency declaration received.
  - Limited to direct assistance so we will need to ask for the Individual Housing Program but that is something I will work on with FEMA.
- Major disaster declaration denied. The appeal is being developed with a draft to Paul Smith by later afternoon 1/18/16.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.

- We will have 12 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.

Items to Note

- Deployed 11 state/local teams and 10 ARC Flint Water Response Teams to the field today.
  - 4,963 homes visited today.
- DTMB is working with DSEMIC and NC3 to monitor social media for information on cyber-attack yesterday.

01/16/16

- Approximately 5:00PM, Michigan.gov began to experience slowness in web page load time. Approximately 10 minutes later the Michigan.gov site became inaccessible caused by of a denial of service attack.
- IBM team was able to implement a mitigation strategy to stop the attack that began at 5:00PM. At 6:24PM the michigan.gov websites were again available to the public.
- Approximately 7:30PM, a new attack was initiated on the michigan.gov environment. The attack focused on the DNS servers and resulted in michigan.gov becoming inaccessible. Additionally, due to the nature of the attack other IBM customers were affected as well. IBM was able to implement a new mitigation strategy that resulted in the excessive traffic being blocked. At 7:53PM the websites were restored to normal operation.
- Shortly after the michigan.gov websites were restored, the State of Michigan was notified by our internet service providers that a DDoS attempt was made against our SOM DTMB servers in the external DMZ. Once detected, this attack was blocked and Michigan Cyber Security saw no signs of any other types of attacks.

01/17/16

- Genesee County was unable to access MiCIMS due to the State increasing filters. Michigan Cyber Security made adjustments to filter settings and their access to MiCIMS was restored.
- DTMB reached out to the City of Flint CTO, Paul Knific, offering any support they need. Right now they feel they have bigger issues than trying to get some of the things back online.

We currently do not have any additional information on the attacks on the City of Flint (cityofflint.com) or Flint Township Police (flinttownshippolice.org) websites. We'll continue to pass information along as we receive it.

- Information reported to the JIC:
  - As of 1/17/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 16,353 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is from the data we received from prior to the SEOC activation (trying to validate the data) plus the PODs and door to door operations since activation.

2. Distributed:
   a. Number of cases of water 27,195
   b. Filters 50,432
   c. Filter cartridges 168,605
   d. Test kits 4,861

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 57,456 (additional 12,884 donated)
    b. Filters 108,520
    c. Filter cartridges 239,081
    d. Test kits 28,901

5. Teams going out tomorrow:
    a. 12 State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
    b. 12 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Facilitated activation of the Genesee County/Genesee Health System MOU for mental health services.
- Coordinated supplies for distribution to students at the U of M Flint campus.
- Still concerned about people going to every fire station and collecting water/filters.
- Coordinated trash pickup at Fire Station PODs with the City Liaison officer.
- Coordinated hotshot deliveries of supplies to home bound population.

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/16/16 – 12th Day (11th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to prepare for engagement following the Presidential Emergency declaration

Attached Documents:

- SitRep 11

Status on Governor's request letter to the President:

- Emergency declaration received. Federal Coordinating Officer (FCO) is David Samaneigo (Sam) who has been my LNO from FEMA. We began discussions on a transition to FEMA support last night. His team is headed to MI at this time and we will have our first coordination meeting on Sunday.
- The request for a Declaration of a Major Disaster was denied. FEMA advised this event does not fit the legal definition of a major disaster (natural incident or fire, flood, or explosion). This information has been provided since prior to the event to elected officials in Flint and the

legislature. We are reviewing the chances for an appeal and I have already discussed this with the FCO.

Key items for tomorrow to note:

- The logistics plan will be fully executed tomorrow with all teams.
  - [redacted]
  - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.
- I will be back on duty Sunday.
- We have been working with some of the churches. Contact was made with 14 churches for Sunday distributions. Interaction with the pastors has been very positive.
- A logistics briefing will be provided to see how many more teams we can put in the field.

Items to Note

- LT Gov visited the local EOC today; discussed local EOC operations.
- Deployed 11 state teams and 10 ARC Flint Water Response Teams to the field today.
- DEQ sampling kits are now being received at the PODs.
- DEQ sampled two Head Start facilities and worked with GIS to obtain future sample sites.
- The Freeman School pilot was delayed due to some parts not arriving as scheduled. Testing was to be done Sunday but may not occur until Monday.
- NG will have a total of 78 personnel in the PODs for distribution. Mission has not changed.
  - NG soldiers have been in the PODS. 38 more processing in tomorrow with start date of 1/18 in the PODS. The TAG and I will be discussing future use of NG personnel door to door next week.
- Information reported to the JIC:

  - As of 1/16/16 7pm (start date was Tuesday, 1/12/16)

1. 11,324 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is from the data we received prior to the SEOC activation plus the PODs and door to door operations since activation. 3,850 homes were visited today (4,000 was the goal).

2. Distributed:
   a. Number of cases of water 20,876
   b. Filters 47,935
   c. Filter cartridges 167,401
   d. Test kits 3,322

3. Total number of customers on the Flint water system
   a. 29,944 paying customers
   b. 45,000 hookups (This is our high end target #)
   c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
   a. Cases of water 57,456 (additional 12,884 donated)
   b. Filters 108,520
   c. Filter cartridges 239,081
   d. Test kits 28,901

5. Teams going out tomorrow:

b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Provided direction to Operations and Logistics Section to initiate water sample collection at PODs.
- Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional churches were supplied with water, filters and test kits.
- Still concerned about people going to every fire station and collecting water/filters.
- Station #6 (POD) has associated safety concerns due to proximity of street and lack of suitable parking. We are working to resolve.

Subject: SEOC Update 1/15/16 - Flint Water - Limited Distribution

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/15/16 – 11th Day (10th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Pilot the logistics plan and adjust as needed
- Continue with door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to ensure we get a Presidential Declaration of a Major Disaster and Emergency

Attached Documents:

- SitRep 10

Status on Governor's request letter to the President:

- All documents for the presidential request have been submitted to FEMA. Numerous calls and meetings took place between me and FEMA today.
- When we get the declaration(s) ... I will set up a legislative/congressional call to explain and provide bullet points as to what programs we will received. The Federal Coordinating Officer assigned will also be with me to answer questions. This has helped in the past.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - team.
  - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.
  - A pilot team was used to test our logistics plan today and with 60% strength they had 160% output (830 homes).

- I will be off tomorrow but available by cell. Tony Katarsky will be SEOC State Director. I will be back in on Sunday.

Items to Note

- LT Gov visited the local EOC and SEOC today. He was able to hear our final briefing for the day.
- Held a short session managing stress with SEOC staff. Two handouts were put in MICIMS for all state and local personnel to view.
- Deployed 10 state teams and 5 ARC Flint Water Response Teams to the field today.
- Standing requirements were created for the JIC so we can get information to the media every day. Below are the current ones we have in place and we should have something out tonight according to the JIC.

    - As of 1/15/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 7474 homes visited by the FWRTs. We believe we have ~24,000 homes with filters but are trying to validate that information. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
    a. Number of cases of water 18,576
    b. Filters 45,916
    c. Filter cartridges 165,382
    d. Test kits 3,217

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 44,688 (additional 12,884 donated)
    b. Filters 78,520
    c. Filter cartridges 163,081
    d. Test kits 18,761

5. Teams going out tomorrow:

    b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Home Deliveries:

- Still receiving lists from the Valley Area Agency on Aging (VAAA) on home deliveries and forwarding these to the Sheriff's office. They are going through a lot of homes. 120 out of 125 homes were completed yesterday.

Operations:

- We sent staff to visit Fire Station 6 and the warehouse today. Fire station 6 traffic was congested and that was during a "slow" time. The National Guard is identifying what is needed to alleviate this. MSP is working on providing uniform presence as needed. An additional iPad at each location will hopefully help relieve the amount of time that people are spending at the distribution sites.

- Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional requests from churches were made and I approved the locations so they could be ready for Sunday. Lt. Roach was told by one of the pastors that he met with the Gov today and expressed how much he appreciated the efforts put forth. We should have 14 for this Sunday. We are working on how we can increase this output.
- Still concerned about people going to every fire station and collecting water/filters. NG personnel observed vehicles with several cases of water an overheard saying they were heading to the next station. Some people were helping themselves and taking more than one case at a time. Per the NG they cannot physically stop people from doing so. The NG is going to try to change staging in the fire stations to try to prevent this.
- Flint PD is going to check in every day with the EOC and provide a specific contact person. They are also going to help with traffic issues at the PODS. Will ask Flint PD to provide a presence when water is off loaded at a POD to help prevent people from "helping themselves."

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/14/16 – 10th Day (9th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Prepare/approve logistics plan and finalize lease on warehouse space/begin to move supplies from GCCARD to new warehouse
- Continue with door to door teams and finalize planning for future team use
- Submit request for a Presidential Declaration of a Major Disaster and Emergency
- Continue to work on long term recovery items (DHHS, DEQ, MDARD)

Attached Documents:

- SitRep 9

Status on Governor's request letter to the President:

- All documents for the presidential request have been submitted to FEMA. I had a lengthy conversation with the FEMA Region V Administrator reference the request prior to sending.

Key items for tomorrow to note are:

- The door to door teams will continue in the morning.
- We will continue to ramp up door to door operations with additional teams. Teams continue to focus on the high lead level areas and additional data is being analyzed to focus mission areas.
- ARC will increase the number of their Water Response Teams.
- Supply burn rates as well as projections on how many teams will be needed to put filters in all homes within 3 and 5 days will be completed. Analysis will be done to see in NG personnel may be needed to finish in quicker manner.

Items to Note

- DEQ was notified of the number of homes who are willing to have them take additional samples in the future (current number (114). This question was added to the App being used by the Water Response Teams. Data will be provided when needed.
- LT Gov is scheduled to be at the local EOC and SEOC (~4:30) tomorrow to see the operations.

- Secured 80,000 sq. ft. of a warehouse today. Working to consolidate all resources in one location. Tomorrow will be the first day of full implementation of our logistics plan.
- Email sent to state employees to request volunteers for weekend.
- Media monitoring showed no incorrect information today.
- Michigan Association of Broadcasters is sending PSA to radio stations.
- Coordinating with Red Cross on volunteers for weekend.
- Deployed 8 Water Response Teams to the field today (approx. 120 volunteers). 78 Red Cross volunteers active across the operation today.
- National Guard is ramping up to have 3 soldiers per shift at each POD tomorrow. Will also have a Public Affairs Officer at the JIC and liaison at the local EOC.
- Senator Ananich visited the SEOC today to see how things operate. The visit went well and he seemed happy with the number of staff working the Flint event. He tweeted out a message indicating there is still a lot of work to be done but all are working hard.
- DHHS
    - The Community Health Emergency Coordination Center (CHECC) is working on the following:
        - A nutrition plan
        - Education materials, messaging, and working with local agencies
        - Developing a community assessment for disaster behavioral health services.
- Lined up the delivery of filters to two large apartment complexes and a student housing complex.
- We have the list of individuals needing home service (additional contacts will be sent to the Ops Chief at the Local EOC each day at 4:00). Info will be provided to the sheriff's office for action.
- Water Response Team Numbers (this is not the total of homes with filters – I will provide that number tomorrow but it appears we have filters in over half the residences):

	TOTAL	1/12/2016	1/13/2016	1/14/2016
Occupied Homes	1450	242	492	716
Vacant Homes	1967	152	161	1654
Total Homes	**3417**	**394**	653	2370
Resources				
Door Hangars	1487	217	453	817
Water	588	117	254	217
Filters	945	112	220	613
Pitchers	22	3	13	6
Water test kits	217	48	109	60
Replacement Filter	482		137	345
Total Resources Dispersed	**3741**			
Future sample test site	114	28	34	52

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/13/16 – 9th Day (8th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Prepare/approve logistics plan and close lease on warehouse space

- Continue with door to door teams and finalize planning for second wave increase (+15 teams – total for 1/14/16 will be 20)
- Continue to work on Governor's Declaration of an Emergency

Attached Documents:

- SitRep 8

Status on Governor's request letter to the President:

- All support data from state Agencies and local jurisdictions collected as of 6:00 pm on 01-13-16
- Current timeline:
    - First draft completed and ready for review by State Department Directors (including the Attorney General) by 11:00 am on 01-14-16
    - State agency reviews due back by 1:00 pm on 01-14-16 for revision of the draft
    - Revised draft to Captain Kelenske by 2:00 pm on 01-14-16 for review and forwarding to the Governor for final review
    - Final draft (based on Governor's review) submitted to FEMA Region V Administrator by no later than cob 01-14-16 but hopefully sooner. FEMA is aware and ready to receive.

Requests and potential response from FEMA/President

- The letter will request all programs eligible under the Stafford Act including Public Assistance, Individual Assistance, Hazard Mitigation, FEMA's coordination of assistance from other Federal agencies and direct assistance from FEMA
- The letter will also request potential direct reimbursement from other Federal agencies such as EPA, CDC, HUD, DHHS and SBA
- This request is in coordination with the request for Non-Stafford Act federal assistance already requested and received by the State (technical assistance and administration, but no direct reimbursement of disaster costs)
- Direct Federal assistance from FEMA in the form of Individual Assistance to homeowners for household repairs (repair and/or replacement of water service lines and Other Needs Assistance to reimburse for water filters, bottled water, etc.) is a possibility
- Direct Federal assistance from FEMA in the form of Public Assistance is not as likely as it is mostly replacement of publicly owned water distribution lines (and not the direct result of damage from a natural cause)
- If Stafford Act assistance is denied (Public Assistance, Individual Assistance and Hazard Mitigation) FEMA could still provide coordination of assistance from other Federal agencies if the President declares a disaster (or emergency) for the State of Michigan

Key items for tomorrow to note are:

- The door to door teams will continue at 9 a.m. – 5 p.m. Thursday morning and continue through the weekend.
- We will continue to ramp up door to door operations with additional teams. Teams are focusing on the high lead level areas and additional data is being analyzed to focus mission areas.
- MNG will have a press event at the armory with incoming soldiers and MG Vadnais.

Items to Note

- Received information that Rev. Jesse Jackson will be in town 1/17/16 at 1:30 at the Heavenly Host Church of the Harvest of Dartmouth St, Flint.
- Managed and corrected misinformation on NG role.
- Senator Ananich is stopping by the SEOC tomorrow morning 0845. I am meeting with him and his Chief of Staff. Short visit as he has a 0930 at the Capitol.
- Working with Comcast so they can put teams in the field for distribution.

- Penske is going to give us 15-20 trucks over the weekend.
- Contact made with Two Men and a Truck for resources.
- Meeting set with Google where they will brief me and key staff potential tasks.
- Coordinated with Flint Mass Transportation Authority (MTA) to include Fire Station PODs on bus routes.
- Tomorrow I will have a projection as to the number of teams needed to get all citizens filters in their homes in 5 days / 3 days.
- We are standardizing team structure and supply deployment to increase efficiencies. Mission Ready Package (MRP) specifications will be sent out for other entities to assist with door to door. They will then be able to arrive as a MRP, get supplies, receive a mission location and deploy.
- 5 Water Response Teams were in the field again today. Below are the numbers from the 2 days of just the Water Response Teams (there are paper copies with data still to be entered from the PODs). I was just briefed by the ARC logistics planner and there are efficiencies we can put in place to increase homes touched per day. The next version of the app will provide more granular details. Additional 30 tablets were configured by DTMB today for field implementation to include use in the PODs.

	Total	1/12/2016	1/13/2016
Occupied Homes	533	242	291
Vacant Homes	238	152	86
Total Homes	**771**	**394**	377
Resources			
Door Hangars	473	217	256
Water	265	117	148
Filters	235	112	123
Pitchers	9	3	6
Water test kits	92	48	44
Replacement Filter	93		93
Total Resources Dispersed	**1167**		
Future sample test site	62	28	34

- We show 17,276 residences with filters (this does not include data entry to be completed from POD or other locations).
    - We have 35,378 service hookups but with apartments, multi residence dwellings, etc we would be around 45,000.
- Logistics Support
    - The American Red Cross Logistics Planner provided me a brief and I approved the plan forward. The current plan includes:
        - Mission – A filter in every home ASAP.
        - 4 Distribution Methods
            - PODs (5)
            - Water Response Teams (20 effective tomorrow and this will increase)
            - Local EOC "Hot Shots" (these are calls for functional needs, unable to get to a POD location due to ??, etc). Personnel dispatched with supplies.
            - Local EOC support for other local requests (Faith based for distribution, etc.)
        - Three warehouse locations at this time
        - How to better leverage ARC resources

- Supplies – Daily Numbers
    - Replacement Cartridges - 30,700 delivered.

- Water (cases) - 19,152 cases delivered

- Budget projection completed and will be submitted to SBO for review.

- Notes from Water Response Team Command (MSP)
  - Very good synergy between Flint Post troopers and Genesee County Sheriff command and deputies in effective and efficient deployments for distribution efforts.
  - Great attitude and efforts by uniforms and volunteers to make important contributions to the City of Flint on water response team deployments.
  - Clear direction and coordination in the field of supply teams by lieutenants and troopers. No confusion. Clearly defined roles.

All personnel continue to be fully committed to fixing this as quickly as possible.

Chris

Update 1/12/16 – 8th Day (7th Full Day) After Governor's Declaration of an Emergency

I apologize in advance for the length of this report. With the supply issues we had the last couple of days I wanted to share our inventory plus what we anticipate to ensure we do not have supply issues.

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Fine-tune logistics
- Increase and deploy door to door teams (4 state teams added to teams from the Sheriff's Department)
- Increase collaboration and messaging of collaboration with local agencies (specifically the Sheriff's Department)

Attached Documents:
- SitRep 7
- Executive Order Activating the National Guard

Key items for tomorrow to note are:
- The Governor signed an Executive Order activating the National Guard. Mission will be to relieve ARC volunteers at the PODs (Fire Stations) which will free up the ARC volunteers for door to door activities.
  - I have briefed the ARC Disaster Officer on this plan.
- The Governor requested, through FEMA Region V, support from the Federal Emergency Management Agency (FEMA) to bring together and identify other federal agencies that may have programs and funding that could be dedicated to assisting Flint as part of an interagency recovery plan. One of the existing LNOs has been identified as the POC for this. He will be a great liaison for the FWIACC.
- The door to door teams will continue at 0830 Wednesday morning and continue through the weekend and ramp up door to door operations with additional teams. Teams are focusing on the high lead level areas.
- We will look at all commodities and see where we are and where we need to be while working with the ARC logistics specialist.

Items to Note

- PSA video sent out to Flint citizens on resources available.

- Water
  - Today's numbers - 7,824 cases of water arrived today, 1/12/16 (109 pallets)
  - Ordered:
    - 19,152 cases of water are going to arrive Wednesday, 1/13/16 (266 pallets)
      - 1/3 is going to GCCARD and the rest is going to the new warehouse
    - 12,768 cases to arrive daily beginning Thursday through Saturday (177 pallets a day)

- Filters
  - Today's numbers
    - Ordered on 1/11/16 and delivered 1/12/16 direct to GCCARD
      - 2,000 – Brita filter faucet mounts
    - Filter Replacements
      - 2,400 – Brita filter replacements (single pack)
      - 8,000 – Brita filter replacements (two pack)
  - Ordered on 1/12/16 to arrive Wednesday
    - Faucet Mounts – To be delivered direct to GCCARD on 1/13/16 (Wednesday)
      - 10,000 – PUR Vertical faucet mount
      - 2,500 – PUR Horizontal mount
    - Replacement Filters – To be delivered direct to GCCARD on 1/13/16 (Wednesday)
      - 10,000 – PUR replacement filters (3 pack)
      - 10,000 – PUR replacement filters (single pack)
    - PUR Combination Pack – to be delivered to GCCARD on 1/13/16 (Wednesday)
      - 10,700 – PUR combo packs

- To arrive Thursday
  - Zero Water Pitcher (8 Cup) – Delivering direct to GCCARD on 1/14/16 (Thursday)
    - 1,300 – Zero Water pitchers
  - Faucet Mounts – Delivering direct to GCCARD on 1/14/16 (Thursday)
    - 11,000 – PUR vertical faucet mount
    - 1,500 – PUR Horizontal faucet mount
    - 5,000 – Brita faucet mount
    - 10,000 – Brita adv faucet mount white
    - 12,000 – Brita adv faucet mount chrome
  - Replacement Filters – Delivering direct to GCCARD on 1/14/16 (Thursday)
    - 117,600 – PUR replacement filter

- Test Kits
  - 6601 unassembled kits arrived at GCCARD today, 1/12/16.
  - 500 have been assembled and are ready for distribution
  - 1000 additional unassembled kits have been ordered to be delivered at GCCARD (no ETA yet)
  - 10,142 unassembled kits to arrive at GCCARD early next week

- Second warehouse – Located in Flint
  - 100, 000 square feet of secure warehouse obtained.
  - Accepting commodities beginning Wednesday, January 13

- Logistics Support

- The American Red Cross Logistics Planner arrived from DC today as requested. I outlined what her mission was and how I saw the progression forward. This logistics planner will assist in streamlining the inventory and distribution process now and into the future.

- Door to Door Numbers
  - Today the app implementation for the field went extremely well. There were a few issues that were quickly addressed. One related to how form fields should be filled out. Another was getting styluses for teams so that they don't have to remove their gloves in the cold. All very simple to fixes.
  - We are working on version 2.0 so this can be used at the PODs
  - We should be able to greatly optimize distribution in the near future as we mapped the active water subscribers from Flint's DPW and are adding them to the field team members apps. Of the ~56,000 possible addresses, this reduces the number of possible homes to visit down to ~29,000.
  - Notes from the field commander:
    - "Today we started out the day using two groups that consisted of approximately 10 people in each group. We eventually combine groups with Genesee County Sheriff's group and they brought two more groups with approx. 10 people (Local UAW) in each group. This made us a lot more efficient and we were able to set up a game plan. Tomorrow I feel we will be more efficient and we will have a better plan in place to get the maximum output out of our resources."
  - In the end, there were 394 total home visits with the following breakdowns:
    - 217 Door Hangers
    - 152 Vacant Homes
    - 117 Water Distributions
    - 112 Filters
    - 3 Pitchers
    - 48 Water Test Kits
- 211
  - CALL VOLUME:
    - 185 calls for water-related issues had been received as of 4:45 pm.

- Logistics made contact with Comcast and will be supplying them with filters and replacement cartridges for their deliveries in their work trucks as they make services calls. They will follow our procedures for reporting (our checklist).

Chris

Update 1/11/16

The focus today was the media event and getting the supplies and logistics on track. Most of the activity today was working on logistics for the water and other supplies.

Attached Documents:
- SitRep 6

Key items for tomorrow to note are:
- The door to door teams will start at 0830 Tuesday morning. It is reported that troopers are going to the door but DHHS employees are the lead with a troop car nearby.
  - State and local GIS created an App today for the teams to use tomorrow but I see potential use at distribution sites.

- The App data will be used for our maps as we survey the public/distribute supplies and we will be getting real time metrics through the site from the field send back to the SEOC. We are using Android tablets tomorrow but in the future can use any mobile device for this.

Items to Note

- It was reported that only one POD (Station 5) was out of water longer than 30-45 minutes. This site was ~2 hours without water and part of that was the truck went to the wrong station. Trucks were sent as soon as the local EOC was notified.
- We also did not receive a DHHS shipment that was to come in which caused some filter delivery issues.
- Supplies are limited at this time; however, we are getting our shipments starting at 0630 tomorrow.
- We have Home Depot giving us 12,768 cases (this was a late development so the SitRep indicates half the amount) of water every day starting tomorrow. We are still working with other distributors too.
- ARC is flying in a logistics planner tomorrow. Three additional staff with be with her to shadow and help. We are turning warehouse logistics over to ARC logistics. We are moving tomorrow to a process that has a distribution center (GCCARD) and a warehouse that is 100,000 square that will maintain mass quantities. Staff has continually been placing orders for supplies to ensure we get a head of this. The intent is to keep the warehouse full so we do not have these continual issues of supplies.
- Began mapping lead service lines (anticipate having draft of lead service lines Friday).
- Coordinated with local IT managers overseeing filter tracking system to streamline data collection.

Local Emergency Operations Center

- Working to coordinate resources at the local level to maintain adequate supplies at all PODs.
- Demand has exceeded supplies and supplies are moving rapidly from PODs today. Working to make sure POD managers notify us when they start running low.
- Working to establish a warehouse for local resource storage.
- Established trigger points for resources at PODs and hourly inventory reporting from the PODs.
- Discussed potential long term water sources between local EOC and SEOC.
- Established planning cycle/meeting scheduled for 1/12/16.
- Local EOC EMHSD staff with Natasha Henderson to request deployment of City representative at local EOC.

Chris

Update 1/10/16

Attached Documents:

- SitRep 5
- Door card (English version but Spanish version will be ready for Tuesday)

I have a local EOC section listed below but state personnel are heavily engage in management of both locations. We occasionally hit some road bumps with this event but all personnel are working well together to accomplish our goals (especially state agency personnel).

I have had good discussion with FEMA LNOs. Two statements have been developed from our discussions that hopefully helps put this in more context but if it is more confusing I apologize:

1. In the immediate response, the State, in collaboration and coordination with city of Flint and county of Genesee are working to get water, water filters, and testing kits to the affected population. In conjunction, the state will coordinate with federal agencies to ascertain what resources can come to bear to help mitigate the issue.

2. If asked about a federal declaration from FEMA, we need to articulate the definition of major and emergency declaration and state or note to ourselves that it appears to not qualify; however, there may exist opportunities to leverage federal assistance from some agencies (i.e....EPA) under their own authority to help address this issue.

    - We need to really manage expectations on the potential for a federal declaration...not that we will not go after one but it will be difficult to get.
    - A major disaster is defined in the Stafford Act as any ***"nature catastrophe (including hurricane, tornado, storm, high water, windriven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought) or, regardless of cause any fire, flood, or explosion.....causes damage of sufficient severity and magnitude, to warrant major disaster assistance.....to supplement the efforts and available resources of States, and local government....."***
    - An emergency declaration is ***"is any occasion or instance for which, in determination .....assistance is needed to supplement State and local efforts and capabilities to save lives and protect property and public health and safety or to lessen or avert the threat of a catastrophe....."***
        - This is limited to immediate and short-term assistance (I hate to put times on this but short-term is like 3 weeks), essential to save lives, protect public health and safety and property.
    - Severity of the situation is ***"A finding that the situation is of such severity and magnitude that effective response is beyond the capability the state and affected local governments, and that the state requires supplementary federal emergency assistance to save and to protect property....***
    - Nature of assistance for Emergency Declaration is for ***"Debris removal, emergency protective measures, direct federal assistance...."***
        - Debris Removal = ***self-explanatory and we do not have this***
        - Emergency Protective measures = ***water, commodities, transportation (remember ... to supplement what the locals and state are already doing if we need more)***
        - Direct federal assistance= ***what specific type of work is requested, and what are the reasons why the state/local government cannot perform or contract for performance. Essentially what is the need that state/local govt cannot provide. I can see this being something we need but we may be able to get this outside a federal declaration under the federal agencies own authority to help address this issue.***

Back to the update...

Key items for tomorrow to note are:

- Training is occurring for the door to door teams scheduled for Tuesday morning.
- Deploying an additional MSP District Coordinator to the local EOC for command and control support.
- Deploying two DTMB trucks and two drivers for sustained logistical support for the week.
- Media event with the Governor in Flint.
- New Incident Action Plan starts (1/11 0800 -1/13 0800 operational period). Our objectives are as follows:
    1. Ensure all households within impacted community have required resources.

2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

<u>Items to Note</u>

- All 9 churches had filter systems/replacement filters, information sheets, and water test kits delivered as requested by each pastor/reverend on Sunday. We did not think we could get them water due to the limited time but we did end up getting water to all 9 churches with the other items.
- Fire station resource locations stayed open from 9a to 9p and will continue with those hours until further notice (Staffing is in place until Saturday). ARC is staffing these locations.
- The media event was held at Fire Station No. 1 and report back is that it went well and the spirit of collaboration between local, state, non-governmental partners is strong was relayed.
- The four door to door teams will have the hours of 8:30 a.m. to 5 p.m.
    - Each will have logistics support from DTMB, security from MSP, and contact personnel from DHHS.
    - The door card is attached that will be left if no one is home.
- Worked to identify a storage location within the City of Flint for water and supplies. G-CARD is identified as temporary location but we are moving toward a state run warehouse operation (*looking at private sector partners to assist, especially with the warehouse management side*).
    - GCCard is large enough, centrally located and comes staffed. GCCard has 75,000 sq ft with warehouse managers to assist with tracking resources coming in and out.
- GIS will provide us daily updates of how much was distributed each day but note we have a delay in data entry from delivery to entry in the GIS system. Over the weekend there was a problem locally with staffing to get this completed. A solution is in place and will be implemented so we get timely data. Distributed to date (as of 1/8/16).
    - 12,386 filters
    - 1,985 replacement filters
    - 354 Pitchers
    - 2500 Lead Testing Kits
- Establishing and tracking of resources is a priority. Staffing has been assigned to get a good handle on these to ensure distribution sites maintain an appropriate level of inventory. I have requested trigger points get put in place so we do not get below certain levels in the main warehouse location.
    - Contacts with some large water distributors have been made and their and our logistics chiefs will connect first thing this week.
    - We have ordered an additional (expedited delivery with ETAs tomorrow)
        - 40,000 Brita Filters
        - 40,000 Brita Replacement Filters
        - 1000 Zero 8-Cup Pitchers
        - 1000 Zero 8-Cup Pitchers
        - 2000 PUR Replacement Filters
        - 93 Pallets of water (about 6700 cases)
- GIS continues to produce multiple maps for use.
- JIC Items
    - Requested PSA on the radio. Media has been approved and working with MAB.

- Requested JIC to contact Comcast and Dish Network for availability for continuous running of filter install/replacement and test kit video.
- A news release will likely going out tomorrow regarding canvassing in neighborhoods. Continued social media messaging.
  - Tuesday – embed state PIO with one of the canvassing teams to liaison with media.
  - JIC moving tomorrow to Flint.

Local Emergency Operations Center

I am providing you some information on some issues we ran into at the PODs. This has been addressed with additional state resources and processes put in place so we do not run out of resources. Public concerns/complaints have not been brought to my attention at this time. Staff is working very hard to ensure we do not run out of supplies at the PODs and they understand the consequences. No one in the Local EOC or State EOC is happy the follwoing occurred and I felt you should know in case it is brought up. Again, I believe we have fixed this and I take full responsibility for any supplies not being on site.

Fire Station Inventory Levels:

Station 1:

- Only time without supplies - 15 minutes without water while the truck was unloaded.

Station 3:

- Ran out of replacement filters around 7:00, replacement filters delivered around 7:30. Had to pick up replacement filters from Home Depot and deliver.

Station 5:

- Ran out of water around 5:00, water was delivered around 6:30. We needed to find additional trucks because DTMB drivers were over hours. The ARC stepped up and found a truck to go and pick up a pallet of water and deliver.
- Somewhere between 4:00-6:00 they ran out of lead test kits. No way to restock these because City facilities were closed and could not reach anyone.

Station 6:

- Around 5:00 ran out of water, filters, and replacement kits. Replacement kits were delivered around 7:30. Additional water and filters were delivered after 9:00 due to the DTMB drivers heading back to Lansing. Food Bank was called and had to get drivers in to operate trucks, pick up water from the School District, load and deliver to all sites. Delays occurred with weather conditions and needing to use last minute sheriff EOC staff to load due to issues with City workers. City workers were scheduled to help and left around 7:00 without helping.
- 2 pallets of water were dropped off in the afternoon and within 1 hour were gone. This was much faster than we expected. On 1/9 they didn't go through 2 pallets of water at any station for the hours 9:00-4:00.
- We received news that a reverse 9-1-1 call notified residents of water which caused an unanticipated amount of people obtaining water. There was also a report of 1 person walking out with 2 cases of water and trying to sell in the parking lot.

Station 8:

- Around 7:00 ran out of filters and lead tests. Filters were delivered around 8:00 from the food bank trucks.
- Hourly reports were requested in the morning from volunteers but this information was not received as to the status throughout the day. Early inventory of supplies took between 1 hour-1.5 hours to receive in the EOC. We were not advised of low counts, just zero numbers.
- Reports received that the last couple of hours were slow.
- Residents were advised of the other sites and the opportunity to obtain supplies.

Restocking Plan

- United Way set up meeting with Food Bank to discuss.

- Had EOC meeting on this topic to discuss options.

Churches:

- All 9 churches received waters, filters, and informational bulletins.
- Lt Roach received positive feedback from 3 of the pastors.
- No complaints were received.

Signage:

- Provided information to SEOC on signage requirements at the fire stations.

Storage:

- Researched storage spaces; established temporary site at GCCARD.

Personnel:

- Lack of local EOC leadership (seems somewhat checked out) with IC and Deputy IC (doing an okay job).
- Captain TaFoya (Genesee County) helped tremendously today with all the plans outlined above and attended the press conference.
- Tina Martinez at the Food Bank and Matt Purcell at GCCARD were extremely helpful in getting last minute operations set up.

Chris

Update 1/9/16

SitRep 4 attached for more in depth information. The below only contains some items worked on today and while the format in the attached SitRep is not perfect (it is created automatically by MICIMS) it does contain a lot more information you may want to read. I also attached one of our maps. It is our filter distribution map. All filters handed out by anyone working with us feeds into this now. We are continuing to refine these and at this time there is a delay in the upload of address data but we are working on it. We have a ways to go to get filters in every home but this will help direct us to those who need still them. We also are working on identifying abandoned homes.

Key items for tomorrow to note are:

- 9 churches will have ARC volunteers and filters for distribution. Some may also get water.
- 5 fire stations are a distribution point for water, filter systems/replacement filters, and water test kits. While only open today until 4 p.m., tomorrow and until further notice they are open from 9a to 9p.
- Media event will take place on the above tomorrow.

Items to Note

- 211 has some issues with call load but it is being worked on. 2-1-1 Director contacted MDHHS PIO to discuss/resolve caller wait times and messaging. We anticipate an increase in activity tomorrow in 211 calls so we requested and received an increase to staff 211.
- We are shifting tasks the SEOC took on that are handled more effectively and efficiently at the local EOC. We have established command and control in their EOC. We are running things there but that is not being made public. We are doing this in partnership but we are clearly handling the operation with state personnel oversight.
- A 3rd FEMA LNO arrived today upon my request. This has nothing to do with a Presidential request for a declaration but support for some other items I want worked on for long term recovery.
- We continue morning calls with the local EOC leadership and local emergency manager on what our goals for the day are as well as any issues/concerns.

- Five 5 fire stations have received water, water filters, replacement cartridges, and water testing kits with American Red Cross personnel at each location to assist with delivery of resources and collection of addresses receiving them. These locations will be open from 9a – 9p daily until determined they are no longer needed. Those picking up water testing kits will be advised that they can return the test kits to the fire departments (where they will be picked up and taken to the Flint City Hall), the Flint Water Treatment Plant, or they can take them directly to the Flint City Hall. For those unable to return the kits, 211 can make arrangements for pick up the kits. We understand response to these sites has been positive thus far. The Genesee County EOC will be monitoring these supplies and request replacement of products as needed.
    - A call is going out tomorrow morning to advise this information ... I do not believe it was every resident but Tori Sachs has that info if needed.
- I approved a press release today to advise the public that all levels are working together to ensure delivery of filters, test kits and water; noting that all of these items were delivered to the 5 Flint fire department stations. It was stressed that the public should be aware that the local and state agencies have been working cooperatively to assist the residents - and will continue to do so. This was done to hopefully end or at least minimize the "who can get water and filters out first" when all of this has been connected with the state and coordinated since the state declaration was put in place.
- The arrangement of 2,000 filters, to be taken to 9 local churches on Sunday, January 10, is ongoing. The filters have been secured; they are now in the possession of the DTMB. DTMB will return to Flint on Sunday morning to deliver these to necessary locations. The American Red Cross will be on site at each church to assist with distribution and recording addresses (for GIS). The local EOC is working to ensure these arrangements are complete and run smoothly. Future engagement with the faith based community will occur to assist with additional distribution.
- A Flint City liaison has not been in the EOC but starting Monday this will be in place to keep the Flint Mayor appraised of activities being conducted in the city. She also has been advised she can call me at any time if she needs anything.
- Training has been confirmed for the door-to-door operation scheduled to start Tuesday. Four teams are initially scheduled with more to potentially be put in place. These are the teams that will be handing out water, filter systems/replacement filters, test kits and information. If nobody is home, a door hanger with information is being left. DHHS personnel and one MSP trooper will be on these teams.
    - Training will take place at 1 p.m. on Monday afternoon at the DHHS office on Clio Road. DEQ and DHHS will provide the training.
        - *Training is so those going door to door can explain what the filters do, how to install them, if they need install help to call 211 who has a list of people who can install the filters, and answer any other questions versus just handing them the filter.*
    - Hours of operation will be Tuesday through Friday from 8:30 a.m. to 5 p.m. AT THIS TIME. I am reevaluating these times to increase contact with someone versus just leaving information.
    - *Logistics are being finalized for the teams and trucks to handle stocking and re-stocking of materials during daily operations.*
    - GIS maps will provide guidance on deployment locations for these teams and other teams in the field.
- A pilot project at Freeman Elementary with LARA and DEQ has been initiated to see if replacing certain plumbing components in faucets at the school will drop the lead level.

MSP/EMHSD GIS Section Updates

Accomplished Today (January 9):

- Produced a Point of Distribution Map. Contains four types of distribution points; Churches, Water Resource Sites, Filter Distribution Sites, Water Distribution Sites.

- Produced Filter Distribution Map.
- Developed process of how best to handle geocoding the household filter locations, worked on processing the data.
- Worked on map of franchise customers outside of Flint City.
- Produced maps for MDARD on food establishments and Local Health Departments.
- Produced map of Church Filter Distribution map for DTMB.

Local Emergency Operations Center

- The state has deployed 10 personnel to the Genesee County EOC to ensure we have command and control at the local level. On 1/8/15 The state personnel took over the incident management functions of the Genesee County EOC (not public). The arrival of additional staff allowed the local Emergency Management Coordinator to delegate tasks which relieved a tremendous amount of stress.
- Additional Sherriff staff (2-positions) will be shadowing the state incident management team to allow for transition to the county personnel later in the incident when we are comfortable with them handling things. Not sure when that will be but we have secured a direct bill hotel for staff to stay in Flint as long as needed.
- With the additional staff, the Local EOC will be able to take over functions previously handled by the SEOC including:
    - Logistical activities to support church operations.
    - Logistical activities to support fire stations operations.
    - Coordinate Donations Management activities and draft donations management plan
    - Coordinate Volunteer Management activities
    - Identify local storage/staging facilities
    - Overall inventory tracking
    - Tracking of Points of Distribution (PODs)

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/8/16

SitRep 3 attached.

There is a significant difference in what is being presented by the media and what the local EOC is relaying to us at the SEOC. It is also being driven by the media that this is a state versus local response (who is providing more and quicker versus a coordinated effort between all). That said, I advised SEOC personnel that perception is reality in some eyes and we are to move forward to address items that typically are addressed at the local level. I have ordered the SEOC open all weekend due to make the quick wins that we need and continue to get the coordination and collaboration in place that is needed (but make gains on our own as needed).

Items to Note

- Two FEMA LNO's arrived today and are in the SEOC. A third LNO was requested from FEMA due to some unique issues with this event to include having to deploy more or my staff to the local EOC to get more structure and/or find out why there is an issue with the message the media is showing versus what we are hearing from the local EOC.

- We finally received from the local EOC 8 locations (we were told originally early in the week they had 80-90) that are their Points of Distribution (PODs) for water in conjunction with the local food bank. The PODs are not getting water from the food bank even though the food bank has water. We are going to resolve this issue as we can help deliver the water to the PODs but we were not aware of this. 8 PODs is not enough locations if water needs to be distributed to citizens. Speaking with the ARC Regional Administrator later today, I believe ARC got water to those locations but I need to confirm that in the morning. The food bank reported they had 376 cases of water.

- We have learned that a low number of residents are testing their water when DEQ can test 400 kits per day. This is an added focus that we believe can be increased through dissemination of test kits with the filters and any water.

- I found out the Mayor was okay with using fire stations as distribution points for water, filters, and water test kits. While this did not come to me through the local EOC, I advised we needed to get water, filters, and test kits to these locations for tomorrow. The distribution at 5 Flint Fire Department stations has been coordinated to be in place by 10:00 am tomorrow morning.

    - DTMB has provided a truck and driver to pick up water test kits from DEQ lab in Lansing, water from the Food Bank and water filters and replacement cartridges from GCARD in Genesee County.
    - 10 American Red Cross (ARC) volunteers will meet the DTMB truck at GCARD at 9:00 am to be provided information about filters. Instructions will be included in water test kits. They will then report to the 5 fire stations to assist in distribution of resources to the public and track addresses of same.
    - Residents will be told where they can drop off their water test kits, or that they can return them to the fire station the next day. Coordination will occur on pick up of water test kits daily to be taken to the Flint City Hall, who will then delivery them to the DEQ testing lab.

- STILL FINALIZING - We have made available 2,000 Filters for distribution on Sunday as parishioners leave mass/services. This will be 200 filters for 10 churches in Flint. While this is a small number of churches, we do not want to waste an opportunity to hand out filters and this seems like a quick way to so. The filters will be put on the DTMB truck on Saturday for delivery to TBD locations for distribution. Logistics remain undetermined as I am still waiting on a list of the churches, pastors/reverends/hours or services/etc. The DTMB truck will be returning to Lansing approximately 11:00 a.m. so we need to finalize this quickly on Saturday. We may utilize ARC to assist with this.

- The Recovery branch is working with the JIC to develop a door hanger card. DTMB is working on the printing portion of the hanger card. Recovery will also be finalizing logistics over the weekend for neighborhood canvasing to occur early next week. 40 volunteers have signed up to attend training on Monday afternoon to complete this task. The mission will be to deliver water sample kits along with water filters/replacement cartridges, and water.

- It appears that 211 has become overloaded. DHHS is researching ways to increase capacity for calls.

- A Volunteer Management Coordinator is in the Genesee County EOC as of today.

- A Donations Management Coordinator has been requested and she will be in the Genesee County EOC Saturday.

- DHHS had a conference call with GM today; they indicated they can provide cash, and supplies, but primarily manpower. No commitments were made at this point. We inquired as to availability of warehouse space and trucks. It was left as GM being a major resource pool that we can tap into as we determine missions. Further conversations will occur, but primarily GM just wanted us to know they are there if needed.

- An additional EMHSD staff member was sent to the Genesee County EOC to act as Operations Section Chief and obtain awareness of the situation there.

- GIS staff met with various parts of Genesee County/Flint personnel to try to get a handle on data available.

- GIS continues to work with local GIS personnel with three GIS staff going to Flint today to work with them. GIS staff is working with U of M on how best to proceed with digitizing water lines for long term recovery.

Chris

UPDATE 1/7/16

A summary of some of today's SEOC activities is provided below. Attached is the following:

- *Today's SitRep which contains more information than below.*
- The resource request/task assignment sheet for your situational awareness. This is how locals request resources as well as how we track resources and any assignments and/or tasks that are to be completed.
- JIC Task Tracking – for your situational awareness on how we are tracking requests and assignments. Once someone is assigned a task or resource request it allows them to document what work has been or will be done as shown at the bottom of the document.

Items to note:

- *I received a document this evening from Genesee County which appears to be damage* assessment information. Analysis of this will occur tomorrow. It appears to be infrastructure and costs to fix it and no other impacts.
- I spoke with Jamie Curtis, Genesee County Commissioner, this evening. A very good relationship is in place with him, especially with our District Coordinator (DC). I also have our DC working on developing stronger relationships with the Mayor/Mayor's office.
- GIS staff continue to obtain data and work with County and City personnel to get a picture of where resources have been provided, need to be provided, as well as infrastructure locations (pipes) that could be affected.
- Personnel and agencies have been tasked with developing a plan to get people in the community to deliver information, hand out filters, etc. *This would target those areas we are* showing minimal or no filter distribution based on the data we are collecting. The plan is to get them in the field by Tuesday and the plan will be provided to me tomorrow.
- Filters can be obtained at the following locations:
  - Michigan Department of Health and Human Services office, 125 E. Union St., Flint, MI 48502
  - Michigan Department of Health and Human Services office, 4809 Clio Road, Flint, MI 48504

    - Genesee County Community Action Resource Department office, 2727 Lippincott, Flint, MI 48507
    - Genesee County Community Action Resource Department office, 601 N. Saginaw, Flint, MI 48502
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).
- Began work to schedule legislative/congressional conference calls. Tentatively scheduled for 2 p.m. Friday.
- JIC continued to develop messaging.
- Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed two EMHSD/SEOC liaisons to assist the local EOC.
- Published the Incident Action Plan and continued assignment of objectives/tasks.
- FEMA Liaison Officers just arrived in Lansing to assist command and general staff.
- I spoke with Harvey a few times and he should have talking points later tonight or tomorrow a.m. for his use and also for others who may speak to media outside of state government who may benefit from our messaging.
- We held a media round table at 1 P.M. at the SEOC. Dr. Wells and I spoke and answered questions to numerous media outlets.
- Local agencies and NGOs continue to provide water and filters to citizens.
- The website, www.michigan.gov/flintwater, was update with information and links to assistance to include 211. Additional recommendations were provided to include information on the testing water in homes.

EMHSD GIS:

Accomplished Today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Chris

UPDATE 1/6/16

A summary of today's SEOC activities is provided below. I tried to distill this as best I could but there has been a lot of activity and discussion to get an accurate assessment of the situation. Attached is the final

draft of objectives and tactics for the operational period and agency situation report (SitRep) which has more SEOC agency information. I have implemented weekly operational periods.

Advise if you want anyone else copied or off this distribution.

Daily Update

- Set goals for SEOC and identified response/recovery emphasis
- Requested FEMA liaison officers (LNO) from FEMA Region V. Two LNOs will be on site by ~3 p.m. 1/7/16. Both are known contacts to me and some staff and one has worked extensively with me during the SE MI flooding in a command and control position. These personnel have been specifically tasked with this mission. **THEY ARE NOT HERE TO ASSIST WITH A PRESIDENTIAL DECLARATION REQUEST BUT TO ASSIST ME.**
- PIOs from multiple agencies were here and established the Joint Information Center (JIC). News released pushed out on this. I am very happy with the PIO work and movement toward coordinated messaging.
- Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts to ensure situational awareness and to develop a common operating picture.
    - I opened the briefing by identifying our initial goals, items to think about while subject matter experts were briefing us, and how we are to move forward, find quick wins, and regain trust.
    - ***MDHHS – Elevated Blood Lead Levels***
        - Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.
    - **MDEQ – Water Testing Protocols**
        - Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.
- Developed Incident objectives, strategy and tactics (see attached)
- Identified SEOC and state agency staff positions
- Assigned work tasks for SEOC operation period from 0800 January 6, 2016 to 1700 January 8, 2016
- Reviewed planned actions, prepared final draft Incident Action Plan
- **Made contact with the Genesee County Emergency Manager first thing in the morning and held a conference call mid-day to discuss roles. Daily 0830 command conference calls with local EOC command staff starts tomorrow. Tomorrows call will include the County Commissioner and the City Administrator (both invited). Topics include the incident action plan objectives and establishing better local coordination, command and control to facilitate integration with the SEOC. The local EOC is not functioning as it needs to with personnel and local coordination and we are working on that issue.**
- I will be in Flint tomorrow for a 2 p.m. media round table with local officials that was set up by the JIC.
- The attached initial objectives will be updated at least every operational period and as needed. I listed the objectives below but the tactics to accomplish them is in the attached if you want further information.
    1. Activate the State Recovery Task Force (SRTF).
    2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
    3. Obtain and maintain situational awareness and common operating picture of all activities.
    4. Establish SEOC operational period and hours of operations.

5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
6. Develop a comprehensive GIS strategy.
7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
9. Provide technical assistance to the local Damage Assessment process.
10. Establish a Joint Information Center (JIC) and develop a public information strategy.
11. Monitor MI CIMS for resource requests and address as appropriate.
12. Establish and disseminate cost center information for the incident.

- Additional tasks include:
  - Determine what federal agencies are already involved and their status
  - Identify potential water supplies
  - Determine where affected homes are located, where filters/pitchers (and replacements) were installed/provided, and determine who needs filters, etc.
  - Determine how filter distribution is handled, and if it can be handled more efficiently and effectively
  - Determine what mechanisms are in place for nutrition supplementation

EMHSD GIS Accomplishments:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
- Established a daily call with county and city GIS personnel to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
  - Water Pipeline Locations
  - Filter Distribution Locations
  - November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
  - Affected School Locations
  - Predictive analysis of blood lead levels for affected area
  - Updated Parcels
  - Demographics
  - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to obtain the data

To: Etue, Kriste (MSP); Gorski, Gary (MSP); Smith, Paul (GOV)
Cc: Baird, Richard (GOV); Hollins, Harvey (GOV)
Subject: RE: Update - Genesee County Declaration

I forgot to advise that we have asked key state agency PIOs to be in the SEOC for the briefing.

From: Kelenske, Chris (MSP)
Sent: Tuesday, January 05, 2016 6:06 PM

To: Etue, Kriste (MSP); Gorski, Gary (MSP); Smith, Paul (GOV)
Cc: Baird, Richard (GOV); Hollins, Harvey (GOV)
Subject: Update - Genesee County Declaration

Below are some key points for your situational awareness (FYSA) that have taken place or will take place within the next 15 hours.

- I was on the phone with Sean Kammer, Assistant to the Flint City Administrator, when the declaration hit the news so I advised him immediately. He was going to let the City Administrator know.
- I contacted MSP Lt. Roach, 3rd District Coordinator, who was at the Genesee County EOC and advised her to let the County EM know the declaration status.
- State Emergency Management Coordinators (SEMCs) were notified via our notification system with additional information in an email.
    - This included information on the SEOC activation and a 0900 briefing for SEMCs.
    - Some subject matter experts will provide us an update to establish a common operating picture.
- We have been in contact with FEMA Region V watch desk ... they will be on the call tomorrow and continue to monitor the situation.
- I have been in contact with the FEMA Region V Administrator to keep him updated.
- Operational period for the SEOC will be M-F, 0800 to 1700 at this time.
- Situation Reports (SitReps) will be provided in the evenings.
- An Incident Action Plan will be developed tomorrow.

Call me with any concerns or questions.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/17/2016 08:00:00
Operational Period End:	01/19/2016 08:00:00
Situation Report No.	12
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/17/2016 08:00:00
SEOC Hours of Operation End:	01/17/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 17):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public Information Control.

- Logistics
o Working on securing vehicles for additional teams for Monday, January 18th.
o Procured 2 additional vans from DOC to shuttle additional teams next week.
o Obtaining armed security for warehouse between the hours of 7:00 pm and 7:00 am.
o Requested expedited delivery of DEQ water testing kits.
o 20 ft. trailer has been procured from the DOC for use by ARC to store assembled water test kits.
o Verizon Booster and wireless will be provided to warehouse for internet connectivity and improved cellular reception.
o POD trash issue is being resolved and new removal system is in place.
o Submitted a request to MDOT for reflective vests for volunteers.
o Submitted request for hand warmers for volunteers.
- JIC
o Governor's office issued a news release announcing the presidential emergency declaration approval.
o Answered media calls about the state's resource distribution and activity efforts to date.
o Updated daily talking points to include the state's activity efforts to date and the Presidential emergency declaration.
o Coordinating with FEMA External Affairs to plan a Congressional call on January 17, in additional to a legislative call regarding the Presidential emergency declaration. Preparing talking points for the Congressional and legislative conference calls.
o Issued a news release with today's activity for the water resource sites and water distribution teams, as well as the increase in National Guard personnel.
- Recovery Branch
o Worked to ramp up team activities for tomorrow.
o Continued coordination with Red Cross on volunteers for Monday.
o Data is for 1/17/16 as of 5:00 pm.
Water Response Teams TOTALS 1/17/2016
Occupied Homes 8,871 2799
Vacant Homes 2,954 790
Unknown 4,523 1374
Total Homes Visited 16,348 4963
Resources Provided
Door Hangers 6,369 1982
Water - Cases 3,595 1510
Water - Gallons (Jugs) 98 1
Filters-Faucet 4,572 1558
Replacement Filter 2,938 897
Filter Pitchers 35 6
Water test kits 854 434
Total Resources Dispersed 18,461
Future sample test site 914 460

- Planning Section
o Lead morning and afternoon state agency conference call.
o Coordinated logistics of resource tracking.
o Developed projections based off of reporting and trend analysis.
o Published Sit Rep # 12.
o Participated in distribution process meetings.

- Operations Section
o Conducted SEOC Briefings.
o Worked with local EOC to fix trash issue at the stations.
o 89 American Red Cross volunteers are active across operation today.

o Warehouse Numbers:
□ Clio St Warehouse (approximate current stock)
• Replacement Cartridges.
o 62,048
• Filters (faucet)
o 57,097
• Water (cases)
o 31,920
• Testing Kits
o 11,053
o Point of Distribution (as of 7 pm)
□ Contacts
• 741
□ Water (cases)
• 4809
□ Filters (faucet)
• 938
□ Replacement Cartridges
• 306
□ Filters (pitcher)
• 10
□ Test kits
• 1105
• Finance Section.
o Working on verifying correct entry of EMHSD staff overtime in DCDS.
o Continuing to work on developing spend plan.

• GIS Branch Updates.
o Determined that 40% of the registered 29,994 active water subscribers have received filters.
o Developed a Flint Water Response Team progress map for public distribution.
o Produced a city of Flint infrastructure map for FEMA IMAT.
o Developed planning maps for the Recovery Branch.

DTMB:
• Clio Rd Warehouse security setup today.
• Warehouse technology issues addressed and resources will be supplied by tomorrow.
• DTMB, DSEMIC, and NC3 are monitoring social media for information on cyber-attack.

DHHS-CH
• Put together a timeline of activities for DHHS response.
• Letter sent to JIC on blood lead analyzers for pediatricians.
• Coordinated with DOE on potential grant for children impacted by traumatic events.

DEQ
• Working on the test kit production.
• Working to transition ordering to FEMA if needed.

Local EOC Update:
• Facilitated activation of Genesee County/Genesee Health System MOU for mental health services.
• Coordinated supplies for U of M flint Distribution.
• Coordinated trash pickup at Fire Station PODs with Liaison Officer.
• Developed Sit Rep #7.
• Coordinated hotshot deliveries of supplies to special locations.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 10 p.m. on Jan. 17.

State agencies at the JIC included the Governor's Office, Departments of Health and Human Services, Agriculture and Rural Development, and Technology and Management and Budget, Natural Resources, Environmental Quality, Licensing and Regulatory Affairs, Military and Veterans Affairs and Michigan State Police. The Genesee County Sheriff's Office was also present.

Tasks accomplished:

- Helped arrange a legislative and congressional conference call to give updates on state and FEMA efforts.
- Provided talking points for Captain Kelenske for the legislative and congressional phone call.
- Provided talking points for attendees on congressional/legislative call so they can share updates with their constituents.
- Arranged a media availability at the Clio Road warehouse for media to have the opportunity to tour the warehouse to get photos and video of where water resources for Flint residents are being housed and distributed. Event attended by F/Lt. Dave Kaiser,

ARC Warehouse Manager, and Capt. Tafoya of GCSD.
- Provided printed instructions to 211 for installing a water filter.
- Created a section called Federal Declaration Requests on the Flint Water Website to house the emergency declaration and associated letters.
- Updated the Lead in the Body FAQ/fact sheet on the website to focus more on lead in the water.
- Planning to send out nightly news release with updated information about today's activity.
- At the request of 211, arranged for a PIO from the Community Service Commission to be in the JIC this week.

Agriculture and Rural Development (MDARD)

Saturday Jan 16th update:

Primary activities today: coordination with FDA Detroit District on their and MDARD's upcoming activities related to food, inquiry into a possible animal facility requiring follow up; draft of a document outlining federal resources that may be available to assist with broader recovery issues.

American Red Cross (ARC)

Today was the last day the American Red Cross supplied staffing at the fire station POD's supporting the National Guard mission.
The assembly of water test kits at ARC headquarters was postponed until product is available.
We deployed and supported 10 teams (30 volunteers) for neighborhood canvassing (Water Response). 10-14 teams are planned for tomorrow.
We supplied lunches for all 20 of the Water Response Teams today, and will feed all of the teams again tomorrow.
The volunteer reception center (VRC) was in full operation today. 42 volunteers were processed today. The VRC will be in operation on Monday.
We continued warehouse and inventory management efforts.
A total of 89 Red Cross volunteers were active in today's efforts.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities. Also monitoring media and coverage of rallies and events.

Community Health (MDCH)

To support and provide information to the CHECC Disaster Behavioral Health planning lead, MDE was inquired regarding potential application for the "Project School Emergency Response to Violence," (SERV) grant. Follow-up was received from Louis Burgess who indicated that information will be gathered by MDE regarding this grant to determine the applicability and feasibility.

Provided MDHHS PIOs with drafted letter developed by the CHECC and reviewed/approved by Dr. Wells, Dr. Johnson, and April Swartout, for approval from the JIC to be signed and sent to GCHD. This letter serves to encourage Genesee County pediatricians to accept and use portable lead analyzers being offered to them by the GCHD. This letter was approved by the JIC this afternoon, pending minor edits. The final version of the letter will be provided to the SEOC State Director for approval before sending to GCHD.

Provided a MDHHS timeline of Flint Water-related activities, to date, to the Operations Section Chief as requested. This timeline included both health and human services statistics such as water and filter orders, number of blood lead tests conducted, and data on the number of elevated blood lead levels reported in children (categorized by age) in Flint.

Coordinated with the JIC and CHECC on nutritional information available online, as well as the possibility of activating the Disaster Distress 24/7 helpline through SAMHSA. These two projects are a work-in-progress to be further facilitated by the subject matter experts working on them later in the week.

Corrections (MDOC)

Brent Travelbee and Todd Bechler on duty SEOC today. All previous requests for vehicles, personnel and warehouse equipment have been filled and continue to be on site to assist with water distribution; additional request's today for re-allocation of hand jacks, a replacement electric jack, an additional box truck and 2 more transportation vans have either been filled or are in progress set for Monday morning delivery. MDOC Director Heidi Washington is providing full support to our assistance efforts. We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner. All MDOC resources will be reporting tomorrow Sunday January 17, 2016 as requested.

MDOC RESOURCES PENDING DEPLOYMENT: Monday, January 18, 2016

Vehicles with Drivers

(2) – 18' Box Trucks
(4) – 20' Box Trucks
(2) - 24' Box Trucks
(1) - 30' Box Truck (Lift gate broken but truck still on site, DTMB repairing)

Box Trucks have power lift gates

(1) – F250 Pick Up Quad Cab with Cap
(1) – 5 Passenger Handicapped Capable Van

(1) – 15 Passenger Van with 10' Enclosed Trailer
(1) – Pick-up Truck

(6) – 10/15 Passenger Vans

(1) – 20 Person Shuttle Bus (Sent to Red Cross Volunteer Sight)

(1) - 53' Refrigerated Semi-Trailer

(3) - Electric Pallet Jacks (This includes one that is broken and will be returning to Ionia tomorrow night for repair)

(7) – Hand Pallet Jacks

(5) 6-10 Passenger Vans

All vehicles drivers have 800 MHz Radio Operability (G EVENT 9)

Staffing

There will be 24 staff members on site 23 drivers and an assistant for the Red Cross Transportation Van (w/trailer).

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:
• Identified MDEQ employee George Krisztian to attend the Tuesday Flint health briefing.
• Coordinated one 24' trailer or truck to be delivered to the ARC HQ in Flint. This will be used to store water test kits once assembled by the ARC. Duration of request was 7 days.
• Participated in SEOC activities to include the daily state agency briefing and the Distribution Process meetings.
• Provided support for possible transition of test-kit provision to FEMA
• Initiated expedited delivery of sample bottles already on order.

Human Services (MDHS)

Updated MDHHS Budget / Finance of FEMA intention of assuming water filter device procurement.

Provided FEMA OPs and Logs requested information on current water filtration device orders and inventories.

Met with FEMA VAL. Exchanged contact information, provided some SA and supplied contact information between FEMA VAL and MCSC in Flint.

Staying in communication with 211, addressing human service concerns and delivery of resources to the elderly and disabled.

Review and provide regular 211 updates to SEOC Ops.

CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

Two bubblers that were supposed to be overnighted and delivered to a Flint area Home Depot did not arrive. Without these bubblers the Freeman School faucet replacement pilot cannot be completed; Install could possibly be finished on 1/18 if parts arrive.

LARA is currently working with DEQ to create a schedule for LARA's Plumbing Division to help DEQ with testing of additional schools in the Flint area.

LARA Bureau of Community and Health Services is in contact with licensed facilities to ensure they are receiving appropriate assistance if needed. LARA is continuing to receive information on the facilities to determine the appropriate actions needed.

Military and Veterans Affairs (DMVA)

Last 24 hours:
Distributed water, water filters, water test kits and collected water samples for analysis at five points of distribution. Coordinated efforts with Genesee County EOC and Joint Information Center. In-Processed 33 Soldiers to augment distribution operations at 1800 S. outer Dirve, Saginaw, MI on 17 January 2016 at 1300. Conducted lodging and operations orientation following in-processing. Total of 67 Soldiers on State Active Duty on 17 January 2016. All PODS received pallet jacks for off-loading water pallets. Coordination between FEMA and Selfridge Air Base (SANGB) taking place. Exact terms of agreement of FEMA using SANGB for staging operations have not been identified at this time.

Total of 67 Soldiers on State Active Duty:
1 at Genesee County EOC
1 at Joint Information Center
32 at PODS
33 Soldiers In-processing

Next 48 hours:
Distribute water, water filters, and water test kits and collect water samples for analysis at five points of distribution. Coordinate efforts with Genesee County EOC and Joint Information Center. Relieve Red Cross at PODS, assuming their role of distributing filters. Total of 67 Soldiers on State Active Duty on 17 January 2016. Additional Soldiers will conduct first full day of distribution operation on 18 January 2016. Continue coordination between FEMA and SANGB, a 0800 meeting will be conducted on 18JAN16.

Micheal Shook
CPT, IN, USA
989-763-4256

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC morning briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac. Participation in afternoon SEOC briefings in planned only if significant changes in the forecast occur.

NWS support beyond this weekend being coordinated between NWS Grand Rapids and NWS Detroit. Hand off to NWS Detroit for morning conference call weather forecast likely before the end of January.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

Contact info for VAAA Executive Director is:

Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

On 1/11/16 AASA forwarded to MSP/GIS over 1,400+ NAPIS addresses of Flint seniors who received in-home services in FY15. The NAPIS file was sent encrypted and did not include client names. The NAPIS file included 1,029 HDM, 138 CM, and 30 CCS clients.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Teams have been distributing water all day. 4968 homes have been visited today.

2:59 p.m. - Ryan McKee from DTMB requested assistance from MSP MIOC/DSEMIIC to monitor social media for information

relating to the cyber attacks that occurred on the following websites yesterday and today; CityofFlint.com, Michigan.gov and Flinttownshippolice.org.

3:09 p.m.- Analyst Peter Hoffman of the DSEMIIC was notified. DTMB will be forwarding their information to the DSEMIIC, MIOC and MC3 for coordination.

3:50 p.m. - DTMB forwarded their information regarding the cyber attack to the DSEMIIC, MIOC and MC3 for social media monitoring.

5:59 p.m. Lt. Young advised today, Sunday, Jan 17, 2016 - 173 total team members made up 11 teams which consisted of 104 volunteers to include 22 DHHS, 69 Non volunteers (Paid Personnel) which included 11 drivers from Dean Trailways, 12 MDOC personnel, 17 MSP and 29 GCSO.

We have 114 state of Michigan employee volunteers scheduled for Sunday Jan 17th and 139 scheduled for Monday Jan 18th.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided management briefing and information on emergency declaration.

DTMB Mail Services has seven drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams. Drivers have agreed to work through the end of day Tuesday, January 19.

DTMB assisted in procuring 72 truck loads of water, 8 trucks per day until Wednesday, January 20.
60 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
Provided 450 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks.
Warehouse space was procured for 80,000 square feet to hold water, water filters, cartridges and water test kits.
Procured 500 rain ponchos for volunteers and a 40 yard dumpster for use at the warehouse.
Providing printing needs for agencies for volunteers to distribute to city residents.
Provided armed security for Clio Rd. warehouse.
Providing server monitoring of MiCIMS servers.
Provided wireless router and printer for FEMA staff at SEOC.
Verizon Wireless booster will be onsite at Clio Rd. warehouse on Monday, January 18 by 2:00pm.
Procuring hand warmers for Water Response Teams.

Transportation (MDOT)

MDOT continues to maintain situational awareness and respond to issues regarding equipment and road conditions.

Subject: "Arrest Snyder" Protest - Ann Arbor, MI - January 18, 2016

Good morning,

The DSEMIIC continues to search social media for any threats related to Governor Rick Snyder in Southeast Michigan. The DSEMIIC has observed that there is an "Arrest Snyder" gathering planned for Monday, January 18, 2016. The event is motivated by the ongoing controversy related to the Flint Water Crisis.

The "Arrest Snyder" gathering will span across both the City of Ann Arbor and the University of Michigan Campus. The event is scheduled to begin at approximately 4:00 p.m., with participants meeting in front of the Rackham Building at 915 East Washington Street. At 4:30 p.m. participants plan to march West along Washington Street to Main Street, turn left and go approximately half a block to the Governor's residence at 211 S. Main Street in Ann Arbor by approximately 5:00 p.m. Once there, participants are being asked to form a moving circle in front of the residence. At approximately 5:45 p.m. the event page offers the option to march back to campus via Liberty Street.

As of Monday, January 18 at 2:00 p.m., there are 224 subjects confirmed as attending on the event's Facebook page.

The DSEMIIC assesses the media exposure, potential for attendance by groups with divergent views, potential to attract groups who seek to engage in destruction of property, assault, or other types of crimes may potentially result in incidents at, or associated with this event.

The DSEMIIC will continue to monitor events for public safety and situational awareness recognizing that all citizens have a constitutionally protected right to peacefully assemble and protest. The DSEMIIC will send updates with any new information.

Subject: New Request for Staffing - Flint Joint Information Center
Attachments: Staffing - 2016.01.18.docx

Importance: High

Fellow PIOs:

The Joint Information Center (JIC) continues to play a critical role in centralizing communications and streamlining public education efforts as the state continues working to improve the water situation in Flint. Thank you to all the departments who have and are providing staff. At this time, we are seeking staff for Jan. 23-Jan. 31.

To maximize efficiency, preference is for PIOs to staff the JIC for a two- or three-day time period (at least initially) to limit re-training and transition between incoming/outgoing staff.

I ask that you please review the attached staffing schedule and respond with your availability by Wednesday at noon. Most immediately, we are in need of some additional staff for this Saturday and Sunday.

The JIC is operating from a state office building in Flint at 125 E. Union Street, 48502. At a minimum, JIC working hours are from 8 a.m. to 6 p.m., although several PIOs are routinely working until 9 p.m. to complete all necessary tasks (more staff will help alleviate some of this). *Lunch is provided, and overnight accommodations can also be arranged at no-cost to the PIO.*

Please let me know if you or one of your staff can help us out.

Thank you much,

Ron

***Subject:* RE: SEOC Update 1/17/16 - Flint Water - Limited Distribution**

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/18/16 – 14th Day (13th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs) and PODs
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work to bring FEMA IMAT personnel up to date following the Presidential Emergency declaration.
- Complete appeal for Presidential Major Disaster Declaration denial.

Attached Documents:

- SitRep 13
- Side by side comparison of homes with filters January 13th compared to January 18th. This should be hitting the media tonight. This took longer to create than I wanted but is the image I have wanted to show progress of getting filters in to the field.

Status on Governor's request letter to the President:

- Appeal in process.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
    - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.
    - NG will be bringing in personnel to prep for surge.

Items to Note

- Beginning tomorrow the operational periods will be 7 days long.
- The CDC/ATSDR (Agency for Toxic Substances Disease Registry) has deployed a team to Michigan.
- An Arabic version of the palm card was reviewed and approved. This was developed via Arab American and Chaldean Council.
- Deployed 12 state/local teams and 10 ARC Flint Water Response Teams to the field today.
- DTMB is working to secure space in Flint for FEMA staff.
- Cost analysis to investigate if it would be more cost effective for FEMA to purchase water vs the SOM.
- ARC news release concerning the Volunteer Reception Center (VRC) sent out today.
- Media availability conducted today at 3pm at the VRC.
- Since 1/14/16 Michigan 2-1-1 has received three direct reports of bottled water testing positive for lead. DHHS SEOC Desk and DEQ SEOC Desk was able to contact two of the callers. The Zero Water filter (pitcher) has a handheld test device so people know when to change the filter. This TDS Meter measures dissolved solids (it is not a lead test). This was explained and we are going to work on messaging to ensure this does not cause issues. Dissolved solids are in all water. The water from the callers is going to be tested and a case of water from one of the companies will also be sent to DEQ for testing. Brands are Spartan Spring Water and Canned Water for Kids. The filter company is also going to work on messaging and work with us on this matter.
- Information reported to the JIC:
    - As of 1/17/16 as of 5 pm (start date was Tuesday, 1/12/16)

        1. 21,393 homes visited by the FWRTs to date.

        2. Distributed:
            a. Number of cases of water 37,313
            b. Filters 53,713
            c. Filter cartridges 169,520
            d. Test kits 7,379

        3. Total number of customers on the Flint water system
            a. 29,944 paying customers
            b. 45,000 hookups (This is our high end target #)
            c. 39,000 includes apartment complexes (The is the low end target #)

        4. Resources purchased:
            a. Cases of water 82,992 (additional 16,056 donated)
            b. Filters 115,700
            c. Filter cartridges 243,200
            d. Test kits 61,161

        5. Teams going out tomorrow:
            b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Continuing to work with faith based organization to distribute resources.
- Working with colleges to obtain volunteers for canvassing.

Chris

Update 1/17/16 – 13th Day (12th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs), PODs
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work to bring FEMA IMAT personnel up to date following the Presidential Emergency declaration.

Attached Documents:

- SitRep 12

Status on Governor's request letter to the President:

- Emergency declaration received.
  - Limited to direct assistance so we will need to ask for the Individual Housing Program but that is something I will work on with FEMA.
- Major disaster declaration denied. The appeal is being developed with a draft to Paul Smith by later afternoon 1/18/16.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 12 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.

Items to Note

- Deployed 11 state/local teams and 10 ARC Flint Water Response Teams to the field today.
  - 4,963 homes visited today.
- DTMB is working with DSEMIC and NC3 to monitor social media for information on cyber-attack yesterday.

  01/16/16
  - Approximately 5:00PM, Michigan.gov began to experience slowness in web page load time. Approximately 10 minutes later the Michigan.gov site became inaccessible caused by of a denial of service attack.
  - IBM team was able to implement a mitigation strategy to stop the attack that began at 5:00PM. At 6:24PM the michigan.gov websites were again available to the public.
  - Approximately 7:30PM, a new attack was initiated on the michigan.gov environment. The attack focused on the DNS servers and resulted in michigan.gov becoming inaccessible. Additionally, due to the nature of the attack other IBM customers were affected as well. IBM was able to implement a new mitigation strategy that resulted in the excessive traffic being blocked. At 7:53PM the websites were restored to normal operation.

- Shortly after the michigan.gov websites were restored, the State of Michigan was notified by our internet service providers that a DDoS attempt was made against our SOM DTMB servers in the external DMZ. Once detected, this attack was blocked and Michigan Cyber Security saw no signs of any other types of attacks.

01/17/16

- Genesee County was unable to access MiCIMS due to the State increasing filters. Michigan Cyber Security made adjustments to filter settings and their access to MiCIMS was restored.
- DTMB reached out to the City of Flint CTO, Paul Knific, offering any support they need. Right now they feel they have bigger issues than trying to get some of the things back online.

We currently do not have any additional information on the attacks on the City of Flint (cityofflint.com) or Flint Township Police (flinttownshippolice.org) websites. We'll continue to pass information along as we receive it.

- Information reported to the JIC:

  - As of 1/17/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 16,353 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is from the data we received from prior to the SEOC activation (trying to validate the data) plus the PODs and door to door operations since activation.

2. Distributed:
   a. Number of cases of water 27,195
   b. Filters 50,432
   c. Filter cartridges 168,605
   d. Test kits 4,861

3. Total number of customers on the Flint water system
   a. 29,944 paying customers
   b. 45,000 hookups (This is our high end target #)
   c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
   a. Cases of water 57,456 (additional 12,884 donated)
   b. Filters 108,520
   c. Filter cartridges 239,081
   d. Test kits 28,901

5. Teams going out tomorrow:

   b. 12 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Facilitated activation of the Genesee County/Genesee Health System MOU for mental health services.
- Coordinated supplies for distribution to students at the U of M Flint campus.
- Still concerned about people going to every fire station and collecting water/filters.
- Coordinated trash pickup at Fire Station PODs with the City Liaison officer.

- Coordinated hotshot deliveries of supplies to home bound population.

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/16/16 – 12th Day (11th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to prepare for engagement following the Presidential Emergency declaration

Attached Documents:

- SitRep 11

Status on Governor's request letter to the President:

- Emergency declaration received. Federal Coordinating Officer (FCO) is David Samaneigo (Sam) who has been my LNO from FEMA. We began discussions on a transition to FEMA support last night. His team is headed to MI at this time and we will have our first coordination meeting on Sunday.
- The request for a Declaration of a Major Disaster was denied. FEMA advised this event does not fit the legal definition of a major disaster (natural incident or fire, flood, or explosion). This information has been provided since prior to the event to elected officials in Flint and the legislature. We are reviewing the chances for an appeal and I have already discussed this with the FCO.

Key items for tomorrow to note:

- The logistics plan will be fully executed tomorrow with all teams.
    - We will have 10 state agency, type 3 teams (6-9 personnel), with a goal of 300 homes per team.
    - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.
- I will be back on duty Sunday.
- We have been working with some of the churches. Contact was made with 14 churches for Sunday distributions. Interaction with the pastors has been very positive.
- A logistics briefing will be provided to see how many more teams we can put in the field.

Items to Note

- LT Gov visited the local EOC today; discussed local EOC operations.
- Deployed 11 state teams and 10 ARC Flint Water Response Teams to the field today.
- DEQ sampling kits are now being received at the PODs.
- DEQ sampled two Head Start facilities and worked with GIS to obtain future sample sites.
- The Freeman School pilot was delayed due to some parts not arriving as scheduled. Testing was to be done Sunday but may not occur until Monday.
- NG will have a total of 78 personnel in the PODs for distribution. Mission has not changed.

- NG soldiers have been in the PODS. 38 more processing in tomorrow with start date of 1/18 in the PODS. The TAG and I will be discussing future use of NG personnel door to door next week.

- Information reported to the JIC:

  - As of 1/16/16 7pm (start date was Tuesday, 1/12/16)

1. 11,324 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is from the data we received prior to the SEOC activation plus the PODs and door to door operations since activation. 3,850 homes were visited today (4,000 was the goal).

2. Distributed:
   a. Number of cases of water 20,876
   b. Filters 47,935
   c. Filter cartridges 167,401
   d. Test kits 3,322

3. Total number of customers on the Flint water system
   a. 29,944 paying customers
   b. 45,000 hookups (This is our high end target #)
   c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
   a. Cases of water 57,456 (additional 12,884 donated)
   b. Filters 108,520
   c. Filter cartridges 239,081
   d. Test kits 28,901

5. Teams going out tomorrow:
   a. 10 State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
   b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Provided direction to Operations and Logistics Section to initiate water sample collection at PODs.
- Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional churches were supplied with water, filters and test kits.
- Still concerned about people going to every fire station and collecting water/filters.
- Station #6 (POD) has associated safety concerns due to proximity of street and lack of suitable parking. We are working to resolve.

Subject: SEOC Update 1/15/16 - Flint Water - Limited Distribution

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/15/16 – 11th Day (10th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Pilot the logistics plan and adjust as needed
- Continue with door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to ensure we get a Presidential Declaration of a Major Disaster and Emergency

Attached Documents:

- SitRep 10

Status on Governor's request letter to the President:

- All documents for the presidential request have been submitted to FEMA. Numerous calls and meetings took place between me and FEMA today.
- When we get the declaration(s) … I will set up a legislative/congressional call to explain and provide bullet points as to what programs we will received. The Federal Coordinating Officer assigned will also be with me to answer questions. This has helped in the past.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
    - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.
    - A pilot team was used to test our logistics plan today and with 60% strength they had 160% output (830 homes).
- I will be off tomorrow but available by cell. Tony Katarsky will be SEOC State Director. I will be back in on Sunday.

Items to Note

- LT Gov visited the local EOC and SEOC today. He was able to hear our final briefing for the day.
- Held a short session managing stress with SEOC staff. Two handouts were put in MICIMS for all state and local personnel to view.
- Deployed 10 state teams and 5 ARC Flint Water Response Teams to the field today.
- Standing requirements were created for the JIC so we can get information to the media every day. Below are the current ones we have in place and we should have something out tonight according to the JIC.
    - As of 1/15/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 7474 homes visited by the FWRTs. We believe we have ~24,000 homes with filters but are trying to validate that information. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
    a. Number of cases of water 18,576
    b. Filters 45,916
    c. Filter cartridges 165,382

d. Test kits 3,217

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 44,688 (additional 12,884 donated)
    b. Filters 78,520
    c. Filter cartridges 163,081
    d. Test kits 18,761

5. Teams going out tomorrow:

    b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Home Deliveries:

- Still receiving lists from the Valley Area Agency on Aging (VAAA) on home deliveries and forwarding these to the Sheriff's office. They are going through a lot of homes. 120 out of 125 homes were completed yesterday.

Operations:

- We sent staff to visit Fire Station 6 and the warehouse today. Fire station 6 traffic was congested and that was during a "slow" time. The National Guard is identifying what is needed to alleviate this. MSP is working on providing uniform presence as needed. An additional iPad at each location will hopefully help relieve the amount of time that people are spending at the distribution sites.
- Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional requests from churches were made and I approved the locations so they could be ready for Sunday. Lt. Roach was told by one of the pastors that he met with the Gov today and expressed how much he appreciated the efforts put forth. We should have 14 for this Sunday. We are working on how we can increase this output.
- Still concerned about people going to every fire station and collecting water/filters. NG personnel observed vehicles with several cases of water an overheard saying they were heading to the next station. Some people were helping themselves and taking more than one case at a time. Per the NG they cannot physically stop people from doing so. The NG is going to try to change staging in the fire stations to try to prevent this.
- Flint PD is going to check in every day with the EOC and provide a specific contact person. They are also going to help with traffic issues at the PODS. Will ask Flint PD to provide a presence when water is off loaded at a POD to help prevent people from "helping themselves."

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/14/16 – 10th Day (9th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Prepare/approve logistics plan and finalize lease on warehouse space/begin to move supplies from GCCARD to new warehouse
- Continue with door to door teams and finalize planning for future team use
- Submit request for a Presidential Declaration of a Major Disaster and Emergency
- Continue to work on long term recovery items (DHHS, DEQ, MDARD)

Attached Documents:

- SitRep 9

Status on Governor's request letter to the President:

- All documents for the presidential request have been submitted to FEMA. I had a lengthy conversation with the FEMA Region V Administrator reference the request prior to sending.

Key items for tomorrow to note are:

- The door to door teams will continue in the morning.
- We will continue to ramp up door to door operations with additional teams. Teams continue to focus on the high lead level areas and additional data is being analyzed to focus mission areas.
- ARC will increase the number of their Water Response Teams.
- Supply burn rates as well as projections on how many teams will be needed to put filters in all homes within 3 and 5 days will be completed. Analysis will be done to see in NG personnel may be needed to finish in quicker manner.

Items to Note

- DEQ was notified of the number of homes who are willing to have them take additional samples in the future (current number (114). This question was added to the App being used by the Water Response Teams. Data will be provided when needed.
- LT Gov is scheduled to be at the local EOC and SEOC (~4:30) tomorrow to see the operations.
- Secured 80,000 sq. ft. of a warehouse today. Working to consolidate all resources in one location. Tomorrow will be the first day of full implementation of our logistics plan.
- Email sent to state employees to request volunteers for weekend.
- Media monitoring showed no incorrect information today.
- Michigan Association of Broadcasters is sending PSA to radio stations.
- Coordinating with Red Cross on volunteers for weekend.
- Deployed 8 Water Response Teams to the field today (approx. 120 volunteers). 78 Red Cross volunteers active across the operation today.
- National Guard is ramping up to have 3 soldiers per shift at each POD tomorrow. Will also have a Public Affairs Officer at the JIC and liaison at the local EOC.
- Senator Ananich visited the SEOC today to see how things operate. The visit went well and he seemed happy with the number of staff working the Flint event. He tweeted out a message indicating there is still a lot of work to be done but all are working hard.
- DHHS
    - The Community Health Emergency Coordination Center (CHECC) is working on the following:
        - A nutrition plan
        - Education materials, messaging, and working with local agencies
        - Developing a community assessment for disaster behavioral health services.
- Lined up the delivery of filters to two large apartment complexes and a student housing complex.
- We have the list of individuals needing home service (additional contacts will be sent to the Ops Chief at the Local EOC each day at 4:00). Info will be provided to the sheriff's office for action.

- Water Response Team Numbers (this is not the total of homes with filters – I will provide that number tomorrow but it appears we have filters in over half the residences):

	TOTAL	1/12/2016	1/13/2016	1/14/2016
Occupied Homes	1450	242	492	716
Vacant Homes	1967	152	161	1654
Total Homes	3417	394	653	2370
Resources				
Door Hangars	1487	217	453	817
Water	588	117	254	217
Filters	945	112	220	613
Pitchers	22	3	13	6
Water test kits	217	48	109	60
Replacement Filter	482		137	345
Total Resources Dispersed	3741			
Future sample test site	114	28	34	52

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/13/16 – 9th Day (8th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- *Receive, store and increase quantities of supplies*
- Prepare/approve logistics plan and close lease on warehouse space
- Continue with door to door teams and finalize planning for second wave increase (+15 teams – total for 1/14/16 will be 20)
- Continue to work on Governor's Declaration of an Emergency

Attached Documents:

- SitRep 8

Status on Governor's request letter to the President:

- All support data from state Agencies and local jurisdictions collected as of 6:00 pm on 01-13-16
- Current timeline:
  - First draft completed and ready for review by State Department Directors (including the Attorney General) by 11:00 am on 01-14-16
  - State agency reviews due back by 1:00 pm on 01-14-16 for revision of the draft
  - Revised draft to Captain Kelenske by 2:00 pm on 01-14-16 for review and forwarding to the Governor for final review
  - Final draft (based on Governor's review) submitted to FEMA Region V Administrator by no later than cob 01-14-16 but hopefully sooner. FEMA is aware and ready to receive.

Requests and potential response from FEMA/President

- The letter will request all programs eligible under the Stafford Act including Public Assistance, Individual Assistance, Hazard Mitigation, FEMA's coordination of assistance from other Federal agencies and direct assistance from FEMA

- The letter will also request potential direct reimbursement from other Federal agencies such as EPA, CDC, HUD, DHHS and SBA
- This request is in coordination with the request for Non-Stafford Act federal assistance already requested and received by the State (technical assistance and administration, but no direct reimbursement of disaster costs)
- Direct Federal assistance from FEMA in the form of Individual Assistance to homeowners for household repairs (repair and/or replacement of water service lines and Other Needs Assistance to reimburse for water filters, bottled water, etc.) is a possibility
- Direct Federal assistance from FEMA in the form of Public Assistance is not as likely as it is mostly replacement of publicly owned water distribution lines (and not the direct result of damage from a natural cause)
- If Stafford Act assistance is denied (Public Assistance, Individual Assistance and Hazard Mitigation) FEMA could still provide coordination of assistance from other Federal agencies if the President declares a disaster (or emergency) for the State of Michigan

Key items for tomorrow to note are:

- The door to door teams will continue at 9 a.m. – 5 p.m. Thursday morning and continue through the weekend.
- We will continue to ramp up door to door operations with additional teams. Teams are focusing on the high lead level areas and additional data is being analyzed to focus mission areas.
- *MNG will have a press event at the armory with incoming soldiers and MG Vadnais.*

Items to Note

- Received information that Rev. Jesse Jackson will be in town 1/17/16 at 1:30 at the Heavenly Host Church of the Harvest of Dartmouth St, Flint.
- Managed and corrected misinformation on NG role.
- Senator Ananich is stopping by the SEOC tomorrow morning 0845. I am meeting with him and his Chief of Staff. Short visit as he has a 0930 at the Capitol.
- Working with Comcast so they can put teams in the field for distribution.
- Penske is going to give us 15-20 trucks over the weekend.
- Contact made with Two Men and a Truck for resources.
- Meeting set with Google where they will brief me and key staff potential tasks.
- Coordinated with Flint Mass Transportation Authority (MTA) to include Fire Station PODs on bus routes.
- Tomorrow I will have a projection as to the number of teams needed to get all citizens filters in their homes in 5 days / 3 days.
- We are standardizing team structure and supply deployment to increase efficiencies. Mission Ready Package (MRP) specifications will be sent out for other entities to assist with door to door. They will then be able to arrive as a MRP, get supplies, receive a mission location and deploy.
- 5 Water Response Teams were in the field again today. Below are the numbers from the 2 days of just the Water Response Teams (there are paper copies with data still to be entered from the PODs). I was just briefed by the ARC logistics planner and there are efficiencies we can put in place to increase homes touched per day. The next version of the app will provide more granular details. Additional 30 tablets were configured by DTMB today for field implementation to include use in the PODs.

	Total	1/12/2016	1/13/2016
Occupied Homes	533	242	291
Vacant Homes	238	152	86
Total Homes	**771**	**394**	377

Resources			
Door Hangars	473	217	256
Water	265	117	148
Filters	235	112	123
Pitchers	9	3	6
Water test kits	92	48	44
Replacement Filter	93		93
Total Resources Dispersed	**1167**		
Future sample test site	62	28	34

- We show 17,276 residences with filters (this does not include data entry to be completed from POD or other locations).
    - We have 35,378 service hookups but with apartments, multi residence dwellings, etc we would be around 45,000.
- Logistics Support
    - The American Red Cross Logistics Planner provided me a brief and I approved the plan forward. *The current plan includes:*
        - Mission – A filter in every home ASAP.
        - 4 Distribution Methods
            - PODs (5)
            - Water Response Teams (20 effective tomorrow and this will increase)
            - Local EOC "Hot Shots" (these are calls for functional needs, unable to get to a POD location due to ??, etc). Personnel dispatched with supplies.
            - Local EOC support for other local requests (Faith based for distribution, etc.)
        - Three warehouse locations at this time
        - How to better leverage ARC resources

- Supplies – Daily Numbers
    - Replacement Cartridges - 30,700 delivered.
    - Water (cases) - 19,152 cases delivered

- Budget projection completed and will be submitted to SBO for review.

- *Notes from Water Response Team Command (MSP)*
    - Very good synergy between Flint Post troopers and Genesee County Sheriff command and deputies in effective and efficient deployments for distribution efforts.
    - Great attitude and efforts by uniforms and volunteers to make important contributions to the City of Flint on water response team deployments.
    - Clear direction and coordination in the field of supply teams by lieutenants and troopers. No confusion. Clearly defined roles.

All personnel continue to be fully committed to fixing this as quickly as possible.

Chris

<u>Update 1/12/16 – 8th Day (7th Full Day) After Governor's Declaration of an Emergency</u>

I apologize in advance for the length of this report. With the supply issues we had the last couple of days I wanted to share our inventory plus what we anticipate to ensure we do not have supply issues.

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Fine-tune logistics
- Increase and deploy door to door teams (4 state teams added to teams from the Sheriff's Department)
- Increase collaboration and messaging of collaboration with local agencies (specifically the Sheriff's Department)

Attached Documents:

- SitRep 7
- Executive Order Activating the National Guard

Key items for tomorrow to note are:

- The Governor signed an Executive Order activating the National Guard. Mission will be to relieve ARC volunteers at the PODs (Fire Stations) which will free up the ARC volunteers for door to door activities.
    - I have briefed the ARC Disaster Officer on this plan.
- The Governor requested, through FEMA Region V, support from the Federal Emergency Management Agency (FEMA) to bring together and identify other federal agencies that may have programs and funding that could be dedicated to assisting Flint as part of an interagency recovery plan. One of the existing LNOs has been identified as the POC for this. He will be a great liaison for the FWIACC.
- The door to door teams will continue at 0830 Wednesday morning and continue through the weekend and ramp up door to door operations with additional teams. Teams are focusing on the high lead level areas.
- We will look at all commodities and see where we are and where we need to be while working with the ARC logistics specialist.

Items to Note

- PSA video sent out to Flint citizens on resources available.

- Water
    - Today's numbers - 7,824 cases of water arrived today, 1/12/16 (109 pallets)
    - Ordered:
        - 19,152 cases of water are going to arrive Wednesday, 1/13/16 (266 pallets)
            - 1/3 is going to GCCARD and the rest is going to the new warehouse
        - 12,768 cases to arrive daily beginning Thursday through Saturday (177 pallets a day)

- Filters
    - Today's numbers
        - Ordered on 1/11/16 and delivered 1/12/16 direct to GCCARD
            - 2,000 – Brita filter faucet mounts
        - Filter Replacements
            - 2,400 – Brita filter replacements (single pack)
            - 8,000 – Brita filter replacements (two pack)
    - Ordered on 1/12/16 to arrive Wednesday
        - Faucet Mounts – To be delivered direct to GCCARD on 1/13/16 (Wednesday)
            - 10,000 – PUR Vertical faucet mount
            - 2,500 – PUR Horizontal mount
        - Replacement Filters – To be delivered direct to GCCARD on 1/13/16 (Wednesday)

        - 10,000 – PUR replacement filters (3 pack)
        - 10,000 – PUR replacement filters (single pack)
    - PUR Combination Pack – to be delivered to GCCARD on 1/13/16 (Wednesday)
        - 10,700 – PUR combo packs

- To arrive Thursday
    - Zero Water Pitcher (8 Cup) – Delivering direct to GCCARD on 1/14/16 (Thursday)
        - 1,300 – Zero Water pitchers
    - Faucet Mounts – Delivering direct to GCCARD on 1/14/16 (Thursday)
        - 11,000 – PUR vertical faucet mount
        - 1,500 – PUR Horizontal faucet mount
        - 5,000 – Brita faucet mount
        - 10,000 – Brita adv faucet mount white
        - 12,000 – Brita adv faucet mount chrome
    - Replacement Filters – Delivering direct to GCCARD on 1/14/16 (Thursday)
        - 117,600 – PUR replacement filter

- Test Kits
    - 6601 unassembled kits arrived at GCCARD today, 1/12/16.
    - 500 have been assembled and are ready for distribution
    - 1000 additional unassembled kits have been ordered to be delivered at GCCARD (no ETA yet)
    - 10,142 unassembled kits to arrive at GCCARD early next week

- Second warehouse – Located in Flint
    - 100, 000 square feet of secure warehouse obtained.
    - Accepting commodities beginning Wednesday, January 13

- Logistics Support
    - The American Red Cross Logistics Planner arrived from DC today as requested. I outlined what her mission was and how I saw the progression forward. This logistics planner will assist in streamlining the inventory and distribution process now and into the future.

- Door to Door Numbers
    - Today the app implementation for the field went extremely well. There were a few issues that were quickly addressed. One related to how form fields should be filled out. Another was getting styluses for teams so that they don't have to remove their gloves in the cold. All very simple to fixes.
    - We are working on version 2.0 so this can be used at the PODs
    - We should be able to greatly optimize distribution in the near future as we mapped the active water subscribers from Flint's DPW and are adding them to the field team members apps. Of the ~56,000 possible addresses, this reduces the number of possible homes to visit down to ~29,000.
    - Notes from the field commander:
        - "Today we started out the day using two groups that consisted of approximately 10 people in each group. We eventually combine groups with Genesee County Sheriff's group and they brought two more groups with approx. 10 people (Local UAW) in each group. This made us a lot more efficient and we were able to set up a game plan. Tomorrow I feel we will be more efficient and we will have a better plan in place to get the maximum output out of our resources."
    - In the end, there were 394 total home visits with the following breakdowns:
        - 217 Door Hangers

- 152 Vacant Homes
- 117 Water Distributions
- 112 Filters
- 3 Pitchers
- 48 Water Test Kits

- 211
  - CALL VOLUME:
    - 185 calls for water-related issues had been received as of 4:45 pm.

- Logistics made contact with Comcast and will be supplying them with filters and replacement cartridges for their deliveries in their work trucks as they make services calls. They will follow our procedures for reporting (our checklist).

Chris

Update 1/11/16

The focus today was the media event and getting the supplies and logistics on track. Most of the activity today was working on logistics for the water and other supplies.

Attached Documents:

- SitRep 6

Key items for tomorrow to note are:

- The door to door teams will start at 0830 Tuesday morning. It is reported that troopers are going to the door but DHHS employees are the lead with a troop car nearby.
  - State and local GIS created an App today for the teams to use tomorrow but I see potential use at distribution sites.
  - The App data will be used for our maps as we survey the public/distribute supplies and we will be getting real time metrics through the site from the field send back to the SEOC. We are using Android tablets tomorrow but in the future can use any mobile device for this.

Items to Note

- It was reported that only one POD (Station 5) was out of water longer than 30-45 minutes. This site was ~2 hours without water and part of that was the truck went to the wrong station. Trucks were sent as soon as the local EOC was notified.
- We also did not receive a DHHS shipment that was to come in which caused some filter delivery issues.
- Supplies are limited at this time; however, we are getting our shipments starting at 0630 tomorrow.
- We have Home Depot giving us 12,768 cases (this was a late development so the SitRep indicates half the amount) of water every day starting tomorrow. We are still working with other distributors too.
- ARC is flying in a logistics planner tomorrow. Three additional staff with be with her to shadow and help. We are turning warehouse logistics over to ARC logistics. We are moving tomorrow to a process that has a distribution center (GCCARD) and a warehouse that is 100,000 square that will maintain mass quantities. Staff has continually been placing orders for supplies to ensure we get a head of this. The intent is to keep the warehouse full so we do not have these continual issues of supplies.
- Began mapping lead service lines (anticipate having draft of lead service lines Friday).
- Coordinated with local IT managers overseeing filter tracking system to streamline data collection.

Local Emergency Operations Center

• Working to coordinate resources at the local level to maintain adequate supplies at all PODs.
• Demand has exceeded supplies and supplies are moving rapidly from PODs today. Working to make sure POD managers notify us when they start running low.
• Working to establish a warehouse for local resource storage.
• Established trigger points for resources at PODs and hourly inventory reporting from the PODs.
• Discussed potential long term water sources between local EOC and SEOC.
• Established planning cycle/meeting scheduled for 1/12/16.
• Local EOC EMHSD staff with Natasha Henderson to request deployment of City representative at local EOC.

Chris

Update 1/10/16

Attached Documents:

- SitRep 5
- Door card (English version but Spanish version will be ready for Tuesday)

I have a local EOC section listed below but state personnel are heavily engage in management of both locations. We occasionally hit some road bumps with this event but all personnel are working well together to accomplish our goals (especially state agency personnel).

I have had good discussion with FEMA LNOs. Two statements have been developed from our discussions that hopefully helps put this in more context but if it is more confusing I apologize:

1. In the immediate response, the State, in collaboration and coordination with city of Flint and county of Genesee are working to get water, water filters, and testing kits to the affected population. In conjunction, the state will coordinate with federal agencies to ascertain what resources can come to bear to help mitigate the issue.

2. If asked about a federal declaration from FEMA, we need to articulate the definition of major and emergency declaration and state or note to ourselves that it appears to not qualify; **however**, there may exist opportunities to leverage federal assistance from some agencies (i.e....EPA) under their own authority to help address this issue.

    - We need to really manage expectations on the potential for a federal declaration...not that we will not go after one but it will be difficult to get.
    - A major disaster is defined in the Stafford Act as any ***"nature catastrophe (including hurricane, tornado, storm, high water, windriven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought) or, regardless of cause any fire, flood, or explosion.....causes damage of sufficient severity and magnitude, to warrant major disaster assistance.....to supplement the efforts and available resources of States, and local government....."***
    - An emergency declaration is ***"is any occasion or instance for which, in determination .....assistance is needed to supplement State and local efforts and capabilities to save lives and protect property and public health and safety or to lessen or avert the threat of a catastrophe....."***

    - This is limited to immediate and short-term assistance (I hate to put times on this but short-term is like 3 weeks), essential to save lives, protect public health and safety and property.
- Severity of the situation is ***"A finding that the situation is of such severity and magnitude that effective response is beyond the capability the state and affected local governments, and that the state requires supplementary federal emergency assistance to save and to protect property....***
- Nature of assistance for Emergency Declaration is for ***"Debris removal, emergency protective measures, direct federal assistance...."***
    - Debris Removal = ***self-explanatory and we do not have this***
    - Emergency Protective measures = ***water, commodities, transportation (remember ... to supplement what the locals and state are already doing if we need more)***
    - Direct federal assistance= ***what specific type of work is requested, and what are the reasons why the state/local government cannot perform or contract for performance. Essentially what is the need that state/local govt cannot provide. I can see this being something we need but we may be able to get this outside a federal declaration under the federal agencies own authority to help address this issue.***

Back to the update...

Key items for tomorrow to note are:

- Training is occurring for the door to door teams scheduled for Tuesday morning.
- Deploying an additional MSP District Coordinator to the local EOC for command and control support.
- Deploying two DTMB trucks and two drivers for sustained logistical support for the week.
- Media event with the Governor in Flint.
- New Incident Action Plan starts (1/11 0800 -1/13 0800 operational period). Our objectives are as follows:
    1. Ensure all households within impacted community have required resources.
    2. Ensure accurate tracking and accounting of all commodities.
    3. Improve and maintain public information strategy.
    4. Develop a long term public health and services plan.
    5. Ensure adequate staffing to support operational requirements.
    6. Identify possible assistance programs.
    7. Develop an approved GIS strategy.
    8. Maintain coordination between partner agencies and organizations.
    9. Enhance situational awareness and common operating picture of all activities.
    10. Develop a comprehensive Recovery Plan.

Items to Note

- All 9 churches had filter systems/replacement filters, information sheets, and water test kits delivered as requested by each pastor/reverend on Sunday. We did not think we could get them water due to the limited time but we did end up getting water to all 9 churches with the other items.
- Fire station resource locations stayed open from 9a to 9p and will continue with those hours until further notice (Staffing is in place until Saturday). ARC is staffing these locations.
- The media event was held at Fire Station No. 1 and report back is that it went well and the spirit of collaboration between local, state, non-governmental partners is strong was relayed.
- The four door to door teams will have the hours of 8:30 a.m. to 5 p.m.
    - Each will have logistics support from DTMB, security from MSP, and contact personnel from DHHS.

- The door card is attached that will be left if no one is home.
- Worked to identify a storage location within the City of Flint for water and supplies. G-CARD is identified as temporary location but we are moving toward a state run warehouse operation (looking at private sector partners to assist, especially with the warehouse management side).
  - GCCard is large enough, centrally located and comes staffed. GCCard has 75,000 sq ft with warehouse managers to assist with tracking resources coming in and out.
- GIS will provide us daily updates of how much was distributed each day but note we have a delay in data entry from delivery to entry in the GIS system. Over the weekend there was a problem locally with staffing to get this completed. A solution is in place and will be implemented so we get timely data. Distributed to date (as of 1/8/16).
  - 12,386 filters
  - 1,985 replacement filters
  - 354 Pitchers
  - 2500 Lead Testing Kits
- Establishing and tracking of resources is a priority. Staffing has been assigned to get a good handle on these to ensure distribution sites maintain an appropriate level of inventory. I have requested trigger points get put in place so we do not get below certain levels in the main warehouse location.
  - Contacts with some large water distributors have been made and their and our logistics chiefs will connect first thing this week.
  - We have ordered an additional (expedited delivery with ETAs tomorrow)
    - 40,000 Brita Filters
    - 40,000 Brita Replacement Filters
    - 1000 Zero 8-Cup Pitchers
    - 1000 Zero 8-Cup Pitchers
    - 2000 PUR Replacement Filters
    - 93 Pallets of water (about 6700 cases)
- GIS continues to produce multiple maps for use.
- JIC Items
  - Requested PSA on the radio. Media has been approved and working with MAB.
  - Requested JIC to contact Comcast and Dish Network for availability for continuous running of filter install/replacement and test kit video.
  - A news release will likely going out tomorrow regarding canvassing in neighborhoods. Continued social media messaging.
    - Tuesday – embed state PIO with one of the canvassing teams to liaison with media.
    - JIC moving tomorrow to Flint.

<u>Local Emergency Operations Center</u>

I am providing you some information on some issues we ran into at the PODs. This has been addressed with additional state resources and processes put in place so we do not run out of resources. Public concerns/complaints have not been brought to my attention at this time. Staff is working very hard to ensure we do not run out of supplies at the PODs and they understand the consequences. No one in the Local EOC or State EOC is happy the follwoing occurred and I felt you should know in case it is brought up. Again, I believe we have fixed this and I take full responsibility for any supplies not being on site.

<u>Fire Station Inventory Levels:</u>

Station 1:

- Only time without supplies - 15 minutes without water while the truck was unloaded.

Station 3:

- Ran out of replacement filters around 7:00, replacement filters delivered around 7:30. Had to pick up replacement filters from Home Depot and deliver.

Station 5:

- Ran out of water around 5:00, water was delivered around 6:30. We needed to find additional trucks because DTMB drivers were over hours. The ARC stepped up and found a truck to go and pick up a pallet of water and deliver.
- Somewhere between 4:00-6:00 they ran out of lead test kits. No way to restock these because City facilities were closed and could not reach anyone.

Station 6:

- Around 5:00 ran out of water, filters, and replacement kits. Replacement kits were delivered around 7:30. Additional water and filters were delivered after 9:00 due to the DTMB drivers heading back to Lansing. Food Bank was called and had to get drivers in to operate trucks, pick up water from the School District, load and deliver to all sites. Delays occurred with weather conditions and needing to use last minute sheriff EOC staff to load due to issues with City workers. City workers were scheduled to help and left around 7:00 without helping.
- 2 pallets of water were dropped off in the afternoon and within 1 hour were gone. This was much faster than we expected. On 1/9 they didn't go through 2 pallets of water at any station for the hours 9:00-4:00.
- We received news that a reverse 9-1-1 call notified residents of water which caused an unanticipated amount of people obtaining water. There was also a report of 1 person walking out with 2 cases of water and trying to sell in the parking lot.

Station 8:

- Around 7:00 ran out of filters and lead tests. Filters were delivered around 8:00 from the food bank trucks.
- Hourly reports were requested in the morning from volunteers but this information was not received as to the status throughout the day. Early inventory of supplies took between 1 hour-1.5 hours to receive in the EOC. We were not advised of low counts, just zero numbers.
- Reports received that the last couple of hours were slow.
- Residents were advised of the other sites and the opportunity to obtain supplies.

Restocking Plan

- United Way set up meeting with Food Bank to discuss.
- Had EOC meeting on this topic to discuss options.

Churches:

- All 9 churches received waters, filters, and informational bulletins.
- Lt Roach received positive feedback from 3 of the pastors.
- No complaints were received.

Signage:

- Provided information to SEOC on signage requirements at the fire stations.

Storage:

- Researched storage spaces; established temporary site at GCCARD.

Personnel:

- Lack of local EOC leadership (seems somewhat checked out) with IC and Deputy IC (doing an okay job).
- Captain TaFoya (Genesee County) helped tremendously today with all the plans outlined above and attended the press conference.
- Tina Martinez at the Food Bank and Matt Purcell at GCCARD were extremely helpful in getting last minute operations set up.

Chris

Update 1/9/16

SitRep 4 attached for more in depth information. The below only contains some items worked on today and while the format in the attached SitRep is not perfect (it is created automatically by MICIMS) it does contain a lot more information you may want to read. I also attached one of our maps. It is our filter distribution map. All filters handed out by anyone working with us feeds into this now. We are continuing to refine these and at this time there is a delay in the upload of address data but we are working on it. We have a ways to go to get filters in every home but this will help direct us to those who need still them. We also are working on identifying abandoned homes.

Key items for tomorrow to note are:

- 9 churches will have ARC volunteers and filters for distribution. Some may also get water.
- 5 fire stations are a distribution point for water, filter systems/replacement filters, and water test kits. While only open today until 4 p.m., tomorrow and until further notice they are open from 9a to 9p.
- Media event will take place on the above tomorrow.

Items to Note

- 211 has some issues with call load but it is being worked on. 2-1-1 Director contacted MDHHS PIO to discuss/resolve caller wait times and messaging. We anticipate an increase in activity tomorrow in 211 calls so we requested and received an increase to staff 211.
- We are shifting tasks the SEOC took on that are handled more effectively and efficiently at the local EOC. We have established command and control in their EOC. We are running things there but that is not being made public. We are doing this in partnership but we are clearly handling the operation with state personnel oversight.
- A 3rd FEMA LNO arrived today upon my request. This has nothing to do with a Presidential request for a declaration but support for some other items I want worked on for long term recovery.
- We continue morning calls with the local EOC leadership and local emergency manager on what our goals for the day are as well as any issues/concerns.
- Five 5 fire stations have received water, water filters, replacement cartridges, and water testing kits with American Red Cross personnel at each location to assist with delivery of resources and collection of addresses receiving them. These locations will be open from 9a – 9p daily until determined they are no longer needed. Those picking up water testing kits will be advised that they can return the test kits to the fire departments (where they will be picked up and taken to the Flint City Hall), the Flint Water Treatment Plant, or they can take them directly to the Flint City Hall. For those unable to return the kits, 211 can make arrangements for pick up the kits. We understand response to these sites has been positive thus far. The Genesee County EOC will be monitoring these supplies and request replacement of products as needed.
    - A call is going out tomorrow morning to advise this information ... I do not believe it was every resident but Tori Sachs has that info if needed.
- I approved a press release today to advise the public that all levels are working together to ensure delivery of filters, test kits and water; noting that all of these items were delivered to the 5 Flint fire department stations. It was stressed that the public should be aware that the local and state agencies have been working cooperatively to assist the residents - and will continue to do so. This was done to hopefully end or at least minimize the "who can get water and filters out first" when all of this has been connected with the state and coordinated since the state declaration was put in place.
- The arrangement of 2,000 filters, to be taken to 9 local churches on Sunday, January 10, is ongoing. The filters have been secured; they are now in the possession of the DTMB. DTMB will return to Flint on Sunday morning to deliver these to necessary locations. The American Red Cross will be on site at each church to assist with distribution and recording addresses (for GIS). The local

EOC is working to ensure these arrangements are complete and run smoothly. Future engagement with the faith based community will occur to assist with additional distribution.

- A Flint City liaison has not been in the EOC but starting Monday this will be in place to keep the Flint Mayor appraised of activities being conducted in the city. She also has been advised she can call me at any time if she needs anything.
- Training has been confirmed for the door-to-door operation scheduled to start Tuesday. Four teams are initially scheduled with more to potentially be put in place. These are the teams that will be handing out water, filter systems/replacement filters, test kits and information. If nobody is home, a door hanger with information is being left. DHHS personnel and one MSP trooper will be on these teams.
    - Training will take place at 1 p.m. on Monday afternoon at the DHHS office on Clio Road. DEQ and DHHS will provide the training.
        - Training is so those going door to door can explain what the filters do, how to install them, if they need install help to call 211 who has a list of people who can install the filters, and answer any other questions versus just handing them the filter.
    - Hours of operation will be Tuesday through Friday from 8:30 a.m. to 5 p.m. AT THIS TIME. I am reevaluating these times to increase contact with someone versus just leaving information.
    - Logistics are being finalized for the teams and trucks to handle stocking and re-stocking of materials during daily operations.
    - GIS maps will provide guidance on deployment locations for these teams and other teams in the field.
- A pilot project at Freeman Elementary with LARA and DEQ has been initiated to see if replacing certain plumbing components in faucets at the school will drop the lead level.

<u>MSP/EMHSD GIS Section Updates</u>

Accomplished Today (January 9):

- Produced a Point of Distribution Map. Contains four types of distribution points; Churches, Water Resource Sites, Filter Distribution Sites, Water Distribution Sites.
- Produced Filter Distribution Map.
- Developed process of how best to handle geocoding the household filter locations, worked on processing the data.
- Worked on map of franchise customers outside of Flint City.
- Produced maps for MDARD on food establishments and Local Health Departments.
- Produced map of Church Filter Distribution map for DTMB.

<u>Local Emergency Operations Center</u>

- The state has deployed 10 personnel to the Genesee County EOC to ensure we have command and control at the local level. On 1/8/15 The state personnel took over the incident management functions of the Genesee County EOC (not public). The arrival of additional staff allowed the local Emergency Management Coordinator to delegate tasks which relieved a tremendous amount of stress.
- Additional Sherriff staff (2-positions) will be shadowing the state incident management team to allow for transition to the county personnel later in the incident when we are comfortable with them handling things. Not sure when that will be but we have secured a direct bill hotel for staff to stay in Flint as long as needed.
- With the additional staff, the Local EOC will be able to take over functions previously handled by the SEOC including:
    - Logistical activities to support church operations.
    - Logistical activities to support fire stations operations.

- Coordinate Donations Management activities and draft donations management plan
- Coordinate Volunteer Management activities
- Identify local storage/staging facilities
- Overall inventory tracking
- Tracking of Points of Distribution (PODs)

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/8/16

SitRep 3 attached.

There is a significant difference in what is being presented by the media and what the local EOC is relaying to us at the SEOC. It is also being driven by the media that this is a state versus local response (who is providing more and quicker versus a coordinated effort between all). That said, I advised SEOC personnel that perception is reality in some eyes and we are to move forward to address items that typically are addressed at the local level. I have ordered the SEOC open all weekend due to make the quick wins that we need and continue to get the coordination and collaboration in place that is needed (but make gains on our own as needed).

Items to Note

- Two FEMA LNO's arrived today and are in the SEOC. A third LNO was requested from FEMA due to some unique issues with this event to include having to deploy more or my staff to the local EOC to get more structure and/or find out why there is an issue with the message the media is showing versus what we are hearing from the local EOC.

- We finally received from the local EOC 8 locations (we were told originally early in the week they had 80-90) that are their Points of Distribution (PODs) for water in conjunction with the local food bank. The PODs are not getting water from the food bank even though the food bank has water. We are going to resolve this issue as we can help deliver the water to the PODs but we were not aware of this. 8 PODs is not enough locations if water needs to be distributed to citizens. Speaking with the ARC Regional Administrator later today, I believe ARC got water to those locations but I need to confirm that in the morning. The food bank reported they had 376 cases of water.

- We have learned that a low number of residents are testing their water when DEQ can test 400 kits per day. This is an added focus that we believe can be increased through dissemination of test kits with the filters and any water.

- I found out the Mayor was okay with using fire stations as distribution points for water, filters, and water test kits. While this did not come to me through the local EOC, I advised we needed to get water, filters, and test kits to these locations for tomorrow. The distribution at 5 Flint Fire Department stations has been coordinated to be in place by 10:00 am tomorrow morning.

    - DTMB has provided a truck and driver to pick up water test kits from DEQ lab in Lansing, water from the Food Bank and water filters and replacement cartridges from GCARD in Genesee County.
    - 10 American Red Cross (ARC) volunteers will meet the DTMB truck at GCARD at 9:00 am to be provided information about filters. Instructions will be included in water test kits. They will

then report to the 5 fire stations to assist in distribution of resources to the public and track addresses of same.
    - Residents will be told where they can drop off their water test kits, or that they can return them to the fire station the next day. Coordination will occur on pick up of water test kits daily to be taken to the Flint City Hall, who will then delivery them to the DEQ testing lab.

- STILL FINALIZING - We have made available 2,000 Filters for distribution on Sunday as parishioners leave mass/services. This will be 200 filters for 10 churches in Flint. While this is a small number of churches, we do not want to waste an opportunity to hand out filters and this seems like a quick way to so. The filters will be put on the DTMB truck on Saturday for delivery to TBD locations for distribution. Logistics remain undetermined as I am still waiting on a list of the churches, pastors/reverends/hours or services/etc. The DTMB truck will be returning to Lansing approximately 11:00 a.m. so we need to finalize this quickly on Saturday. We may utilize ARC to assist with this.

- The Recovery branch is working with the JIC to develop a door hanger card. DTMB is working on the printing portion of the hanger card. Recovery will also be finalizing logistics over the weekend for neighborhood canvasing to occur early next week. 40 volunteers have signed up to attend training on Monday afternoon to complete this task. The mission will be to deliver water sample kits along with water filters/replacement cartridges, and water.

- It appears that 211 has become overloaded. DHHS is researching ways to increase capacity for calls.

- A Volunteer Management Coordinator is in the Genesee County EOC as of today.

- A Donations Management Coordinator has been requested and she will be in the Genesee County EOC Saturday.

- DHHS had a conference call with GM today; they indicated they can provide cash, and supplies, but primarily manpower. No commitments were made at this point. We inquired as to availability of warehouse space and trucks. It was left as GM being a major resource pool that we can tap into as we determine missions. Further conversations will occur, but primarily GM just wanted us to know they are there if needed.

- An additional EMHSD staff member was sent to the Genesee County EOC to act as Operations Section Chief and obtain awareness of the situation there.

- GIS staff met with various parts of Genesee County/Flint personnel to try to get a handle on data available.

- GIS continues to work with local GIS personnel with three GIS staff going to Flint today to work with them. GIS staff is working with U of M on how best to proceed with digitizing water lines for long term recovery.

Chris

UPDATE 1/7/16

A summary of some of today's SEOC activities is provided below. Attached is the following:

- Today's SitRep which contains more information than below.
- The resource request/task assignment sheet for your situational awareness. This is how locals request resources as well as how we track resources and any assignments and/or tasks that are to be completed.
- JIC Task Tracking – for your situational awareness on how we are tracking requests and assignments. Once someone is assigned a task or resource request it allows them to document what work has been or will be done as shown at the bottom of the document.

Items to note:

- I received a document this evening from Genesee County which appears to be damage assessment information. Analysis of this will occur tomorrow. It appears to be infrastructure and costs to fix it and no other impacts.
- I spoke with Jamie Curtis, Genesee County Commissioner, this evening. A very good relationship is in place with him, especially with our District Coordinator (DC). I also have our DC working on developing stronger relationships with the Mayor/Mayor's office.
- GIS staff continue to obtain data and work with County and City personnel to get a picture of where resources have been provided, need to be provided, as well as infrastructure locations (pipes) that could be affected.
- Personnel and agencies have been tasked with developing a plan to get people in the community to deliver information, hand out filters, etc. This would target those areas we are showing minimal or no filter distribution based on the data we are collecting. The plan is to get them in the field by Tuesday and the plan will be provided to me tomorrow.
- Filters can be obtained at the following locations:
  - Michigan Department of Health and Human Services office, 125 E. Union St., Flint, MI 48502
  - Michigan Department of Health and Human Services office, 4809 Clio Road, Flint, MI 48504
  - Genesee County Community Action Resource Department office, 2727 Lippincott, Flint, MI 48507
  - Genesee County Community Action Resource Department office, 601 N. Saginaw, Flint, MI 48502
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).
- Began work to schedule legislative/congressional conference calls. Tentatively scheduled for 2 p.m. Friday.
- JIC continued to develop messaging.
- Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed two EMHSD/SEOC liaisons to assist the local EOC.
- Published the Incident Action Plan and continued assignment of objectives/tasks.
- FEMA Liaison Officers just arrived in Lansing to assist command and general staff.
- I spoke with Harvey a few times and he should have talking points later tonight or tomorrow a.m. for his use and also for others who may speak to media outside of state government who may benefit from our messaging.
- We held a media round table at 1 P.M. at the SEOC. Dr. Wells and I spoke and answered questions to numerous media outlets.
- Local agencies and NGOs continue to provide water and filters to citizens.
- The website, www.michigan.gov/flintwater, was update with information and links to assistance to include 211. Additional recommendations were provided to include information on the testing water in homes.

EMHSD GIS:

Accomplished Today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Chris

UPDATE 1/6/16

A summary of today's SEOC activities is provided below. I tried to distill this as best I could but there has been a lot of activity and discussion to get an accurate assessment of the situation. Attached is the final *draft of objectives and tactics for the operational period and agency situation report (SitRep) which has* more SEOC agency information. I have implemented weekly operational periods.

Advise if you want anyone else copied or off this distribution.

Daily Update

- Set goals for SEOC and identified response/recovery emphasis
- Requested FEMA liaison officers (LNO) from FEMA Region V. Two LNOs will be on site by ~3 p.m. 1/7/16. Both are known contacts to me and some staff and one has worked extensively with me during the SE MI flooding in a command and control position. These personnel have been specifically tasked with this mission. **THEY ARE NOT HERE TO ASSIST WITH A PRESIDENTIAL DECLARATION REQUEST BUT TO ASSIST ME.**
- PIOs from multiple agencies were here and established the Joint Information Center (JIC). News released pushed out on this. I am very happy with the PIO work and movement toward coordinated messaging.
- Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts to ensure situational awareness and to develop a common operating picture.
    - I opened the briefing by identifying our initial goals, items to think about while subject matter experts were briefing us, and how we are to move forward, find quick wins, and regain trust.
    - **MDHHS – Elevated Blood Lead Levels**

        - Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.
    - **MDEQ – Water Testing Protocols**
        - Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.
- Developed Incident objectives, strategy and tactics (see attached)
- Identified SEOC and state agency staff positions
- Assigned work tasks for SEOC operation period from 0800 January 6, 2016 to 1700 January 8, 2016
- Reviewed planned actions, prepared final draft Incident Action Plan
- **Made contact with the Genesee County Emergency Manager first thing in the morning and held a conference call mid-day to discuss roles. Daily 0830 command conference calls with local EOC command staff starts tomorrow. Tomorrows call will include the County Commissioner and the City Administrator (both invited). Topics include the incident action plan objectives and establishing better local coordination, command and control to facilitate integration with the SEOC. The local EOC is not functioning as it needs to with personnel and local coordination and we are working on that issue.**
- I will be in Flint tomorrow for a 2 p.m. media round table with local officials that was set up by the JIC.
- The attached initial objectives will be updated at least every operational period and as needed. I listed the objectives below but the tactics to accomplish them is in the attached if you want further information.
    1. Activate the State Recovery Task Force (SRTF).
    2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
    3. Obtain and maintain situational awareness and common operating picture of all activities.
    4. Establish SEOC operational period and hours of operations.
    5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
    6. Develop a comprehensive GIS strategy.
    7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
    8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
    9. Provide technical assistance to the local Damage Assessment process.
    10. Establish a Joint Information Center (JIC) and develop a public information strategy.
    11. Monitor MI CIMS for resource requests and address as appropriate.
    12. Establish and disseminate cost center information for the incident.
- Additional tasks include:
    - Determine what federal agencies are already involved and their status
    - Identify potential water supplies
    - Determine where affected homes are located, where filters/pitchers (and replacements) were installed/provided, and determine who needs filters, etc.
    - Determine how filter distribution is handled, and if it can be handled more efficiently and effectively
    - Determine what mechanisms are in place for nutrition supplementation

EMHSD GIS Accomplishments:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC

- Established a daily call with county and city GIS personnel to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
    - Water Pipeline Locations
    - Filter Distribution Locations
    - November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
    - Affected School Locations
    - Predictive analysis of blood lead levels for affected area
    - Updated Parcels
    - Demographics
    - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to obtain the data

Cc: Baird, Richard (GOV); Hollins, Harvey (GOV)
Subject: Update - Genesee County Declaration

Below are some key points for your situational awareness (FYSA) that have taken place or will take place within the next 15 hours.

- I was on the phone with Sean Kammer, Assistant to the Flint City Administrator, when the declaration hit the news so I advised him immediately. He was going to let the City Administrator know.
- I contacted MSP Lt. Roach, 3rd District Coordinator, who was at the Genesee County EOC and advised her to let the County EM know the declaration status.
- State Emergency Management Coordinators (SEMCs) were notified via our notification system with additional information in an email.
    - This included information on the SEOC activation and a 0900 briefing for SEMCs.
    - Some subject matter experts will provide us an update to establish a common operating picture.
- We have been in contact with FEMA Region V watch desk ... they will be on the call tomorrow and continue to monitor the situation.
- I have been in contact with the FEMA Region V Administrator to keep him updated.
- Operational period for the SEOC will be M-F, 0800 to 1700 at this time.
- Situation Reports (SitReps) will be provided in the evenings.
- An Incident Action Plan will be developed tomorrow.

Call me with any concerns or questions.

Chris

Another request, because I want to route this press release for approval tonight – but not for dissemination – are you able to share with me the talking point the Gov will use for further increasing the National Guard? I want to make sure we are saying what he is saying.

Again, we will not use or disseminate this information until 8:30 a.m. tomorrow.

If there are any other important Flint Water related pieces that the JIC should be talking about tomorrow following the speech, please let me know. I have seen an email from Tori regarding a new website?

I was also told from Nicole that we are supposed arrange a local television interview tomorrow morning through Friday morning to discuss ground activity. Since we are not issuing this information until 8:30 a.m. today, I am wondering if it is okay to hold off on tomorrow's interview and start them on Thursday? Please advise.

Thank you,
Shanon

Subject: RE: Nightly numbers on hold

Meegan,

I understand the concern, but my concern is the JIC will need new information for the media tomorrow. I don't think we can keep giving them old info, especially because we are making significant progress.

We can stress this info is updated. Will that work?

Shanon –
Two options:

- If you go with a release and push the button at 8:30 a.m., could you indicate in the release something to the effect that these are updated numbers are just in – to make clear that these are updates since the Governor's speech? I just remember FEMA Dan talking about how we don't want to get nailed for not having our numbers straight.
- Cancel this release all together. Just put the next one out on Wednesday night. What do you think? I actually favor this action.

Subject: RE: Nightly numbers on hold

Yes please. That way when the Gov says tonight "more than 21,000" homes visited, your new # won't hit the media market so we won't get questions about why the JIC is reporting one # and we are reporting another.

Thank you Shanon!

Importance: High

Hi Meegan and Anna,

I just spoke with Nicole Lisabeth and I want to confirm that the JIC is to hold the nightly water activity numbers news release tonight and issue it tomorrow morning. We can push it out at 8:30 a.m. tomorrow. Will this be fine?

Thank you,
Shanon

Flint Water Emergency Response
Talking Points for Capt. Chris Kelenske
Meeting with Appropriations

NOT INTENDED TO BE DISSEMINATED TO THE MEDIA OR PUBLIC IN THIS FORMAT

Chronology

- October 1, 2015: Public Health Emergency Declaration issued
- December 14, 2015: State of Emergency declared by City of Flint.
- January 4, 2016: Genesee County Board of Commissioners declared a local emergency
    - Genesee County also requested a Governor's Declaration of Emergency with the local declaration.
- January 5, 2015: Governor declared State of Emergency
    - State Emergency Operations Center activated in Lansing to coordinate state response
    - Joint Information Center (JIC) activated on January 6, 2016 in Lansing; moved to Flint on January 11, 2016
- January 9, 2016: Water resource sites established at fire stations. 9 a.m. to 4 p.m. on January 9, 2016 but 9 a.m. – 9 p.m. starting January 10, 2016.
- January 12, 2016: Water resource teams began going door-to-door (4 teams)
- January 12, 2016: Governor Snyder issued an Executive Order activating the Michigan National Guard
- January 14, 2016: Governor requested Presidential declaration of emergency and expedited major disaster for Genesee County
- January 16, 2016: President Obama approved the Governor's request for a federal emergency in Flint.
    - Denied request for major disaster

Federal Support

- President Obama's approval of a federal emergency in Flint provides emergency relief in the form of bottled water, water filters, filter replacements, and water test kits. The period of assistance is up to 90 days.

- In addition, the state is working with the Federal Emergency Management Agency (FEMA) to coordinate an interagency recovery plan with other federal agencies to provide resources to Flint.

    - Coordination will include identifying federal agencies that have programs, authorities and/or technical expertise that could be utilized in the ongoing response and recovery efforts in Flint to be made available. Such federal agencies may include the Department of Health and Human Services, Environmental Protection Agency, Department of Housing and Urban Development, and Army Corps of Engineers.

Current Status/Update

- We are continuing to bring all state resources to bear to protect public health and safety.

- One of our most important messages and priorities continues to be making sure residents are aware of the information and free resources available to them, which include bottled water, water filters, replacement cartridges, water test kits.

- The one-stop shop for finding all these resources is by visiting www.michigan.gov/FlintWater or calling 2-1-1.

- To date, more than 21,300 homes have been visited by water response teams who are going door-to-door to distribute free bottled water, filters, replacement cartridges, and water testing kits.

    - Water response teams are a collaborative effort comprised of city, county, state personnel, American Red Cross personnel, and volunteers.

- The Michigan National Guard has been activated to assist with distribution efforts at the five water resource sites at fire stations in the city.
    - There are approximately 70 National Guard members handing out water resources at the fire stations in the city.

- Since January 9, the following resources have been distributed to residents, both at the water resource sites and by the water response teams:

    - More than 37,300 cases of water
    - More than 53,700 water filters
    - More than 7,300 water testing kits

- To help enhance the water testing process, Flint residents can now drop-off water samples to the five water resource sites at fire stations. Samples will only

be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

- Water resource sites are open daily from 9 a.m. to 9 p.m. and are located at:

  Fire Station #1
  310 East 5th St.
  Flint, MI 48502

  Fire Station #3
  1525 Martin Luther King Ave.
  Flint, MI 48503

  Fire Station #5
  3402 Western Road
  Flint, MI 48506

  Fire Station #6
  716 West Pierson Road
  Flint, MI 48505

  Fire Station #8
  202 East Atherton Road
  Flint, MI 48507

Filters

- When used properly water filters remove 99% of lead in water.

- Residents are urged to use filtered water for drinking, food preparation, brushing teeth and watering pets. Unfiltered water may be used for bathing and cleaning.

- One filter and one replacement cartridge are being provided per household initially. Each filter is good for approximately 100 gallons of water. The filter has an indicator on it that will turn from green to red when it needs to be replaced.

- The filters have a two to five-year, non-replaceable battery that operates the indicator light.

- There is a detailed video posted on www.michigan.gov/flintwater that explains how to properly install a water filter cartridge. An instruction sheet also has been provided to 2-1-1 to share with those individuals without internet access.

Resources for homebound individuals

- 2-1-1 is collecting a list of limited mobility or homebound individuals needing home delivery of water resources and is providing that information to the Genesee County Sheriff's Department, who is making these deliveries.

- The Plumbers and Pipefitters Union has agreed to provide free water filter installation to homebound residents needing assistance. This is also being coordinated through 2-1-1.

Outside Support Efforts – Volunteers and Donations

- There has been great cooperation on the ground in Flint by many local agencies, from the city and county to churches and public, private, and non-profit groups to help with this effort.

- The American Red Cross, United Way, 2-1-1, and many other organizations have assisted with water resource distribution efforts and the donations management process.

- The American Red Cross has established a volunteer reception center for those wishing to assist with ongoing efforts to distribute water, water filters, replacement cartridges and water test kits.
    - The Volunteer Reception Center is located at the Red Cross office at 1401 S. Grand Traverse St. in Flint.
    - This week, the Volunteer Reception Center hours are:
        - Monday - Friday, 9 a.m. to 7 p.m.
        - Saturday, 9 a.m. to 2 p.m.
        - Sunday, 12 p.m. to 5 p.m.

National Guard Mobilization

- Governor Snyder issued an Executive Order on January 12, 2016, to activate the Michigan National Guard.
    - Currently they are being used to staff water resource sites to support the distribution of bottled watered, water filters, replacement cartridges, and water testing kits.
    - National Guard is uniquely prepared and trained to respond quickly in emergency situations.
    - The first group of National Guard personnel arrived in Flint on January 13 to conduct assessment and get acclimated (seven personnel).
    - 30 more personnel arrived on January 15 and additional soldiers were added on January 18, bringing the current commitment to approximately 70 soldiers.

- This is the second time the Governor has activated the National Guard.
  - Last time was for the Duck Lake Fire in Luce County in May 2012.
- Per the Michigan Emergency Management Plan, the Michigan State Police Director or designee is responsible for coordinating all state efforts, including the Michigan National Guard.
- Activation of the Michigan National Guard allows the volunteers from the American Red Cross, who have been staffing the water resource sites, to join the water distribution teams.

Water Bills

- The City of Flint is responsible for issuing water shut-off notices for non-payment. Per the Mayor, the city has put a halt on all notices or disconnections. Shut off notices have not been mailed since the beginning of December.

- Water payment inquiries should be referred to the City of Flint.

Commodities

- As of 1/19/16, 5 pm (start date was Tuesday, 1/12/16)

1. 21,393 homes visited by the FWRTs to date.

2. Distributed:
   a. Number of cases of water 87,313
   b. Filters 53,713
   c. Filter cartridges 169,520
   d. Test kits 7,379

3. Total number of customers on the Flint water system
   a. 29,944 paying customers
   b. 45,000 hookups (This is our high end target #)
   c. 69,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
   a. Cases of water 82,992 (additional 16,056 donated)
   b. Filters 115,700
   c. Filter cartridges 243,200
   d. Test kits 61,161

5. Teams going out tomorrow:
   a. 5-6 State (6-9 personnel) type 3 teams - Goal tomorrow 300 homes per team
   b. 10 ARC (2-4 personnel) type 5 teams - Goal tomorrow 100 homes per team

- How was the amount of water in the supplemental determined:
  - 100,000 (population) X 2 gallons per day per person X 30 days X $1.25 gallon = $7.5 million.
- Burn Rates
  - Faucet Filters – 4,073
  - Water – 14,781
  - Replacement Filters – 2,430
  - Test Kits – 2,253

Flint Water Emergency Response
General Talking Points

NOT INTENDED TO BE DISSEMINATED TO THE MEDIA OR PUBLIC IN THIS FORMAT

Background

- On January 16, President Obama approved Governor Snyder's request for a federal emergency in Flint. This action will provide emergency relief in the form of bottled water, water filters, filter replacements, and water test kits. The period of assistance is up to 90 days.
    - Governor Snyder had also requested a major disaster declaration, which the President denied based on the legal requirement that under the Stafford Act disaster relief is available only for natural events, fires, floods, or explosions. The state is reviewing the process for appealing the disaster declaration denial.
- The State Emergency Operations Center in Lansing has been activated since January 5 and continues to be staffed seven days a week by members of state agencies and other partners to coordinate the state's response.

Current Status/Update

- The state continues to bring all state resources to bear to protect public health and safety. One of our most important messages and priorities continues to be making sure residents are aware of the information and free resources available to them, which include bottled water, water filters, replacement cartridges, water test kits.
- The one-stop shop for finding all these resources is by visiting www.michigan.gov/FlintWater or calling 2-1-1.
- Including today's anticipated activity, water response teams, who are going door-to-door, have distributed resources to nearly 7,000 Flint homes providing residents with free bottled water, filters, replacement cartridges, and water testing kits.

- More than 12,000 homes have been visited by the water response teams, which are a collaborative effort comprised of local and state personnel, American Red Cross personnel, and volunteers.

- The Michigan National Guard has been activated to assist with distribution efforts at the five water resource sites at fire stations in the city. Starting tomorrow, the number of National Guard members will be further increased to approximately 70 National Guard members handing out resources at the fire stations in the city.

- From January 9 - 16, the following resources have been distributed to residents, both at the water resource sites and by the water response teams:

    - Nearly 20,900 cases of water
    - Nearly 48,000 water filters
    - More than 3,300 water testing kits

- To help enhance the water testing process, Flint residents can now drop-off water samples to the five water resource sites at fire stations. Samples will only be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

- Water resource sites are open daily from 9 a.m. to 9 p.m. and are located at:

    Fire Station #1
    310 East 5th St.
    Flint, MI 48502

    Fire Station #3
    1525 Martin Luther King Ave.
    Flint, MI 48503

    Fire Station #5
    3402 Western Road
    Flint, MI 48506

    Fire Station #6
    716 West Pierson Road
    Flint, MI 48505

    Fire Station #8
    202 East Atherton Road
    Flint, MI 48507

Filters

- When used properly water filters remove 99% of lead in water. Residents are urged to use filtered water for drinking, food preparation, brushing teeth, and watering pets. Unfiltered water may be used for bathing and cleaning.

- One filter and one replacement cartridge are being provided per household initially. Each filter is good for approximately 100 gallons of water. The filter has an indicator on it that will turn from green to red when it needs to be replaced.

- The filters do have a five-year, non-replaceable battery that operates the indicator light.

- There is a detailed video posted on www.michigan.gov/flintwater that explains how to properly install a water filter cartridge.

Resources for homebound individuals
